

Name: _____ Class: _____ Date: _____

Chapter 02—Economic Tools and Economics Systems**Multiple Choice**

1. Opportunity cost exists because
- a. technology is fixed at any point in time
 - b. the law of comparative advantage is working
 - c. resources are scarce but wants are unlimited
 - d. the value of lost opportunities varies from person to person
 - e. efficiency is measured by the monetary cost of an activity

ANSWER: c

2. Opportunity cost is the difference between the benefits and the costs of a choice.
- a. True
 - b. False

ANSWER: b

3. Opportunity cost is always measured in dollar terms, rather than in terms of real goods and services.
- a. True
 - b. False

ANSWER: b

4. A rational decision maker engages in an activity if that activity is more attractive than the best alternative.
- a. True
 - b. False

ANSWER: a

5. The Sultan of Brunei, one of the world's richest people, does not face the problem of scarcity.
- a. True
 - b. False

ANSWER: b

6. Opportunity cost is defined
- a. only in terms of money spent
 - b. as the value of all alternatives not chosen
 - c. as the value of the best alternative not chosen
 - d. as the difference between the benefits from a choice and the benefits from the next best alternative
 - e. as the difference between the benefits from a choice and the costs of that choice

ANSWER: c

7. Suppose you have an hour before your next class starts. You can either read a book, get something to eat, or take a nap. The opportunity cost of getting something to eat is
- a. the cost of what you eat
 - b. the value of reading and sleeping
 - c. the loss of value from not reading or sleeping
 - d. the net benefit of sleeping for another hour

Chapter 02—Economic Tools and Economics Systems

- e. impossible to determine because the most preferred alternative is not known

ANSWER: e

8. The opportunity cost of an activity is

- a. zero if you choose the activity voluntarily
- b. the amount of money spent on the activity
- c. the value of the best alternative not chosen
- d. the sum of benefits from all of the sacrificed alternatives
- e. the difference between the benefits and the costs of that activity

ANSWER: c

9. The opportunity cost of an activity

- a. depends on the individual's subjective values and opinions
- b. is the same for everyone
- c. must be calculated and known before undertaking that activity
- d. is irrelevant to decision making
- e. is not related to time

ANSWER: a

10. Your opportunity cost of choosing a particular activity

- a. can be easily and accurately calculated
- b. cannot even be estimated
- c. does not change over time
- d. varies, depending on time and circumstances
- e. is measured by the money you spend on the activity

ANSWER: d

11. The opportunity cost of college is the same for all students who are receiving full-tuition scholarships.

- a. True
- b. False

ANSWER: b

12. The opportunity cost of going to college is best measured by the

- a. cost of room and board
- b. cost of tuition
- c. cost of room and board plus tuition
- d. income forgone by not working, plus tuition
- e. income forgone by not working, plus tuition and room and board

ANSWER: d

13. Suppose you have a choice of working full-time during the summer or going full-time to summer school. Summer tuition and books are \$2,200. If you worked, you could make \$7,000. Your rent is \$1,000 for the summer, regardless of your choice. The opportunity cost of going to summer school is, therefore,

- a. \$2,200

Chapter 02—Economic Tools and Economics Systems

- b. \$7,000
- c. \$8,000
- d. \$9,200
- e. \$10,200

ANSWER: d

14. Upon graduating from high school you have a job offer which would provide you with \$20,000 in income for the coming year. You have also been accepted to Isaac and Avery college. Tuition for the coming year at I&A college is \$15,000, room and board is \$10,000 and you expect that books will cost you \$2,000. What is the opportunity cost of attending I&A college?

- a. \$37,000
- b. \$27,000
- c. \$20,000
- d. \$32,000
- e. \$47,000

ANSWER: a

15. The cost of attending college

- a. is entirely monetary and consists of expenditures on tuition, books, transportation, and meals
- b. is not monetary, but consists solely of forgone income
- c. is the most valued alternative given up to attend college
- d. is negligible for most people, because they really have no choice but to attend college
- e. is the same whether you attend a public or a private college

ANSWER: c

16. Expenses for room and board

- a. are opportunity costs of attending college, because they are subsidized by the government or by the college
- b. are opportunity costs of attending college since they involve cash expenditures
- c. are opportunity costs of attending college if you are on scholarship, but not otherwise
- d. are not usually part of the opportunity cost of attending college, because you would have to live somewhere and eat something even if you didn't attend college
- e. are not usually part of the opportunity cost of attending college, because they are already included in room and board charges, and we wish to avoid double counting

ANSWER: d

17. The opportunity cost of going to college includes the costs of tuition, books, fees, and

- a. nothing else
- b. housing
- c. housing and food
- d. earnings forgone by not working full-time
- e. housing, food, and earnings forgone by not working full-time

ANSWER: d

18. Opportunity cost is objective; therefore, its value does not change as circumstances change.

Chapter 02—Economic Tools and Economics Systems

- a. True
- b. False

ANSWER: b

19. Which economic concept does the expression "time is money" reflect?

- a. opportunity cost
- b. specialization
- c. market exchange
- d. comparative advantage
- e. efficiency

ANSWER: a

20. A test was scheduled for Monday morning, but you went to a party on Saturday night. If you hadn't attended the party, you could have studied for the test or gone to a movie. Which of the following is true?

- a. The opportunity cost of going to the movie is studying for the test.
- b. The opportunity cost of going to the party is the movie.
- c. The opportunity cost of going to the party is both the movie and the study time.
- d. Because you could go to the party only that night but could go to a movie any time, the opportunity cost of the party is the study time.
- e. From the above information, it's not possible to determine the opportunity cost of attending the party.

ANSWER: e

21. The term opportunity cost suggests that

- a. in any exchange situation where one person gains, someone else must lose
- b. not all individuals make the most of life's opportunities
- c. executives do not always recognize opportunities for profit as quickly as they should
- d. the only factor that is important in decision making is cost
- e. because goods are scarce, in order to get some good you must give up some other good in return

ANSWER: e

22. If you enjoy playing golf, the opportunity cost of cleaning your room

- a. is the same on sunny days as it is on rainy days
- b. is greater on sunny days than it is on rainy days
- c. is smaller on sunny days than it is on rainy days
- d. does not change with the weather conditions
- e. is equal to the opportunity cost of any other chore you have to do that day

ANSWER: b

23. Melissa is a self-employed lawyer who chooses a higher-priced restaurant 2 miles from home over a cheaper restaurant 15 miles from home. Which of the following is the most likely explanation for her behavior?

- a. The opportunity cost of her time is very low.
- b. She doesn't take travel time into consideration.
- c. She doesn't like to cook or doesn't know how.
- d. The prices at the more expensive restaurant understate the opportunity cost of eating there.

Chapter 02—Economic Tools and Economics Systems

- e. The higher monetary cost of the more expensive restaurant is offset by the higher opportunity cost of the lower-priced restaurant.

ANSWER: e

24. The opportunity cost of a particular activity
- a. must be the same for everyone
 - b. is the value of all alternative activities that are forgone
 - c. has a maximum value equal to the minimum wage
 - d. varies from person to person
 - e. can usually be known with certainty

ANSWER: d

25. The opportunity cost of an activity is best measured
- a. only by the monetary costs
 - b. by the number of alternative activities that were forgone
 - c. by the cost difference between the chosen activity and the next best alternative
 - d. by the value expected from the best alternative that is forgone
 - e. as the time wasted choosing among various activities

ANSWER: d

26. A university should not disband its football team if it has already paid for the stadium.
- a. True
 - b. False

ANSWER: b

27. Suppose you have purchased a non-refundable plane ticket and, at the last moment, you cannot take the trip. You can, however, sell the ticket. If you paid \$700 for the ticket, the cost of sending the ticket to someone through overnight mail is \$20, and you spend \$10 on a courier to get the ticket to the post office for overnight delivery, what is the minimum you should accept for the ticket?
- a. \$700 because that is what the ticket cost.
 - b. \$720 because that is the cost of the ticket and of getting it to the buyer.
 - c. \$730 because that is the total cost of the ticket and getting it to the buyer.
 - d. More than \$730, so that you can make a profit.
 - e. \$30 because the \$700 is a sunk cost.

ANSWER: e

28. Sunk costs
- a. can only be measured in monetary terms
 - b. are opportunity costs
 - c. should influence a person's choice if that person is a marginal decision maker
 - d. lower the efficiency of production
 - e. should not be considered when making economic decisions

ANSWER: e

Chapter 02—Economic Tools and Economics Systems

29. If people specialize in producing those goods for which they possess a comparative advantage, then the economy as a whole can produce a greater quantity of goods.

- a. True
- b. False

ANSWER: a

30. It is possible for one person to have a comparative advantage in the production of all products?

- a. True
- b. False

ANSWER: b

31. Comparative advantage is based on opportunity costs.

- a. True
- b. False

ANSWER: a

32. The law of comparative advantage says that a person should produce a good if she

- a. has the greatest desire to consume that good
- b. has the lowest opportunity cost of producing that good
- c. has an absolute advantage in a related activity
- d. has a comparative advantage in a related activity
- e. is equally good at producing this good as someone else is

ANSWER: b

33. The law of comparative advantage says that

- a. the individual with the lowest opportunity cost of producing a particular good should produce it
- b. comparative advantage exists only when one person has an absolute advantage in the production of two goods
- c. whoever has a comparative advantage in producing a good also has an absolute advantage in producing that good
- d. whoever has an absolute advantage in producing a good also has a comparative advantage in producing that good
- e. gains from trade are possible only when one person has the comparative advantage in producing both goods

ANSWER: a

34. Comparative advantage is

- a. the ability of an individual to specialize and produce a greater amount of some good than can another individual
- b. the number of units of one good given up in order to acquire something
- c. the ability of an individual to produce a good at a lower opportunity cost than some other individual can
- d. an expression for the amount of labor a particular individual needs to produce a fixed amount of capital goods
- e. a reference to an individual having the greatest opportunity cost of producing the good and produces it with the fewest resources

ANSWER: c

35. If you and I agree to exchange four ginger snaps for one chocolate chip cookie, then it must be true that

Chapter 02—Economic Tools and Economics Systems

- a. we are both at least as well off as we were before
- b. I am better off than I was before, but you are not
- c. you are better off than you were before, but I am not
- d. we are both better off than before
- e. we are both worse off than before

ANSWER: a

36. The law of comparative advantage states that the person who should produce a good is the person who
- a. has the lowest opportunity cost of producing that good
 - b. can produce that good using the fewest resources
 - c. will produce that good using the most expensive resources
 - d. has the most desire for that good
 - e. has produced that good in the past

ANSWER: a

37. A person who can produce more of a good than another person is said to possess a comparative advantage.
- a. True
 - b. False

ANSWER: b

38. It is impossible for one person to have a comparative advantage in all tasks.
- a. True
 - b. False

ANSWER: a

39. It is possible for one person to have an absolute advantage in two tasks and a comparative advantage in only one.
- a. True
 - b. False

ANSWER: a

40. It is possible for one person to have an absolute advantage in something even if she has no comparative advantage in anything.
- a. True
 - b. False

ANSWER: b

41. Absolute advantage is based on opportunity cost.
- a. True
 - b. False

ANSWER: b

42. John takes 10 minutes to iron a shirt and 20 minutes to type a paper. Harry takes 10 minutes to iron a shirt and 30 minutes to type a paper. Which of the following statements is correct?
- a. Harry has a comparative advantage in ironing.

Chapter 02—Economic Tools and Economics Systems

- b. Harry has a comparative advantage in typing.
- c. Harry has an absolute advantage in typing.
- d. Harry has an absolute advantage in ironing.
- e. Neither can gain from specialization and exchange.

ANSWER: a

43. Don can produce 10 pens or 20 pencils in one hour while Bob can produce 5 pencils or 15 pens in one hour. Which of the following statements is correct?

- a. Don has an absolute advantage over Bob in the production of pencils and Bob in the production of pens
- b. Bob has an absolute advantage over Don in the production of pencils
- c. Bob has a comparative advantage over Don in the production of pens
- d. Don has a comparative advantage over Bob in the production of pens
- e. Don does not have a comparative advantage in the production of either good

ANSWER: c

44. If Jason can wash a car in 20 minutes and wash a dog in 10 minutes, and Megan can wash a car in 15 minutes and wash a dog in 15 minutes, which of the following statements is true?

- a. The opportunity cost of washing a car is greater for Megan.
- b. The opportunity cost of washing a car is one dog bath for Jason.
- c. Megan could wash two cars in the time it takes to wash a dog.
- d. Jason has both a comparative and an absolute advantage in washing a dog.
- e. The opportunity cost of washing a dog is greater for Jason.

ANSWER: d

45. Janis mows the lawn in 1 hour and types a paper in 1 hour. Kristen mows the lawn in 2 hours and types a paper in 1 hour. Which of the following statements is true?

- a. Kristen has an absolute advantage in typing and a comparative advantage in mowing.
- b. Janis has an absolute advantage in both activities and a comparative advantage in typing.
- c. Janis has an absolute advantage in both activities and a comparative advantage in mowing.
- d. The opportunity cost of mowing the lawn is greater for Kristen than it is for Janis.
- e. Neither Janis nor Kristen would gain from specialization.

ANSWER: d

46. If Monica has a comparative advantage in baking and George has a comparative advantage in sewing, then

- a. Monica must have an absolute advantage in baking
- b. Monica must have an absolute advantage in sewing
- c. George must have an absolute advantage in baking
- d. George must have an absolute advantage in sewing
- e. we can conclude nothing about absolute advantage

ANSWER: e

47. If Evan has an absolute advantage in cleaning and bookkeeping when compared to Gloria, then

- a. Evan must also have a comparative advantage in cleaning and bookkeeping
- b. Evan must have a comparative advantage in cleaning

Chapter 02—Economic Tools and Economics Systems

- c. Evan must have a comparative advantage in bookkeeping
- d. Gloria has a comparative advantage in neither activity
- e. we can conclude nothing about comparative advantage

ANSWER: e

48. If Jeremy has an absolute advantage in cooking and Margaret has an absolute advantage in cleaning, then
- a. Jeremy has a comparative advantage in cooking, and Margaret has a comparative advantage in cleaning
 - b. Jeremy has a comparative advantage in cleaning, and Margaret has a comparative advantage in cooking
 - c. we can conclude nothing about comparative advantage
 - d. Jeremy has a comparative advantage in cooking, but we can conclude nothing about Margaret
 - e. Margaret has a comparative advantage in cleaning, but we can conclude nothing about Jeremy

ANSWER: c

49. If Robin has an absolute advantage in both gardening and baking when compared to Robert, then
- a. Robin cannot benefit by trading with Robert
 - b. Robin can benefit by specializing in gardening if Robert specializes in baking
 - c. Robin can benefit by specializing in baking if Robert specializes in gardening
 - d. Robin and Robert may benefit from trading, but there is insufficient information to determine who should specialize in what
 - e. neither Robin nor Robert can benefit from trading with the other

ANSWER: d

50. If one person has the absolute advantage in producing both of two goods, then that person
- a. must also have a comparative advantage in both goods
 - b. cannot benefit from trade
 - c. cannot have a comparative advantage in either good
 - d. will have the comparative advantage in only one good
 - e. should specialize in the production of both goods

ANSWER: d

51. A country has an absolute advantage in the production of a good if that country
- a. can produce the good using fewer resources than another country would require
 - b. has the lowest opportunity cost of producing the good and can produce it with the fewest resources
 - c. has the lowest opportunity cost of producing the good regardless of whether it is produced with the fewest resources
 - d. has the greatest opportunity cost of producing the good regardless of whether it is produced with the fewest resources
 - e. has the greatest opportunity cost of producing the good and produces it with the fewest resources

ANSWER: a

52. If Sam can chop up more carrots per minute than Joe can, then
- a. Joe has an absolute advantage in carrot chopping
 - b. Joe must have a comparative advantage in carrot chopping
 - c. Sam has an absolute advantage in carrot chopping

Chapter 02—Economic Tools and Economics Systems

- d. Sam must have a comparative advantage in carrot chopping
- e. we can conclude nothing about absolute advantage

ANSWER: c

53. Eileen has a comparative advantage over Jan in piano tuning but not in shoe polishing. Therefore,
- a. Jan must have an absolute advantage in piano tuning
 - b. Eileen must have an absolute advantage in shoe polishing
 - c. Jan must have a lower opportunity cost of shoe polishing
 - d. Eileen must have an absolute advantage in shoe polishing and in piano tuning
 - e. Eileen must have an absolute advantage in piano tuning

ANSWER: c

54. If Helen gives up the opportunity to bake 40 cakes for each room she paints and Josh can paint one room in the time it takes him to bake 60 cakes, which of the following is true?
- a. The opportunity cost of painting is higher for Helen.
 - b. The opportunity cost of baking cakes is lower for Josh.
 - c. The opportunity cost of painting one room is $1/40$ of a cake for Helen.
 - d. The opportunity cost of baking one cake is 60 rooms painted for Josh.
 - e. The opportunity cost of cakes cannot be computed.

ANSWER: b

55. Helen gives up the opportunity to bake 40 cakes for each room she paints; Josh can paint one room in the time it takes him to bake 60 cakes. The opportunity cost of a cake for Helen is
- a. painting one room
 - b. painting $1/40$ of a room
 - c. painting $1/60$ of a room
 - d. painting $2/3$ of a room
 - e. painting $3/2$ of a room

ANSWER: b

56. Helen gives up the opportunity to bake 40 cakes for each room she paints; Josh can paint one room in the time it takes him to bake 60 cakes. The opportunity cost of a cake for Josh is
- a. painting one room
 - b. painting $1/40$ of a room
 - c. painting $1/60$ of a room
 - d. painting $2/3$ of a room
 - e. painting $3/2$ of a room

ANSWER: c

57. If Daniel produces one pair of shoes in 4 hours and Sarah produces one pair of shoes in 3 hours, then
- a. Sarah has a comparative advantage in shoemaking
 - b. Daniel has a comparative advantage in shoemaking
 - c. Sarah has an absolute and a comparative advantage in shoemaking
 - d. Daniel has an absolute and a comparative advantage in shoemaking

Chapter 02—Economic Tools and Economics Systems

- e. Sarah has an absolute advantage in shoemaking

ANSWER: e

Exhibit 2-1

	Hans	Maria
Loads of laundry per hour	4	12
Pages typed per hour	6	8

58. According to Exhibit 2-1, Hans' opportunity cost of doing a load of laundry is

- a. 12 papers
- b. 8 papers
- c. 1 1/2 pages
- d. 2/3 of a page
- e. impossible to compute

ANSWER: c

59. According to Exhibit 2-1, Hans' opportunity cost of typing one page is

- a. 12 loads of laundry
- b. 8 loads of laundry
- c. 3/2 of a load of laundry
- d. 2/3 of a load of laundry
- e. impossible to compute

ANSWER: d

60. According to Exhibit 2-1, Maria's opportunity cost of typing a page is

- a. 4 loads of laundry
- b. 6 loads of laundry
- c. 2/3 of a load of laundry
- d. 3/2 of a load of laundry
- e. impossible to compute

ANSWER: d

61. According to Exhibit 2-1, Maria's opportunity cost of doing a load of laundry is

- a. 4 pages
- b. 6 pages
- c. 2/3 of a page
- d. 3/2 of a page
- e. impossible to compute

ANSWER: c

62. According to Exhibit 2-1, if Hans types one fewer page, how many loads of laundry can he do in the time saved on typing?

- a. 12 loads
- b. 8 loads

Chapter 02—Economic Tools and Economics Systems

- c. $\frac{3}{2}$ of a load
- d. $\frac{2}{3}$ of a load
- e. it cannot be determined

ANSWER: d

63. According to Exhibit 2-1, if Hans does one fewer load of laundry, how many pages can he type in the time saved on laundry?

- a. 12 pages
- b. 8 pages
- c. $\frac{3}{2}$ of a page
- d. $\frac{2}{3}$ of a page
- e. it cannot be determined

ANSWER: c

64. According to Exhibit 2-1, if Maria does one fewer load of laundry, how many pages can she type in the time saved on laundry?

- a. 4 pages
- b. 6 pages
- c. $\frac{2}{3}$ of a page
- d. $\frac{3}{2}$ of a page
- e. it cannot be determined

ANSWER: c

65. According to Exhibit 2-1, if Maria types one fewer page, how many loads of laundry can she do in the time saved on typing?

- a. 4 loads
- b. 6 loads
- c. $\frac{2}{3}$ of a load
- d. $\frac{3}{2}$ of a load
- e. it cannot be determined

ANSWER: d

66. According to Exhibit 2-1, in any given amount of time,

- a. Maria has an absolute and a comparative advantage in typing
- b. Maria has an absolute and a comparative advantage in doing laundry
- c. Maria has a comparative advantage in both typing and doing laundry
- d. Hans has an absolute and a comparative advantage in typing
- e. Hans has an absolute advantage in doing laundry

ANSWER: b

67. According to Exhibit 2-1, Hans and Maria would be better off if

- a. Hans specialized in typing and Maria in doing laundry
- b. Hans specialized in doing laundry and Maria in typing
- c. each did their own laundry and typing

Chapter 02—Economic Tools and Economics Systems

- d. Maria did all of the typing and all of the laundry
- e. Hans did all of the typing and all of the laundry

ANSWER: a

68. In one week, Mohammed can knit 5 sweaters or bake 240 cookies. In one week, Tetah can knit 15 sweaters or bake 480 cookies. In this example,

- a. Mohammed has the absolute and comparative advantage in both tasks
- b. Tetah has the absolute and comparative advantage in both tasks
- c. Mohammed has the absolute advantage in both tasks and the comparative advantage in knitting sweaters
- d. Tetah has the absolute advantage in both tasks and the comparative advantage in knitting sweaters
- e. Mohammed has the absolute advantage in both tasks and the comparative advantage in baking cookies

ANSWER: d

69. In one week, Mohammed can knit 5 sweaters or bake 240 cookies. The opportunity cost per sweater for Mohammed is

- a. \$240
- b. 240 cookies
- c. 48 sweaters
- d. 1/48 of a cookie
- e. 48 cookies

ANSWER: e

70. In one week, Mohammed can knit 5 sweaters or bake 240 cookies. The opportunity cost per cookie for Mohammed is

- a. \$5
- b. 5 sweaters
- c. 48 sweaters
- d. 1/48 of a sweater
- e. 48 cookies

ANSWER: d

71. In one week, Mohammed can knit 5 sweaters or bake 240 cookies. In one week, Tetah can knit 15 sweaters or bake 480 cookies. Mohammed and Tetah would produce the maximum quantities of cookies and sweaters if

- a. Mohammed knitted and baked and Tetah did nothing
- b. Tetah knitted and baked and Mohammed did nothing
- c. Mohammed knitted and Tetah baked
- d. Tetah knitted and Mohammed baked
- e. Mohammed knitted and baked and Tetah just knitted

ANSWER: d

72. In one week, Tetah can knit 15 sweaters or bake 480 cookies. The opportunity cost per sweater for Tetah is

- a. \$480
- b. 480 cookies
- c. 32 cookies
- d. 1/32 of a cookie
- e. 15 cookies

Chapter 02—Economic Tools and Economics Systems

ANSWER: c

73. In one week, Tetah can knit 15 sweaters or bake 480 cookies. The opportunity cost per cookie for Tetah is
- \$15
 - 15 sweaters
 - 32 sweaters
 - $\frac{1}{32}$ of a sweater
 - 480 sweaters

ANSWER: d

Exhibit 2-2

	Robinson Crusoe	Friday
Fishhooks per day	30	60
Fishing poles per day	2	10

74. Given the information in Exhibit 2-2, which product should Friday (an individual) make?
- fishhooks because he can make 30 more per day than Crusoe but only 8 more fishing poles
 - both because he is better at both
 - fishing poles because that is where his comparative advantage lies
 - neither because Crusoe is better at both
 - we cannot tell from the given information

ANSWER: c

75. Specialization can sometimes create problems such as boredom and repetitive motion injuries.
- True
 - False

ANSWER: a

76. Specialization often leads to gains in productivity for society as a whole.
- True
 - False

ANSWER: a

77. Barter occurs when
- two people share everything
 - one product is exchanged directly for another product
 - money is used to buy goods
 - money is exchanged directly for other money
 - goods are used to buy money

ANSWER: b

78. If I trade a ginger snap for a chocolate chip cookie, I am engaging in
- barter

Chapter 02—Economic Tools and Economics Systems

- b. comparative advantage
- c. absolute advantage
- d. privatization
- e. division of labor

ANSWER: a

79. Money facilitates trade because

- a. it eliminates the need for specialization
- b. it prevents people from taking advantage of each other
- c. it serves as a medium of exchange
- d. division of labor allows money to be produced at a lower cost
- e. people do not benefit from barter unless money is used

ANSWER: c

80. Barter is

- a. illegal in the United States
- b. an efficient system of exchange
- c. most useful when there is much specialization and international trade
- d. only possible if money is used as a medium of exchange
- e. the direct exchange of goods, without the use of money

ANSWER: e

81. A medium of exchange must be

- a. approved by the government
- b. socially acceptable in exchange for goods and services
- c. easy to reproduce
- d. used to eliminate specialization and the division of labor
- e. used when a system of barter exists

ANSWER: b

82. Division of labor allows people to do tasks for which they have greater natural ability.

- a. True
- b. False

ANSWER: a

83. Which of the following provide the best evidence of specialization?

- a. a firm that produces a line of related products, such as eight kinds of breakfast cereal
- b. an architect who is willing to practice in only one geographic area
- c. a physician that practices in a specialty area such as cardiology or orthopedic surgery
- d. a family that eats at Wendy's every Thursday night
- e. a retailer that sells goods but provides no services

ANSWER: c

84. The division of labor

Chapter 02—Economic Tools and Economics Systems

- a. allows more people to be employed
- b. allows tasks to be performed more efficiently
- c. makes people happier on the job
- d. means that less management is required
- e. means that less equipment will be used

ANSWER: b

85. The division of labor facilitates productivity increases for all of the following reasons, *except* one. Which is the exception?

- a. It allows people to do those tasks for which they have the greatest natural ability.
- b. Workers get better at tasks, the more they repeat them.
- c. The more experience workers gain by specializing in a task, the more likely they will enjoy that task.
- d. More sophisticated production techniques are introduced.
- e. The division of labor often permits the introduction of labor-saving machinery.

ANSWER: c

86. Which of the following is not a gain from division of labor?

- a. Workers' abilities are matched to tasks.
- b. Workers gain experience from the repetition of the tasks.
- c. Workers save time by not moving to different tasks.
- d. Workers' morale increases as tasks become more specialized.
- e. The introduction of labor-saving machinery is possible.

ANSWER: d

87. Division of labor increases productivity because

- a. tasks can be assigned according to individual tastes and abilities
- b. workers who repeatedly perform the same tasks become bored
- c. each worker must learn each of the numerous tasks in the total production process
- d. specialization of labor allows for the introduction of cheaper, less sophisticated production techniques
- e. managers can force workers to produce goods that are valued more highly than the costs of producing them.

ANSWER: a

88. Because of specialization and comparative advantage, most people

- a. consume only what they produce themselves
- b. consume the products produced by their family and friends
- c. consume the products of many other specialists
- d. do not use money as a medium of exchange
- e. share whatever they produce

ANSWER: c

89. Fast food is faster and cheaper than a similar meal you could prepare for yourself. Which of the following does *not* explain that fact?

- a. meal preparation has been divided into many separate tasks
- b. larger-scale production allows the introduction of more efficient machines

Chapter 02—Economic Tools and Economics Systems

- c. workers gain productivity at a task over time
- d. there is less time lost moving from one task to another
- e. workers are more productive when they are being paid

ANSWER: e

90. The "division of labor" refers to
- a. discrimination in labor markets
 - b. separating a job into smaller tasks completed by different people
 - c. one worker who divides his time among different jobs and duties
 - d. defining a job according to the appropriate sex
 - e. the fact that two 20-year-olds are more productive than one 40-year-old

ANSWER: b

91. Specialization of labor
- a. increases productivity without creating any problems
 - b. reduces productivity, and is usually eliminated by business firms
 - c. can create problems of boredom and repetitive motion injuries
 - d. prevents the introduction of more sophisticated and efficient production techniques
 - e. ignores individual preferences and natural abilities

ANSWER: c

92. In economics, specialization means
- a. producing something using only one type of resource, such as labor
 - b. producing something using only one type of labor
 - c. focusing efforts on a particular product or a single task
 - d. producing only one unit of output
 - e. producing something using only one unit of a variable resource

ANSWER: c

93. Which of the following is an example of division of labor?
- a. an author writing a book one chapter at a time
 - b. a firm trying to get rid of a labor union
 - c. separating resources into four categories: land, labor, capital, and entrepreneurial ability
 - d. allocating revenue among a firm's resource suppliers
 - e. dividing an assembly process into separate steps

ANSWER: e

94. Each point on a production possibilities frontier requires full employment of resources.
- a. True
 - b. False

ANSWER: a

95. The production possibilities frontier represents all desirable combinations of outputs.
- a. True

Chapter 02—Economic Tools and Economics Systems

b. False

ANSWER: b

96. Each point along a nation's production possibilities frontier represents efficient use of all resources.

a. True

b. False

ANSWER: a

97. On a given production possibilities frontier, which of the following is *not* assumed to be fixed?

a. the amount of labor available

b. the amount of capital available

c. the level of technology

d. the amount of land and natural resources available

e. production of each item

ANSWER: e

98. At various points along the production possibilities frontier,

a. the greatest achievable output levels are illustrated

b. resources are not fully employed

c. more of one good can be obtained without giving up more of the other

d. more efficient output levels are possible

e. society is equally well off

ANSWER: a

99. When drawing a production possibilities frontier, all of the following are usually assumed *except one*. Which is the exception?

a. The quantity of resources is rapidly growing.

b. Technology is fixed.

c. Resources can be shifted between production of the two goods.

d. The production possibilities frontier is drawn for a particular time period.

e. Resources are fully and efficiently employed.

ANSWER: a

100. Society's production possibilities frontier

a. helps explain the immense complexity of the real economy

b. demonstrates that, although resources are scarce for individuals, there is no problem of scarcity for society as a whole

c. is based on unrealistic assumptions and therefore has no value as an economic tool

d. is based on simplifying assumptions, but is still useful for illustrating scarcity, opportunity cost, and economic growth

e. is based on the assumption that technology is constantly changing

ANSWER: d

101. Which of the following is most appropriately measured along one axis of the production possibilities frontier

Chapter 02—Economic Tools and Economics Systems

diagram?

- a. the quantity of a produced good
- b. the price of a produced good
- c. the quantity of natural resources
- d. the state of technology
- e. society's welfare and satisfaction

ANSWER: a

102. "Efficiency" refers to

- a. producing output using the least amount of labor
- b. producing output using the least amount of capital
- c. producing as far inside the production possibilities frontier as possible
- d. producing only one out of many possible commodities
- e. getting the maximum possible output from available resources

ANSWER: e

103. If all resources are used efficiently to produce goods and services, a nation will find itself producing

- a. inside its production possibilities frontier
- b. somewhere on its production possibilities frontier
- c. outside of its production possibilities frontier
- d. at one extreme end of its production possibilities frontier
- e. more of one product with no decrease in the production of any other product

ANSWER: b

104. The production possibilities frontier represents the boundary between attainable and unattainable prices of commodities.

- a. True
- b. False

ANSWER: b

105. A point outside the production possibilities frontier

- a. represents unemployment of resources
- b. represents full employment of resources
- c. would not represent an efficient combination of goods
- d. cannot be reached using the available technology
- e. is less desirable than one that lies inside the frontier

ANSWER: d

Exhibit 2-3

Chapter 02—Economic Tools and Economics Systems

106. In Exhibit 2-3, if all the economy's resources are used efficiently to produce good B, then the economy is at point

- a. g
- b. b
- c. h
- d. i
- e. e

ANSWER: a

107. In Exhibit 2-3, if all the economy's resources are used efficiently to produce good A, then the economy is at point

- a. h
- b. e
- c. d
- d. i
- e. c

ANSWER: d

108. Which of the following points in Exhibit 2-3 is unattainable, given the quantity of resources and level of technology?

- a. h
- b. g
- c. f
- d. i
- e. e

ANSWER: e

109. Which of the following points in Exhibit 2-3 represents an inefficient use of the economy's resources?

- a. g
- b. i
- c. f
- d. d
- e. h

ANSWER: c

Chapter 02—Economic Tools and Economics Systems

110. In Exhibit 2-3, if resources are used fully and efficiently, then the economy can produce at point(s)

- a. f
- b. h, d, or e
- c. a, b, or c
- d. d or e
- e. g, h, or i

ANSWER: e

111. Point e in Exhibit 2-3 represents

- a. an attainable combination of good A and good B
- b. an unattainable combination of good A and good B
- c. the combination of good A and good B that the economy will produce
- d. one possible efficient combination of good A and good B
- e. the only unattainable combination of good A and good B

ANSWER: b

112. Point f in Exhibit 2-3 represents

- a. an efficient combination of good A and good B
- b. the only efficient combination of good A and good B
- c. the combination of good A and good B that the economy will produce
- d. an inefficient combination of good A and good B
- e. the only unattainable combination of good A and good B

ANSWER: d

113. Point g in Exhibit 2-3 is efficient because

- a. the only way to increase production of A is by decreasing production of B
- b. the economy can increase production of both A and B from point b
- c. it is impossible to move to any other point along the production possibilities frontier
- d. it is impossible to move to any other point inside the production possibilities frontier
- e. no other production possibilities frontier exists

ANSWER: a

114. Points inside the production possibilities frontier represent

- a. full and efficient use of all resources
- b. inefficiency or unemployment (or both)
- c. currently unattainable combinations of outputs
- d. currently unattainable combinations of resources
- e. the most desirable combinations of outputs

ANSWER: b

115. Points outside the production possibilities frontier represent

- a. unemployment of resources
- b. inefficient use of resources

Chapter 02—Economic Tools and Economics Systems

- c. combinations that are attainable only if all resources are used fully and efficiently
- d. currently unattainable combinations of outputs
- e. the only currently attainable combinations from which society must choose

ANSWER: d

116. A point inside the production possibilities curve illustrates a situation in which resources are not fully employed

- a. True
- b. False

ANSWER: a

117. The bowed-out shape of the production possibilities frontier indicates increasing opportunity costs.

- a. True
- b. False

ANSWER: a

118. The typical concave (i.e., bowed-out) shape of the production possibilities frontier reflects the law of increasing opportunity cost.

- a. True
- b. False

ANSWER: a

Exhibit 2-4

119. In Exhibit 2-4, what is the opportunity cost of moving from point c to point b?

- a. 3 units of food
- b. 22 units of education
- c. 1 unit of food
- d. 12 units of education
- e. 62 units of education

ANSWER: b

120. Along a bowed-out production possibilities frontier, as more of one good is produced,

- a. the opportunity cost of producing that good remains constant

Chapter 02—Economic Tools and Economics Systems

- b. the opportunity cost of producing that good decreases
- c. efficiency decreases
- d. the opportunity cost of producing both goods must remain constant
- e. technology remains constant

ANSWER: e

121. If an economy is operating at a point inside the production possibilities frontier, then
- a. some of the nation's resources are unemployed
 - b. the production decisions are made by the government
 - c. unlimited resources must satisfy scarce desires
 - d. there is a scarcity of human resources relative to human wants therefore society must have some mechanism for making choices
 - e. society is paying too much for wages

ANSWER: a

122. If the production possibilities frontier is a straight line,
- a. its slope will equal -1
 - b. resources must not be used efficiently
 - c. resources must be unemployed
 - d. society must not be using the latest technology
 - e. resources must be equally adaptable at producing either product

ANSWER: e

123. A production possibilities frontier will be bowed out if
- a. there is scarcity
 - b. resources are used efficiently
 - c. production of one good involves an opportunity cost
 - d. resources are not perfectly adaptable to making each good
 - e. technology is improving

ANSWER: d

124. Because resources are not perfectly adaptable to the production of both good A and good B,
- a. the opportunity cost of A increases as production of A increases
 - b. the opportunity cost of A decreases as production of A increases
 - c. it is impossible for the economy to produce both A and B
 - d. the opportunity cost of A is constant
 - e. the opportunity cost of B is constant

ANSWER: a

125. On a production possibilities frontier showing possible output levels of good A and good B, the opportunity cost of producing the first 10 units of A will usually be
- a. the same as the opportunity cost of producing the second 10 units of A
 - b. less than the opportunity cost of producing the second 10 units of A
 - c. greater than the opportunity cost of making the second 10 units of A

Chapter 02—Economic Tools and Economics Systems

- d. 10 units of A
- e. 10 units of B

ANSWER: b

126. The concave shape of a production possibilities frontier showing possible output levels of good A and good B indicates that if the economy produces more and more of good B,

- a. larger and larger amounts of good A must be sacrificed
- b. smaller and smaller amounts of good A must be sacrificed
- c. more of good A will be produced
- d. the amount of resources available in the economy must be increased
- e. there must be an improvement in technology

ANSWER: a

Exhibit 2-5

127. In moving from point f to point g in Exhibit 2-3, the
- a. production of B increases without a change in the production of A
 - b. production of A increases without a change in the production of B
 - c. production of both A and B increase
 - d. production of both A and B decrease
 - e. production of B increases and production of A decreases

ANSWER: e

128. If the production possibilities curve is a downward-sloping straight line, that would indicate

- a. that society cannot decide which good it prefers
- b. an absence of scarcity
- c. constant opportunity cost
- d. inefficiency
- e. specialization

ANSWER: c

129. The law of increasing opportunity cost explains why

- a. opportunity cost is constant along the production possibilities frontier

Chapter 02—Economic Tools and Economics Systems

- b. the production possibilities frontier is downward sloping
- c. the production possibilities frontier is curved
- d. efficient points lie along the production possibilities frontier
- e. technology remains constant along a production possibilities frontier

ANSWER: c

130. The law of increasing opportunity cost reflects the fact that
- a. the production possibilities frontier is bowed inward
 - b. resources are not perfectly substitutable
 - c. resources cannot always be used efficiently
 - d. an economy will operate at a point inside the production possibilities frontier
 - e. an economy will operate at a point along the production possibilities frontier

ANSWER: b

131. On a straight-line production possibilities frontier, which of the following is true?
- a. The problem of scarcity does not exist.
 - b. Resources are imperfect substitutes.
 - c. Opportunity costs are constant.
 - d. Technology is rapidly expanding.
 - e. Some resources are not being used efficiently.

ANSWER: c

132. Any movement along the production possibilities frontier involves the production of
- a. more of both goods
 - b. more of one good and less of the other
 - c. less of both goods
 - d. more resources
 - e. better technology

ANSWER: b

Exhibit 2-6

Chapter 02—Economic Tools and Economics Systems

133. In Exhibit 2-5, the opportunity cost of moving from point b to d is

- a. 30 mufflers
- b. 50 mufflers
- c. 100 socks
- d. 150 socks
- e. 250 socks

ANSWER: c

134. In Exhibit 2-5, if society moves from point c to point d, society

- a. gains 100 socks
- b. loses 30 mufflers
- c. is worse off after the change in production
- d. is not operating efficiently
- e. experiences some unemployment of resources

ANSWER: b

135. On a production possibilities frontier, the opportunity cost of one more unit of a commodity per time period is measured by the

- a. monetary price of the commodity
- b. amount of the other commodity that must be sacrificed
- c. amount of unemployed resources that must be used
- d. amount of satisfaction it gives consumers
- e. amount of tax paid to government for production, sale, and use of the commodity

ANSWER: b

136. A production possibilities frontier will shift outward if there is an improvement in technology.

- a. True
- b. False

ANSWER: a

137. A production possibilities frontier will shift inward if there is more unemployment of labor.

- a. True
- b. False

ANSWER: b

138. Increases in resources or improvements in technology will cause the production possibilities frontier to

- a. shift outward
- b. shift inward
- c. become a straight line
- d. become horizontal
- e. become vertical

ANSWER: a

139. Which of the following would shift the production possibilities frontier outward?

Chapter 02—Economic Tools and Economics Systems

- a. an increase in the size of the labor force
- b. more efficient use of existing resources and technology
- c. the government prints more money
- d. the end of a strike by a labor union
- e. society's desire to produce more of one of the goods

ANSWER: a

140. Which of the following would *not* shift the production possibilities frontier?

- a. an increase in worker training
- b. a war that destroyed many buildings
- c. a technological improvement that improved fuel efficiency in cars
- d. a decrease in the size of the labor force
- e. a change to a more inefficient production process

ANSWER: e

141. Which of the following would shift the production possibilities frontier outward?

- a. a reduction in inefficiency
- b. a reduction in the size of the labor force
- c. an improvement in technology
- d. a change in the combination of goods produced
- e. increasing opportunity costs

ANSWER: c

142. An improvement in technology

- a. will always result in a parallel shift of the production possibilities frontier
- b. will never result in a parallel shift of the production possibilities frontier
- c. will be indicated as a movement along the production possibilities frontier
- d. will shift the production possibilities frontier outward but not necessarily to a parallel position
- e. may not shift the production possibilities frontier

ANSWER: d

143. An improvement in technology would

- a. enable the economy to produce outside its original production possibilities frontier
- b. enable the economy to move along its original production possibilities frontier
- c. eliminate scarcity; therefore, the production possibilities frontier would no longer exist
- d. have no effect on the production possibilities frontier
- e. change the production possibilities frontier to a line with a positive slope

ANSWER: a

144. A production possibilities frontier can shift outward for all of the following reasons *except one*. Which is the exception?

- a. a decrease in the unemployment rate
- b. an improvement in labor skills

Chapter 02—Economic Tools and Economics Systems

- c. an improvement in technology
- d. a larger work force
- e. a larger capital stock

ANSWER: a

145. A production possibilities frontier can shift inward if there is

- a. an increase in the unemployment rate
- b. mandatory retirement at age 55
- c. an improvement in technology
- d. a larger work force
- e. a larger capital stock

ANSWER: b

Exhibit 2-7

146. Which of the following would cause the production possibilities frontier in Exhibit 2-6 to shift from AA to BA?

- a. a drought that affected food production but had no effect on education
- b. a technological improvement in education that had no effect on food production
- c. a technological improvement in food production that had no effect on education
- d. a disease that affected students' ability to learn (and therefore education) but not food production
- e. an increase in the size of the labor force that affected both food production and education

ANSWER: a

Exhibit 2-8

Chapter 02—Economic Tools and Economics Systems

147. Current production at which labeled point in Exhibit 2-7 would lead to the largest outward shift in the production possibilities frontier in a later year?

- a. point a because this point represents a greater consumption level than point b
- b. point b because this point represents greater total production than the other two points
- c. point c because this point represents a greater consumption level than the other two points
- d. point b because this point represents greater production of capital than point c
- e. point c because this point represents greater production of capital than the other two points

ANSWER: e

148. The production possibilities frontier will shift if there is a change in

- a. technology
- b. unemployment
- c. product prices
- d. society's preferences for commodities
- e. the quantities of the two goods being produced

ANSWER: a

149. The production possibilities frontier represents all desirable combinations of two goods

- a. True
- b. False

ANSWER: b

150. The reason that the production possibilities frontier is usually a bow-shaped curve instead of a straight line is that

- a. it makes it easier to illustrate the concepts of scarcity and prices with a bow-shaped curve than it is with a straight line
- b. early economists began drawing them in this way and the convention has continued throughout the years
- c. output eventually reaches a maximum and then declines
- d. resources are not perfectly adaptable to the production of all goods
- e. the frontier will shift outward over time

ANSWER: d

151. The production possibilities frontier can be used to show all of the following *except one*. Which is the exception?

Chapter 02—Economic Tools and Economics Systems

- a. scarcity
- b. opportunity cost
- c. the law of increasing opportunity cost
- d. efficiency
- e. the best combination of goods and services for an economy

ANSWER: e

152. An outward shift of the production possibilities frontier

- a. reflects economic stability
- b. reflects economic growth
- c. reflects economic decline
- d. does not relate to the state of the economy
- e. is always a parallel shift

ANSWER: b

153. Which of the following *cannot* be determined from a nation's position relative to its production possibilities frontier?

- a. whether it is producing efficiently
- b. whether it has unemployed resources
- c. the opportunity cost of each good illustrated
- d. the society's relative preferences regarding each good illustrated
- e. the price of each good illustrated

ANSWER: e

154. The economic question of "what to produce" is often referred to as the distribution question.

- a. True
- b. False

ANSWER: b

155. Which economic question does the decision to produce butter instead of guns answer?

- a. What to produce?
- b. How to produce?
- c. For whom to produce?
- d. Who has a comparative advantage in gun production?
- e. Who has an absolute advantage in butter production?

ANSWER: a

156. If dairy farmers use automatic milking machines instead of milking by hand, which economic question does their decision answer?

- a. What to produce?
- b. How to produce?
- c. For whom to produce?
- d. Who has a comparative advantage in milking?
- e. What is the price of milk?

Chapter 02—Economic Tools and Economics Systems

ANSWER: b

157. Which economic question does the decision to give all of the butter the economy produces to the homeless answer?

- a. What to produce?
- b. How to produce?
- c. For whom to produce?
- d. Who has a comparative advantage in butter production?
- e. Who has an absolute advantage in butter production?

ANSWER: c

158. Every economy must answer each of the following questions *except one*. Which is the exception?

- a. Which goods will be produced?
- b. Why are these particular goods produced?
- c. Which resources should be used?
- d. How should resources be combined to produce each product?
- e. Who will actually consume the goods produced?

ANSWER: b

159. The economic question of what will be produced is

- a. primarily answered by the government in a system of pure capitalism
- b. primarily answered by markets in a command economy
- c. faced by all economies regardless of their wealth
- d. does not have to be answered by economies possessing great wealth
- e. cannot be illustrated by the economic concept of the production possibilities frontier

ANSWER: c

160. The set of mechanisms and institutions that resolve the basic economic questions is called the

- a. economic system
- b. production possibilities dilemma
- c. business resolution device
- d. absolute advantage determination
- e. comparative advantage determination

ANSWER: a

161. An economic system

- a. must answer the three economic questions to the satisfaction of everyone in society
- b. must not allow some members of society to gain an unfair advantage when answering the three economic questions
- c. must choose pure capitalism to adequately answer the three economic questions
- d. is a set of social institutions and mechanisms organized to answer the three economic questions
- e. can address problems of scarcity only by embracing the social institution of private property

ANSWER: d

162. Of the various types of economic systems, pure market capitalism involves the greatest government interference and

Chapter 02—Economic Tools and Economics Systems

control over the economy.

- a. True
- b. False

ANSWER: b

163. One flaw of pure capitalism is that a person who owns no resources could starve.

- a. True
- b. False

ANSWER: a

164. Which of the following is *not* a characteristic of pure capitalism?

- a. private property rights
- b. competitive markets
- c. laissez-faire policies
- d. central planning
- e. a reliance on prices to direct resources to their best uses

ANSWER: d

165. Adam Smith's term, "the invisible hand," refers to

- a. the hidden role of government in setting regulations that govern trading in markets
- b. the most capable entrepreneurs in the economy
- c. market forces
- d. the unseen work of the financial markets that facilitates trade
- e. the role of technological change and random events in the economy

ANSWER: c

166. A major distinguishing feature between capitalist and socialist (or command) economies is that

- a. under capitalism the average citizen is always wealthier than in socialist economies
- b. decision making is typically decentralized in socialist economies and is centralized in capitalist economies
- c. socialist countries all have red flags and capitalistic economies do not
- d. resources are publicly owned in capitalist economies
- e. decision making is typically decentralized under capitalism while it is centralized in command economies

ANSWER: e

167. Adam Smith believed that people's pursuit of their own self-interests

- a. tended to promote the general welfare
- b. required the government's "invisible hand" to keep the economy running smoothly
- c. might cause aggregate demand to be greater than aggregate supply
- d. would increase the wealth of a nation, which was the quantity of gold and silver it owned
- e. would decrease the wealth of a nation, which was its ability to produce goods and services

ANSWER: a

168. Pure capitalism and a pure command system represent

- a. two different ways of answering the basic economic questions

Chapter 02—Economic Tools and Economics Systems

- b. two names describing the same method of answering the basic economic questions
- c. the only two ways of answering the basic economic questions
- d. the most efficient ways to answer the basic economic questions
- e. none of the above

ANSWER: a

169. Which of the following is a characteristic of pure capitalism?

- a. all resources are owned communally
- b. economic activity is coordinated by government decision makers
- c. the price system is used to guide resources to their highest-valued uses
- d. centralized economic planning is used to answer the basic economic questions
- e. individual choices are reflected only through collective decisions

ANSWER: c

170. The "invisible hand" described by Adam Smith refers to the

- a. allocative role of markets and market forces
- b. importance of government intervention and central planning
- c. actions of successful entrepreneurs in directing the economy
- d. role of monopolized industries in leading the nation
- e. value of religious belief in creating an ideal economy

ANSWER: a

171. Inefficiency is a flaw of a command economy because there is less incentive for resources to flow to their highest-valued uses.

- a. True
- b. False

ANSWER: a

172. In a command economy

- a. a dictator makes every economic decision
- b. owners can sell their resources to the highest bidder
- c. no individual or group coordinates the economy
- d. in theory, individual choices are reflected in collective decisions, and decisions are made by central planners
- e. public ownership of resources is combined with free markets to direct economic activity

ANSWER: d

173. Which of the following is a characteristic of a pure command economy?

- a. all resources are privately owned
- b. economic activity is coordinated by the price system
- c. competitive markets guide resources to their highest-valued uses
- d. centralized economic planning is used to answer the basic economic questions
- e. economic choices are voluntary and are based on rational self-interest

ANSWER: d

Chapter 02—Economic Tools and Economics Systems

174. One of the most centrally planned economies in the world today is found in

- a. the United States
- b. Germany
- c. Canada
- d. Japan
- e. North Korea

ANSWER: e

175. The primary differences in economic structure among different countries relate to ownership of resources and the manner in which economic activities are coordinated.

- a. True
- b. False

ANSWER: a

176. The U.S. economy is best characterized as

- a. pure capitalism
- b. a command economy
- c. socialism
- d. a mixed capitalist economy
- e. market socialism

ANSWER: d

177. The mixed economy is the dominant economic system in the world because

- a. custom and religion have no influence on economic decisions in these systems
- b. pure capitalist economies have placed more control in the hands of individuals in recent years
- c. there is public (i.e., governmental) ownership of resources but regulation of government by individuals reduces some of the flaws of pure capitalism
- d. there is private ownership of property but government regulation of individuals reduces some of the flaws of pure capitalism
- e. governments in pure command economies have increased their control over decision-making in recent years

ANSWER: d

178. A mixed capitalist economy is one in which

- a. decisions are based primarily on religion or custom
- b. all resources are publicly owned and economic planning is centralized
- c. all resources are privately owned and prices are used to coordinate economic activity
- d. resources are both publicly and privately owned and some markets are regulated
- e. all resources are publicly owned and prices are used to coordinate economic activity

ANSWER: d

179. The opportunity cost of going to college consists of more than just the tuition that will be paid.

- a. True
- b. False

ANSWER: a

Chapter 02—Economic Tools and Economics Systems

180. When faced with a choice, a person assesses alternatives as long as the expected marginal _____ of gathering more information about the person's opinions _____ the expected marginal _____.

- a. benefit, is less than, cost
- b. cost, exceeds, benefit
- c. benefit, exceeds, cost
- d. benefit, is greater than, benefit
- e. cost, is greater than, benefit

ANSWER: c

181. The law of comparative advantage does not apply to

- a. entire nations
- b. natural resources like air and sunshine
- c. individuals
- d. firms
- e. regions of a country

ANSWER: b

182. All of the following are evidence of specialization except

- a. a solo carpenter who builds a whole bedroom set
- b. restaurants that range from subs to sushi
- c. the credits at the end of a movie
- d. professional mourners in Taiwan
- e. online sellers

ANSWER: a

183. Just as resources are scarce for the individual,

- a. they are also scarce for the economy as a whole
- b. they are never scarce for the economy as a whole
- c. they are randomly abundant for other individuals
- d. there will be zero resources available for the economy as a whole
