- A) \$49,700.
- B) \$13,050.
- C) \$20,500.
- D) \$31,100.
- E) \$40,400.

Answer: D

$\text{Cash} + \text{Accounts Receivable} + \text{Supplies} + \text{Equipment} = \text{Accounts Payable} + \text{Stockholders' Equity}$

$\$20,500 + \$7,250 + \$650 + \$12,000 = \$9,300 + \text{Stockholders' Equity}$

Answer: Accounting is an information and measurement system. It identifies, records, and communicates relevant, reliable and comparable information about business activities.

Accounting also includes the crucial process of analysis and interpretation. It is part of our everyday lives, through such activities as banking, paying taxes, and receiving payroll checks. Technology plays a major role in accounting by reducing the time effort and cost or recordkeeping while improving clerical accuracy.

Partnerships are businesses owned by two or more people who are jointly liable for tax and other obligations. Corporations are businesses legally separate from their owners, making them responsible for their own acts and own debts. They conduct business with the rights, duties and responsibilities of a person. Limited liability companies owned by one or more 'members'. 1. In August, a check for \$500 was written to Community Sports. This amount represents soccer camp for his daughter Cassie.
2. Bruce plans a Going Out of Business Sale for June, since he will be closing the business for a month-long vacation in July. He plans to reopen August 1 and will continue operating Buddy's Foreign Automotive indefinitely.
3. Buddy received a shipment of tools from Ontario, Canada. The invoice was stated in Canadian dollars.
4. Sandy Lane paid \$1,500 for a major repair services. The amount was recorded as revenue. The parts for the repair must be ordered from overseas and the service won't be complete until the following month.

Answer: 1. Business entity assumption. Buddy should refund the \$500 to the business or record it as a dividend. In the future, he should use a personal check to pay for soccer camp.

2. Going-concern assumption. Buddy's Foreign Automotive is not going out of business. The business is just closing for vacation. He could hold an appropriate sale to generate extra business before going on vacation.

3. Monetary unit assumption. The invoice should be restated in U.S. dollars for accounting purposes.

4. Revenue recognition principle. Since the service has not been completed, revenue should not be recognized. The \$1,500 should be placed in an account such as Deposits Received from Customers (a type of unearned revenue) until the service is completed.

Answer: Beginning equity = \$80,000; Ending equity = \$260,000

Beginning Assets = Beginning Liabilities + Beginning Equity

Account	Increase	Decrease
Cash.....	\$25,000	
Accounts receivable		\$(5,000)
Accounts payable		(11,000)
Notes payable.....	16,000	

Except for net income, an investment of \$3,000 by stockholders, and a cash dividend of \$11,000 to stockholders, no other items affected stockholders' equity. Using the balance sheet equation, compute net income for the past year.

Answer: \$23,000

Assets = Liabilities + Stockholders' Equity

Assets Increased by \$20,000; Liabilities Increased by \$5,000; Therefore, Equity needs to Increase by \$15,000.

Change in Equity = Contributed Capital + Net Income — Dividends

Increase of \$15,000 = \$3,000 + Net Income — \$11,000

\$15,000 = Net Income — \$8,000

Accounts	Amount
Dividends.....	\$15,500
Revenues.....	\$97,000
Expenses.....	\$43,800
Stock issuances.....	2,000

If the beginning equity for the year was \$173,000, calculate the ending equity for Mason Company.

Cash.....	\$40,000	60,000
Accounts Receivable.....	40,000	38,000
Accounts Payable.....	6,000	?

Also, its net income, for October 1 through October 31 was \$20,000 and there were no stock issuances or dividends. Determine the equity at both October 1 and October 31.

Answer: October 1st Equity = \$74,000; October 31st Equity = \$94,000

Total assets:

	<u>October 1</u>	<u>October 31</u>
Cash	\$40,000	60,000
Accounts Receivable	<u>40,000</u>	<u>38,000</u>
Total assets	<u>\$80,000</u>	<u>\$98,000</u>

At October 1:

Assets = Liabilities + Equity

\$80,000 = \$6,000 + Equity

Equity = \$74,000

At October 31:

Equity, October 1 \$74,000

Plus October net income 20,000

Equity, October 31 \$94,000

At October 31:
