Chapter 2 • Analyzing Business Transactions

TEACHING OBJECTIVES

2-1. Record in equation form the financial effects of a business transaction.
2-2. Define, identify, and understand the relationship between asset, liability, and owner’s equity accounts.
2-3. Analyze the effects of business transactions on a firm’s assets, liabilities, and owner’s equity and record these effects in accounting equation form.
2-4. Prepare an Income Statement.
2-5. Prepare a Statement of Owner’s Equity and a Balance Sheet.
2-6. Define the accounting terms new to this chapter.

SECTIONS

1. Property and Financial Interest
2. The Accounting Equation and Financial Statements

CHAPTER OVERVIEW/ LEARNING OBJECTIVES

Learning Link: Chapter 1 introduced accounting by (1) defining accounting, (2) describing accounting career opportunities, and (3) identifying users of financial information. Chapter 2 illustrates basic accounting procedures by analyzing business transactions of a sole proprietorship in a service business.

2-1. This chapter records in equation form the financial effects of a business’s transactions.

2-2. This chapter introduces and defines assets, liabilities and owner equity accounts. It evaluates the relationship between the accounts in equation form.

2-3. The chapter analyzes the effects of business transactions on a firm’s assets, liabilities, and owner’s equity, and records the effects of transactions using the accounting equation.

2-4. This chapter introduces the Income Statement. The Income Statement summarizes changes in owner’s equity that result from revenue and expenses. The difference between revenue and expenses is the net income or net loss of the business for the period.

2-5. The Statement of Changes in Owner’s Equity and a Balance Sheet are discussed. Changes in owner’s equity for the period are summarized on the Statement of Owner’s Equity.
2-6. The *Balance Sheet* shows assets, liabilities, and owner’s equity on a given date.
Chapter Opener: Thinking Critically

At the beginning of the chapter, there is a short paragraph about Southwest Airlines. Let’s read this together. . .

**Ask students** “How does Southwest keep track of all of these transactions so that it can continue to run its airline profitability?”

**Answer---** The individuals in charge of keeping track of these transactions at Southwest as well as in other companies, are known as accountants. When recording the transactions, accountants are required to follow a set of rules and regulations known as GAAP. For every financial transaction that Southwest has, their accountants determine the accounts that were affected and then they record, report, and then analyze these transactions. By doing so they can, at a specific point in time and over a stipulated period, be able to assess the company’s financial performance including profitability of the airline, assets owned by the company, and of course the amount owed to creditors and owners.
Section 1. PROPERTY AND FINANCIAL INTEREST

Beginning with Analysis

Ask students, “What happens when you buy a pair of jeans and pay cash?” —The total cost of jeans they own increases, and the amount of cash they have decreases.

Ask students, “What happens when you buy a pair of jeans with your credit card?” —The total they own increases, and the amount of money they owe increases.

• Point out that most business transactions have at least two effects.

Objective 2-1

♦ Starting a Business
  • Explain that the equation, property = financial interest, is the basis for transaction analysis.

♦ DESCRIBE THESE ANALYSIS STEPS:
  1. Explain to students that analysis (determining whether a financial event, like a purchase, sale, payment, or receipt is a business transaction) is the first step of the recording process.
  2. The equation must always be in balance.

♦ Purchasing Equipment for Cash
  • Remind students that, when recording the effects of transactions in equation form, the value of property acquired by a business is offset by any claim against the property (rights to proceeds from a sale of property).
• Emphasize that a claim is never asset specific. That is, assets are thought of as being a pool of items.

♦ Purchasing Equipment on Credit
  • Define Accounts Payable. (Amounts that a business must pay in the future.)

  • Explain that purchasing an asset on credit:
    1. Increases the asset—the Property side of the equation.
    2. Increases the amount owed by the business—the Financial Interest side of the equation.

  • Point out that the equation must always remain in balance.

♦ Purchasing Supplies
  • Explain that this transaction:
    1. Increases the asset, Supplies.
    2. Decreases the asset, Cash.

  • Point out that the equation remains in balance.

♦ Paying A Creditor
  • Explain that paying a creditor involves:
    1. A decrease in the amount owed by the business—the Financial interest side of the equation.
    2. A decrease in cash—the Property side of the equation.

  • Point out that the equation remains in balance.

♦ Renting Facilities
  • Point out that the rent in this transaction is paid in advance.

  • Explain that the right to occupy the facility is considered a form of property.
• Explain that this transaction:
  1. Increases the asset, *Prepaid Rent*.
  2. Decreases the asset, *Cash*.

• Point out that the equation remains in balance.

**Objective 2-2**

**Assets, Liabilities, and Owner’s Equity**

**Say to your students**, “Suppose you want to establish a Catering Service business. What items will you need to start the business?”

--List these on the board.

**Then ask students**, “How will you acquire these items?” List the responses on the board.

♦ Explain to students that everything listed will be categorized as an asset or a liability. The difference is owner’s equity.

♦ Have students categorize the items.

**Objective 2-3**

**Section 2. THE ACCOUNTING EQUATION AND FINANCIAL STATEMENTS**

**The Fundamental Accounting Equation**

Write the accounting equation on the board, then

• **Explain to students** that accountants show the relationship between assets, liabilities, and owner’s equity in an equation.
• Assets are on the left and liabilities and owner’s equity (claims against the assets), are on the right.

• The two sides of the equation must always balance.

• Emphasize that assets are things that an individual or a business owns that have value.

Ask students to give you examples of assets. As they yell them out, write the assets under Assets in the accounting equation. Do the same thing with examples of Liabilities.

♦ Earning Revenue and Incurring Expenses

• Explain that revenue is the inflow of assets (cash or accounts receivable) as a result of the sale of goods or services.

• Explain that expenses are the costs associated with earning revenue.

• In the beginning, students might get confused by the terms expense and liability.

• Point out that an expense is something that was used up and can actually create a liability if it is not paid off in cash. A liability is a debt owned by the business and usually ends with the word “payable”—Accounts Payable is a good example.
♦ **Selling Services for Cash**
  - Explain that this transaction:
    1. Increases the asset, *Cash*.
    2. Increases the revenue.
  - Point out that the equation remains in balance.
  - Point out that revenues are recorded in a separate column under owner’s equity.

♦ **Selling Services on Credit**

  *Ask students.* “Why can we record this transaction as revenue even though we haven’t *got* paid yet?” —because we have *earned* it.

♦ **Collecting Receivables**

  *Ask students.* “Why don’t we record revenue when we receive this payment?” —because we would be recording the revenue *twice*.

♦ **Paying Employees Salaries**
  - Point out that expenses are recorded in a separate column under owner’s equity.
  - Explain that expenses have the effect of decreasing owner’s equity.
  - Emphasize that this transaction:
    1. Decreases the asset, *Cash*.
    2. Increases the *Expenses* column which causes Owner’s Equity to go down.
  - Point out that the equation remains in balance.

♦ **Paying Utilities Expense**
  - Explain that this transaction:
    1. Decreases the asset, *Cash*. 
2. Increases the Expenses column which causes Owner’s Equity to go down.

- Point out that the equation remains in balance.

♦ Effects of Owner’s Withdrawals

- Explain that the funds taken from the business are for the owner’s personal use and not an expense of the business, but a decrease in owner’s equity.

- In accounting, owner’s equity is the amount remaining after the value of all liabilities is subtracted from the value of all assets. That is, it is the owner’s right to the financial interest in the business.

Point out to students the Summary of Transactions Figure 2-2 in the text.

- After recording all of these transactions, the accounting equation still balances.

Objective 2-4

The Income Statement

Explain to students that the Income Statement is the first in a series of three reports that together, provide a business owner with all of the business’s financial information.

- Point out that the income statement details revenues and expenses. It reports whether the business had a “net income” or a “net loss.”

Ask students, “When would a business report a net loss?” (When expenses are greater than revenues.)
Explain that the heading of the Income Statement includes the appropriate three-line heading:

<table>
<thead>
<tr>
<th>Who— Name of the company</th>
</tr>
</thead>
<tbody>
<tr>
<td>What— Name of the financial statement</td>
</tr>
<tr>
<td>When—Period of time covered</td>
</tr>
</tbody>
</table>

Objective 2-5

Statement of Owner’s Equity and the Balance Sheet

The Statement of Owner’s Equity reports the changes that occurred in the owner’s financial interest during the reporting period.

- It would include:
  1. Investments
  2. Net income or net loss of the business
  3. Any withdrawals the owner made

- Point out the three-line heading.

- Emphasize the importance of including the beginning capital balance and the ending capital balance.

The Balance Sheet shows:

- Point out that the Balance Sheet contains information about assets, liabilities, and the balance in the owner’s equity account.
- It points out the equality of the Accounting Equation.

Ask students, “What is the difference in the heading of the statement?” —the date line.
• Explain that The Income Statement and the Statement of Owner’s Equity are a movie covering a period of time but the Balance Sheet is a snapshot at a specific moment.

The Importance of Financial Statements

Ask students, “Where could I find information about whether a firm is making a profit?”—(The Income Statement).

Ask students, “Which statement contains information about the assets owned or amounts owed by the business?”—(The Balance Sheet).

Ask students, “Which statement would provide information about how much the owner invested or withdrew during the period?”—(The Statement of Owner’s Equity).

Financial statements and other records are necessary so that businesspeople can make good decisions. . .

Managerial Implications:
Ask students, “If you were buying a business, what would you look for in the company’s financial statements?”
Answer—Answers will vary. Students should mention total assets and the type of assets, the liabilities, the business would be responsible for, and whether the business is making a profit.

• Point out the sequence/order in which the financial statements must be prepared:
  1st—income statement
  2nd—statement of owner’s equity
  3rd—balance sheet
Chapter 2
Analyzing Business Transactions

by
Price, Haddock and Farina
Chapter 2 Learning Objectives

SECTION 1: Property and Financial Interests

2-1 Record in equation form the financial effects of a business transaction.

2-2 Define, identify, and understand the relationship between asset, liability, and owner’s equity accounts.

SECTION 2: The Accounting Equation and Financial Statements

2-3 Analyze the effects of business transactions on a firm’s assets, liabilities, and owner’s equity and record these effects in accounting equation form.

2-4 Prepare an income statement.

2-5 Prepare a statement of owner’s equity and a balance sheet.

2-6 Define the accounting terms new to this chapter.
Meet Eli’s Consulting Services

• Eli’s Consulting Services is a firm that provides a wide range of accounting and consulting services.

• Trayton Eli, CPA is the sole proprietor of the firm.
• Carlos Valdez is the office manager of the firm.

• Every month the firm bills clients for the services provided that month.

• Customers can also pay in cash when the services are provided.
Steps to analyze the effect of a business transaction

1. Describe the financial event.
   - Identify the property.
   - Identify who owns the property.
   - Determine the amount of increase or decrease.

2. Make sure the equation is in balance.

   Property (asset) = Financial Interest (creditors and owners)
Section 1: Property and Financial Interests

Learning Objective

2-1: Record in equation form the financial effects of a business transaction.
Trayton Eli withdrew $100,000 from personal savings and deposited it in a new checking account in the name of Eli’s Consulting Services.

Analysis:

(a) The business received $100,000 of **property** in the form of cash.

(a) Eli has a $100,000 **financial interest** in the business.
The owner invested cash into the business.

<table>
<thead>
<tr>
<th>Property</th>
<th>Financial Interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td>Trayton Eli, Capital</td>
</tr>
</tbody>
</table>

(a) Invested cash: +$100,000

(a) Increased equity

New balances: $100,000 = $100,000

Trayton Eli now has $100,000 equity in Eli’s Consulting Services.
The company buys equipment for $5,000 cash

<table>
<thead>
<tr>
<th>Property</th>
<th>Cash</th>
<th>Equipment</th>
<th>Financial Interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>Previous balances</td>
<td>$100,000</td>
<td>=</td>
<td>$100,000</td>
</tr>
<tr>
<td>(b) Purchased equipment</td>
<td>+</td>
<td>$5,000</td>
<td></td>
</tr>
<tr>
<td>(b) Paid cash</td>
<td>-5,000</td>
<td>+</td>
<td></td>
</tr>
<tr>
<td>New balances</td>
<td>$95,000</td>
<td>+</td>
<td>$100,000</td>
</tr>
</tbody>
</table>

$100,000 = $100,000
The company buys $6,000 of equipment on account (on credit)

<table>
<thead>
<tr>
<th>Property</th>
<th>Financial Interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash + Equipment</td>
<td>Accounts Payable + Trayton Ell, Capital</td>
</tr>
<tr>
<td>Previous balances</td>
<td>$95,000 + $5,000 = $100,000</td>
</tr>
<tr>
<td>(c) Purchased equip.</td>
<td>+ $6,000</td>
</tr>
<tr>
<td>(c) Incurred debt</td>
<td></td>
</tr>
<tr>
<td>New balances</td>
<td>$95,000 + $11,000 = $106,000</td>
</tr>
</tbody>
</table>

$106,000 = $106,000

Notice the new claim against the firm’s property – the creditor’s claim of $6,000.
The firm purchases supplies for $1,500 cash

<table>
<thead>
<tr>
<th>Property</th>
<th>Financial Interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td>Accounts Payable</td>
</tr>
<tr>
<td>Supplies</td>
<td>Trayton Ell, Capital</td>
</tr>
<tr>
<td>Equipment</td>
<td></td>
</tr>
</tbody>
</table>

| Previous balances         | $95,000            |
| (d) Purchased supplies    | $11,000 + $1,500   |
| (d) Paid cash             | -$1,500            |
| New balances              | $93,500 + $1,500 + $11,000 |

$106,000 = $106,000
The firm makes a payment of $2,500 on account

<table>
<thead>
<tr>
<th>Property</th>
<th>Financial Interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash $93,500</td>
<td>Accounts Payable $6,000</td>
</tr>
<tr>
<td>Supplies $1,500</td>
<td>Trayton Ell, Capital $100,000</td>
</tr>
<tr>
<td>Equipment $11,000</td>
<td></td>
</tr>
<tr>
<td>$103,500</td>
<td>$103,500</td>
</tr>
</tbody>
</table>

$103,500 = $103,500
The firm makes a payment of $8,000 rent in advance.

<table>
<thead>
<tr>
<th>Property</th>
<th>Financial Interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td>Accounts Payable</td>
</tr>
<tr>
<td>Supplies</td>
<td>Trayton Eli, Capital</td>
</tr>
<tr>
<td>Prepaid Rent</td>
<td></td>
</tr>
<tr>
<td>Equipment</td>
<td></td>
</tr>
</tbody>
</table>

\[
\begin{align*}
\text{Cash} & + \text{Supplies} + \text{Prepaid Rent} + \text{Equipment} = \text{Accounts Payable} + \text{Trayton Eli, Capital} \\
$91,000 & + $1,500 + $11,000 = $3,500 + $100,000 \\
-8,000 & \\
+8,000 & \\
83,000 & + $1,500 + $8,000 + $11,000 = $3,500 + $100,000 \\
\end{align*}
\]

\[\$103,500 = \$103,500\]
Section 1: Property and Financial Interests

Learning Objective

2-2: Define, identify, and understand the relationship between asset, liability, and owner’s equity accounts.
QUESTION:

What are assets?

ANSWER:

Assets are property owned by a business.
### Liabilities and Equity

**QUESTION:**

What are liabilities?

**ANSWER:**

Liabilities are debts or obligations of a business.

**QUESTION:**

What is owner’s equity?

**ANSWER:**

Owner’s equity is the term used by sole proprietorships. It is the financial interest of an owner of a business. It is also called proprietorship or net worth.
QUESTION:

What is a Balance Sheet?

ANSWER:

A balance sheet is a formal report of the financial position of a business on a certain date. It reports the assets, liabilities, and owner’s equity of the business.
## The Balance Sheet

<table>
<thead>
<tr>
<th>Assets</th>
<th>Liabilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td>83 000 00</td>
</tr>
<tr>
<td>Supplies</td>
<td>15 000 00</td>
</tr>
<tr>
<td>Prepaid Rent</td>
<td>8 000 00</td>
</tr>
<tr>
<td>Equipment</td>
<td>11 000 00</td>
</tr>
<tr>
<td>Total Assets</td>
<td>103 500 00</td>
</tr>
<tr>
<td>Accounts Payable</td>
<td>35 000 00</td>
</tr>
<tr>
<td>Owner’s Equity</td>
<td>103 500 00</td>
</tr>
</tbody>
</table>

- **Assets** – the amount and types of property owned by the business
- **Liabilities** – the amount owed to the creditors
- **Equity** – the owner’s interest
Section 1, Objective 2-2: Define, identify, and understand the relationship between asset, liability, and owner’s equity accounts.
Section 2: The Accounting Equation and Financial Statements

Learning Objective

2-3: Analyze the effects of business transactions on a firm’s assets, liabilities, and owner’s equity and record these effects in accounting equation form.
QUESTION:

What is the fundamental accounting equation?

ANSWER:

The fundamental accounting equation is the relationship between assets and liabilities plus owner’s equity.
In accounting terms the firm’s assets must equal the total of its liabilities and owner’s equity. This equality can be expressed in equation form as:

\[ \text{Assets} = \text{Liabilities} + \text{Owner’s Equity} \]

The entire accounting process of analyzing, recording and reporting business transactions is based on the fundamental accounting equation.

If any two parts of the equation are known, the third part can be determined.
QUESTION:

What is revenue?

ANSWER:

A revenue is an inflow of money or other assets that results from the sales of goods or services or from the use of money or property. It is also called income.
QUESTION:

What is an expense?

ANSWER:

An expense is an outflow of cash, use of other assets, or incurring of a liability.
The firm receives $36,000 in cash for services provided to clients.

<table>
<thead>
<tr>
<th>Assets</th>
<th>=</th>
<th>Liabilities +</th>
<th>Owner’s Equity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash $83,000</td>
<td>+</td>
<td>Supplies $1,500</td>
<td>Prepaid Rent $8,000</td>
</tr>
<tr>
<td>$119,000</td>
<td>+</td>
<td>$1,500</td>
<td>$8,000</td>
</tr>
<tr>
<td>$139,500</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Section 2, Objective 2-3: Analyze the effects of business transactions on a firm’s assets, liabilities, and owner’s equity and record these effects in accounting equation form.

The company performs services on account for $11,000

<table>
<thead>
<tr>
<th>Assets</th>
<th>Liab.</th>
<th>Owner’s Equity</th>
</tr>
</thead>
<tbody>
<tr>
<td>$119,000 + $1,500 + $8,000 + $11,000 = $3,500 + $100,000 + $36,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>+ $11,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>$119,000 + $11,000 + $1,500 + $8,000 + $11,000 = $3,500 + $100,000 + $47,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>$150,500</td>
<td></td>
<td></td>
</tr>
<tr>
<td>$150,500</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

</tbody>
</table>

Section 2, Objective 2-3: Analyze the effects of business transactions on a firm’s assets, liabilities, and owner’s equity and record these effects in accounting equation form.
The firm records a withdrawal by the owner of $5,000

<table>
<thead>
<tr>
<th>Assets</th>
<th>=</th>
<th>Liab.</th>
<th>+</th>
<th>Owner’s Equity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td>+</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Accts. Rec.</td>
<td>+</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Supp.</td>

<td>-</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Exp.</td>
<td>-</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

$116,350 + $5,000 + $1,500 + $8,000 + $11,000 = $3,500 + $100,000 + $47,000 − $8,650

$5,000

$111,350 + $5,000 + $1,500 + $8,000 + $11,000 = $3,500 + $95,000 + $47,000 − $8,650

$136,850

$136,850
2-4: Prepare an Income Statement
QUESTION:

What is an income statement?

ANSWER:

An income statement is a formal report of business operations covering a specific period of time. It is also called a profit and loss statement or a statement of income and expenses.
The income statement has a three-line heading

The third line shows that the report covers operations over a period of time

<table>
<thead>
<tr>
<th></th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Revenue</strong></td>
<td></td>
</tr>
<tr>
<td>Fees Income</td>
<td>$47,000.00</td>
</tr>
<tr>
<td><strong>Expenses</strong></td>
<td></td>
</tr>
<tr>
<td>Salaries Expense</td>
<td>$8,000.00</td>
</tr>
<tr>
<td>Utilities Expense</td>
<td>650.00</td>
</tr>
<tr>
<td><strong>Total Expenses</strong></td>
<td>8,650.00</td>
</tr>
<tr>
<td><strong>Net Income</strong></td>
<td>$38,350.00</td>
</tr>
</tbody>
</table>

</table>

- A single line shows that the amounts above it are being added or subtracted.
- A double line indicates final amounts for the column or section of a report.
Business managers and owners use the balance sheet and the income statement to control current operations and plan for the future.

- Creditors, prospective investors, governmental agencies, and others are interested in the profits of the business and in the asset and equity structure.
Financial statements are always prepared in a specific order:

1\textsuperscript{st} Income Statement

2\textsuperscript{nd} Statement of Owner’s equity

3\textsuperscript{rd} Balance Sheet
Financial statements:

Net income (or loss) is transferred to the statement of owner’s equity.

The ending capital balance is transferred to the balance sheet.
