81. What is meant when we say that revenue and expenses fall under the umbrella of owner's equity? Why does revenue have the same placement of plus and minus signs as the Capital account, and why do expenses have the opposite placement of plus and minus signs as does the Capital account?

ANSWER: Revenue is said to fall under the umbrella of owner's equity because revenue represents amounts earned by the business. Earnings serve to increase the owner's investment. Consequently, the placement of the plus and minus signs for revenue should be the same as that for Capital. Expenses are said to fall under the umbrella of owner's equity because expenses represent the costs of earning the revenue or doing business. Consequently, expenses are deductions from revenue and, as such, the placement of the plus and minus signs is the opposite of that for revenue, which also makes them the opposite of Capital.

82. Explain how the Drawing account differs from an expense account.

ANSWER: The Drawing account is the opposite of an investment by the owner and records personal use of owner. An expense is a cost related to the earning of revenue or the cost of doing business. In both cases, there is usually a decrease to Cash.
