#### MATCHING

Choose the one most appropriate answer for each.

k. informal references a. acre b. adaptation nonhomogenity c. agreement m. personal property d. appurtenance n. quadrangle e. base line o. real estate f. bench marks p. recorded plat g. datum q. scarcity h. fixity r. situs

. government survey s. vertical land descriptions

j. improvements t. water table

- 1. any form of land development, such as buildings, roads, fences, and pipelines
- 2. fixed mark of known location and elevation
- 3. type of measurement necessary when air rights need to be described
- 4. a subdivision map filed in the county recorder's office
- 5. the shortage of land in an area where there is a great demand for land
- 6. a point, line, or surface from which a vertical height or depth is measured
- 7. manner in which a specific item is custom made to adapt to a certain piece of real estate
- 8. a right or interest in things of a temporary or movable nature
- 9. a parcel of land containing 43,560 square feet
- 10. upper limit of percolating water below the earth's surface
- 11. the fact that no two parcels of land are exactly alike
- 12. location preference
- 13. the fact that land and buildings require long periods of time to pay for themselves
- 14. land and improvements in a physical sense as well as the rights to own and use them
- 15. right or privilege or improvement that belongs to and passes with the land
- 16. easily understood but not precise method of land description
- 17. possibly the most significant test of the existence of a fixture
- 18. latitude line that intercepts a principal meridian

- 19. also known as rectangular survey or U.S. public land survey20. 24-by-24 mile area created by the guide meridians and correction lines
