# **CHAPTER 1**

# **Accounting in Action**

# **ASSIGNMENT CLASSIFICATION TABLE**

			Brief			
Lea	rning Objectives	Questions	Exercises	Do It!	Exercises	Problems
1.	Identify the activities and users associated with accounting.	1, 2, 3, 4, 5		1	1, 2	
2.	Explain the building blocks of accounting: ethics, principles, and assumptions.	6, 7, 8, 9, 10		2	3	
3.	State the accounting equation, and define its components.	11, 12, 13, 22	1, 2, 3, 4, 5, 6	3	5	1
4.	Analyze the effects of business transactions on the accounting equation.	14, 15, 16, 18	7, 8, 9	4	6, 7, 8	1, 2, 4, 5
5.	Describe the four financial statements and how they are prepared.	17, 19, 20, 21	10, 11	5	9, 10, 11, 12, 13, 14, 15, 16, 17, 18	2, 3, 4, 5

# **ASSIGNMENT CHARACTERISTICS TABLE**

Problem Number	Description	Difficulty Level	Time Allotted (min.)
1	Analyze transactions and compute net income.	Moderate	40–50
2	Analyze transactions and prepare income statement, owner's equity statement, and statement of financial position.	Moderate	50–60
3	Prepare income statement, owner's equity statement, and statement of financial position.	Moderate	50–60
4	Analyze transactions and prepare financial statements.	Moderate	40–50
5	Determine financial statement amounts and prepare owner's equity statement.	Moderate	40–50

# **ANSWERS TO QUESTIONS**

- 1. Yes, this is correct. Virtually every organization and person in our society uses accounting information. Businesses, investors, creditors, government agencies, and not-for-profit organizations must use accounting information to operate effectively.
- 2. Accounting is the process of identifying, recording, and communicating the economic events of an organization to interested users of the information. The first step of the accounting process is therefore to identify economic events that are relevant to a particular business. Once identified and measured, the events are recorded to provide a history of the financial activities of the organization. Recording consists of keeping a chronological diary of these measured events in an orderly and systematic manner. The information is communicated through the preparation and distribution of accounting reports, the most common of which are called financial statements. A vital element in the communication process is the accountant's ability and responsibility to analyze and interpret the reported information.
- **3.** (a) Internal users are those who plan, organize, and run the business and therefore are officers and other decision makers.
  - (b) To assist management, managerial accounting provides internal reports. Examples include financial comparisons of operating alternatives, projections of income from new sales campaigns, and forecasts of cash needs for the next year.
- **4.** (a) Investors (owners) use accounting information to make decisions to buy, hold, or sell ownership shares of a company.
  - (b) Creditors use accounting information to evaluate the risks of granting credit or lending money.
- **5.** No, this is incorrect. Bookkeeping usually involves only the recording of economic events and therefore is just one part of the entire accounting process. Accounting, on the other hand, involves the entire process of identifying, recording, and communicating economic events.
- 6. Benton Travel Agency should report the land at €90,000 on its December 31, 2020 statement of financial position. This is true not only at the time the land is purchased, but also over the time the land is held. In determining which measurement principle to use (cost or fair value) companies weigh the factual nature of cost figures versus the relevance of fair value. In general, companies use cost. Only in situations where assets are actively traded do companies apply the fair value principle. An important concept that accountants follow is the historical cost principle.
- 7. The monetary unit assumption requires that only transaction data that can be expressed in terms of money be included in the accounting records. This assumption enables accounting to quantify (measure) economic events.
- **8.** The economic entity assumption requires that the activities of the entity be kept separate and distinct from the activities of its owners and all other economic entities.
- **9.** The three basic forms of business organizations are: (1) proprietorship, (2) partnership, and (3) corporation.

#### Questions Chapter 1 (Continued)

- **10.** One of the advantages Neha Singh would enjoy is that ownership of a corporation is represented by transferable shares. This would allow Neha to raise money easily by selling a part of her ownership in the company. Another advantage is that because holders of the shares (shareholders) enjoy limited liability; they are not personally liable for the debts of the corporate entity. Also, because ownership can be transferred without dissolving the corporation, the corporation enjoys an unlimited life.
- **11.** The basic accounting equation is Assets = Liabilities + Owner's Equity.
- **12.** (a) Assets are resources owned by a business. Liabilities are claims against assets. Put more simply, liabilities are existing debts and obligations. Owner's equity is the ownership claim on total assets.
  - (b) Owner's equity is affected by owner's investments, drawings, revenues, and expenses.
- **13.** The liabilities are: (b) Accounts payable and (g) Salaries and wages payable.
- 14. Yes, a business can enter into a transaction in which only the left side of the accounting equation is affected. An example would be a transaction where an increase in one asset is offset by a decrease in another asset. An increase in the Equipment account which is offset by a decrease in the Cash account is a specific example.
- **15.** Business transactions are the economic events of the enterprise recorded by accountants because they affect the basic accounting equation.
  - (a) The death of the owner of the company is not a business transaction as it does not affect the basic accounting equation.
  - (b) Supplies purchased on account is a business transaction as it affects the basic accounting equation.
  - (c) An employee being fired is not a business transaction as it does not affect the basic accounting equation.
  - (d) A withdrawal of cash from the business is a business transaction as it affects the basic accounting equation.
- **16.** (a) Decrease assets and decrease owner's equity.
  - (b) Increase assets and decrease assets.
  - (c) Increase assets and increase owner's equity.
  - (d) Decrease assets and decrease liabilities.
- **17.** (a) Income statement.

(c) Income statement.

- (b) Statement of financial position.
- (d) Statement of financial position.
- (e) Statement of financial position and owner's equity statement.
  - (f) Statement of financial position.
- 18. No, this treatment is not proper. While the transaction does involve a receipt of cash, it does not represent revenues. Revenues are the gross increase in owner's equity resulting from business activities entered into for the purpose of earning income. This transaction is simply an additional investment made by the owner in the business.

#### Questions Chapter 1 (Continued)

**19.** Yes. Net income does appear on the income statement—it is the result of subtracting expenses from revenues. In addition, net income appears in the owner's equity statement—it is shown as an addition to the beginning-of-period capital. Indirectly, the net income of a company is also included in the statement of financial position. It is included in the capital account which appears in the owner's equity section of the statement of financial position.

20.	(a)	Ending capital balance Beginning capital balance Net income	£189,000 <u>186,000</u> <u>£ 3,000</u>
	(b)	Ending capital balance Beginning capital balance	£189,000 <u>186,000</u> 3,000
		Deduct: Investment Net loss	<u>13,000</u> <u>£ 10,000</u>
21.	(a)	Total revenues (£20,000 + £70,000)	£90,000
	(b)	Total expenses (£26,000 + £40,000)	£66,000
	(c)	Total revenues Total expenses Net income	£90,000 <u>66,000</u> <u>£24,000</u>

**22.** TSMC's accounting equation at December 31, 2016 was NT\$1,886,455,302 = NT\$496,404,176 + NT\$1,390,051,126.

# SOLUTIONS TO BRIEF EXERCISES

## **BRIEF EXERCISE 1.1**

- (a)  $\pm 90,000 \pm 50,000 = \pm 40,000$  (Owner's Equity).
- (b) ¥44,000 + ¥70,000 = ¥114,000 (Assets).
- (c) ¥94,000 ¥53,000 = ¥41,000 (Liabilities).

## **BRIEF EXERCISE 1.2**

- (a)  $\pounds 120,000 + \pounds 230,000 = \pounds 350,000$  (Total assets).
- (b)  $\pounds 190,000 \pounds 89,000 = \pounds 101,000$  (Total liabilities).
- (c)  $\pounds 900,000 0.5(\pounds 900,000) = \pounds 450,000$  (Owner's equity).

**BRIEF EXERCISE 1.3** 

- (€800,000 + €150,000) (€300,000 €60,000) = €710,000
   (Owner's equity).
- (€300,000 + €100,000) + (€800,000 €300,000 €70,000) = €830,000 (Assets).
- (c) (€800,000 €80,000) (€800,000 €300,000 + €120,000) = €100,000 (Liabilities).

							Owner's	s Ec	quity

# SOLUTIONS FOR DO IT! EXERCISES

# DO IT! 1.1

- 1. False. The three steps in the accounting process are identification, recording, and communication.
- 2. True.
- 3. False. Financial accounting provides reports to help investors and creditors evaluate a company.
- 4. True.
- 5. True.

DO IT! 1.2

- 1. False. IFRS are issued by the IASB.
- 2. False. The standards of conduct by which actions are judged as right or wrong, honest or dishonest, fair or not fair, are ethics.
- 3. False. The primary accounting standard-setting body in the United States is the Financial Accounting Standards Board (FASB).
- 4. True.
- 5. True.

DO IT! 1.3

- 1. Drawings is owner's drawings (D); it decreases owner's equity.
- 2. Rent Revenue is revenue (R); it increases owner's equity.
- 3. Advertising Expense is an expense (E); it decreases owner's equity.
- 4. When the owner puts personal assets into the business, it is investment by owner (I); it increases owner's equity.

DO IT! 1.4

As	Assets = Liabilities			Owner'	s Equity	
Cash+	Accounts Receivable	Accounts = Payable +	Owner's Capital	Owner's – Drawings	+ Revenues – Expenses	
(1)	+ R20,000				+R20,000	
(2) +R20,000	– R20,000					
(3)		+ R3,200			–R3,200	
(4) – R 2,500				-R2,500		

DO IT! 1.5

- (a) The total assets are HK\$49,000, comprised of Cash HK\$6,500, Accounts Receivable HK\$13,500, and Equipment HK\$29,000.
- (b) Net income is HK\$20,500, computed as follows:

Revenues		
Service revenue		HK\$53,500
Expenses		
Salaries and wages expense	HK\$16,500	
Rent expense	10,500	
Advertising expense	6,000	
Total expenses		33,000
Net income		<u>HK\$20,500</u>

(c) The ending owner's equity balance of Tsui Repairs is HK\$21,000. By rewriting the accounting equation, we can compute Owner's Equity as Assets minus Liabilities, as follows:

Total assets [as computed in (a)]		HK\$49,000
Less: Liabilities		
Notes payable	HK\$25,000	
Accounts payable	3,000	28,000
Owner's equity		<u>HK\$21,000</u>

Note that it is not possible to determine the company's owner's equity in any other way, because the beginning balance for owner's equity is not provided.

# SOLUTIONS TO EXERCISES

# EXERCISE 1.1

- <u>C</u> Analyzing and interpreting information.
- **R** Classifying economic events.
- **C** Explaining uses, meaning, and limitations of data.
- **R** Keeping a systematic chronological diary of events.
- <u>R</u> Measuring events in dollars and cents.
- **C** Preparing accounting reports.
- **C** Reporting information in a standard format.
- **I** Selecting economic activities relevant to the company.
- **R** Summarizing economic events.

# EXERCISE 1.2

(a) Internal users Marketing manager Production supervisor Store manager Vice-president of finance

# External users

- Customers Financial regulators Labor unions Suppliers Tax authorities
- (b) <u>I</u> Can we afford to give our employees a pay raise?
  - **E** Did the company earn a satisfactory income?
  - I Do we need to borrow in the near future?
  - **E** How does the company's profitability compare to other companies?
  - I What does it cost us to manufacture each unit produced?
  - I Which product should we emphasize?
  - E Will the company be able to pay its short-term debts?

# EXERCISE 1.3

Angela Manternach, president of Manternach Designs, instructed Carla Ruden, the head of the accounting department, to report the company's land in its accounting reports at its fair value of  $\leq 170,000$  instead of its cost of  $\leq 100,000$ , in an effort to make the company appear to be a better investment. The historical cost principle requires that assets be recorded and reported at their cost, because cost is faithfully representative and can be objectively measured and verified. In this case, the historical cost principle should be used and Land reported at  $\leq 100,000$ , not  $\leq 170,000$ .

The stakeholders include owners and creditors of Manternach Company, potential owners and creditors, other users of Manternach's accounting reports, Angela, and Carla. All users of Manternach's accounting reports could be harmed by relying on information that may be unreliable. Angela Manternach could benefit if the company is able to attract more investors, but would be harmed if the inappropriate reporting is discovered. Similarly, Carla could benefit by pleasing her boss, but would be harmed if the inappropriate reporting is discovered.

Carla's alternatives are to report the land at  $\leq 100,000$  or to report it at  $\leq 170,000$ . Reporting the land at  $\leq 170,000$  is not appropriate since it may mislead many people who rely on Manternach's accounting reports to make financial decisions. Carla should report the land at its cost of  $\leq 100,000$ . She should try to convince Angela Manternach that this is the appropriate course of action, but be prepared to resign her position if Manternach insists.

# **EXERCISE 1.4**

- 1. Incorrect. The historical cost principle requires that assets (such as buildings) be recorded and reported at their cost.
- 2. Correct. The monetary unit assumption requires that companies include in the accounting records only transaction data that can be expressed in terms of money.
- 3. Incorrect. The economic entity assumption requires that the activities of the entity be kept separate and distinct from the activities of its owner and all other economic entities.

# **EXERCISE 1.5**

(c) The sequence of preparing financial statements is income statement, owner's equity statement, and statement of financial position. The interrelationship of the owner's equity statement to the other financial statements results from the fact that net income from the income statement is reported in the owner's equity statement and ending capital reported in the owner's equity statement is the amount reported for owner's equity on the statement of financial position.

# CT 1.1 FINANCIAL REPORTING PROBLEM

- (a) TSMC's total assets at December 31, 2016 were NT\$ 1,886,455,302 and at December 31, 2015 were NT\$ 1,657,518,298 million.
- (b) TSMC had NT\$ 541,253,833 of cash and cash equivalents at December 31, 2016.
- (c) TSMC had accounts payable totaling NT\$ 26,062,351 on December 31, 2016 and NT\$ 18,575,286 on December 31, 2015.
- (d) TSMC reports revenues for 2015 of NT\$ 947,938,344 and for 2016 of NT\$ 843,497,368 million.
- (e) From 2015 to 2016, TSMC's net income increased NT\$ 27,782,069 from NT\$ 306,556,167 to NT\$ 334,338,236.

- (a) The four skill sets are: Strong leadership, Communication skills, Tech know-how, and Business savvy.
- (b) These skill sets are useful for the following reasons:

Strong leadership: Being a good leader is a major plus in the business world. After all, strong leadership is critical to the success of any organization, whether it is a football team, movie production company, international accounting firm or locally owned restaurant.

Communication skills: In business and accounting there's demand for employees who don't just have technical skills, but strong people skills too. Speaking and listening abilities go a long way in a business career.

Tech know-how: Nearly every industry is computerized in some way, and computers are probably second nature to you. As a CPA, you'll need to know about existing and emerging technologies in business environments and understand how to use them effectively.

Business savvy: Being business savvy means mastering your creative problem-solving skills. You should know how to examine information, interpret it and find creative solutions. Innovative answers are what will get you respect in the business world – and so will responsibility, ethics and honesty.

# CT 1.4 DECISION–MAKING ACROSS THE ORGANIZATION

- (a) The estimate of the £6,100 loss was based on the difference between the £25,000 invested in the driving range and the bank balance of £18,900 at March 31. This is not a valid basis for determining income because it only shows the change in cash between two points in time.
- (b) The statement of financial position at March 31 is as follows:

March 31, 2020	
Assets	
Building	£ 8,000
Equipment	800
Cash	18,900
Total assets	£27,700
Owner's Equity and Liabilities	
Owner's Equity	
Owner's capital (£25,000 + £2,480)	£27,480
Liabilities	·
Accounts payable (£120 + £100)	220
Total owner's equity and liabilities	£27,700

## CHIP-SHOT DRIVING RANGE. Statement of Financial Position March 31, 2020

As shown in the statement of financial position, the owner's equity at March 31 is £27,480. The estimate of £2,480 of net income is the difference between the initial investment of £25,000 and £27,480. This was not a valid basis for determining net income because changes in owner's equity between two points in time may have been caused by factors unrelated to net income. For example, there may be drawings and/or additional capital investments by the owner.

# CT 1.4 (Continued)

(c) Actual net income for March can be determined by adding withdrawals to the change in equity during the month as shown below:

Equity, March 31, per statement of financial position	£27,480
Equity, March 1	(25,000)
Increase in equity	2,480
Add: Withdrawals	<u>1,000</u>
Net income	<u>£ 3,480</u>

Alternatively, net income can be found by determining the revenues earned [described in (d) below] and subtracting expenses.

(d) Revenues earned can be determined by adding expenses incurred during the month to net income. March expenses were Rent, £1,000; Salaries and Wages, £500; Advertising, £750; and Utilities, £120 for a total of £2,370. Revenues earned, therefore, were £5,850 (£2,370 +  $\pm$ 3,480). Alternatively, since all revenues are received in cash, revenues earned can be computed from an analysis of the changes in cash as follows:

Beginning cash balance		£25,000
Less: Cash payments		
Caddy shack	£8,000	
Golf balls and clubs	800	
Rent	1,000	
Advertising	650	
Salaries and wages		
Withdrawals	<u>1,000</u>	<u>11,950</u>
Cash balance before revenues		13,050
Cash balance, March 31		18,900
Revenues earned		<u>£ 5,850</u>

To: Erin Danielle From: Student

I have received the statement of financial position of Liverpool Ltd. as of December 31, 2020. A number of items in this statement of financial position are not properly reported. They are:

- 1. The statement of financial position should be dated as of a specific date, not for a period of time. Therefore, it should be dated "December 31, 2020."
- 2. Cash should be reported after Supplies on the statement of financial position.
- 3. Accounts receivable should be shown as an asset, not a liability, and reported between Cash and Supplies on the statement of financial position.
- 4. Accounts payable should be shown as a liability, not an asset. The note payable is also a liability and should be reported in the liability section.
- 5. Liabilities <u>and</u> owner's equity should be shown on the statement of financial position. Owner's capital and Owner's drawings are not liabilities.
- 6. Owner's capital and Owner's drawings are part of owner's equity. The drawings account is not reported on the statement of financial position but is subtracted from Owner's capital to determine Owner's equity at the end of the period.

# CT 1.5 (Continued)

# A correct statement of financial position is as follows:

LIVERPOOL LTD.
<b>Statement of Financial Position</b>
December 31, 2020

Assets

Total assets	<u>\$42,500</u>
Owner's Equity and Liabilities	
Owner's Equity Owner's capital Liabilities	\$24,000

Notes payable	\$10,500	
Accounts payable	\$ 8,000	
Total liabilities		18,500
Total owner's equity and liabilities		\$42,500

CT 1.6

- (a) Answers to the following will vary depending on students' opinions.
  - (1) This does not represent the hiding of assets, but rather a choice as to the order of use of assets. This would seem to be ethical.
  - (2) This does not represent the hiding of assets, but rather is a change in the nature of assets. Since the expenditure was necessary, although perhaps accelerated, it would seem to be ethical.
  - (3) This represents an intentional attempt to deceive the financial aid office. It would therefore appear to be both unethical and potentially illegal.
  - (4) This is a difficult issue. By taking the leave, actual net income would be reduced. The form asks the applicant to report actual net income. However, it is potentially deceptive since you do not intend on taking unpaid absences in the future, thus future income would be higher than reported income.
- (b) Companies might want to overstate net income in order to potentially increase the stock price by improving investors' perceptions of the company. Also, a higher net income would make it easier to receive debt financing. Finally, managers would want a higher net income to increase the size of their bonuses.
- (c) Sometimes companies want to report a lower income if they are negotiating with employees. For example, professional sports teams frequently argue that they can not increase salaries because they aren't making enough money. This also occurs in negotiations with unions. For tax accounting (as opposed to the financial accounting in this course) companies frequently try to minimize the amount of reported taxable income.
- (d) Unfortunately many times people who are otherwise very ethical will make unethical decisions regarding financial reporting. They might be driven to do this because of greed. Frequently it is because their superiors have put pressure on them to take an unethical action, and they are afraid to not follow directions because they might lose their job. Also, in some instances top managers will tell subordinates that they should be a team player, and do the action because it would help the company, and therefore would help fellow employees.

# CT 1.7 CONSIDERING PEOPLE, PLANET, AND PROFIT

The 5 aspirations of the company are related to sustaining (1) its business, (2) its brands, (3) its people, (4) its communities, and (5) the planet.

## **GAAP 1.1**

The International Accounting Standards Board, IASB, and the Financial Accounting Standards Board, FASB, are two key players in developing international accounting standards. The IASB releases international standards known as International Financial Reporting Standards (IFRS). The FASB releases U.S. standards, referred to as Generally Accepted Accounting Principles or GAAP.

GAAP 1.2

Accounting standards have developed in different ways because the standard setters have responded to different user needs. In some countries, the primary users of financial statements are private investors; in others the primary users are taxing authorities or central government planners.

GAAP 1.3

A single set of high-quality accounting standards is needed because of increases in multinational corporations, mergers and acquisitions, use of information technology, and international financial markets.

GAAP 1.4

Currently the internal control standards applicable to Sarbanes-Oxley (SOX) apply only to large public companies listed on U.S. exchanges. If such standards were adopted by non-U.S. companies, users of statements would benefit from more uniform regulation and U.S. companies would be competing on a more "even" playing field. The disadvantage of adopting SOX would be the additional costs associated with its required internal control measures.
