## New Perspectives Microsoft office 365 Access 2016 Introductory 1st Edition Shellman Test Bank Full Download: https://alibabadownload.com/product/new-perspectives-microsoft-office-365-access-2016-introductory-1st-edition Class: Date: Name: Access Module 01: Creating a Database 1. A database or a relational database is a collection of related tables. a. True b. False ANSWER: True **POINTS:** 1 REFERENCES: Introduction to Database Concepts 2. Each record in a table is uniquely identified by a foreign key. a. True b. False ANSWER: False **POINTS:** 1 REFERENCES: Introduction to Database Concepts 3. A software program that lets the user create databases and then manipulate the data in the databases is called a database management system (DBMS). a. True b. False ANSWER: True **POINTS:** REFERENCES: Managing a Database 4. A table is a predesigned database that includes professionally designed database objects. \_ a. True b. False ANSWER: False **POINTS:** REFERENCES: Starting Access and Creating a Database 5. The only option available for creating tables in Access is to use the datasheet view. a. True b. False ANSWER: False **POINTS:** REFERENCES: Creating a Table in Datasheet View 6. The number of the currently selected record in a table and the total number of records in the table are displayed in the Current Record box which appears between the two sets of navigation buttons on a data sheet. a. True b. False ANSWER: True
