$X \oplus Y = X\overline{Y} + \overline{X}Y$

Dual $(X \oplus Y)$ = Dual $(X\overline{Y} + \overline{X}Y)$

$= (X + \overline{Y})(\overline{X} + Y)$

$= \overline{\overline{X}Y + X\overline{Y}}$

$= \overline{X\overline{Y} + \overline{X}Y}$

$= \overline{X \oplus Y}$

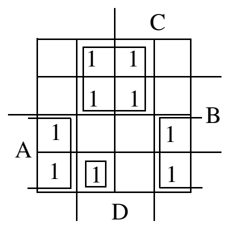
2-33.

$AB\overline{C}D + A\overline{D} + \overline{A}D = AB\overline{C}D + (A \oplus D)$

Note that $X + Y = (X \oplus Y) + XY$

Letting $X = AB\overline{C}D$ and $Y = A \oplus D$,

We can observe from the map below or determine algebraically that XY is equal to 0.



For this situation,

$$X + Y = (X \oplus Y) + XY$$
$$= (X \oplus Y) + 0$$
$$= X \oplus Y$$

So, we can write $F(A, B, C, D) = X \oplus Y = AB\overline{C}D \oplus (A \oplus D)$
