Skill: R Objective: 7

49) PayPal is a popular third-party transaction broker that operates on the internet to facilitate settlements for purchases. Explain how PayPal works.

Answer:

Paypal facilitates settlements for purchases for a small fee per transaction. PayPal provides a plug-in “shopping cart” that sellers can easily add to their websites. A buyer purchases items by depositing funds into the seller’s PayPal account. The seller then retrieves the funds from its PayPal account.
