

## **PART TWO—The Power of Vision**

### **Major Purposes of Part Two**

Part Two focuses on three important subjects—the power of vision, the motive to lead, and organizational climate.

### **Part Two Objectives**

After completing Part Two, your students should be able to better understand:

- The importance of vision for leadership success;
- The leadership qualities needed for steering organizations through periods of change;
- Strategies for successful leadership;
- Motives for assuming the challenge of leadership;
- The importance of organizational climate; and
- The ethical climates of organizations—profit maximizing, trusteeship, and quality of life management.

### Strategies For Successful Leadership

There are many models of what it takes to be a good leader. Thomas Neff and James Citrin provide one that is based on extensive polling, financial analysis, and structured interviews. In their book *Lessons from the Top*, they identify seven strategies for effective leadership. Leaders at all levels of responsibility in all types of organizations can use these strategies to succeed.

- **Create a vision.** A successful leader goes to the company's roots, builds on the things the organization does best, and develops a winning plan.
  - **Build a great team.** Great leaders surround themselves with people whose skills and experiences complement their own, and whose passion, attitudes, and values are closely matched to theirs.
  - **Inspire employees to greatness.** Communicate continuously, listen carefully, and genuinely tolerate failure as a learning experience.
  - **Create a flexible, responsive organization.** The best leaders design their organizations to make sure decisions can be made fast.
  - **Use reinforcing reward systems.** Make recognition and compensation consistent with achieving the mission, living the values, and executing the strategy of the organization.
  - **Retain top performers.** Have good perks, memberships, stock options, and other incentives so top performers won't leave.
  - **Lead with integrity.** Integrity builds trust in leaders that is critical for high performing organizations.

## NOTES AND ANECDOTES

In 2004 Wal-Mart Stores, Inc. published a vision statement identifying 3 basic values and core beliefs of the company. These are analogous to IBM's 3 core values.

- Respect for the Individual  
“ ‘Our people make the difference’ is not a meaningless slogan – it’s a reality at Wal-Mart. We are a group of dedicated, hardworking, ordinary people who have teamed together to accomplish extraordinary things. We have very different backgrounds, different colors and different beliefs, but we do believe that every individual deserves to be treated with respect and dignity.”

Don Soderquist  
Senior Vice Chairman, Wal-Mart Stores, Inc. (retired)

- Service to Our Customers  
We want our customers to trust in our pricing philosophy and to always be able to find the lowest prices with the best possible service. We’re nothing without our customers.

“Wal-Mart’s culture has always stressed the importance of Customer Service. Our Associate base across the country is as diverse as the communities in which we have Wal-Mart stores. This allows us to provide the Customer Service expected from each individual customer that walks into our stores.”

Tom Coughlin,  
Vice Chairman, Wal-Mart Stores, Inc.

- Strive for Excellence  
New ideas and goals make us reach further than ever before. We try to find new and innovative ways to push our boundaries and constantly improve.  
  
“Sam was never satisfied that prices were as low as they needed to be or that our product’s quality was as high as they deserved – he believed in the concept of striving for excellence before it became a fashionable concept.”

Lee Scott,  
President and Chief Executive Officer of Wal-Mart Stores, Inc.

## NOTES AND ANECDOTES

Max DePree, management author and retired chairman of Herman Miller, Inc., writes, "Healthy companies come from healthy leaders." Just as one takes a physical exam to evaluate personal health, so can the leader take a Leadership Physical to evaluate leadership performance. The occasional checkup can be used to reveal strengths and areas for improvement.

Approximately 500 years ago, Niccoló Machiavelli wrote in his classic book *The Prince* that a leader should discourage unrequested advice, but he went on to say that a great leader is a great asker and a patient hearer of the truth. Once a year, the caring leader should visit with someone who understands leadership, knows his condition, and can provide objective evaluation and prescription for good leadership performance.

The following exercise includes a *brain scan*, *heart check-up*, and *fitness test* to evaluate leadership performance. Current status is less important than what the leader does with the data. What steps are taken to stay great or improve?

---

## EXERCISE 2.1: LEADERSHIP PHYSICAL

Complete the following evaluation of leadership performance. Evaluate the performance of yourself or someone you know in a position of leadership. Respond to each question by placing a number from 1 to 15 (1 is low, 15 is high). Also include evidence to support your opinion and suggestions (Rx) to improve.

### BRAIN SCAN: SETTING DIRECTION

By creating a vision and a strategy to succeed, the leader gains the *respect* and *confidence* of followers.

### NOTES AND ANECDOTES

#### ORGANIZATIONS IN PROGRESS

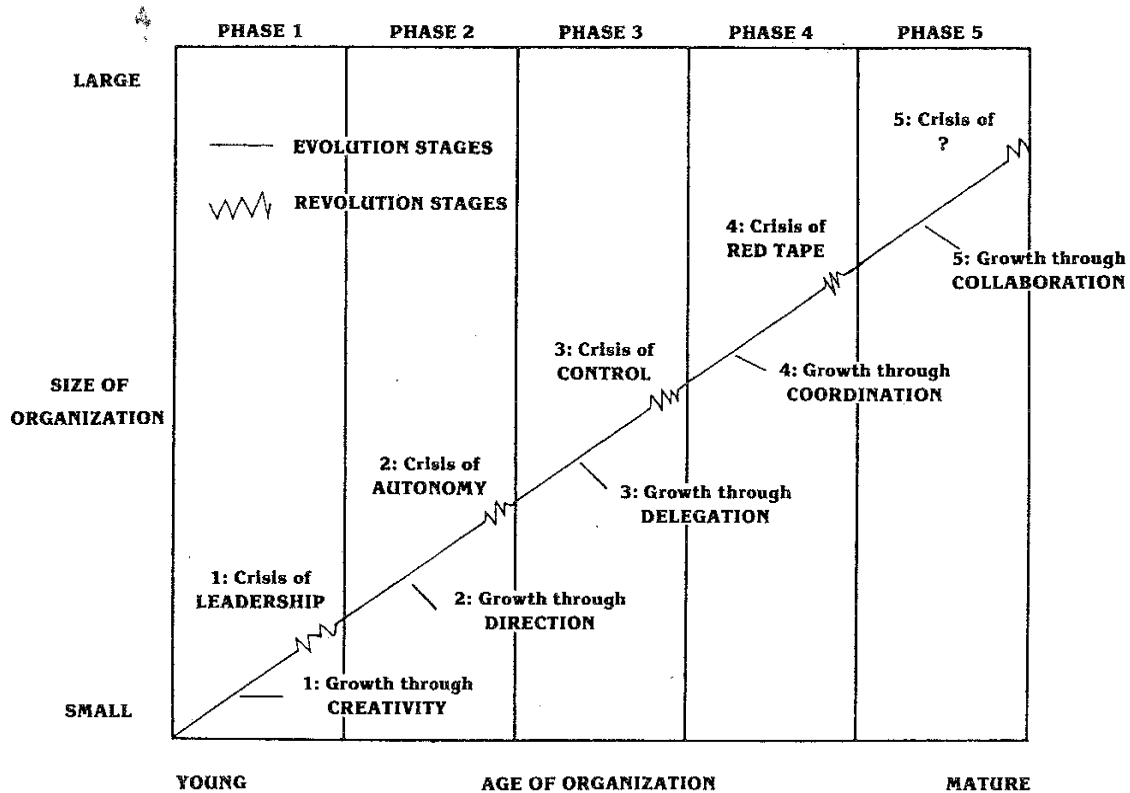

Figure 2-1 shows five phases in the life of an organization. Each phase includes a period of evolution when growth takes place and a period of revolution when crisis threatens the continued development and possibly the existence of the organization.

The following is a description of the typical periods of growth and crisis for each of the five phases:

- *Phase 1: Growth through Creativity.* In its earliest period, an organization's activities are usually centered around the development of products and markets. Top leadership is devoted to these goals. Communication between leaders and followers is frequent and informal. People may work long hours for low pay in anticipation of future benefits.  
*Crisis of Leadership.* As the organization grows, it becomes increasingly difficult to handle the rapidly swelling staff using the old, informal methods. Leaders become overworked and harried by administrative details. A "crisis of leadership" leads to the first revolution. Founders, frequently incapable or unwilling to change habits and styles, may have to step aside in favor of individuals who can focus and organize the organization's activities.
- *Phase 2: Growth through Direction.* Under strong and capable organizers, the organization may experience a period of sustained growth. A functional structure is introduced. Accounting systems, budgets, and personnel policies are adopted. Communication becomes more formal with policies, reports, and memos replacing word-of-mouth customs. Responsibilities are divided between upper level policy makers and lower level specialists.  
*Crisis of Autonomy.* Lower level leaders, however, become increasingly frustrated and demand more autonomy and room to exercise their own initiative. With upper level leaders reluctant to give up authority, a new revolutionary period is at hand.

**FIGURE 2.1 Five Phases of Organizational Development**

- **Phase 3: Growth through Delegation.** The successful organization will install effective decentralization and empowerment activities in answer to the crisis of autonomy. Greater responsibility is given to lower-level leaders. Top executives stay out of day-to-day operations, often concentrating on acquiring new units for the organization. Communication from the top is less frequent.  
*Crisis of Control.* Decentralized leaders are able to penetrate new markets, respond faster to customers, and develop new products. Eventually, however, top leaders may attempt to return to a centralized structure because of a sense of loss of control. This attempt brings on a new revolution, the "crisis of control." The organization must find a new solution to coordinating problems.
- **Phase Four: Growth through Coordination.** This evolutionary period is characterized by the installation of systems for achieving organizational efficiencies and economies. Under the initiation of top leaders, decentralized units are merged into clusters and

groups, each of which is expected to show satisfactory return on invested capital. Central staff personnel are added to initiate, control, and review programs for line managers.

*Crisis of Red Tape.* These changes encourage more efficient use of company resources, and field leaders learn to justify their actions more carefully to headquarters. Tension gradually builds, however, between line and staff and between headquarters and the field. A revolution develops as rules and regulations begin to interfere with problem-solving activities.

- *Phase 5: Growth through Collaboration.* In response to the crisis of red tape, a flexible and pragmatic approach to management develops. Groups and interdivisional teams perform tasks and solve problems. Headquarters' staff is held to a minimum, and the focus of their efforts is to support and facilitate the success of field personnel. Leaders are trained in behavioral skills so they can improve organizational performance. Many of today's organizations are in this stage of evolution.

*Crisis Unknown* Revolution and crisis may center around the psychological saturation of members who become emotionally and physically exhausted by the intensity of teamwork and the heavy pressure for innovative solutions. There may also be pressure for representation on organizational boards, as already exists in many European countries. At present, the situation is "crisis unknown."

## NOTES AND ANECDOTES

### LEADERSHIP CHALLENGE

At each phase of an organization's development, effective leadership is necessary to resolve crises and sustain community.

Herman Maynard, Jr., and Susan Mehrrens, authors of *The Fourth Wave*, identify the challenges facing today's leaders: 1) creating work environments where people feel safe; 2) fostering truth-telling in all dealings; 3) articulating clear and consistent goals, as well as explicit values to guide member behavior; and 4) facing and resolving dysfunctional practices within the community. To meet these challenges, the authors prescribe a structure based on community, a locus of control based on personal commitment, and an atmosphere that supports freedom of expression, respect for all people, and lifelong learning.

## EXERCISE 2.2 Management Systems Questionnaire

This questionnaire evaluates management practices in seven key areas: leadership, motivation, communications, teamwork, decision making, goal setting, and controls.<sup>1</sup>

Evaluate each organizational variable on a scale of 1 to 20 (1 is low; 20 is high). Place a checkmark in the scale grid indicating your assessment of the organization.

Organizational Variable	SYSTEMS OF MANAGEMENT			
	System I	System II	System III	System IV
<b>1. Leadership process used:</b>				
Extent to which superiors have confidence and trust in subordinates	Have no confidence and trust in subordinates	Have condescending confidence and trust, such as master has to servant	Substantial but not complete confidence and trust: still wish to keep control of decisions	Complete confidence and trust in all matters
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			
Extent to which superiors behave so that subordinates feel free to discuss important things about their jobs with their immediate superior	Subordinates do not feel at all free to discuss things about the job with their superior	Subordinates do not feel very free to discuss things about the job with their superior	Subordinates feel free to discuss things about the job with their superior	Subordinates feel completely free to discuss things about the job with their superior
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			
Extent to which immediate superior, in solving job-related problems, generally tries to get subordinates' ideas and opinions and make constructive use of them	Seldom gets ideas and opinions of subordinates in solving job-related problems	Sometimes gets ideas and opinions of subordinates in solving job-related problems	Usually gets ideas and opinions and usually tries to make constructive use of them	Always gets ideas and opinions and always tries to make constructive use of them
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			
<b>2. Character of motivational forces:</b>				
Manner in which motivation is used	Fear, threats, punishment, and occasional rewards	Rewards and some actual or potential punishment	Rewards, occasional punishment, and some involvement	Economic rewards based on compensation system developed through participation: group participation and involvement in setting goals, improving methods, appraising progress toward goals, etc.
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			

## EXERCISE 2.2 Management Systems Questionnaire (continued)

Organizational Variable	System I	System II	System III	System IV
Amount of responsibility felt by each member of the organization for achieving the organization's goals	High levels of management feel responsibility: lower levels feel less: rank and file feel little and often welcome opportunities to behave in ways to defeat organization's goals	Managerial personnel usually feel responsibility: rank and file usually feel relatively little responsibility for achieving organization's goals	Substantial proportion of personnel, especially at high levels, feel responsibility and generally behave in ways to achieve the organization's goals	Personnel at all levels feel responsibility for the organization's goals and behave in ways to implement them
3. Character of communication process:				
Amount of interaction and communication aimed at achieving organization's objectives	Very little	Little	Quite a bit	Much with both individuals and group
Direction of information flow	Downward	Mostly downward	Down and up	Down, up, and among peers
Extent to which downward communications are accepted by subordinates	Viewed with great suspicion	May or may not be viewed with suspicion	Often accepted, but at times viewed with suspicion; may or may not be openly questioned	Generally accepted, but if not, openly and candidly questioned
Accuracy of upward communication	Tends to be inaccurate	Information that boss wants to hear flows: other information is restricted and filtered	Information that boss wants to hear flows: other information may be limited or cautiously given	Accurate

## EXERCISE 2.2 Management Systems Questionnaire (continued)

Organizational Variable	System I	System II	System III	System IV
Psychological closeness of superiors to subordinates (i.e., how well does superior know and understand problems faced by subordinates?)	Has no knowledge or understanding of problems of subordinates	Has some knowledge and understanding of problems of subordinates	Knows and understands problems of subordinates quite well	Knows and understands problems of subordinates very well
	1 2 3 4 5	6 7 8 9 10	11 12 13 14 15	16 17 18 19 20

### 4. Character of interaction-influence process:

Amount and character of interaction	Little interaction and always with fear and distrust	Little interaction and usually with some condescension by superiors: fear and caution by subordinates	Moderate interaction, often with fair amount of confidence and trust	Extensive, friendly interaction with high degree of confidence and trust
	1 2 3 4 5	6 7 8 9 10	11 12 13 14 15	16 17 18 19 20

Amount of cooperative teamwork present	None	Relatively little	A moderate amount	Very substantial amount throughout the organization
	1 2 3 4 5	6 7 8 9 10	11 12 13 14 15	16 17 18 19 20

### 5. Character of decision-making process:

At what level in the organization are decisions formally made?	Bulk of decisions at top of organization	Policy at top: many decisions within prescribed framework made at lower levels	Broad policy and general decisions at top: more specific decisions at lower levels	Decision making widely done throughout organization, although well integrated through linking process provided by overlapping groups
	1 2 3 4 5	6 7 8 9 10	11 12 13 14 15	16 17 18 19 20

To what extent are decision makers aware of problems, particularly those at lower levels in the organization?	Often unaware or only partially aware	Aware of some, unaware of others	Moderately aware of problems	Generally quite well aware of problems
	1 2 3 4 5	6 7 8 9 10	11 12 13 14 15	16 17 18 19 20

## EXERCISE 2.2 Management Systems Questionnaire (continued)

Organizational Variable	System I	System II	System III	System IV
Extent to which technical and professional knowledge is used in decision making	Used only if possessed at higher levels	Much of what is available in higher and middle level is used	Much of what is available in higher, middle, and lower levels is used	Most of what is available anywhere within the organization is used
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			
To what extent are subordinates involved in decisions related to their work?	Not at all	Never involved in decisions: occasionally consulted	Usually consulted, but ordinarily not involved in the decision making	Involved fully in all decisions related to their work
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			
Are decisions made at the best level in the organization so far as the motivational consequences are concerned (i.e., does the decision-making process help to create the necessary motivation in those persons who have to carry out the decisions)?	Decision making contributes little or nothing to the motivation to implement the decision: usually yields adverse motivation	Decision making contributes relatively little motivation	Some contribution by decision making to motivation to implement	Substantial contribution by decision-making process to motivation to implement
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			
6. Character of goal setting or ordering:				
Manner in which usually done	Orders issued	Orders issued: opportunity to comment may or may not exist	Goals are set or orders issued after discussion with subordinate(s) of problems and planned action	Except in emergencies, goals are usually established by means of group participation
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			
Are there forces to accept, resist, or reject goals?	Goals are overtly accepted, but are covertly resisted strongly	Goals are overtly accepted, but often covertly resisted to at least a moderate degree	Goals are overtly accepted, but at times with some covert resistance	Goals are fully accepted both overtly and covertly
	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20			

## EXERCISE 2.2 Management Systems Questionnaire (continued)

Organizational Variable	System I	System II	System III	System IV
7. Character of control process:				
Extent to which the review and control functions are concentrated	Highly concentrated in top management	Relatively highly concentrated, with some delegation control to middle and lower levels	Moderate downward delegation of review and control processes: lower as well as higher levels feel responsible	Quite widespread responsibility for review and control, with lower units at times imposing more rigorous review and tighter controls than top management
	1 2 3 4 5 6 7 8 9 10	11 12 13 14 15	16 17 18 19 20	
Extent to which there is an informal organization present and supporting or opposing goals of organization	Informal organization present and opposing goals of formal organization	Informal organization usually present and partially resisting goals	Informal organization may be present and may either support or partially resist goals of formal organization	Informal and formal organization are one and the same: hence all social forces support efforts to achieve organization's goals
	1 2 3 4 5 6 7 8 9 10	11 12 13 14 15	16 17 18 19 20	
Extent to which control data (i.e., accounting, productivity cost, etc.) are used for self-guidance or group problem solving by managers and nonsupervisory employees or used by superiors in a punitive, policing manner	Used for policing and in punitive manner	Used for policing coupled with reward and punishment, sometimes punitively: used somewhat for guidance, but in accord with orders	Largely used for policing, with emphasis usually on reward, but with some punishment: used for guidance in accord with orders: some use also for self-guidance	Used for self-guidance and for coordinated problem solving and guidance: not used punitively
	1 2 3 4 5 6 7 8 9 10	11 12 13 14 15	16 17 18 19 20

## Scoring

To determine your organization's score on the Management Systems Questionnaire, complete the following steps.

### Step One

Calculate the average score for each of the seven key management systems areas:

1. Leadership processes:      Total \_\_\_\_ divided by 3 = \_\_\_\_ average score
2. Motivational forces:      Total \_\_\_\_ divided by 2 = \_\_\_\_ average score
3. Communication  
processes:      Total \_\_\_\_ divided by 5 = \_\_\_\_ average score
4. Interaction processes:      Total \_\_\_\_ divided by 2 = \_\_\_\_ average score
5. Decision-making  
processes:      Total \_\_\_\_ divided by 5 = \_\_\_\_ average score
6. Goal setting:      Total \_\_\_\_ divided by 2 = \_\_\_\_ average score
7. Control processes:      Total \_\_\_\_ divided by 3 = \_\_\_\_ average score

### Step Two

Enter the seven average scores on the Organizational Evaluation Chart, Figure 2.2. Connect these with straight line to show a pattern of strengths and areas for improvement. Figure 2.3 shows an example.

**FIGURE 2.2 Organizational Evaluation Chart**

Organizational Variable	System I										System II										System III										System IV									
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

**FIGURE 2.3 Organizational Evolution Chart****ORGANIZATIONAL EVALUATION CHART EXAMPLE**

### Step Three

Total the average scores for the seven key areas. Then match the overall score with the corresponding management system and evaluation.

Overall Score	Management System	Evaluation
105-140	System IV	Enlightened; successful; best organizational climate
70-104	System III	Supportive; positive; good organizational climate
35-69	System II	Impoverished; needs work; unsatisfactory organizational climate
7-34	System I	Exploitive; failing; poor organizational climate

## EXERCISE 2.3 Organizational Norms Questionnaire

### Introduction

Norms of behavior influence employee morale and productivity in every organization. Norms can be supportive or harmful to the organization. This questionnaire identifies norms of behavior in ten important categories:

1. organizational/personal pride;
2. performance/excellence;
3. teamwork/communication;
4. leadership/supervision;
5. profitability/cost effectiveness;
6. colleague/associate relations;
7. customer/client relations;
8. innovativeness/creativity;
9. training/development;
10. candor/openness.

### Directions

You are asked to predict what most employees in your organization would think or do if another employee behaved in a particular manner. For example, the first item reads:

If an employee in your organization were to criticize the organization and the people in it . . . most other employees would:

To complete this statement, choose one of the following alternatives:

- A. strongly agree with or encourage it;
- B. agree with or encourage it;
- C. have or express no opinion;

*Source: Reprinted from John E. Jones and J. William Pfeiffer (eds.), The 1977 Annual Handbook for Group Facilitators (San Diego, Calif.: University Associates, Inc., 1977). Used with permission.*

- D. disagree with or discourage it;
- E. strongly disagree with or discourage it.

Choose the alternative that you think would be the most common response of most employees, and place the corresponding letter in the blank space following each item. Complete all 42 statements in the same manner.

If an Employee in Your Organization Were to:	Most Other Employees Would:
1. Criticize the organization and the people in it . . .	<hr/>
2. Try to improve things, even though the operation is running smoothly . . .	<hr/>
3. Listen to others and try to get their opinions . . .	<hr/>
4. Think of going to a supervisor with a problem . . .	<hr/>
5. Look on himself or herself as being responsible for reducing costs . . .	<hr/>
6. Take advantage of another employee . . .	<hr/>
7. Keep a customer or client waiting in order to look after matters of personal convenience . . .	<hr/>
8. Suggest a new idea or approach for doing things . . .	<hr/>
9. Actively look for ways to expand his or her knowledge in order to be able to do a better job . . .	<hr/>
10. Talk freely and openly about the organization and its problems . . .	<hr/>
11. Show genuine concern for the problems that face the organization and make suggestions for solving them . . .	<hr/>
12. Suggest that employees should do only enough to get by . . .	<hr/>
13. Go out of his or her way to help other members of the work group . . .	<hr/>
14. Look on the supervisor as a source of help and development . . .	<hr/>

15. Purposely misuse equipment or privileges  
... \_\_\_\_\_
16. Express concern for the well-being of other  
members of the organization ... \_\_\_\_\_
17. Attempt to find new and better ways to  
serve the customer or client ... \_\_\_\_\_
18. Attempt an experiment in order to do things  
better ... \_\_\_\_\_
19. Show enthusiasm for going to an organiza-  
tion-sponsored training and development  
program ... \_\_\_\_\_
20. Suggest confronting the boss about a mistake  
or something in the boss's style that is  
creating problems ... \_\_\_\_\_
21. Look on the job as being merely a paycheck  
... \_\_\_\_\_

**X. Candor/Openness**

Item	Response				
	A	B	C	D	E
10	+2	+1	0	-1	-2
20	+2	+1	0	-1	-2
30	+2	+1	0	-1	-2
39	+2	+1	0	-1	-2
Total Score _____ $\div 8 \times 100 =$ _____ Final % Score					

**Instructions**

For each of the ten categories, enter your final percentage score from the score sheet, and then plot that percentage by placing an X on the following graph at the appropriate point. (Negative percentages are plotted to the left of the center line; positive percentages are plotted to the right.) Next, connect the X's you have plotted with straight lines. The result is a profile of organizational norms (see Figure 2.4).

**Interpretation**

The higher the percentage for each category on the Organizational Norms Questionnaire, the more effective the organization is and the more satisfied employees would be expected to be. The following is a description of each category:

- I. *Organizational/personal pride.* High scores in this area represent a concern for the health of the organization, its vitality, and its success. The work itself is rewarding, and problems are looked on as challenges rather than as causes for apathy or defeat.
- II. *Performance/excellence.* Favorable ratings in this area represent striving for personal and organizational excellence. High standards of performance are the norm.
- III. *Teamwork/communication.* Organizations in which members share information and help one another usually experience high morale and productivity, while organizations with restricted communications and less cohesive groups typically experience failure.
- IV. *Leadership/supervision.* Leadership refers to technical skill, consideration of employee problems, and strength of character. Without effective leadership, a group or organization will not be successful.
- V. *Profitability/cost effectiveness.* Employees must be aware of economic factors relating to organizational success. A lack of concern for company property and expenses often indicates poor morale.

**Figure 2.4 Profile of Organizational Norms**

VI. *Colleague/associate relations.* People need social interaction and a sense of belonging. Unless conditions in the organization satisfy these needs, reduced commitment and poor job performance can result.

VII. *Customer/client relations.* The behavior of each representative of the organization reflects on the integrity and professionalism of the entire organization. A poor attitude or misconduct by one employee may result in a poor reputation for all employees.

- VIII. *Innovativeness/creativity.* Employees who exercise creativity show interest in their work. The distinction should be made between a grumpy complainer and an employee who is trying to develop better methods for the benefit of the organization.
- IX. *Training/development.* Training and development for all levels and classifications of employees is important for organizational effectiveness and employee satisfaction. Training builds skills, relationships, and commitment.
- X. *Candor/openness.* A high score in this area represents honest and free-flowing communications. Such openness is necessary if an organization is to accomplish its performance objectives as well as meet the social and psychological needs of its employees.

The Organizational Norms Questionnaire can be used for team building and organizational development. For team building, group profiles can be developed to diagnose problems and make improvements. For organizational development, a profile can be developed showing the overall strengths and weaknesses of the organization in the ten categories. This profile can be used as a basis for maintaining or improving overall effectiveness.

A useful exercise is for the leader to compare his or her self-evaluation on the *Leadership Physical* with the evaluation of colleagues. Points of agreement and disagreement can be explored, and actions can be taken to improve as needed.

**EXERCISE 2.4 MANAGEMENT EFFECTIVENESS AUDIT****MANAGEMENT EFFECTIVENESS AUDIT****Directions**

Complete this questionnaire to evaluate the management processes — planning, organizing, leading, and controlling — as they are generally practiced in your organization. In rating each item, circle the number on the scale that represents your evaluation (1 through 5, with 5 representing the highest rating). Each item should be rated independently without looking back to previous ratings. When you are unable to rate an item, indicate why in the space provided under “Unable to Rate.” When you have a comment or recommendation regarding an item, write this in the space provided under “Comments or Recommendations.”

Comments or Recommendations

25. Are there workable procedures for evaluating performance? No workable procedures Very workable procedures

26. Is control emphasized to such an extent that personal initiative is discouraged? Control is over-emphasized, discouraging personal initiative Controls are constructively used; no detraction from personal initiative

27. Are corrective actions implemented when performance does not meet standards? Corrective actions are not implemented appropriately Corrective actions are implemented appropriately

28. What are reporting, comparing, and corrective procedures used for? Policing and punishment Guidance and problem solving

**Scoring and Interpretation**

Total the scores received for each section of the Management Effectiveness Audit, and follow the formula below. The result is the percentage of managerial effectiveness for your organization.

Planning

Total Score \_\_\_\_\_  $\div$  45 x 100 = \_\_\_\_\_ % Effectiveness

Organizing

Total Score \_\_\_\_\_  $\div$  25 x 100 = \_\_\_\_\_ % Effectiveness

Directing (Leadership)

Total Score \_\_\_\_\_  $\div$  50 x 100 = \_\_\_\_\_ % Effectiveness

Controlling

Total Score \_\_\_\_\_  $\div$  20 x 100 = \_\_\_\_\_ % Effectiveness

The higher the percentage of effectiveness in all four management processes, the greater the success the organization can expect to experience during each phased of development—creativity, direction, delegation, co-ordination, and collaboration. Effective management practices attract and keep the best employees, and this results in the best quality of work and the best quality of work life.

## Φ APPLICATION

### The Importance of Vision

#### Consider the Credo of Johnson & Johnson

We believe our first responsibility is to the doctors, nurses, and patients, to mothers and fathers and all others who use our products and services. In meeting their needs everything we do must be high quality. We must constantly strive to reduce our costs in order to maintain reasonable prices. Customers' orders must be serviced promptly and accurately. Our suppliers and distributors must have an opportunity to make a fair profit.

We are responsible to our employees, the men and women who work with us throughout the world. Everyone must be considered as an individual. We must respect their dignity and recognize their merit. They must have a sense of security on their jobs. Compensation must be fair and adequate, and working conditions clean, orderly and safe. We must be mindful of ways to help our employees fulfill their family responsibilities. Employees must feel free to make suggestions and complaints. There must be equal opportunity for employment, development and advancement for those qualified. We must provide competent management, and their actions must be just and ethical.

We are responsible to the communities in which we live and work and to the world community as well. We must be good citizens -- support good works and charities and bear our fair share of taxes. We must encourage civic improvements and better health and education. We must maintain in good order the property we are privileged to use, protecting the environment and natural resources.

Our final responsibility is to our stockholders. Business must make a sound profit. We must experiment with new ideas. Research must be carried on, innovative programs developed and mistakes paid for. New equipment must be purchased, new facilities provided and new products launched. Reserves must be created to provide for adverse times. When we operate according to these principles, the stockholders should realize a fair return.

**Assignment:** Discuss the importance of having a vision for organization success, and use true-life examples to support these views.

## **Φ APPLICATION**

### **What Makes A Good Business Plan**

Prepare a business plan, approximately 5 pages, including:

1. An executive summary (3 or 4 paragraphs)
  - Description of the company/organization – what it is, it's size, it's growth (future plan)
  - Current stage of development – 2 or 3 strengths, 1 or 2 accomplishments
  - Makeup and status of senior management team – number, experience, chart
2. A marketing section (3 or 4 paragraphs)
  - Information on the industry the company/organization is competing in – trends, profit potential
  - Marketing plan – customer/client profile; market needs; geographic analysis of market
  - Analysis of how and why the company/organization's marketing efforts are different from competitors', especially unique strengths
3. A products and services section (3 or 4 paragraphs)
  - Description of product or service and where it is in life cycle (new or mature)
  - Future product research and development efforts
  - The status of copyright or patent applications
4. A manufacturing/production and distribution section (3 or 4 paragraphs)
  - Description of the logistics of manufacturing/production process
  - Current manufacturing/production capacity and percentage of use
  - Description of the distribution system
5. A financial information section (3 or 4 paragraphs)
  - financial statements for current year and three previous years, if applicable (Appendix)
  - Financial projections for the next three to five years (including basis assumptions for sales, cost of sales, cash flow, balance sheets and key statistics such as current ratios, debt/equity ratio, and inventory turnovers)
  - Listing of current lawsuits filed by or against the company/organization

A good business plan is readable, interesting, complete, and to the point (approximately 5 pages, plus appropriate appendices). Appendices can include division/department action plans, financial and other supporting data, time line of projected goals and activities.

Activity: Prepare a business plan for a company/organization.

## DISCUSSION QUESTIONS AND ACTIVITIES

To personalize the subject of *the power of vision*, ask your students to consider questions such as these:

1. Discuss the power of vision as it relates to leadership effectiveness.
2. How does Martin Luther King, Jr. evoke his vision of what could and should be in his famous "I Have a Dream" speech? Has our American society achieved this ideal dream?
3. What forces—people and events—have influenced current attitudes toward leadership in the American workplace?
4. Describe the psychological climate of your organization. Discuss current strengths and weaknesses.
5. What role does leadership play in determining the climate in your organization? Give examples of leaders and their influence.
6. Consider the folklore of your organization. What stories are told about people and events? Are these positive or negative? What does this suggest about the organizational climate?
7. Gather into groups to discuss organizational climate? Who has experienced an exploitive or impoverished climate? Who has experienced a supportive or enlightened climate? What should organizations do to develop a healthy climate—reward systems, organizational clarity, standards of performance, warmth and support, leadership practices, etc.? Be specific.

8. Consider examples of organizational success stories in the private, public and non-profit sectors. What influence does organizational climate have on the success of these organizations?
