TEST BANK

Essentials of Comparative Politics

FIFTH EDITION

W. W. Norton & Company has been independent since its founding in 1923, when William Warder Norton and Mary D. Herter Norton first published lectures delivered at the People's Institute, the adult education division of New York City's Cooper Union. The firm soon expanded its program beyond the Institute, publishing books by celebrated academics from America and abroad. By midcentury, the two major pillars of Norton's publishing program—trade books and college texts—were firmly established. In the 1950s, the Norton family transferred control of the company to its employees, and today—with a staff of four hundred and a comparable number of trade, college, and professional titles published each year—W. W. Norton & Company stands as the largest and oldest publishing house owned wholly by its employees. Copyright © 2015 by W. W. Norton & Company, Inc.

PREFACE

The Test Bank is designed to help instructors create their ideal mix of questions for quizzes or exams. Each question assesses a specific chapter-learning goal and is written with clear and concise language that matches the difficulty level of the question. Each chapter goal is assessed with questions across the appropriate levels of Bloom's Taxonomy. By asking students questions that vary in both taxonomy and level of difficulty, instructors can evaluate how well students understand specific concepts and how skilled they are at applying these concepts to hypothetical and real-world scenarios.

ASSESSMENT INFORMATION

Every question is labeled with six levels of metadata to allow instructors to assess their students. These metadata tags are:

ANS: This is the correct answer for each question.

DIF: This is the level of difficulty assigned to the problem. For more information, please see "Difficulty Levels" below.

REF: This is the main section in the textbook chapter from which the question is drawn.

OBJ: This is the chapter-learning goal from the textbook that the question tests.

MSC: This is the level of Bloom's Taxonomy that the question is designed to test. For more information, please see "Bloom's Taxonomy" below.

BLOOM'S TAXONOMY

We have focused on the levels of Bloom's taxonomy that are most relevant to political science and are most reliably assessed through the types of questions included in this test bank. As a result, we have included five levels of the taxonomy in the metadata.

- **1. Remembering** questions test declarative knowledge, including textbook definitions and the relationships between two or more pieces of information. Can students recall or remember the information in the same form it was learned?
- 2. Understanding questions pose problems in a context different from the one in which the material was learned, requiring students to draw from their declarative and/or procedural understanding of important concepts. Can students explain ideas or concepts?
- **3. Applying** questions ask students to draw from their prior experience and use critical thinking skills to reason about the real world. Can students use learned information in new situations?
- **4. Analyzing** questions test students' ability to break down information and see how different elements relate to each other and to the whole. Can students distinguish among different parts of a process?
- **5. Evaluating** questions ask students to assess and judge information. Can students make decisions and distinguish between valid and invalid claims?

DIFFICULTY LEVELS

Along with Bloom's Taxonomy, each question is tagged to a level of difficulty so that instructors can choose how to sort and categorize questions. We understand that what one instructor or student finds difficult might not equate with someone else's perspective. However, many instructors do find this basic classification useful as a starting point in balancing their quizzes and exams, so we have tried to be as objective as possible by using the following criteria to decide the level of difficulty for each question.

- **1. Easy** questions require students to demonstrate a basic understanding of the concepts, definitions, and examples presented in the textbook.
- **2. Moderate** questions direct students to use critical thinking skills and to demonstrate a strong understanding of core concepts independent of specific textbook examples or definitions.
- 3. Difficult questions ask students to synthesize textbook concepts to make analytical inferences or to evaluate claims.

CHAPTER 1: Introduction

MULTIPLE CHOICE

1.	An	institution	can b	e def	ined as	s any:
----	----	-------------	-------	-------	---------	--------

- a. organization or activity that is self-perpetuating and valued for its own sake.
- large, monolithic organization that depends on a core bureaucracy and a set of standard operating procedures.
- c. object or value that people support through public funds.
- d. organization or action that is subject to government regulation.
- e. spontaneous movement that is unable to sustain itself.

ANS: A DIF: Easy REF: What Is Comparative Politics?

OBJ: Define the role and importance of institutions in political life.

MSC: Remembering

2. *Politics* is defined in the text as the:

- a. ability to impose your values on others.
- b. struggle in any group for the power to make decisions for the larger group.
- c. battle over economic resources and their use.
- d. result of conflict between cultures.
- e. relationship between international actors.

ANS: B DIF: Easy REF: What Is Comparative Politics?

OBJ: Explain the methods political scientists use to understand politics around the world.

MSC: Remembering

3. What is deductive reasoning?

- a. the means by which we go from a hypothesis to studying evidence
- b. the means by which we go from studying a single case to generating a hypothesis
- c. the means by which we test evidence using logic and mathematics
- d. the means by which we test evidence using extensive field research
- e. the means by which we use ideological assumptions to create policy

ANS: A DIF: Easy REF: What Is Comparative Politics?

OBJ: Explain the methods political scientists use to understand politics around the world.

MSC: Remembering

What is inductive reasoning?

- a. the means by which we go from a hypothesis to studying a number of cases

- 17. One big rift within the study of comparative politics is:
 - a. quantitative versus didactic research.
 - b. epistemology versus ontology.
 - c. religious versus secular research.
 - d. quantitative versus qualitative research.
 - e. structural versus ideational.
 - ANS: D DIF: Easy REF: What Is Comparative Politics?

OBJ: Discuss whether comparative politics can be more scientific and predict political outcomes.

MSC: Remembering

- 18. Which of the following statements about game theory is accurate?
 - a. It assumes rational, predictable behavior by individual human beings.
 - b. It is most closely associated with qualitative methods of research.
 - c. Its primary political actor of focus is the institution.
 - d. It considers cultural factors to be a major determinant of human political choices.
 - e. It demonstrates a bias against western political thought.
 - ANS: A DIF: Moderate REF: What Is Comparative Politics?

OBJ: Discuss whether comparative politics can be more scientific and predict political outcomes.

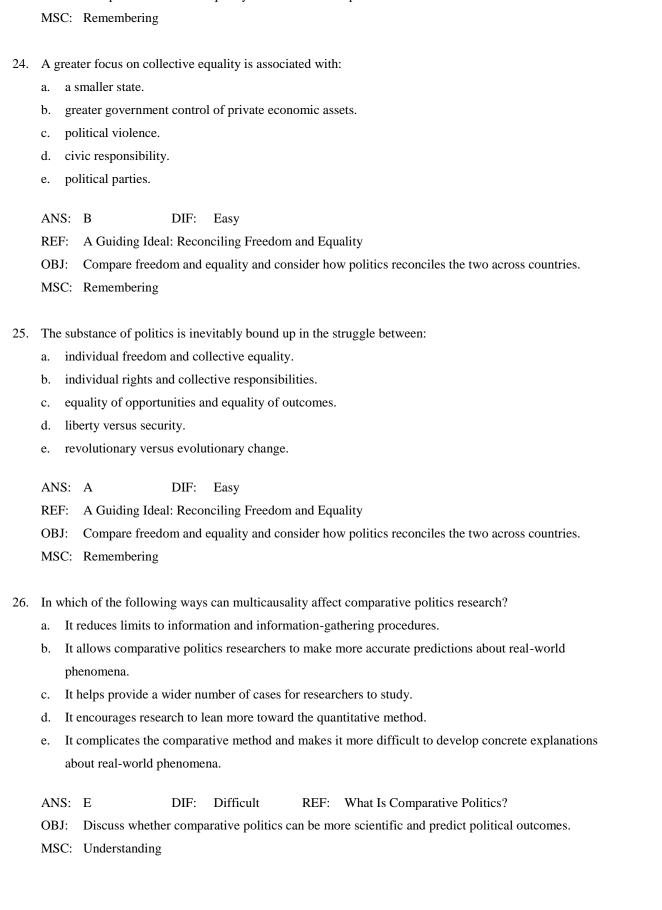

MSC: Understanding

- 19. Which of the following best describes the current trend in comparative politics research?
 - a. There is hopeful talk of moving away from models that describe politics, but much research in comparative politics remains descriptive and focused on a single country.
 - An evolution toward models that analyze politics and compare its role in different countries—inductively, deductively, qualitatively, and quantitatively—is well under way.
 - c. There has been a strong trend in comparative politics toward using quantitative methodologies to the near-total exclusion of qualitative methods.
 - d. Most comparative politics scholars use full mixed-methods models to conduct research.
 - e. There is a new emphasis among comparative politics researchers on building their research around the promotion of a particular ideal.
