55. National laws aimed at maintaining competition in all sectors of the economy and preventing monopolistic behavior of firms are called _____.

Scenario – T & M Computers

Thomas Benson and Matthew Roderick started a small computer business ten years ago in Rapid City, South Dakota. Armed only with determination and innovative designs, Thomas and Matthew were driven to achieve success for their company, T & M Computers. Their hard work has indeed, paid off. Since the inception of the company, the two owners have watched their business grow and demand for their products increase.

Four years ago due to this high product demand, they went international with their business operations. Thomas and Matthew now have international business operations in Singapore, France, Turkey, and Great Britain. Further operational expansion is anticipated within the next year and the company plans to begin operations in Spain, Greece, and Italy.

The owner's hard work and dynamic ideas have proven quite profitable for the company. Thomas and Matthew are pleased with how their operation has grown into becoming a major international business worthy of competing with Intel and Microsoft. T & M Computers may well be the next giant recognized in the field of computer software.

56. T & M Computers plans to begin operations in areas that recently needed financial assistance and undergone certain levels of reconstruction and reorganizing to their economies. Which organization listed below is most likely to have played an integral part in this?

- a. The World Trade Organization
- b. The World Bank Group
- c. The International Development Association
- d. The International Finance Corporation
- e. The sovereign government of Greece

57. The Everline Corporation's future business plans include expanding into foreign markets where the use of mobile Web browsing is growing rapidly. Which one of the following countries would this organization be least likely to look toward to include in their future expansion plans?

- a. Vietnam
- b. Kenya

- c. India
- d. Germany
- e. Nigeria

Scenario – T & M Computers

Thomas Benson and Matthew Roderick started a small computer business ten years ago in Rapid City, South Dakota. Armed only with determination and innovative designs, Thomas and Matthew were driven to achieve success for their company, T & M Computers. Their hard work has indeed, paid off. Since the inception of the company, the two owners have watched their business grow and demand for their products increase.

Four years ago due to this high product demand, they went international with their business operations. Further operational expansion is anticipated within the next year and the company plans to begin operations in Spain, Greece, and Italy.

The owner's hard work and dynamic ideas have proven quite profitable for the company. Thomas and Matthew are pleased with how their operation has grown into becoming a major international business worthy of competing with Intel and Microsoft. T & M Computers may well be the next giant recognized in the field of computer software.

58. Which one of the following would T & M Computers least expect to be a negative influence from the sovereign governments within the nations where their business operations are located?

- a. Military hostilities
- b. Protectionist policies
- c. Promotion of economic growth and job creation
- d. Stiff environmental standards
- e. Stringent immigration policies

59. There is a perceived economic gap among the various foreign customers of the Everline Corporation. This is thought to be mainly the result of the level of access or lack thereof to modern digital information technologies experienced within these individual countries. Considering this perceived economic gap, Everline's operations may be experiencing influence identified as which of the following?

- a. Digital stagnation
- b. Digital era
- c. Digital divide
- d. Bandwidth technology era
- e. Web revolution

Scenario – The Renna Company

Established in 1956, the Renna Company has always maintained its operations within the boundaries of the United States. Originally based in Lexington, Kentucky, this company has now expanded operations into thirteen other U.S. states. While it's inexpensive and efficient cooling and heating products are in high demand even in foreign markets, this company contends it has no desire for international expansion.

Conducting operations strictly within the U.S. borders does not appear to have limited this company overly much. It realized net profits of two billion dollars last year and provided gainful employment for over four thousand workers. The leaders of the Renna Company realize greater profits could be attained through international expansion. However, they stand in agreement when they state, "It is not always the money that best defines the worth of an organization."

The company desire to stay true to its mission statement, which claims, "It will serve the marketplace of the

United States with its superior products and provide job opportunities with a fair wage for its employees.” The Renna Company is very proud of its products and enjoys the fact they are produced and sold in the United States of America. This company truly reflects the success possible when holding to the fact that “Made in America” is still a winner.

60. Which one of the following statements is least likely to be a rationale explaining why the Renna Company staunchly desires to avoid global expansion?

- a. Globalization can create a wearing away of old industries.
- b. Globalization brings into play the concept of sustainable development.
- c. Globalization can contribute to an increase in environmental degradation.
- d. Global expansion often leads to greater integration and interdependence among economies and societies, which can bring about injustices.
- e. Economic change comes with a high price tag including job losses and wages that become stagnant.

61. All of the following are examples of counterarguments the Renna Company should consider before continuing with their stand of keeping their operations strictly within the borders of the United States except which one?

- a. Global expansion affords a strong potential for costs of both product production and product purchase to decrease.
- b. Life expectancy may increase for members of the population within the nations involved in globalization due to the increased quality of life.
- c. Globalization contributes to faster economic growth for the nations involved.
- d. The quality of life is most likely to improve for the citizens of the nations that are involved with globalization and trade.
- e. The wage levels of each nation may become stagnant and some workers may become displaced, having been replaced by less expensive foreign labor.

Scenario – The Everline Corporation

The Everline Corporation is a multinational business that provides state-of-the-art digital communication capabilities to its global customers. Originally operating as a U.S. domestic business based in Duluth, Minnesota, Everline quickly seized on the opportunity provided by international expansion. Within two years, the corporation had expanded into fourteen foreign nations found throughout the Middle East, Europe, Asia, and South America.

Everline understands the vital importance of offering effective and affordable communication products to its customers. It realizes the value consumers place on being able to communicate with businesses without delays or hassles. The corporation recognizes its customers need to quickly and efficiently communicate with others in the global marketplace of today.

Fueled by its staff of innovative and highly skilled communication engineers, the future for Everline looks more and more promising. Communication needs around the globe continue to grow and this business stands ready to fill the demand. With net profits expected to reach one billion dollars in the next year, this company is decidedly reaping the rewards of its hard work.

62. The Everline Corporation is currently conducting its international communication business during a period of time that is experiencing rapid changes and challenges. Individuals and organizations are adjusting their lifestyles and methods of operations to fully utilize the modern communication technologies available in the marketplace. The time period Everline is currently operating under is best classed as which one of the following terms?

- a. Digital proliferation
- b. Modern communication era

- c. Digital divide
- d. Communication decade
- e. Digital era

63. The managers of the Everline Corporation attribute their company's continued profitability to the idea that globalization and information technology are closely related to one another. They acknowledge that the information technology revolution has occurred almost instantaneously. Which one of the following would not be considered a benefit derived from this so-called revolution?

- a. Societal hierarchies have grown in number to better accommodate information technology changes.
- b. A more free flow of capital across national boundaries has occurred.
- c. Operating costs have decreased for many businesses.
- d. The production of goods and services has become globalized.
- e. The costs of communication are reduced.

64. The Renna Company has a clear understanding of the benefits of economic development. Economic development which meets the needs of the present generation without compromising the ability of future generations to meet their own needs, whether environmentally, socially or economically is best identified as which one of the following?

- a. Sustainable development
- b. Reform process
- c. Trade liberalization
- d. Corporate social responsibility
- e. Environmental degradation
