

## **Chapter 2**

# **Recording Business Transactions**

### *Review Questions*

---

1. The three categories of the accounting equation are assets, liabilities, and equity. Assets include Cash, Accounts Receivable, Notes Receivable, Prepaid Expenses, Land, Building, Equipment, Furniture, and Fixtures. Liabilities include Accounts Payable, Notes Payable, Accrued Liability, and Unearned Revenue. Equity includes Common Stock, Dividends, Revenue, and Expenses.
2. Companies need a way to organize their accounts so they use a chart of accounts. Accounts starting with 1 are usually Assets, 2 – Liabilities, 3 – Equity, 4 – Revenues, and 5 – Expenses. The second and third digits in account numbers indicate where the account fits within the category.
3. A chart of accounts and a ledger are similar in that they both list the account names and account numbers of the business. A ledger, though, provides more detail. It includes the increases and decreases of each account for a specific period and the balance of each account at a specific point in time.
4. With a double-entry you need to record the dual effects of each transaction. Every transaction affects at least two accounts.
5. A T-account is a shortened form of each account in the ledger. The debit is on the left side, credit on the right side, and the account name is shown on top.
6. Debits are increases for assets, dividends, and expenses. Debits are decreases for liabilities, common stock, and revenue.
7. Credits are increases for liabilities, common stock, and revenue. Credits are decreases for assets, dividends, and expenses.
8. Assets, dividends, and expenses have a normal debit balance. Liabilities, common stock, and revenue have a normal credit balance.
9. Source documents provide the evidence and data for accounting transactions. Examples of source documents a business would have are: bank deposit slips, purchase invoices, bank checks, and sales invoices
10. Transactions are first recorded in a journal, which is the record of transactions in date order.

- 11.** Step 1: Identify the accounts and the account type. You need this information before you can complete the next step. Step 2: Decide if each account increases or decreases, then apply the rules of debits and credits. Reviewing the rules of debits and credits, we use the accounting equation to help determine debits and credits for each account. Step 3: Record transactions in the journal using journal entries. Step 4: Post the journal entry to the ledger. When journal entries are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date on the journal entry should also be transferred to the accounts in the ledger. Step 5: Determine whether the accounting equation is in balance. After each entry the accounting equation should always be in balance.
- 12.** Part 1: Date of the transaction. Part 2: Debit account name and dollar amount. Part 3: Credit account name and dollar amount. The credit account name is indented. Part 4: Brief explanation.
- 13.** When transactions are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date of the journal entry is also transferred to the accounts in the ledger. The posting reference columns in the journal and ledger are also completed. In a computerized system, this step is completed automatically when the transaction is recorded in the journal.
- 14.** The trial balance is used to prove the equality of total debits and total credits of all accounts in the ledger; it is also used to prepare the financial statements.
- 15.** A trial balance verifies the equality of total debits and total credits of all accounts on the trial balance and is an internal document used only by employees of the company. The balance sheet, on the other hand, presents the business's accounting equation and is a financial statement that can be used by both internal and external users.
- 16.** If total debits equal total credits on the trial balance, it does not mean that the trial balance is error-free. An incorrect amount could have been used, an entry could have been completely missed, or the wrong account title could have been debited or credited.
- 17.** The debt ratio is calculated by dividing total liabilities by total assets and shows the proportion of assets financed with debt. It can be used to evaluate a business's ability to pay its debts.

## Short Exercises

---

### S2-1

- |                          |                         |

Salaries Expense	1,900	
Rent Expense	800	
Utilities Expense	1,000	
<b>Total</b>	<b>\$ 35,300</b>	<b>\$ 35,300</b>

Explanation:

- a. Increase Cash by \$400, decrease Accounts Receivable by \$400.
- b. Increase Accounts Payable by \$1,800 (\$2,000 – \$200).
- c. Increase Utilities Expense and Utilities Payable by \$300 each.
- d. Increase Common Stock by \$100.

**E2-28**

## Liabilities:

Accounts Payable	\$ 1,600
Utilities Payable	800
Unearned Revenue	24,795
Notes Payable	<u>69,000</u>
Total liabilities	<u>\$ 96,195</u>

## Assets:

Cash	\$ 30,000
Accounts Receivable	7,900
Office Supplies	3,000
Office Equipment	30,000
Building	75,000
Land	<u>29,000</u>
Total assets	<u>\$ 174,900</u>

Debt ratio = Total liabilities / Total assets = \$96,195 / \$174,900 = 0.55 = 55%

SHEILA SANCHEZ, REGISTERED DIETICIAN  
 Balance Sheet  
 July 31, 2018

---

Assets		Liabilities	
Cash	\$ 32,000	Accounts Payable	\$ 3,400
Accounts Receivable	9,100	Unearned Revenue	1,296
Office Supplies	1,400	Notes Payable	34,000
Prepaid Insurance	2,600	Total Liabilities	\$ 38,696
Equipment	24,000		
		Stockholders' Equity	
		Common Stock	20,000
		Retained Earnings	10,404
		Total Stockholders' Equity	30,404
Total Assets	\$ 69,100	Total Liabilities and Stockholders' Equity	\$ 69,100

---

**Requirement 4**

Debt ratio = Total liabilities / Total assets = \$38,696 / \$69,100 = 0.56 = 56%

***Using Excel***

## Critical Thinking

### Tying It All Together Case 2-1

#### Requirement 1

Fry's Electronics would record the following journal entry:

Date	Accounts and Explanation	Debit	Credit
	Cash	10,500	
	Service Revenue		10,500

The transaction would increase assets (Cash) and equity (Retained Earnings) on the balance sheet and increase Service Revenue on the income statement.

#### Requirement 2

Fry's Electronics would record the following journal entry:

Date	Accounts and Explanation	Debit	Credit
	Cash	24,000	
	Unearned Revenue		24,000

The transaction would increase assets (Cash) and increase liabilities (Unearned Revenue) on the balance sheet.

#### Requirement 3

In requirement 1, Fry's Electronics recorded revenue because the company had received the cash from the customer and provided the service. In requirement 2, Fry's Electronics recorded a liability, Unearned Revenue, because even though cash was received, the service has not been provided. The revenue related to requirement 2 will not be recorded until the service has been provided.

**Decision Case 2-1**

Net Income		\$ 5,700

---

McChesney should discontinue the business because net income falls below the target amount.

**Ethical Issue 2-1**

The bank has a standing agreement with Better Days Ahead for overdrafts, so as long as transactions are compliant with terms of the agreement, there is no ethical issue. The exercise refers to Better Days Ahead managing funds “wisely.” However, whether funds are managed wisely or not is a matter of prudent business management and not an ethical issue. Presumably if Better Days Ahead was exceeding the terms of the agreement, the bank would cancel the arrangement.

**Ethical Issue 2-1, cont.**

Some students may point out that the agreement was for times when donations were running low, whereas the reasons given for the overdraft are for expansion and fundraising. If this is interpreted to mean that Better Days Ahead is abusing the privilege according to the terms of the agreement, then there may be an ethical issue involved, but that is not made clear by the information given.

Students may approve of Henson's cash management if the arrangement is beneficial to Better Days Ahead, and thus helps them accomplish their charitable mission more effectively. Students may disapprove of Henson's cash management if (a) they feel it is "unwise" (poor business management), or (b) if they believe he is exceeding the terms of the agreement.

**Fraud Case 2-1****Requirement 1**

By changing an expense to an asset, the total expenses will decrease and net income will increase.

**Requirement 2**

The CEO gained by earning a bonus, and the accounting manager may have gained by getting favorable treatment from the CEO. The shareholders of the company lost, because the company paid out the bonus under fraudulent conditions.

**Financial Statement Case 2-1****Requirement 1**

$$\begin{aligned}\text{Debt ratio} &= \text{Total liabilities} / \text{Total assets} \\ &= \$27,305 \text{ (in millions)} / \$40,262 \text{ (in millions)} \\ &= 0.678^* = 67.8\% \\ &^* \text{ rounded}\end{aligned}$$

**Requirement 2**

Target's debt ratio is significantly higher than Kohl's (59.6%).

**Communication Activity 2-1**

Debits are on the left, credits are on the right. Normal balance for assets, expenses, and dividends is a debit. For liability, common stock, and revenue accounts, the normal balance is a credit.
