18. Assume you are a banker who has loaned money to a firm, but that firm is now facing increased competition and reduced cash flows. Which one of the following ratios would you most closely monitor to evaluate the firm's ability to repay its loan?

A. current ratio

B. debt-to-equity ratio

C. times-interest-earned ratio

D. times-burden-covered ratio

E. None of the above.

The times-burden-covered ratio is the best answer, as it indicates how well the firm's cash flows cover both debt principal and interest payments. The times-interest-earned ratio applies most appropriately when we are confident the firm can roll over existing debt; this is not the case here.

- 22. Primavera Holdings has a profit margin of 25%, an asset turnover of 0.5 and financial leverage (assets to equity) of 1.5. Primavera has \$20 billion in assets, of which half is in cash and marketable securities. Assume that Primavera earns a 3 percent after-tax return on cash and securities. What would Primavera's return on equity be if it paid out 90% of its cash and marketable securities as a dividend to shareholders?
 - A. Negative
 - B. Between 0% and 20%
 - C. Between 20% and 40%
 - **D.** between 40% and 60%
 - E. Greater than 60%

Currently, equity = \$13.33 billion (20/13.33 = 1.5), sales = 10 (10/20 = 0.5) and net income = 2.5 (2.5/10 = 25%).

Paying a \$9 billion dividend would reduce assets to \$11 billion and equity to \$4.33 billion. Net income would fall by $3\% \times \$9$ billion = \$0.27 billion, to \$2.23 billion.

ROE would then be 2.23/4.33 = 51.50%

32. Please refer to the income statement for VGA Associates below. Assuming that cost of goods sold are variable and operating expenses are fixed, what was VGA Associates' breakeven sales volume in 2014?

VGA Associates					
Income statement for	Income statement for 2014				
Sales	\$200,000				
Cost of goods sold	150,000				
Gross profit	50,000				
Operating expenses	20,000				
Operating income	30,000				
Interest expense	5,000				
Pre-tax income	25,000				
Taxes	5,000				
Net income	\$20,000				

- A. \$20,000
- **B.** \$80,000
- C. \$150,000
- D. \$180,000
- E. None of the above.

Gross margin = 50,000/200,000 = 25%.

Breakeven sales volume = Operating expenses/Gross margin = \$20,000/0.25 = \$80,000.

Short Answer Questions

33. Answer the questions below based on the following information. The tax rate is 35% and all dollars are in millions. Assume that the companies have no liabilities other than the debt shown below.

	Suunto Inc.	Runrun Corp.
Earnings before interest and taxes	\$280	\$294
Debt (at 10% interest)	\$140	\$840
Equity	\$560	\$210

- a. Calculate each company's ROE, ROA, and ROIC.
- b. Why is Runrun's ROE so much higher than Suunto's? Does this mean Runrun is a better company? Why or why not?
- c. Why is Suunto's ROA higher than Runrun's? What does this tell you about the two companies?
- d. How do the two companies' ROICs compare? What does this suggest about the two companies?

	Suunto Inc.	Runrun Corp.
Net income	172.9	136.5
ROE	31%	65%
ROA	25%	13%
ROIC	26%	18%

a.

- b. Runrun's higher ROE is a natural reflection of its higher financial leverage. It does not mean that Runrun is the better company.
- c. This is also due to Runrun's higher leverage. ROA penalizes levered companies by comparing the net income available to equity to the capital provided by owners and creditors. It does not mean that Runrun is a worse company than Suunto.
- d. ROIC abstracts from differences in leverage to provide a direct comparison of the earning power of the two companies' assets. On this metric, Suunto is the superior performer. Before drawing any firm conclusions, however, it is important to ask how the business risks faced by the companies compare and whether the observed ratios reflect long-run capabilities or

- 34. Please refer to Limited Brands Inc.'s financial statements above. Use the company's operating profit as an approximation of its EBIT, and assume a 40% tax rate for your calculations. For the fiscal years ending in January of 2006 and 2007, calculate:
 - a. Debt-to-equity ratio
 - b. Times-interest-earned ratio
 - c. Times burden covered

	Fiscal Year Ending	
	Jan. 2007 Jan. 200	
a. Debt-to-equity ratio	1.40	1.57
b. Times-interest-earned ratio	11.53	10.08
c. Times burden covered	10.35	10.08

(Note that principal payment in year t equals current portion of long-term debt in year t-1.)

- 35. Please refer to Limited Brands Inc.'s financial statements above. Use the company's operating profit as an approximation of its EBIT, and assume a 40% tax rate for your calculations. What percentage decline in earnings before interest and taxes could Limited Brands have sustained in fiscal years ending in January 2006 and 2007 before failing to cover:
 - a. Interest and principal repayment requirements?
 - b. Interest, principal, and common dividend payments?
 - a. For the fiscal year ending January 2006:

Interest expense = \$94

Principal repayment = \$0 (long-term debt due in one year from 2005)

EBIT = \$947.5, so it could have fallen (947.5 - 94)/947.5 = 90.1%

before failing to cover interest and principal.

For the fiscal year ending January 2007:

Interest expense = \$102

Principal repayment = \$7 (long-term debt due in one year from 2006)

EBIT = 1,176, so it could have fallen (1,176 - 102 - 7/0.6)/1,176 = 90.3%

before failing to cover interest and principal.

b. For the fiscal year ending January 2006:

Interest expense = \$94

Principal repayment = \$0 (long-term debt due in one year from 2005)

Common dividends = Shares outstanding \times Dividends per share = 395 \times 0.61 = \$241.0

EBIT = \$947.5, so it could have fallen (947.5 - 94 - 241/0.6)/947.5 = 47.7%

before failing to cover interest, principal, and dividends.

For the fiscal year ending January 2007:

Interest expense = \$102

Principal repayment = \$7 (long-term debt due in one year from 2006)

Common dividends = Shares outstanding \times Dividends per share = 398 \times 0.60 = \$238.8

EBIT = \$1,176, so it could have fallen (1,176 - 102 - 245.8/0.6)/1,176 = 56.5%

before failing to cover interest, principal, and dividends.
