

Chapter 02 Test Bank - Static

1. A tax meets the standard of sufficiency if it is easy for people to pay the tax:

FALSE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

2. The federal government is not required to pay interest on the national debt.

FALSE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

3. A static forecast of the revenue effect of a tax rate change assumes that the tax base does not change.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

4. A dynamic forecast of the revenue effect of a tax rate change assumes that the tax base does not change.

FALSE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

5. The federal Social Security tax burden on employees has not increased since 1990 because the tax rate has not increased since that year.

FALSE

The Social Security tax burden increases annually because the tax base increases annually.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

6. If State H increases its sales tax rate by 1%, its sales tax revenue must also increase by 1%.

FALSE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

7. The city of Berne recently enacted a 10% tax on the price of a subway ticket. Consequently, Mrs. Lane now walks to work instead of taking the subway. Her behavior illustrates the substitution effect of a tax increase.

TRUE

Mrs. Lane substituted a nontaxable activity for a taxable activity.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

8. Jurisdiction P recently increased its income tax rate. A taxpayer who reacts to the increase by working harder to earn more income is demonstrating the income effect of the rate increase.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

9. According to supply-side economic theory, a decrease in tax rates for high-income individuals could actually cause an increase in tax revenue.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

10. Supply-side economic theory holds that people who benefit from a tax rate reduction will spend their tax windfall on consumption goods.

FALSE

Supply-side economic theory predicts that people who benefit from a tax rate reduction will invest their tax windfall in new economic ventures.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

11. State use taxes are more convenient for individual consumers than state sales taxes.

FALSE

State sales taxes are more convenient because they are collected by the seller. Consumers must pay use taxes directly.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-03 Describe the characteristics of a convenient tax.

Topic: Taxes Should Be Convenient

12. The Internal Revenue Service's cost of collecting \$100 of tax revenue is about \$3.

FALSE

The IRS's cost of collecting \$100 of tax revenue averages less than 50 cents.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-03 Describe the characteristics of a convenient tax.

Topic: Taxes Should Be Convenient

13. A convenient tax has low compliance costs for taxpayers and low collection and enforcement costs for the government.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-03 Describe the characteristics of a convenient tax.

Topic: Taxes Should Be Convenient

14. According to the classical concept of efficiency, an efficient tax should be neutral in its effect on free market allocations of economic resources.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

15. According to the Keynesian concept of efficiency, an efficient tax should be neutral in its effect on free market allocations of economic resources.

FALSE

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

16. A tax meets the standard of efficiency if it generates enough revenue to pay for the public goods and services provided by the government.

FALSE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

17. A provision in the tax law designed to encourage a specific economic behavior is a tax preference.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

18. A tax should result in either horizontal or vertical equity across taxpayers.

FALSE

A good tax should result in both horizontal and vertical equity.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-05 Define horizontal and vertical equity.

Topic: Annual versus Lifetime Horizontal Equity

19. Changes in the tax law intended to make the measurement of taxable income more precise usually make the tax law less complex.

FALSE

Increased precision in the measurement of taxable income usually increases tax law complexity.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-05 Define horizontal and vertical equity.

Topic: Annual versus Lifetime Horizontal Equity

20. Vertical equity focuses on measurement of the tax base, and horizontal equity focuses on the tax rate structure.

FALSE

Just the opposite!

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-05 Define horizontal and vertical equity.

Topic: Annual versus Lifetime Horizontal Equity

21. Tax systems with regressive rate structures result in a proportionally heavier tax burden on persons with smaller tax bases.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

22. A progressive rate structure and a proportionate rate structure both result in vertical equity across taxpayers.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

23. The U.S. individual income tax has always used a progressive rate structure.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

24. The declining marginal utility of income across individuals can be measured empirically.

FALSE

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

25. Tax liability divided by taxable income equals marginal tax rate.

FALSE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

Topic: Marginal and Average Tax Rates

26. If a tax has a proportionate rate structure, a taxpayer's marginal rate and average rate are equal.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

Topic: Marginal and Average Tax Rates

27. If a tax has a progressive rate structure, a taxpayer's average rate is greater than her marginal rate.

FALSE

With a progressive rate structure, marginal rate is always greater or equal to average rate.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

Topic: Marginal and Average Tax Rates

28. The theory of distributional justice is a rationale for a progressive income tax system.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-08 Discuss distributive justice as a tax policy objective.

Topic: Distributive Justice

29. Individuals who believe that a tax system is fair are less likely to cheat on their taxes than individuals who believe that the system is unfair.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-08 Discuss distributive justice as a tax policy objective.

Topic: Distributive Justice

30. Many taxpayers believe the income tax system is unfair because it is so complicated.

TRUE

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-08 Discuss distributive justice as a tax policy objective.

31. Government officials of Country Z estimate that next year's public programs will cost \$19 million but that tax revenues will be only \$15 million. The officials could avoid a deficit next year by adopting which of the following fiscal strategies?
- A. Reduce the cost of public programs by \$4 million.
 - B. Increase taxes by \$4 million.
 - C. Borrow \$4 million by issuing new government bonds.
 - D.** All of these strategies will avoid a deficit.

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

32. Government officials of Country Z estimate that next year's public programs will cost \$19 million but that tax revenues will be only \$15 million. Which of the following statements is **false**?
- A.** Country Z's tax system is sufficient.
 - B. Country Z's government is engaging in deficit spending.
 - C. If Country Z must borrow \$4 million to pay for its public programs, its national debt will increase by \$4 million.
 - D. Country Z's government could balance its budget by eliminating a program that costs \$4 million.

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

33. Government J decides that it must increase its tax revenue. Which of the strategies could result in more revenue?
- A. Increase the rate of an existing tax.
 - B. Expand the base of an existing tax.
 - C. Enact a tax on a new base.
 - D.** All of these strategies could result in more revenue for Government J.

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

34. The government of Nation C operated at a \$32 billion deficit this year. The deficit suggests that Nation C's tax system is:
- A. Inefficient
 - B.** Insufficient
 - C. Unfair
 - D. Inconvenient

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

35. The city of Belleview operated at an \$865,000 surplus this year. The surplus suggests that the municipal tax system is:
- A. Fair
 - B. Efficient
 - C.** Sufficient
 - D. Convenient

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

36. Which of the following statements concerning the federal Social Security tax is **true**?
- A. The tax burden increases annually because the rate generally increases annually.
 - B.** The tax burden increases annually because the base generally increases annually.
 - C. Both the rate and the base generally increase annually.
 - D. The Social Security tax burden has not increased since 1990.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

37. A static forecast of the incremental revenue from a tax rate increase presumes that:

- A. The tax base will not change because of the rate increase.
- B. The tax base will increase by the same proportion as the rate increase.
- C. The tax base will decrease by the same proportion as the rate increase.
- D. The tax rate and the tax base are correlated.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

38. A dynamic forecast of the incremental revenue from a tax rate increase presumes that:

- A. Taxpayers will not change their behavior because of the rate increase.
- B. The tax base will increase by the same proportion as the rate increase.
- C. The tax base will decrease by the same proportion as the rate increase.
- D. The tax rate and the tax base are correlated.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

39. Jurisdiction F levies a 10% excise tax on the purchase of golf carts. The annual revenue from this tax averages \$800,000 (10% * \$8 million average annual golf cart purchases). Jurisdiction F is considering raising the tax rate to 12%. Which of the following statements is **true**?

- A. The rate increase will increase revenue by \$160,000.
- B. Based on a dynamic forecast, the rate increase will increase revenue by \$160,000.
- C. Based on a static forecast, the rate increase will increase revenue by \$160,000.
- D. None of the above is true.

A dynamic forecast would be based on a projected decrease in the average annual golf cart purchases because of the tax increase.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

40. Last year, Government G levied a 35% tax on individual income, and Mr. Slate paid \$35,000 tax on his \$100,000 income. This year, the government increased the tax rate to 40%. Which of the following statements is **false**?
- A. Based on a static forecast, government G should collect \$5,000 additional tax from Mr. Slate this year.
 - B.** If Mr. Slate took a second job to maintain his after-tax disposable income, his behavior illustrates a substitution effect of the rate increase.
 - C. If Mr. Slate took a second job to maintain his after-tax disposable income, government G should collect more than \$5,000 additional tax from him this year.
 - D. If Mr. Slate sold an income-generating investment and used the money for personal consumption, his behavior illustrates a substitution effect of the rate increase.

Mr. Slate's behavior in taking a second job illustrates an income effect.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

Topic: Static versus Dynamic Forecasting

41. Which of the following statements about the substitution effect of an income tax rate increase is **false**?
- A. The substitution effect is theoretically stronger for high-income taxpayers than for low-income taxpayers.
 - B. The substitution effect is theoretically stronger for a family's secondary wage earner than for the family's primary wage earner.
 - C. The substitution effect is theoretically stronger for self-employed individuals who control their own time than for employees whose work schedules are controlled by their employers.
 - D.** None of the above is false.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

42. Which of the following statements about the income effect of an income tax rate increase is **true**?

- A. The income effect is theoretically stronger for low-income taxpayers than for high-income taxpayers.
- B. The income effect is theoretically stronger for a family's secondary wage earner than for the family's primary wage earner.
- C. The income effect motivates individuals to find ways to increase their before-tax income.
- D.** Both the income effect is theoretically stronger for low-income taxpayers than for high-income taxpayers and the income effect motivates individuals to find ways to increase their before-tax income are true.

The income effect is theoretically stronger for a family's primary wage earner.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

43. Which of the following statements about the income and substitution effects of an income tax rate increase is **true**?

- A.** The income and substitution effects are contradictory behavioral reactions.
- B. From the government's perspective, the substitution effect is more desirable than the income effect.
- C. Faith in the income effect is the foundation for supply-side economic theory.
- D. Dynamic forecasts of incremental tax revenues must consider the potential income effect but not the potential substitution effect of a rate increase.

From the government's perspective, the income effect is more desirable because it creates a revenue windfall. Faith in the substitution effect is the foundation for supply-side economic theory. Dynamic revenue forecasts must consider both potential behavioral effects.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

44. Supply-side economic theory.

- A. Predicts that a decrease in the highest income tax rates will cause an increase in government revenues.
- B. Is inconsistent with the substitution effect.
- C. Was a clear failure following the Reagan administration tax cuts of the 1980s.
- D. Predicts that taxpayers will save their tax windfall from a rate cut rather than spend or investment the windfall.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

45. Which of the following describes a tax that meets the standard of convenience?

- A. A tax that the government can administer without excessive cost.
- B. A tax that is easy for taxpayers to compute and pay.
- C. A tax that minimizes the opportunity for noncompliance.
- D. All of the above describe a convenient tax.

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-03 Describe the characteristics of a convenient tax.

Topic: Taxes Should Be Convenient

46. Which of the following taxes is most convenient for individuals to pay?

- A. Sales tax
- B. Use tax
- C. Federal income tax
- D. Real property tax

The sales tax is collected by the seller and requires no effort on the part of the purchaser to pay the tax.

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-03 Describe the characteristics of a convenient tax.

Topic: Taxes Should Be Convenient

47. Which of the following statements regarding a convenient tax is **false**?

- A. From the government's viewpoint, a good tax should be convenient to administer.
- B. From the taxpayer's viewpoint, a good tax should be convenient to pay.
- C.** A convenient tax should have a method of collection that offers maximum opportunity for noncompliance.
- D. A convenient tax should permit taxpayers to compute their tax with reasonable certainty without incurring undue costs.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-03 Describe the characteristics of a convenient tax.

Topic: Taxes Should Be Convenient

48. Which of the following statements does not describe the classical standard of tax efficiency?

- A. An efficient tax is a neutral factor in a free market economy.
- B. An efficient tax does not change taxpayer behavior.
- C.** An efficient tax encourages full employment.
- D. An efficient tax favors a laissez-faire economy policy.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

49. The statement that "an old tax is a good tax" means that:

- A. Changes in the tax law create uncertainty in the business environment.
- B. Changes in the tax law disrupt traditional planning strategies.
- C. Changes in the tax law increase the compliance burden on businesses.
- D.** All of the above.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

50. The city of Hartwell spends about \$3 million annually on snow removal. The city is considering amending its real property tax law to allow homeowners to offset the cost of private snow removal against their annual property tax liability. This amendment would affect the:

- A. Fairness of the tax
- B. Efficiency of the tax**
- C. Sufficiency of the tax
- D. Convenience of the tax

The amendment is intended to change taxpayer behavior by rewarding individuals who provide for their own snow removal.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

51. Which of the following statements does not describe the Keynesian standard of tax efficiency?

- A. An efficient tax encourages economic growth.
- B. An efficient tax encourages full employment.
- C. An efficient tax encourages price-level stability.
- D. All of the above describe the Keynesian standard of tax efficiency.**

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

52. Government L levies a 4% excise tax on restaurant meals. It is considering reducing the rate to 2% on meals served in restaurants that ban cigarette and cigar smoking and to increase the rate to 5% in restaurants that allow smoking. Which of the following statements is **true**?

- A. The rate change would improve the neutrality of the excise tax.
- B. The rate change would improve the convenience of the tax.
- C. The rate change is intended to affect social behavior.**
- D. Both the rate change would improve the convenience of the tax and the rate change is intended to affect social behavior are true.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

53. The state of California plans to amend its personal income tax laws to allow parents to reduce their tax by the cost of infant car seats. Which of the following statements is **true**?

- A. The amendment creates a tax preference for parents who purchase infant car seats.
- B. The amendment is intended to change social behavior.
- C. The amendment increases the neutrality of the tax law.
- D. Both the amendment creates a tax preference for parents who purchase infant car seats and is also intended to change social behavior are true.**

The amendment decreases the neutrality of the tax law.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

54. Which of the following statements concerning tax preferences is **false**?

- A. Tax preferences increase the complexity of the law.
- B. Tax preferences raise additional revenue for the government.**
- C. Tax preferences are government subsidies for targeted taxpayer activities.
- D. Tax preferences do not improve the accurate measurement of the tax base.

Tax preferences lose revenue for the government.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Topic: The Classical Standard of Efficiency

55. Which of the following statements concerning tax preferences is **true**?

- A. The annual revenue loss from federal tax preferences is quantified in the Tax Expenditures Budget.**
- B. Tax preferences increase the fairness of the tax law.
- C. Tax preferences simplify the tax law.
- D. Tax preferences make the tax law more neutral across taxpayers.

Accessibility: Keyboard Navigation

Difficulty: 1 Easy
Gradable: automatic

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.
Topic: The Classical Standard of Efficiency

56. Which of the following statements about horizontal equity is **false**?
- A. Horizontal equity focuses on a rational and impartial measurement of the tax base.
 - B. Horizontal equity focuses on the measurement of taxpayers' ability to pay.
 - C. If persons with equal ability to pay a tax owe an equal amount of tax, the tax is horizontally equitable.
 - D.** None of the above is false.

Accessibility: Keyboard Navigation
Difficulty: 1 Easy
Gradable: automatic

Learning Objective: 02-05 Define horizontal and vertical equity.
Topic: Annual versus Lifetime Horizontal Equity

57. The federal income tax law allows individuals whose property is destroyed by a natural disaster such as a fire or hurricane to reduce their taxable income by the amount of their financial loss. This rule is intended to improve the:
- A. Convenience of the tax
 - B. Efficiency of the tax
 - C.** Horizontal equity of the tax
 - D. Vertical equity of the tax

Individuals who must replace property destroyed by a disaster arguably have less ability to pay income tax.

Accessibility: Keyboard Navigation
Difficulty: 2 Medium
Gradable: automatic

Learning Objective: 02-05 Define horizontal and vertical equity.
Topic: Annual versus Lifetime Horizontal Equity

58. The sales tax laws of many states exempt the purchase of groceries and prescription drugs from tax. Such exemptions are intended to improve the:

- A. Convenience of the tax
- B. Equity of the tax**
- C. Sufficiency of the tax
- D. Neutrality of the tax

Nondiscretionary purchases such as food and medicine reduce the purchaser's ability to pay tax.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-05 Define horizontal and vertical equity.

Topic: Annual versus Lifetime Horizontal Equity

59. Which of the following statements about vertical equity is **false**?

- A. Vertical equity focuses on a fair rate structure instead of a fair measurement of the tax base.
- B. If persons with greater ability to pay owe more tax than persons with lesser ability to pay, the tax is vertically equitable.
- C. A tax with a single percentage rate is not vertically equitable.**
- D. None of the above is false.

Even under a proportionate rate structure, taxpayers with more base pay more tax than taxpayers with less base.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-05 Define horizontal and vertical equity.

Topic: Annual versus Lifetime Horizontal Equity

60. Jurisdiction M imposes an individual income tax based on the following schedule.

Rate	Income bracket
5%	\$-0- to \$50,000
+ 8%	\$50,001 to \$200,000
+ 12%	\$200,001 and above

Which of the following statements is **true**?

- A. The schedule provides no information as to whether Jurisdiction M's tax is horizontally equitable.
- B. Jurisdiction M's tax is vertically equitable.
- C. Jurisdiction M's tax is vertically equitable only for individuals with \$50,000 or less taxable income.
- D.** Both "The schedule provides no information as to whether Jurisdiction M's tax is horizontally equitable" and "Jurisdiction M's tax is vertically equitable" are true.

The schedule does not provide information as to whether the definition of taxable income accurately reflects ability to pay. The tax is vertically equitable because taxpayers with more income pay more tax than taxpayers with less income.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-05 Define horizontal and vertical equity.

Topic: Annual versus Lifetime Horizontal Equity

61. Which of the following statements about a regressive tax rate structure is **false**?

- A.** A regressive rate structure cannot result in vertical equity.
- B. Regressive rates decrease as the tax base increases.
- C. A regressive rate structure places a proportionally heavier tax burden on taxpayers with smaller tax bases than persons with greater tax bases.
- D. None of the above is false.

Even with a regressive rate structure, persons with a smaller tax base may pay less tax than persons with a greater tax base.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

62. Vervet County levies a real property tax based on the following schedule.

Rate	Assessed value
3%	\$-0- to \$250,000
+ 1%	\$250,001 and above

Which type of rate structure does this tax use?

- A. Proportionate
- B. Regressive**
- C. Progressive
- D. Dual-bracket

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

63. Vervet County levies a real property tax based on the following schedule.

Rate	Assessed value
3%	\$-0- to \$250,000
+ 1%	\$250,001 and above

Bilex Inc. owns real property valued at \$629,800. Compute Bilex's tax on this property.

- A. \$13,798
- B. \$7,500
- C. \$6,298
- D.** None of the choices are correct.

Bilex's tax is \$11,298 ($[3\% \times \$250,000] + [1\% \times \$379,800]$).

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

64. Vervet County levies a real property tax based on the following schedule.

Rate	Assessed value
3%	\$-0- to \$250,000
+ 1%	\$250,001 and above

Which of the following statements is **false**?

- A. If Mr. Clem owns real property valued at \$112,500, his average tax rate is 3%.
- B. If Ms. Barker owns real property valued at \$455,650, her average tax rate is 2.1%.
- C. If Ms. Lumley owns real property valued at \$750,000, her marginal tax rate is 1%.
- D.** None of the choices are false.

Ms. Barker's tax is \$9,557 ($[3\% \times \$250,000] + [1\% \times \$205,650]$), so her average tax rate is 2.1% ($\$9,557 / \$455,650$).

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

Topic: Income Tax Rate Structures

Topic: Marginal and Average Tax Rates

Topic: Regressive Taxes

65. Which of the following statements about tax rate structures is **true**?

- A. Regressive rate structures are illegal in the United States.
- B.** A tax with a graduated rate structure must be either regressive or progressive.
- C. A proportionate rate structure is the only structure resulting in vertical equity.
- D. None of the choices are true.

A graduated rate structure must include at least two different rates, which either decrease or increase as the tax base increases.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

66. Jurisdiction M imposes an individual income tax based on the following schedule.

Rate	Income bracket
5%	\$-0- to \$50,000
+ 8%	\$50,001 to \$200,000
+ 12%	\$200,001 and above

Which type of rate structure does this tax use?

- A. Proportionate
- B. Regressive
- C. Progressive**
- D. Multi-bracket

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

67. Which of the following statements about a progressive tax rate structure is **false**?

- A. Progressive rates increase as the tax base increases.
- B. Progressive rates reflect the theory of the declining marginal utility of income.
- C. The federal income tax has always used a progressive rate structure.
- D. Progressive rates result in greater vertical equity than a proportionate rate.**

Both progressive rates and a proportionate rate result in vertical equity.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

68. Which of the following statements about a proportionate income tax rate structure is **false**?

- A. A theoretic justification for a proportionate rate is its superior potential for wealth redistribution.
- B. Under a proportionate rate structure, the marginal rate equals the average rate.
- C. Under a proportionate rate structure, the taxpayer with the least income pays the same percentage of income to the government as the taxpayer with the most income.
- D. None of the choices are false.

Wealth redistribution is a theoretic justification for a progressive rate structure.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

Topic: Income Tax Rate Structures

Topic: Marginal and Average Tax Rates

Topic: Regressive Taxes

69. Which of the following statements concerning income tax rate structures is **false**?

- A. Under a progressive rate structure, the marginal rate and the average rate are equal.
- B. Under a regressive rate structure, the average rate for low-income individuals is more than the average rate for high-income individuals.
- C. Under either a regressive, proportionate, or progressive rate structure, high-income taxpayers pay more dollars of tax than low-income individuals.
- D. In theory, a progressive rate structure results in equal economic sacrifice across taxpayers.

The marginal rate and average rate are equal under a proportionate rate structure.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

Topic: Income Tax Rate Structures

Topic: Marginal and Average Tax Rates

Topic: Regressive Taxes

70. Which of the following statements concerning a regressive tax rate structure is **true**?

- A. A regressive tax rate structure is justified by the tax policy of distributive justice.
- B. A regressive rate structure is justified by the theory of the declining marginal utility of income.
- C. Under a regressive rate structure, the average tax rate for high-income taxpayers is less than the marginal tax rate.
- D.** None of the statements are true.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Learning Objective: 02-08 Discuss distributive justice as a tax policy objective.

Topic: Distributive Justice

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

71. Jurisdiction M imposes an individual income tax based on the following schedule.

Rate	Income bracket
5%	\$-0- to \$50,000
+ 8%	\$50,001 to \$200,000
+ 12%	\$200,001 and above

Mr. Coen has \$78,000 taxable income. Compute the tax on this income.

- A.** \$4,740
 - B. \$6,240
 - C. \$8,740
 - D. None of the choices are correct.
- $(5\% \times \$50,000) + (8\% \times \$28,000) = \$4,740.$

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

72. Jurisdiction M imposes an individual income tax based on the following schedule.

Rate	Income bracket
5%	\$-0- to \$50,000
+ 8%	\$50,001 to \$200,000
+ 12%	\$200,001 and above

Ms. Owen has \$314,000 taxable income. Compute the tax on this income.

- A. \$29,680
- B.** \$28,180
- C. \$37,680
- D. None of the choices are correct.

$$(5\% \times \$50,000) + (8\% \times \$150,000) + (12\% \times \$114,000) = \$28,180.$$

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Topic: Income Tax Rate Structures

Topic: Regressive Taxes

73. Jurisdiction M imposes an individual income tax based on the following schedule.

Rate	Income bracket
5%	\$-0- to \$50,000
+ 8%	\$50,001 to \$200,000
+ 12%	\$200,001 and above

Which of the following statements is **true**?

- A. If Mrs. Hall's taxable income is \$227,000, her average tax rate is 12%.
- B. If Mr. Poe's taxable income is \$41,200, his marginal tax rate is 8%.
- C.** If Ms. Kaye's taxable income is \$63,800, her marginal tax rate is 8%.
- D. None of the choices are correct.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

Topic: Marginal and Average Tax Rates

74. Jurisdiction M imposes an individual income tax based on the following schedule.

Rate	Income bracket
5%	\$-0- to \$50,000
+ 8%	\$50,001 to \$200,000
+ 12%	\$200,001 and above

Which of the following statements is **false**?

- A. If Ms. Lui's taxable income is \$33,400, her average tax rate is 5%.
- B. If Mr. Bell's taxable income is \$519,900, his marginal tax rate is 12%.
- C. If Ms. Vern's taxable income is \$188,000, her average tax rate is 7.2%.
- D.** None of the choices are false.

Ms. Vern's tax is \$13,540 ($[5\% \times \$50,000] + [8\% \times \$138,000]$), so her average tax rate is 7.2% ($\$13,540 / \$188,000$).

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

75. Congress originally enacted the federal estate and gift taxes to improve:

- A. Distributional justice
- B. Economic efficiency
- C. Vertical equity
- D. Horizontal equity

Accessibility: Keyboard Navigation

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-08 Discuss distributive justice as a tax policy objective.

Topic: Distributive Justice

76. Which of the following tax policies would increase the redistribution of wealth across society?

- A. Repealing the federal estate and gift taxes
- B. Increasing the highest marginal income tax rate by 10%
- C. Replacing the progressive income tax rate structure with a flat rate
- D. Replacing the income tax with a national sales tax

Replacing the progressive rate structure with a flat rate or replacing the progressive income tax with an arguably regressive sales tax would reduce wealth redistribution.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-08 Discuss distributive justice as a tax policy objective.

Topic: Distributive Justice

77. Which of the following statements concerning the standard of fairness is **false**?

- A. People who believe that a tax is unfair are more likely to evade the tax.
- B. People believe that the federal income tax is unfair because it contains preferences available only to wealthy individuals.
- C. The public perception that the federal income tax is unfair has decreased in recent decades.
- D. None of the choices are false.

The public perception of unfairness has increased in recent decades.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-08 Discuss distributive justice as a tax policy objective.

Topic: Distributive Justice

78. Assume that Congress plans to amend the federal income tax to provide a deduction for the first \$2,400 of residential rent paid by families with incomes below the federal poverty level. Which of the following statements is **true**?

- A. The amendment is intended to improve the efficiency of the tax.
- B.** The amendment is intended to improve the equity of the tax.
- C. The amendment is intended to improve the simplicity of the tax.
- D. The amendment is intended to improve the convenience of the tax.

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Learning Objective: 02-03 Describe the characteristics of a convenient tax.

Learning Objective: 02-04 Contrast the classical and the modern concepts of tax efficiency.

Learning Objective: 02-05 Define horizontal and vertical equity.

Topic: Annual versus Lifetime Horizontal Equity

Topic: Static versus Dynamic Forecasting

79. Assume that Congress plans to amend the federal individual income tax to eliminate the deductions for medical care, educational savings, charitable contributions, and home mortgage interest. Which of the following statements is **true**?

- A. The amendment will reduce the complexity of the tax.
- B. The amendment will increase the horizontal equity of the tax.
- C. The amendment will increase the neutrality of the tax.
- D.** Both the amendment will reduce the complexity of the tax and will increase the neutrality of the tax.

The amendment reduces complexity because it simplifies measurement of the tax base. It increases neutrality because it eliminates preferences available to only certain taxpayers. However, the amendment makes the measurement of each individual's ability to pay *less precise* and, therefore, reduces horizontal equity.

Learning Objective: 02-05 Define horizontal and vertical equity.

Topic: Annual versus Lifetime Horizontal Equity

Topic: Static versus Dynamic Forecasting

82. Mr. and Mrs. Boln earn \$63,000 annual income and pay 20% in state and federal income tax. If tax rates increase so that the couple's annual rate increases to 25%, how much additional income must they earn to maintain their after-tax standard of living?

The Bolns' after-tax income *before* the rate increase is \$50,400 ($\$63,000 - [\$63,000 \times 20\%]$). To maintain their after-tax income *after* the rate increase, the Bolns must earn \$4,200 additional income to increase their before-tax income to \$67,200 ($\$50,400 / 75\%$) on which they will pay \$16,800 tax.

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-02 Differentiate between the income effect and the substitution effect.

Topic: Behavioral Responses to Rate Changes

83. Mr. Ohno owns and operates a part-time service business that generates \$80,000 annual taxable income. His federal tax rate on this income is 17%. Because of recent legislation, this rate will increase to 25% next year.

A. Based on a static forecast, how much additional revenue will the federal government collect from Mr. Ohno next year?

B. How much additional revenue will the federal government collect if Mr. Ohno decides to work fewer hours and consequently earns only \$50,000 next year?

A. The federal government will collect \$6,400 additional revenue ($\$80,000 \times 8\%$ rate increase).

B. \$0. The federal government will collect \$1,100 *less* revenue ($[\$50,000 \times 25\%] - [\$80,000 \times 17\%]$).

Accessibility: Keyboard Navigation

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-01 Explain the concept of sufficiency of a good tax.

Topic: Static versus Dynamic Forecasting

84. The City of Willford levies a flat 7% tax on individual income in excess of \$55,000. Individuals who earn \$55,000 or less pay no income tax.

A. Ms. Vello earned \$127,200 income this year. Compute her city income tax and determine her average tax rate.

B. Mr. Sui earned \$68,900 income this year. Compute his city income tax and determine his average tax rate.

C. Does Willford have a proportionate, progressive, or regressive tax rate structure?

A. Ms. Vello's tax is \$5,054 ($\$72,200 \times 7\%$), and her average tax rate is 3.97% ($\$5,054 / \$127,200$).

B. Mr. Sui's tax is \$973 ($\$13,900 \times 7\%$), and his average tax rate is 1.41% ($\$973 / \$68,900$).

C. Willford has a progressive tax rate structure because the rate increases as the base increases.

Accessibility: Keyboard Navigation

Difficulty: 3 Hard

Gradable: manual

Learning Objective: 02-06 Differentiate between regressive, proportionate, and progressive rate structures.

Learning Objective: 02-07 Explain the difference between marginal and average tax rates.

Topic: Income Tax Rate Structures

Topic: Marginal and Average Tax Rates

Topic: Regressive Taxes

85. The country of Valhalla levies an income tax with the following rate structure.

Rate	Income bracket
5%	\$-0- to \$50,000
+ 10%	\$50,001 to \$150,000
+ 20%	\$150,001 and above

A. Mrs. Greene's annual income is \$125,000. Compute her tax, her average tax rate, and her marginal tax rate.

B. Mr. Chen's annual income is \$220,000. Compute his tax, his average tax rate, and his marginal tax rate.

C. Does Valhalla have a proportionate, progressive, or regressive tax rate structure?

A. Mrs. Greene's tax is $\$10,000 = (5\% \times \$50,000) + (10\% \times \$75,000)$. Her average tax rate is 8% ($\$10,000 / \$125,000$), and her marginal tax rate is 10%.

B. Mr. Chen's tax is $\$26,500 = (5\% \times \$50,000) + (10\% \times \$100,000) + (20\% \times \$70,000)$. His average tax rate is 12.05% ($\$26,500 / \$220,000$) and his marginal tax rate is 20%.

C. Valhalla has a progressive tax rate structure because the rate increases as the base increases.
