40. From the data given below, calculate the Retained Earnings balance of December 31, 2013.

Retained earnings, December 31, 2014	\$115,000
Increase in total liabilities during 2014	33,000
Gain on the sale of buildings during 2014	14,000
Dividends declared and paid in 2014	9,000
Proceeds from sale of common stock in 2014	32,000
Net income for the year ended December 31, 2014	41,000

Prepare the retained earning portion of a statement of changes in stockholders' equity for the year ended December 31, 2014.

Retained earnings, December 31, 2013	\$?

42. Volunteer, Inc. is in the process of liquidating and going out of business. The firm has \$34,910 in cash, inventory totaling \$107,000, accounts receivable of \$72,000, plant and equipment with a \$192,000 book value, and total liabilities of \$307,000. It is estimated that the inventory can be disposed of in a liquidation sale for 75% of its cost, all but 15% of the accounts receivable can be collected, and plant and equipment can be sold for \$210,000.

(a.) Calculate the amount of cash that would be available to the stockholders if the accounts receivable are collected, the other assets are sold as described, and the liabilities are paid in full.

(b.) Describe how the difference between book value and liquidation value would be treated on the final income statement for Volunteer, Inc. with respect to the following assets: inventory, accounts receivable, and plant and equipment. What income statement accounts would be affected when these assets are sold or collected as described above?

(a.)

Cash now available	\$ 34,910
Inventory liquidation value (\$107,000 * .75)	80,250
Accounts receivable collections (\$72,000 * .85)	61,200
Plant and equipment disposal value	<u>210,000</u>
Total cash available	\$386,360
Less: Payment of liabilities	<u>(307,000)</u>
Cash available to stockholders	<u>\$ 79,360</u>

(b.) The inventory was sold at less than cost, so cost of goods sold would be included in the income statement, and a loss on the market value decline might also be shown separately. Sales would also be shown in the revenues section of the income statement. Since less than 100% of the accounts receivable were collected, the difference should be treated as bad debts expense. Plant and equipment was sold for more than book value, so Volunteer, Inc. should record a gain on the sale of plant and equipment.

43. Ann Kimber is thinking about going out of business and retiring. Her firm has \$25,000 in cash, other assets totaling \$35,700, and total liabilities of \$25,500. The other assets can be sold for an estimated \$34,000 cash in a liquidation sale. Calculate the amount of cash that would be available upon Ann's retirement if the other assets were sold and the liabilities were paid.
