## SHORT ANSWER

1. What is the effect on a lawsuit if the person suing brings his or her case to a court that does not have the proper jurisdiction to hear the case?

ANS:

If a court does not have proper jurisdiction, it (the court) has no legitimate right by which judges can exercise their authority. Thus, in this case, the lawsuit could not be heard. The attorneys would need to reschedule the suit for a hearing in the proper court (i.e., the court with the proper jurisdiction).

2. Dunn, a resident of Florida, was in an automobile accident caused by Greeley, a resident of Alabama. Dunn's van was damaged to the extent of \$3,500. May Dunn sue Greeley in the federal district court for Alabama? Why or why not?

ANS:

No. Although federal district courts may hear cases involving parties from different states, the amount of a claim must be more than \$75,000.

4. What is the essential role of Judicial Review in the U.S. Court System?

ANS:

Judicial review allows higher courts to review decisions of a lower court. The review process allows decisions and laws to be reversed or changed if they are not in harmony with existing laws and constitutions. The power of judicial review also enables the judicial branch to act as a check on the other two branches of government. For example, the Federal courts review acts of the U.S. Congress and state legislatures. This process makes judicial review the cornerstone of our Constitution since it assures full protection of our rights as individuals under the U.S. Constitution.

5. The state needed a portion of Beck's land to construct a highway. If the state decides to take the land for the public welfare over Beck's objection, may Beck have his case heard by a court?

ANS:

Yes. In the United States, based on the concept of judicial review, Beck would have the right to have his interests protected by having his case heard in court and, if he is dissatisfied with the ruling, having a higher court review this lower court's decision.

6. What are the advantages and disadvantages of taking your case to small claims court? Refer to text.

ANS:

Advantages

1. Fast. Once a claim is filed (which is a fairly easy process), your case will be heard shortly thereafter, generally within thirty to ninety days. The actual hearing lasts about one hour or less (sometimes only fifteen minutes).
2. Informal. Technical rules of evidence and procedure followed in a regular court trial are not strictly applicable in small claims court and an individual can represent himself or herself.
3. Inexpensive. Since a party is not required to have an attorney, no attorney's fees are required. Only a small filing fee is required. Further, a person with a legal claim might have been discouraged from filing the case in another court where legal fees and court fees might have exceeded the amount of the plaintiff's (person suing) claim.

Disadvantages

1. The maximum amount for which a person may sue in small claims court is limited by state law in each state. If you are seeking an amount that exceeds the small claims court limit for your state and you win your case, you will be unable to claim any amount over the state limit.
2. Most states allow only the loser to appeal. A few states allow no appeal.
3. Difficult to collect the judgment if you win your case. The court does not participate in the collection process. If you win, you are on your own and may have to take legal action to collect if the loser will not pay. You may have to hire a collection agency at great expense.
