- a. Following up on a purchase order to cancel it.
- b. Following up on a purchase order to change the delivery date.
- c. Following up on a purchase order to make sure that the supplier is being paid.
- d. Following up on a purchase order to make sure that the supplier is going to perform as it has confirmed through the purchase order confirmation.

ANSWER: d

Chapter 1 - The Role of Purchasing in the Value Chain

17. Which of the following is not a form of expediting?

- a. A routine status check.
- b. An advanced status check.
- c. Field analysis.
- d. A credit check.

ANSWER: d

18. Which of the following is a characteristic of a finished product?

- a. A component for the manufacturing process.
- b. Products which are purchased to be sold, after negligible added value.
- c. Raw materials for the production process.
- d. Purchased for storage.

ANSWER: b

19. Which of the following explains global sourcing?

- a. Products are increasingly sourced from foreign, low-cost countries.
- b. Products which are purchased to be sold locally.
- c. Products that are sold outside of the European Community.
- d. Products sourced from local suppliers.

ANSWER: a

20. Which of the following are not forms of global sourcing?

- a. Low-cost country sourcing
- b. Products which are sold outside of the European Community
- c. Regional sourcing
- d. Offshoring

ANSWER: b

21. Which of the following are indirect materials?

- a. Transport
- b. Raw materials
- c. Services
- d. Components

ANSWER: c

22. Which term describes the purchasing of all materials, components and services that are used to support the company's infrastructure and back-office activities?

- a. Components acquisition
- b. Raw materials acquisition
- c. Direct purchasing
- d. Indirect purchasing

ANSWER: d

23. Which term describes products which are not consumed immediately, but whose purchasing value is depreciated

Chapter 1 - The Role of Purchasing in the Value Chain

during its economic life cycle?

- a. Just -in-Time supplies
- b. Raw materials acquisition
- c. Equipment
- d. Investment goods

ANSWER: d

24. Which of the following terms refers to products, indirect materials or consumable items which are necessary for keeping the organization running in general, and for the support activities in particular?

- a. Maintenance, repair and operating materials.
- b. Supplies
- c. Consumables
- d. Tangible goods

ANSWER: a

25. Which of the following situations explains the 'make to order (MTO)' process?

- a. Maintenance repair and operating materials are kept in stock.
- b. Only raw materials and components are kept in stock.
- c. Finished products are stockpiled.
- d. No raw materials or components are kept in stock.

ANSWER: b

26. Which of the following situations explains 'ordering'?

- a. Ordering refers to the placing of purchase orders at a supplier against previously arranged conditions.

- d. Quality is meeting (internal or external) customer's requirements that have been informally agreed between a customer and a supplier.

ANSWER: c

41. Which of the following is a definition of 'raw materials'?

- a. Materials which have undergone no transformation or a minimal transformation, and they serve as the basis materials for a production process.
- b. Materials which have undergone transformation and they serve as the basis materials for a production process.
- c. Materials which have undergone no transformation or a minimal transformation, and they serve as the end product of a production process.
- d. Materials which have undergone transformation or a minimal transformation, and they serve as the end product of a production process.

ANSWER: a

42. Which of the following is a consequence of a 'Request for Information (RFI)'?

- a. Suppliers submit general information that may help them to qualify for a potential tender.
- b. Suppliers are invited to submit a tender.
- c. Suppliers are invited to submit general information that will result in them being awarded a supply contract.
- d. Suppliers are invited to submit information that may help them to be contacted for the award of a future contract for supplying goods and services.

ANSWER: a

43. Which of the following is a consequence of a 'Request for Quotation (RFQ)'?

- a. Suppliers submit general information that may help them to qualify for a potential tender.
- b. Suppliers are invited to submit a general tender.
- c. Suppliers are invited to submit general information that will result in them being awarded a supply contract.
- d. Suppliers are invited to submit a detailed bid which meets the requirements as laid down in the request for quotation against the lowest possible price (identical to request for tender).

ANSWER: d

44. Which of the following is a consequence of a 'Request for Tender'?

- a. Suppliers submit general information that may help them to qualify for a potential tender.
- b. Suppliers are invited to submit a general tender.
- c. Suppliers are invited to submit general information that will result in them being awarded a supply contract.

Chapter 1 - The Role of Purchasing in the Value Chain

- d. Suppliers are invited to submit a detailed bid which meets the requirements as laid down in the request for quotation against the lowest possible price (identical to request for tender).

ANSWER: d

45. Which of the following explains 'semi-manufactured goods'?

- a. These products have already been processed and are ready for sale and distribution.
- b. These products have already been processed once or more, and they will be processed further at a later stage.
- c. These products have already been processed once or more, and they will not be processed further at a later stage.
- d. These products have not yet been processed.

ANSWER: b

46. Which of the following explains 'sourcing'?

- a. Finding and selecting the best possible source of supply on a worldwide basis.
- b. Contracting and managing the best possible source of supply on a worldwide basis.
- c. Finding, selecting, contracting and managing the best possible source of supply on a worldwide basis.
- d. Finding, selecting, contracting and managing possible source of local supply.

ANSWER: c

47. Which of the following activities is not part of sourcing strategy?

- a. Identifies for a certain category from how many suppliers to buy, what type of relationship to pursue, and type of contract to negotiate for.
- b. Identifies for a certain category whether to source locally, regionally or globally.
- c. Competitor analysis.
- d. Identifies for a certain category from how many suppliers to buy, what type of relationship to pursue, and contract duration

ANSWER: c

48. Which of the following activities is part of sourcing strategy?

- a. Identifies for a certain category from how many suppliers to buy, what type of relationship to pursue, contract duration, type of contract to negotiate for, and whether to source locally, regionally or globally.
- b. Environmental scanning
- c. Portfolio analysis
- d. Competitor analysis

ANSWER: a

49. Which of the following explains 'supply'?

- a. Includes at least purchasing, materials management, incoming inspection and receiving. Supply is used when relating to buying based upon total cost of ownership in a manufacturing environment.
- b. Purchasing
- c. Includes at least incoming inspection and receiving.
- d. Includes at least purchasing and materials management.

ANSWER: a

50. What is 'supply chain management'?

Chapter 1 - The Role of Purchasing in the Value Chain

- a. The management of all suppliers in such a way that the expectations of the end users of the company are met or surpassed.
- b. The management of all of goods and services up from the raw materials suppliers, component suppliers and other suppliers in such a way that the expectations of the end users of the company are met or surpassed.
Purchasing
- c. The management of all activities, information, knowledge and financial resources associated with the flow and transformation of goods and services.
- d. The management of all activities, information, knowledge and financial resources associated with the flow and transformation of goods and services up from the raw materials suppliers, component suppliers and other suppliers in such a way that the expectations of the end users of the company are met or surpassed.

ANSWER: d

51. Which of the following explains 'supply chain'?
