57. What is the purpose of administrative regulations?

a. Administrative regulations are a form of legislation issued by federal and state government agencies. Administrative regulations fill in the blanks not covered by broadly written statutes.

58. Explain how it is that the First Amendment grants freedom of religion, yet the government may enact legislation that can restrict certain religious practices.

a. This does not mean the freedom to worship is absolute. Otherwise, valid government regulations, which incidentally restrict religious practices, are permitted. For example, a state may ban polygamy under its authority to enact health and safety regulations, even though this at one time imposed a restriction on the religious practices of some Mormon sects, or it can forbid the use of mind-altering substances in prisons, notwithstanding that by doing so, it may infringe on religious practices of some Native American inmates.

59. The Second Amendment states, "A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed." Explain why this statement is unclear and controversial.

a. According to the case of *District of Columbia v. Heller*, the Second Amendment was intended to provide individual gun owners the right to own firearms, but left room for the possibility that the government could at least regulate, if not prohibit, the ownership of firearms. This ruling has left it unclear as to whether the Second Amendment is an individual right or a right of the states to create and

arm militias. It also begs the question as to whether the right to bear arms was intended for individuals or militias only. Finally, the issue of how much the government is allowed to regulate or prohibit the ownership of firearms is still left up for debate.

60. Explain why the Fourth Amendment is so important to individual citizens?

a. The Fourth Amendment is the provision of the Constitution that stands most directly between the individual citizen and the police. This amendment forbids “unreasonable” searches and seizures and requires the existence of “probable cause” before warrants may be issued or a search or seizure may take place. Warrants are required to describe the subject of their search with “particularity.” Requiring probable cause to search or seize attempts to limit the ability of the police to interfere at will in the lives of individual citizens. Instead, they must have some reasonable amount of evidence that the person has engaged in criminal activity.

61. Define incorporation and explain the four types of incorporation discussed in your textbook. Which type of incorporation is used in the courts today?

a. The issue of incorporation arose when the Supreme Court interpreted the due process clause of the Fourteenth Amendment, which says no state shall deprive a person of life, liberty, or property without “due process of law,” as prohibiting states from abridging certain individual rights. The different types of incorporation indicate how much of and which rights are granted by the states. Total incorporation of the due process clause of the Fourteenth Amendment made the entire Bill of Rights applicable to the states. Total incorporation plus of the due process clause of the Fourteenth Amendment includes all of the Bill of Rights and, in addition, includes other, unspecified rights. Ordered liberty is used when there is no necessary relationship between the due process clause of the Fourteenth Amendment and the Bill of Rights. Ordered liberty uses the “totality of circumstances” component. Selective incorporation combines elements of the fundamental rights and total incorporation approaches in modified form and is the approach that seems to predominate in most Supreme Court cases. This approach favors a piecemeal, gradual, and selective method of incorporation. Selective incorporation rejects the notion that all of the rights in the Bill of Rights are automatically incorporated in the due process clause of the Fourteenth Amendment, but it does look to the Bill of Rights as a guide to the meaning of due process.
