LEARNING OBJECTIVES: BTAT.STAR.16.02.06 - Define organic molecules and demonstrate their importance in the

structure and function of biological systems.

- 48. The chemical reactions that cells use to acquire and use energy to live, grow and reproduce are called \_\_\_\_\_.
  - a. hydrolysis
  - b. condensation
  - c. phosphorylation
  - d. metabolism
  - e. oxidation

ANSWER: d

DIFFICULTY: Bloom's: Remember REFERENCES: 2.6 Organic Molecules

LEARNING OBJECTIVES: BTAT.STAR.16.02.06 - Define organic molecules and demonstrate their importance in the

structure and function of biological systems.

49.

How many carbons are present in this figure?

- a. 0
- b. 4
- c. 5
- d. 6
- e. 7

ANSWER: d

DIFFICULTY: Bloom's: Apply

REFERENCES: 2.6 Organic Molecules

LEARNING OBJECTIVES: BTAT.STAR.16.02.06 - Define organic molecules and demonstrate their importance in the

structure and function of biological systems.

- 50. Which organic molecule is a carbohydrate monomer?
  - a. triglyceride
  - b. fatty acids
  - c. nucleotide
  - d. amino acid
  - e. monosaccharide

*ANSWER*: e

DIFFICULTY: Bloom's: Remember REFERENCES: 2.7 Carbohydrates

LEARNING OBJECTIVES: BTAT.STAR.16.02.07 - Summarize the types of carbohydrates with examples.

- 51. Glucose monomers linked into a highly branched chain make up . .
  - a. glycogen
  - b. cellulose

## CHAPTER 02—MOLECULES OF LIFE c. fructose d. starch e. sucrose ANSWER: a DIFFICULTY: Bloom's: Remember REFERENCES: 2.7 Carbohydrates LEARNING OBJECTIVES: BTAT.STAR.16.02.07 - Summarize the types of carbohydrates with examples. 52. Sucrose is composed of \_ a. two molecules of fructose b. two molecules of glucose c. a molecule of fructose and a molecule of glucose d. a molecule of fructose and a molecule of galactose e. two molecules of galactose ANSWER: DIFFICULTY: Bloom's: Remember REFERENCES: 2.7 Carbohydrates LEARNING OBJECTIVES: BTAT.STAR.16.02.07 - Summarize the types of carbohydrates with examples. 53. Plants store their excess carbohydrates in the form of \_\_\_\_. a. cellulose b. starch c. glycogen d. sucrose e. galactose ANSWER: b DIFFICULTY: Bloom's: Remember **REFERENCES:** 2.7 Carbohydrates LEARNING OBJECTIVES: BTAT.STAR.16.02.07 - Summarize the types of carbohydrates with examples. 54. Glycogen is a polysaccharide used for energy storage by \_\_\_\_. a. plants b. animals c. protists d. bacteria e. archaea ANSWER: DIFFICULTY: Bloom's: Remember REFERENCES: 2.7 Carbohydrates LEARNING OBJECTIVES: BTAT.STAR.16.02.07 - Summarize the types of carbohydrates with examples.

55. Which type of bonding allows the long, straight chains of cellulose to lock together tightly?

b. polar covalent

a. hydrogen

| c. ionic                    |  |
|-----------------------------|--|
| d. nonpolar covalent        |  |
| e. metallic                 |  |
| ANSWER:                     | a  |

| 63. Which food product wou                    | uld likely contain the largest amount of unsaturated fat?  |
| a. butter                                     |  |
| b. lard                                       |  |

c. salami

d. olives

e. cheese

ANSWER: d

DIFFICULTY: Bloom's: Analyze

*REFERENCES:* 2.8 Lipids

LEARNING OBJECTIVES: BTAT.STAR.16.02.08 - Describe the structures and functions of the various types of lipids.

64. Fats that contain \_\_\_\_ double bonds are liquids at room temperature, whereas fats that contain \_\_\_\_ double bonds are solids at room temperature.

a. trans; cis

b. cis; trans

c. hydrogenated; partially hydrogenated

d. partially hydrogenated; hydrogenated

e. unsaturated; saturated

ANSWER:

DIFFICULTY: Bloom's: Understand

*REFERENCES:* 2.8 Lipids

LEARNING OBJECTIVES: BTAT.STAR.16.02.08 - Describe the structures and functions of the various types of lipids.

In the figure above, which fatty acids are most likely to be solid at room temperature?

a. I

b. II, III and IV

c. II, III, IV and V

d. I and IV

e. I and V

ANSWER: e DIFFICULTY: Bloom's: Apply REFERENCES: 2.8 Lipids LEARNING OBJECTIVES: BTAT.STAR.16.02.08 - Describe the structures and functions of the various types of lipids. 66. A(n) is a protein monomer. a. nucleotide b. monosaccharide c. simple sugar d. amino acid e. ribose ANSWER: d DIFFICULTY: Bloom's: Remember REFERENCES: 2.9 Proteins LEARNING OBJECTIVES: BTAT.STAR.16.02.09 - Describe the structure of a protein and explain its importance to protein function. 67. Primary protein structure is dependent upon \_\_\_\_\_. a. hydrophobic interactions b. hydrogen bonds between two amino acids c. covalent linkages between carbons and nitrogens of adjacent amino acids d. covalent linkages between carbons and oxygens of adjacent amino acids e. covalent linkages between the polypeptide and sugars or lipids ANSWER: DIFFICULTY: Bloom's: Remember REFERENCES: 2.9 Proteins LEARNING OBJECTIVES: BTAT.STAR.16.02.09 - Describe the structure of a protein and explain its importance to protein function. 68. Which type of bond exists between two amino acids in a protein? a. peptide b. ionic c. hydrogen d. amino e. sulfhydryl ANSWER: DIFFICULTY: Bloom's: Remember REFERENCES: 2.9 Proteins LEARNING OBJECTIVES: BTAT.STAR.16.02.09 - Describe the structure of a protein and explain its importance to protein function.

- 69. Two amino acids are bonded together to form a dipeptide by which type of reaction?
  - a. condensation
  - b. oxidation reduction
  - c. hydrolysis

| d. decomposition             |  |
|------------------------------|--|
| e. acid-base                 |  |
| ANSWER:                      | a  |
| DIFFICULTY:                  | Bloom's: Remember  |

| 73. Nucleotides are monome   | ers of   |

- a. complex lipids
- b. proteins
- c. polysaccharides
- d. nucleic acids
- e. cellulose

ANSWER: d

DIFFICULTY: Bloom's: Remember REFERENCES: 2.10 Nucleic Acids

LEARNING OBJECTIVES: BTAT.STAR.16.02.10 - Describe the features and functions of various types of nucleic acids.

- 74. A nucleotide consists of \_\_\_\_\_.
  - a. a five carbon sugar, a nitrogenous acid, and a phosphate group
  - b. a six carbon sugar, a nitrogenous base, and a phosphate group
  - c. a five carbon sugar, a nitrogenous base, and a phosphate group
  - d. a six carbon sugar, a nitrogenous acid, and a phosphate group
  - e. a four carbon sugar, a nitrogenous acid, and a phosphate group

ANSWER: c

DIFFICULTY: Bloom's: Remember REFERENCES: 2.10 Nucleic Acids

LEARNING OBJECTIVES: BTAT.STAR.16.02.10 - Describe the features and functions of various types of nucleic acids.

- 75. In a polymer of nucleotides, how does one nucleotide attach to another?
  - a. The base of one nucleotide is attached to the base of the next.
  - b. The base of one nucleotide it attached to the sugar of the next.
  - c. The sugar of one nucleotide is attached to the sugar of the next.
  - d. The phosphate group of one nucleotide is attached to the base of the next.
  - e. The phosphate group of one nucleotide is attached to the sugar of the next.

ANSWER: e

DIFFICULTY: Bloom's: Remember REFERENCES: 2.10 Nucleic Acids

LEARNING OBJECTIVES: BTAT.STAR.16.02.10 - Describe the features and functions of various types of nucleic acids.

- 76. Which type of bonds hold the two chains of DNA together in a DNA molecule?
  - a. hydrogen
  - b. polar covalent
  - c. nonpolar covalent
  - d. ionic
  - e. peptide

ANSWER: a

DIFFICULTY: Bloom's: Remember REFERENCES: 2.10 Nucleic Acids

LEARNING OBJECTIVES: BTAT.STAR.16.02.10 - Describe the features and functions of various types of nucleic acids.

#### **Matching**

### Match the following terms to the correct description.

- a. mass number
- b. atomic number
- c. radioisotope
- d. isotopes
- e. ions

DIFFICULTY: Bloom's: Remember REFERENCES: 2.2 Start with Atoms

LEARNING OBJECTIVES: BTAT.STAR.16.02.02 - Describe the atom and its components.

77. forms of an element that differ in the number of neutrons their atoms carry

ANSWER: d

78. number of protons in the atomic nucleus

ANSWER: b

79. isotope with an unstable nucleus

ANSWER: c

80. total number of protons and neutrons in the nucleus of an atom

ANSWER: a

81. atoms with more or less electrons than protons

ANSWER: e

### Match the following terms to the correct description.

- a. acid
- b. base
- c. neutral
- d. buffer

e. pH

DIFFICULTY: Bloom's: Apply REFERENCES: 2.5 Acids and Bases

LEARNING OBJECTIVES: BTAT.STAR.16.02.05 - Define pH and explain its importance in the maintenance of

biological functions.

82. solution that contains the same concentration of  $H^+$  ions as  $OH^{\square}$  ions

ANSWER: c

83. measure of the relative concentration of hydrogen ions in a solution

ANSWER: e

84. substance that releases hydrogen ions in solution

ANSWER: a

85. substance that accepts hydrogen ions in solution

ANSWER: b

86. substance that can maintain the pH of a solution at a relatively constant level

ANSWER: d

### The following are types of chemical bonds. Match these to the correct description.

a. hydrogen

b. ionic

c. covalent

DIFFICULTY: Bloom's: Apply

REFERENCES: 2.3 From Atoms to Molecules

LEARNING OBJECTIVES: BTAT.STAR.16.02.03 - Define a chemical bond and, using examples, illustrate the different

types of chemical bonds.

87. the bond between the atoms in an NaCl molecule

ANSWER: b

88. the bond between the hydrogen atoms of molecular hydrogen

ANSWER: c

89. the bond that breaks when salts dissolve in water

ANSWER: b

90. the bond in which electrons are shared

ANSWER: c

91. the bond that holds organic molecules together

ANSWER: c

### The following are types of chemical bonds. Match these to the correct description.

a. hydrogen

b. ionic

c. covalent

DIFFICULTY: Bloom's: Apply

REFERENCES: 2.4 Hydrogen Bonds and Water

LEARNING OBJECTIVES: BTAT.STAR.16.02.04 - Explain the composition and properties of water.

92. the bond between the two strands of DNA in a double helix

ANSWER: a

93. the bond that is easiest to break

ANSWER: a

Match the structures below with the appropriate label in the figure above.

a. A

b. B

c. C

d. D

e. E

f. F

g. G

DIFFICULTY: Bloom's: Apply REFERENCES: 2.8 Lipids

LEARNING OBJECTIVES: BTAT.STAR.16.02.08 - Describe the structures and functions of the various types of lipids.

94. fatty acid *ANSWER*: c

95. phospholipid

ANSWER: e

96. steroid *ANSWER:* g

## Match the structures below with the appropriate label in the figure above.

a. A b. B

c. C d. D

e. E f. F

g. G

DIFFICULTY: Bloom's: Apply REFERENCES: 2.9 Proteins

LEARNING OBJECTIVES: BTAT.STAR.16.02.09 - Describe the structure of a protein and explain its importance to

protein function.

97. amino acid *ANSWER*: a

Match the structures below with the appropriate label in the figure above.

a. A b. B

c. C d. D

e. E f. F

g. G

DIFFICULTY: Bloom's: Apply REFERENCES: 2.7 Carbohydrates

LEARNING OBJECTIVES: BTAT.STAR.16.02.07 - Summarize the types of carbohydrates with examples.

98. cellulose *ANSWER*: b

99. starch *ANSWER:* f

## **CHAPTER 02—MOLECULES OF LIFE**

Match the structures below with the appropriate label in the figure above.

a. A b. B

c. C d. D

e. E f. F

g. G

DIFFICULTY: Bloom's: Apply REFERENCES: 2.10 Nucleic Acids

LEARNING OBJECTIVES: BTAT.STAR.16.02.10 - Describe the features and functions of various types of nucleic acids.

100. nucleotide *ANSWER*: d
