Chapter 2 Thinking Like an Economist

MULTIPLE CHOICE

1. Which of the following is *not* correct?
   a. Economists use some familiar words in specialized ways.
   b. Economics has its own language and its own way of thinking, but few other fields of study do.
   c. Supply, demand, elasticity, comparative advantage, consumer surplus, and deadweight loss are all terms that are part of the economist's language.
   d. The value of the economist's language lies in its ability to provide you with a new and useful way of thinking about the world in which you live.

ANS: B PTS: 1 DIF: 2 REF: 2-0
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economics MSC: Interpretive

2. Economists use some familiar terms in specialized ways
   a. to make the subject sound more complex than it is.
   b. because every respectable field of study has its own language.
   c. to provide a new and useful way of thinking about the world.
   d. because it was too difficult to come up with new terms.

ANS: C PTS: 1 DIF: 1 REF: 2-0
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economics MSC: Interpretive

THE ECONOMIST AS SCIENTIST

1. Economists, like mathematicians, physicists, and biologists,
   a. make use of the scientific method.
   b. try to address their subject with a scientist's objectivity.
   c. devise theories, collect data, and then analyze these data in an attempt to verify or refute their theories.
   d. All of the above are correct.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

2. The essence of science is
   a. the laboratory experiment.
   b. the scientific method.
   c. the study of nature, but not the study of society.
   d. All of the above are correct.

ANS: B PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Scientific method MSC: Definitional

3. The scientific method is
   a. the use of modern technology to understand the way the world works.
   b. the use of controlled laboratory experiments to understand the way the world works.
   c. the dispassionate development and testing of theories about how the world works.
   d. the search for evidence to support preconceived theories about how the world works.

ANS: C PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Scientific method MSC: Definitional

4. The scientific method is applicable to studying
   a. natural sciences, but not social sciences.
   b. social sciences, but not natural sciences.
   c. both natural sciences and social sciences.
   d. None of the above is correct.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Scientific method MSC: Interpretive

5. Who said, "The whole of science is nothing more than the refinement of everyday thinking"?
   a. Isaac Newton
   b. Albert Einstein
   c. Adam Smith
   d. Benjamin Franklin

ANS: B PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Scientific method MSC: Definitional

6. Albert Einstein once made the following observation about science:
   a. "The whole of science is nothing more than the refinement of everyday thinking."
   b. "The whole of science is nothing more than an interesting intellectual exercise."
   c. "In order to understand science, one must rely solely on abstraction."
   d. "In order to understand science, one must transcend everyday thinking."

ANS: A PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Scientific method MSC: Definitional

7. Sir Isaac Newton's development of the theory of gravity after observing an apple fall from a tree is an example of
   a. a controlled experiment that lead to the formulation of a scientific theory.
   b. being in the right place at the right time.
   c. an idea whose time had come.
   d. the interplay between observation and theory in science.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Scientific method MSC: Interpretive

8. Which of the following is an example of using the scientific method with a natural experiment?
   a. Measuring how long it takes a marble to fall from a ten story building.
   b. Comparing plant growth with and without a soil additive.
   c. Tracking the price of oil when a war in the Middle East interrupts the flow of crude oil.
   d. Observing the reaction when two chemicals are mixed together.

ANS: C PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Natural experiment MSC: Applicative

9. The goal of an economist who formulates new theories is to
   a. provide an interesting framework of analysis, whether or not the framework turns out to be of much use in understanding how the world works.
   b. provoke stimulating debate in scientific journals.
   c. contribute to an understanding of how the world works.
   d. demonstrate that economists, like other scientists, can formulate testable theories.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

10. Which of the following statements applies to economics, as well as to other sciences such as physics?
    a. Experiments are considered valid only when they are conducted in a laboratory.
    b. Good theories do not need to be tested.
    c. Real-world observations often lead to theories.
    d. Economics, as well as other sciences, is concerned primarily with abstract concepts.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

11. With respect to how economists study the economy, which of the following statements is most accurate?
    a. Economists study the past, but they do not try to predict the future.
    b. Economists use "rules of thumb" to predict the future.
    c. Economists devise theories, collect data, and analyze the data to test the theories.
    d. Economists use controlled experiments in much the same way that biologists and physicists do.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

12. Economists face an obstacle that many other scientists do not face. What is that obstacle?
    a. It is often difficult to formulate theories in economics.
    b. It is often difficult and sometimes impossible to perform experiments in economics.
    c. Economics cannot be addressed objectively; it must be addressed subjectively.
    d. The scientific method cannot be applied to the study of economics.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

13. In conducting their research, economists face an obstacle that not all scientists face; specifically, in economics, it is often difficult and sometimes impossible to
    a. make use of theory and observation.
    b. rely upon the scientific method.
    c. conduct laboratory experiments.
    d. find articles or books that were written before 1900.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

14. The use of theory and observation is more difficult in economics than in sciences such as physics due to the difficulty in
    a. performing an experiment in an economic system.
    b. applying mathematical methods to economic analysis.
    c. analyzing available data.
    d. formulating theories about economic events.

ANS: A PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

15. Which of the following statements is (are) correct?
    a. Relative to some other scientists, economists find it more difficult to conduct experiments.
    b. Theory and observation are important in economics as well as in other sciences.
    c. To obtain data, economists often rely upon the natural experiments offered by history.
    d. All of the above are correct.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

16. Because it is difficult for economists to use experiments to generate data, they generally must
    a. do without data.
    b. substitute assumptions for data when data are unavailable.
    c. rely upon hypothetical data that were previously concocted by other economists.
    d. use whatever data the world gives them.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

17. Which of the following statements is correct?
    a. Economists almost always find it easy to conduct experiments in order to test their theories.
    b. Economics is not a true science because economists are not usually allowed to conduct experiments to test their theories.
    c. Economics is a social science rather than a true science because it cannot employ the scientific method.
    d. Economists are usually not able to conduct experiments, so they must rely on natural experiments offered by history.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

18. Instead of conducting laboratory experiments to generate data to test their theories, economists often
    a. ask winners of the Nobel Prize in Economics to evaluate their theories.
    b. argue that data is impossible to collect in economics.
    c. gather data from historical episodes of economic change.
    d. assume that data would support their theories.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

19. The most common data for testing economic theories come from
    a. carefully controlled and conducted laboratory experiments.
    b. computer models of economies.
    c. historical episodes of economic change.
    d. centrally planned economies.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

20. In conducting their research, economists often substitute historical events and historical episodes for
    a. theories and observations.
    b. laboratory experiments.
    c. models.
    d. assumptions.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

21. For economists, substitutes for laboratory experiments often come in the form of
    a. natural experiments offered by history.
    b. untested theories.
    c. "rules of thumb" and other such conveniences.
    d. reliance upon the wisdom of elders in the economics profession.

ANS: A PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

22. Economists regard events from the past as
    a. irrelevant, since history is unlikely to repeat itself.
    b. of limited interest, since those events seldom provide any useful economic data.
    c. interesting but not particularly valuable, since those events cannot be used to evaluate present-day economic theories.
    d. interesting and valuable, since those events are capable of helping us to understand the past, the present, and the future.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

23. For economists, historical episodes
    a. are not worthy of study because they offer few insights into current economic events and problems.
    b. are not worthy of study because laboratory experiments provide more reliable data.
    c. are worthy of study because economists rely entirely on observation, rather than on theory.
    d. are worthy of study because they serve as valuable substitutes for laboratory experiments.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

24. Historical episodes are
    a. valuable to economists because they allow economists to see how the science of economics has evolved.
    b. valuable to economists because they allow economists to evaluate economic theories.
    c. not of concern to economists because economics is about predicting the future, not dwelling on the past.
    d. not of concern to economists because the exact circumstances of historical episodes are unlikely to be observed again.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

25. One thing economists do to help them understand how the real world works is
    a. make assumptions.
    b. ignore the past.
    c. try to capture every aspect of the real world in the models they construct.
    d. All of the above are correct.

ANS: A PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Interpretive

26. Economists make assumptions in order to
    a. mimic the methodologies employed by other scientists.
    b. minimize the number of experiments that yield no useful data.
    c. minimize the likelihood that some aspect of the problem at hand is being overlooked.
    d. focus their thinking on the essence of the problem at hand.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Interpretive

27. Economists make use of assumptions, some of which are unrealistic, for the purpose of
    a. teaching economics to people who have never before studied economics.
    b. advancing their political agendas.
    c. developing models when the scientific method cannot be used.
    d. focusing their thinking.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Interpretive

28. For an economist, the idea of making assumptions is regarded generally as a
    a. bad idea, since doing so leads to the omission of important ideas and variables from economic models.
    b. bad idea, since doing so invariably leads to data-collection problems.
    c. good idea, since doing so helps to simplify the complex world and make it easier to understand.
    d. good idea, since economic analysis without assumptions leads to complicated results that the general public finds hard to understand.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Interpretive

29. Economists make assumptions to
    a. provide issues for political discussion.
    b. make a complex world easier to understand.
    c. make it easier to teach economic concepts and analysis.
    d. create policy alternatives that are incomplete or subject to criticism.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Definitional

30. A circular-flow model and production possibilities frontier are similar in that
    a. neither allows economic analysis to occur.
    b. neither can be represented visually on a graph.
    c. both make use of assumptions.
    d. both make use of complex equations to arrive at solutions.

ANS: C PTS: 1 DIF: 3 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economic models MSC: Interpretive

31. An economic theory about international trade that is based on the assumption that there are only two countries trading two goods
    a. is useless, since the real world has many countries trading many goods.
    b. can be useful only in situations involving two countries and two goods.
    c. can be useful in the classroom, but is useless in the real world.
    d. can be useful in helping economists understand the complex world of international trade involving many countries and many goods.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Interpretive

32. The art in scientific thinking -- whether in chemistry, economics, or biology -- is
    a. the design and implementation of laboratory experiments.
    b. knowing when to stop collecting data and when to start analyzing the data.
    c. deciding which assumptions to make.
    d. being able to mathematically model natural phenomena.

ANS: C PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Definitional

33. The art in scientific thinking is
    a. finding the right problem to study.
    b. deciding which assumptions to make.
    c. the ability to make an abstract subject easy to understand.
    d. not something in which economists have to be skilled.

ANS: B PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Definitional

34. The decision of which assumptions to make is
    a. an easy decision for an economist, but a difficult decision for a physicist or a chemist.
    b. not a particularly important decision for an economist.
    c. usually regarded as an art in scientific thinking.
    d. usually regarded as the easiest part of the scientific method.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Interpretive

35. An example of a price that changes only infrequently is the price of
    a. stocks on the New York Stock Exchange.
    b. crude oil.
    c. residential real estate.
    d. magazines sold at newsstands.

ANS: D PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions | Prices MSC: Definitional

36. When studying the effects of public policy changes, economists
    a. always refrain from making assumptions.
    b. sometimes make different assumptions about the short run and the long run.
    c. consider only the direct effects of those policy changes and not the indirect effects.
    d. consider only the short-run effects of those policy changes and not the long-run effects.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Public policy | Assumptions | Short run | Long run MSC: Interpretive

37. When studying the effects of changes in public policy, economists believe that
    a. it is important to distinguish between the short run and the long run.
    b. the assumptions used in studying those effects should be the same for the short run as for the long run.
    c. the short-run effects of those changes are always more beneficial to society than are the long-run effects.
    d. the long-run effects of those changes are always more beneficial to society than are the short-run effects.

ANS: A PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Public policy | Short run | Long run MSC: Interpretive

38. A model can be accurately described as a
    a. theoretical abstraction with very little value.
    b. device that is useful only to the people who created it.
    c. realistic and carefully constructed theory.
    d. simplification of reality.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

39. Which of the following statements about models is correct?
    a. The more details a model includes, the better the model.
    b. Models assume away irrelevant details.
    c. Models cannot be used to explain how the economy functions.
    d. Models cannot be used to make predictions.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

40. In building economic models, economists often omit
    a. assumptions.
    b. theories.
    c. details.
    d. equations.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

41. Which of the following statements about economic models is correct?
    a. Economic models are built to mirror reality exactly.
    b. Economic models are useful, but they should not be used for the purpose of improving public policies.
    c. Because economic models omit many details, they allow us to see what is truly important.
    d. Economic models seldom incorporate equations or diagrams.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

42. Economic models
    a. cannot be useful if they are based on false assumptions.
    b. were once thought to be useful, but that is no longer true.
    c. must incorporate all aspects of the economy if they are to be useful.
    d. can be useful, even if they are not particularly realistic.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

43. Which of the following is *not* correct about most economic models?
    a. They are composed of equations and diagrams.
    b. They contribute very little to economists' understanding of the real world.
    c. They omit many features of the real-world economy.
    d. In constructing models, economists make assumptions.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

44. Economic models
    a. are constructed to mirror reality as closely as possible, and in this respect economic models are no different from other scientific models.
    b. are constructed to mirror reality as closely as possible, and in this respect economic models are very different from other scientific models.
    c. are simplifications of reality, and in this respect economic models are no different from other scientific models.
    d. are simplifications of reality, and in this respect economic models are very different from other scientific models.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

45. Economic models
    a. are not useful because they omit many real-world details.
    b. are usually composed of diagrams and equations.
    c. are useful because they do not omit any real-world details.
    d. are usually plastic representations of the economy.

ANS: B PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Definitional

46. Just like models constructed in other areas of science, economic models
    a. incorporate assumptions that contradict reality.
    b. incorporate all details of the real world.
    c. complicate reality.
    d. avoid the use of diagrams and equations.

ANS: A PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

47. Which types of models are built with assumptions?
    a. economic models, but not models in other disciplines such as physics and biology
    b. economic models as well as models in other disciplines such as physics and biology
    c. models that are built for teaching purposes but not for research purposes
    d. bad models

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

48. An assumption an economist might make while studying international trade is
    a. there are only two countries.
    b. countries only produce two goods.
    c. technology does not change.
    d. All of the above are possible assumptions.

ANS: D PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Assumptions MSC: Applicative

49. Economists build economic models by
    a. generating data.
    b. conducting controlled experiments in a lab.
    c. making assumptions.
    d. reviewing statistical forecasts.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

50. Economic models are built with
    a. recommendations concerning public policies.
    b. facts about the legal system.
    c. assumptions.
    d. statistical forecasts.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

51. In constructing models, economists
    a. leave out equations, since equations and models tend to contradict one another.
    b. ignore the long run, since models are useful only for short-run analysis.
    c. sometimes make assumptions that are contrary to features of the real world.
    d. try to include every feature of the economy.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

52. Economic models
    a. are people who act out the behavior of firms and households so that economists can study this behavior.
    b. are usually detailed replications of reality.
    c. incorporate simplifying assumptions that often contradict reality, but also help economists better understand reality.
    d. are useful to researchers but not to teachers because economic models omit many details of the real-world economy.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

53. Which of the following statements is correct?
    a. Few economic models incorporate assumptions.
    b. Different economic models employ different sets of assumptions.
    c. Good economic models attempt to mimic reality as closely as possible.
    d. Economic models, to be accepted, must be tested by conducting experiments.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

54. Which of these statements about economic models is correct?
    a. For economists, economic models provide insights about the world.
    b. Economic models are built with assumptions.
    c. Economic models are often composed of equations and diagrams.
    d. All of the above are correct.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Economic models MSC: Interpretive

55. The circular-flow diagram is an example of
    a. a laboratory experiment.
    b. an economic model.
    c. a mathematical model.
    d. All of the above are correct.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Circular-flow diagram MSC: Interpretive

56. The circular-flow diagram is a
    a. visual model of the economy.
    b. visual model of the relationships among money, prices, and businesses.
    c. model that shows the effects of government on the economy.
    d. mathematical model of how the economy works.

ANS: A PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Circular-flow diagram MSC: Definitional

57. A circular-flow diagram is a model that
    a. helps to explain how participants in the economy interact with one another.
    b. helps to explain how the economy is organized.
    c. incorporates all aspects of the real economy.
    d. Both (a) and (b) are correct.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Circular-flow diagram MSC: Interpretive

58. The circular-flow diagram
    a. is an economic model.
    b. incorporates two types of decision makers: households and firms.
    c. represents the flows of inputs, outputs, and dollars.
    d. All of the above are correct.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Circular-flow diagram MSC: Interpretive

59. Which of the following statements about the circular-flow diagram is correct?
    a. One must imagine that the economy operates without money in order to make sense of the diagram.
    b. The diagram leaves out details that are not essential for understanding the economic transactions that occur between households and firms.
    c. The government cannot be excluded as a decision maker in a circular-flow diagram.
    d. All of the above are correct.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Circular-flow diagram MSC: Interpretive

60. In the simple circular-flow diagram, the participants in the economy are
    a. firms and government.
    b. households and firms.
    c. households and government.
    d. households, firms, and government.

ANS: B PTS: 1 DIF: 1 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Circular-flow diagram MSC: Definitional

61. Which two groups of decision makers are included in the simple circular-flow diagram?
    a. markets and government
    b. households and government
    c. firms and government
    d. households and firms

ANS: D PTS: 1 DIF: 1 REF: 2-1

NAT: Analytic LOC: Understanding and applying economic models
TOP: Production possibilities frontier MSC: Interpretive

137. The opportunity cost of obtaining more of one good is shown on the production possibilities frontier as the
    a. amount of the other good that must be given up.
    b. market price of the additional amount produced.
    c. amount of resources that must be devoted to its production.
    d. number of dollars that must be spent to produce it.

ANS: A PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Production possibilities frontier | Opportunity cost MSC: Interpretive

138. The bowed shape of the production possibilities frontier can be explained by the fact that
    a. all resources are scarce.
    b. economic growth is always occurring.
    c. the opportunity cost of one good in terms of the other depends on how much of each good the economy is producing.
    d. the only way to get more of one good is to get less of the other.

ANS: C PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Production possibilities frontier | Opportunity cost MSC: Interpretive

139. Economists believe that production possibilities frontiers are often bowed because
    a. trade-offs inevitably create unemployment.
    b. resources are not completely adaptable.
    c. opportunity costs are constant.
    d. of improvements in technology.

ANS: B PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Production possibilities frontier MSC: Interpretive

140. On a bowed production possibilities frontier, as you move down along the curve
    a. more of one good must be given up to receive one unit of the other good.
    b. the available production technology does not change.
    c. the opportunity cost increases.
    d. All of the above are correct.

ANS: D PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Production possibilities frontier MSC: Interpretive

141. When a production possibilities frontier is bowed outward, the opportunity cost of producing an additional unit of a good
    a. increases as more of the good is produced.
    b. decreases as more of the good is produced.
    c. does not change as more of the good is produced.
    d. may increase, decrease, or not change as more of the good is produced.

ANS: A PTS: 1 DIF: 2 REF: 2-1
NAT: Analytic LOC: Understanding and applying economic models
TOP: Production possibilities frontier | Opportunity cost MSC: Interpretive

142. Production possibilities frontiers are usually bowed outward. This is because
    a. the more resources a society uses to produce one good, the fewer resources it has available to produce another good.
    b. it reflects the fact that the opportunity cost of producing a good decreases as more and more of that good is produced.
    c. of the effects of technological change.
    d. resources are specialized; that is, some are better at producing particular goods rather than other goods.

ANS: D PTS: 1 DIF: 3 REF: 2-1

WHY ECONOMISTS DISAGREE

1. "If all economists were laid end to end, they would not reach a conclusion." Who made this whimsical observation?
   a. Harry Truman
   b. George Bernard Shaw
   c. John Maynard Keynes
   d. Ronald Reagan

ANS: B PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

2. President Ronald Reagan once joked that a Trivial Pursuit game designed for economists would
   a. have no questions but hundreds of answers.
   b. have 100 questions and 3,000 answers.
   c. have 1,000 questions but no answers.
   d. never produce a winner.

ANS: B PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

3. Economists sometimes give conflicting advice because
   a. graduate students in economics are encouraged to argue with each other.
   b. economists have different values and scientific judgment.
   c. economists acting as scientists do not like to agree with economists acting as policy advisers.
   d. economics is more of a belief system than a science.

ANS: B PTS: 1 DIF: 2 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

4. The two basic reasons why economists often appear to give conflicting advice to policymakers are differences in
   a. opinions and education.
   b. opinions and values.
   c. scientific judgments and education.
   d. scientific judgments and values.

ANS: D PTS: 1 DIF: 2 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

5. Sometimes economists disagree because their scientific judgments differ. Which of the following instances best reflects this source of disagreement?
   a. One economist believes income tax cuts are unfair to those with low incomes; another economist believes income tax cuts are not unfair to those with low incomes.
   b. One economist believes unemployment causes more human suffering than does inflation; another economist believes inflation causes more human suffering than does unemployment.
   c. One economist believes the policies of the Democratic party offer the best hope for America's future; another economist believes the policies of the Republican party offer the best hope for America's future.
   d. One economist believes increases in the minimum wage increase unemployment; another economist believes increases in the minimum wage do not increase unemployment.

ANS: D PTS: 1 DIF: 2 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

6. Sometimes economists disagree because their values differ. Which of the following instances best reflects this source of disagreement?
   a. One economist believes the North American Free Trade Agreement (NAFTA) has led to a loss of American jobs; another economist disputes this claim.
   b. One economist believes that when income taxes are cut, people will increase their spending; another economist believes that when income taxes are cut, people will increase their saving.
   c. One economist advises against increases in sales taxes because she thinks such increases are unfair to low-income people; another economist disputes the idea that increases in sales taxes are unfair to low-income people.
   d. One economist believes that, prior to the Civil War, slavery contributed to economic growth in the South; another economist believes that slavery held back the South's economic growth.

ANS: C PTS: 1 DIF: 2 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

7. Which of the following is one of the basic reasons why economists often appear to give conflicting advice to policymakers?
   a. similar opinions about the validity of economic theories
   b. significant differences in education
   c. differences in personal values
   d. a reliance on normative statement for research theories

ANS: C PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

8. Erma and Wayne are both economists. Erma thinks that taxing consumption, rather than income, would result in higher household saving because income that is saved would not be taxed. Wayne does not think that household saving would respond much to a change in the tax laws. In this example, Erma and Wayne
   a. have different normative views about tax policy.
   b. disagree about the validity of a positive theory.
   c. must both be incorrect because economists always agree on policy issues.
   d. None of the above is correct.

ANS: B PTS: 1 DIF: 3 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Differences in scientific judgments MSC: Applicative

9. Which of the following statements is correct about the extent of disagreement among economists?
   a. There is a great deal of agreement among economists on virtually every economic issue.
   b. There is a great deal of agreement among economists on many important economic issues.
   c. All disagreements among economists are attributable to differences in their values.
   d. All disagreements among economists are attributable to the fact that different economists have different degrees of faith in the validity of alternative economic theories.

ANS: B PTS: 1 DIF: 2 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

10. A survey which sought the opinion of professional economists on fourteen propositions about economic policy found that
   a. the respondents were almost equally divided on the propositions.
   b. the respondents favored the propositions by a slight margin.
   c. the respondents disagreed with the propositions by a slight margin.
   d. there was overwhelming endorsement of the propositions among the respondents.

ANS: D PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

11. A survey of professional economists revealed that more than three-fourths of them agreed with a number of statements, including which of the following?
    a. Tariffs and import quotas usually reduce general economic welfare.
    b. A large federal budget deficit has an adverse effect on the economy.
    c. Minimum wage increases unemployment among young and unskilled workers.
    d. All of the above are correct.

ANS: D PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

12. A survey of professional economists revealed that more than three-fourths of them agreed with fourteen economic propositions. Which of the following is *not* one of those propositions?
    a. The United States should not restrict employers from outsourcing work to foreign countries.
    b. The United States should withdraw from the North American Free Trade Agreement (NAFTA).
    c. The United States should eliminate agricultural subsidies.
    d. Local and state governments should eliminate subsidies to professional sports franchises.

ANS: B PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

13. A survey of professional economists revealed that more than three-fourths of them agreed with fourteen economic propositions. Which of the following is *not* one of those propositions?
    a. A ceiling on rents reduces the quantity and quality of housing available.
    b. Fiscal policy has a significant stimulative impact on a less than fully employed economy.
    c. The gap between Social Security funds and expenditures will become unsustainably large within the next fifty years if current policies remain unchanged.
    d. The United States should implement universal health care for its citizens.

ANS: D PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

14. Almost all economists agree that rent control
    a. has no effect on the rental income of landlords.
    b. allows the market for housing to work more efficiently.
    c. adversely affects the availability and quality of housing.
    d. is a very inexpensive way to help the most needy members of society.

ANS: C PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

15. Policies such as rent control and trade barriers persist in spite of the fact that economists are virtually united in their opposition to such policies, probably because
    a. economists have not yet convinced the general public that the policies are undesirable.
    b. economists engage in positive analysis, not normative analysis.
    c. economists have values that are different from the values of most non-economists.
    d. economists' theories are not easily confirmed or refuted in laboratory analysis.

ANS: A PTS: 1 DIF: 2 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

16. Policies such as rent control and trade barriers persist
    a. because economists are about evenly divided as to the merits of those policies.
    b. because almost all economists agree that those policies have no discernible economic effects.
    c. because almost all economists agree that those policies are desirable.
    d. despite the fact that almost all economists agree that those policies are undesirable.

ANS: D PTS: 1 DIF: 2 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Interpretive

17. Almost all economists agree that tariffs and import quotas
    a. reduces general economic welfare.
    b. increases general economic welfare.
    c. have no effect on general economic welfare.
    d. stimulate a less than fully employed economy.

ANS: A PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics
TOP: Economists MSC: Definitional

18. Almost all economists agree that local and state governments should
    a. eliminate subsidies to professional sports franchises.
    b. increase subsidies to professional sports franchises.
    c. copy economic policy from Washington, D.C.
    d. prevent companies from outsourcing work.

ANS: A PTS: 1 DIF: 1 REF: 2-3
NAT: Analytic LOC: The study of economics and definitions in economics

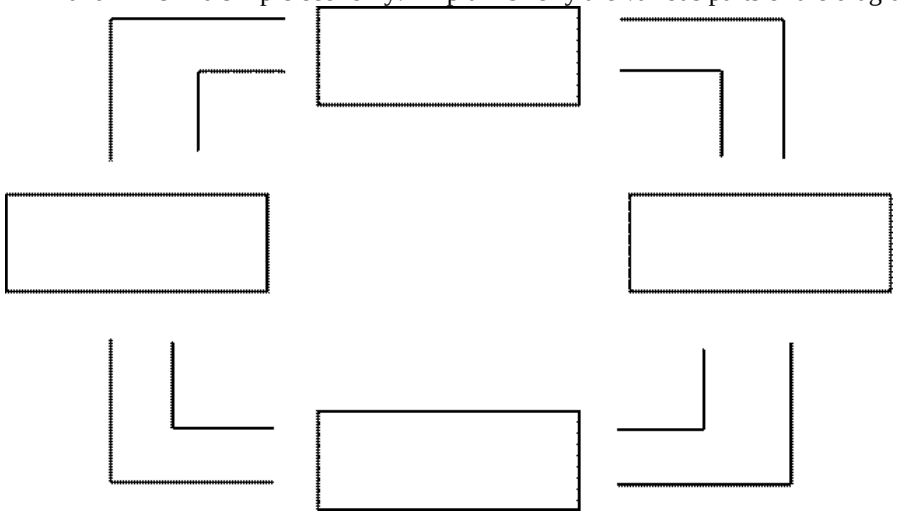
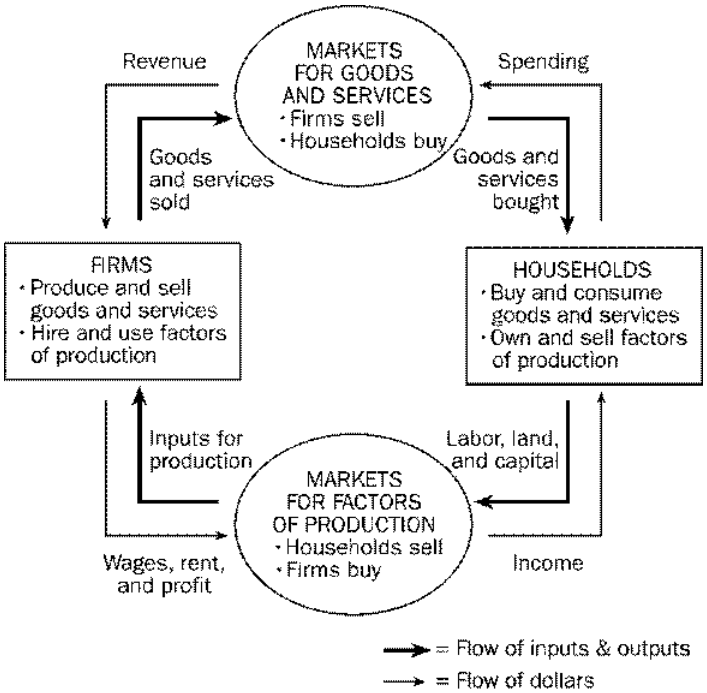
SHORT ANSWER

1. Using the outline below, draw a circular-flow diagram representing the interactions between households and firms in a simple economy. Explain briefly the various parts of the diagram.



ANS:



This diagram should duplicate the essential characteristics of the diagram in the text, with an explanation of the meaning of each flow and each market. It is important that the student understands that the inner loop represents the flow of real goods and services and that the outer loop represents the corresponding flow of payments.

2. The prairie dog has always been considered a problem for American cattle ranchers. They dig holes that cattle and horses can step in, and they eat grass necessary for cattle. Recently, ranchers have discovered that there is a demand for prairie dogs as pets. In some areas, prairie dogs can sell for as high as $150 each. Cattlemen are now fencing off prairie dog towns on their land so these towns will not be disturbed by their cattle.
   Draw a rancher's production possibilities frontier showing increasing opportunity cost of cattle production in terms of prairie dog production. Using a separate graph for each situation, show what would happen to the initial production possibilities frontier in each of the following situations:
   a. The outcome is efficient, with ranchers choosing to produce equal numbers of cattle and prairie dogs.
   b. As a protest against the government introducing the gray wolf back into the wild in their state, ranchers decide to withhold 25 percent of the available grassland for grazing.
   c. The price of prairie dogs increases to $200 each, so ranchers decide to allot additional land for prairie dogs.
   d. The government grants new leases to ranchers, giving them 10,000 new acres of grassland each for grazing.
   e. A drought destroys most of the available grass for grazing of cattle, but not for prairie dogs since they also eat plant roots.

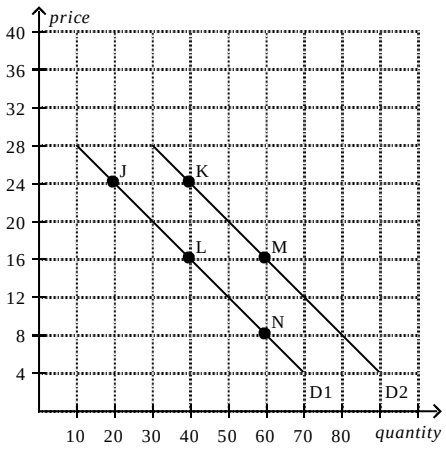
6. Use the following graph to answer the following questions.
   a. How would point J be represented as an ordered pair?
   b. What type of curve is this?
   c. Does this curve show a positive or negative correlation between price and quantity?
   d. Compute the slope of D_1 between points J and L.
   e. What is the slope of D_1 between points L and N? Why would you not have to calculate this answer?
   f. What is it called if we move from D_1 to D_2?
   g. How do you know that the slope of D_2 is the same as the slope of D_1?



ANS:
   a. (20,24)
   b. a demand curve
   c. a negative correlation between price and quantity
   d. -8/20 or -2/5
   e. -2/5; because the slope of a straight line is constant
   f. an increase in demand.
   g. because the 2 lines are parallel
