**Chapter 7 The Macroeconomy: Unemployment, Inflation, and Deflation**

**7.1 Unemployment**

1) Which of the following is TRUE of unemployment?

- A) It is defined as the number of people actively looking for work who do not have jobs.
- B) The result is that the economy operates inside its production possibilities curve.
- C) There are psychological consequences associated with unemployment.
- D) All of the above.

Answer: D

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

2) Which of the following is TRUE about the *labor force*?

- A) It includes those over 16 ages old and are employed.
- B) It includes those over 16 ages old and are unemployed.
- C) Both A and B are correct.
- D) None of the above is correct.

Answer: C

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

3) A country's *labor force* is equal to

- A) the population between the ages of 16 and 65.
- B) the number of employed people.
- C) the total number of employed and unemployed people.
- D) the total number of employed people, unemployed people, and discouraged workers.

Answer: C

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

4) Which of the following people would be considered *unemployed*?

- A) Homer, who lost his job at the power plant and is not looking for work
- B) Lenny, who is working part time at a fast food restaurant
- C) Abe, who is retired
- D) Edna, who lost her job as a teacher and is currently searching for a new job

Answer: D

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

5) The term "unemployment" is best described as the total number of

- A) people not working.
- B) people who have been laid off and have stopped looking for work.
- C) adults who work fewer hours than they wish to work.
- D) adults who are looking for work but have not found a job.

Answer: D

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

6) According to the text, during which time period did the United States have the highest unemployment rates?

- A) 1930s
- B) 1950s
- C) 1980s
- D) 2000s

Answer: A

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

7) Individuals who have stopped looking for work because they are convinced that they will not find a job are considered

- A) structurally unemployed.
- B) discouraged workers.
- C) part of the labor force.
- D) underemployed.

Answer: B

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

8) Which federal agency publishes the United States' unemployment figures?

- A) Health and Human Services
- B) The Bureau of Labor Statistics
- C) the Federal Reserve
- D) the Senate Committee on Labor Relations

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

9) In the history of the United States, unemployment reached its highest rate

- A) in the Panic of 1893.
- B) in the 1930s.
- C) in the period between World War II and the Korean War.
- D) in the Great Recession of the late 2000s.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

10) When did the United States register its lowest unemployment rate?

- A) in the 1920s
- B) in the economic boom of the 1990s
- C) in the Roaring Nineties (1890s)
- D) at the end of World War II

Answer: D

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

11) The population of individuals at least 16 years of age can be broken into 3 groups. They are

- A) the unemployed, discouraged workers, and retirees.
- B) those employed full-time, those employed only part-time, and the unemployed.
- C) those working in the for-profit sector, those working in the nonprofit sector, and individuals who are unemployed.
- D) none of the above.

Answer: D

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

12) The rate of unemployment is calculated as the number of

- A) unemployed workers divided by the number of employed workers.
- B) people in the civilian labor force divided by the number of unemployed.
- C) unemployed divided by the number of people in the civilian labor force.
- D) employed workers divided by the number of unemployed workers.

Answer: C

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

13) According to the Bureau of Labor Statistics, if you voluntarily leave your job to search for another job, then you

- A) are classified as unemployed.
- B) are eligible for unemployment compensation.
- C) may not re-enter the labor force for six months.
- D) are classified as a job loser.

Answer: A

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

14) Official unemployment rates may underestimate the true rate of unemployment because the official rate

- A) includes those workers who only work part time.
- B) may include some individuals who are not actually in the labor force.
- C) does not include individuals receiving any type of unemployment compensation.
- D) fails to include discouraged workers.

Answer: D

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

15) The official unemployment rate may understate the true rate of unemployment because of

- A) workers who hold two jobs.
- B) increases in worker productivity.
- C) changes in wage rates.
- D) discouraged workers who no longer are actively seeking work and are excluded from the statistics.

Answer: D

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 16) Historically, the United States has experienced
- A) continuous decreases in the unemployment rate since World War II.
  - B) periods of both increases and decreases in the unemployment rate since World War II.
  - C) continuous increases in the unemployment rate since World War II.
  - D) no changes in the unemployment rate since World War II.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 17) If the U.S. economy enters a recession, the
- A) economy experiences full employment.
  - B) unemployment rate tends to increase.
  - C) labor force tends to increase.
  - D) entire population will be partially unemployed.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 18) The total civilian labor force is comprised of
- A) the unemployed and the employed.
  - B) only the employed.
  - C) all individuals over 16 years of age, whether or not they work or are seeking work.
  - D) only full-time employed individuals between the ages of 18 and 55.

Answer: A

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

19) The labor force includes individuals who are:

- I. Employed
- II. Unemployed
- III. Discouraged workers

- A) I only
- B) Both I and II
- C) Both I and III
- D) All I, II and III

Answer: B

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

20) Which of the following best fits the definition of unemployed?

- A) retired and not working
- B) working less than a full work week
- C) not working but looking for a job
- D) not working at a gainful pursuit, either in or out of the home

Answer: C

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

21) By definition, the labor force participation rate is

- A) the percentage of institutionalized working-age individuals who are employed or seeking employment.
- B) the percentage of noninstitutionalized working-age individuals who are employed or seeking employment.
- C) the annual rate of growth in the number of people who are either employed or searching for available jobs.
- D) the annual rate of growth in the number of people who are unemployed and searching for available government-provided unemployment benefits.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

22) The rate of unemployment is found by

- A) dividing the number unemployed by the number of people in the labor force.
- B) dividing the number unemployed by the number employed.
- C) dividing the number employed by the number of people in the labor force.
- D) dividing the number employed by the number unemployed.

Answer: A

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

23) Including discouraged workers in the calculation of the unemployment rate would

- A) increase the reported rate.
- B) lower the reported rate.
- C) not change the reported rate.
- D) change the reported rate, but in an unpredictable manner.

Answer: A

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

24) Unemployment is measured as

- A) all teens and adults in the civilian labor force who are not working.
- B) all adults in the civilian labor force who are willing and able to work and who are actively looking for work, but have not found a job.
- C) all adults in the civilian labor force, regardless of whether or not they have been engaged in actively seeking employment, who do not have the job they want.
- D) all adults in the civilian labor force who are not working.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 25) The labor force is defined as the number of
- A) employed plus the number of unemployed.
  - B) people who are working.
  - C) people who are working in labor-type jobs.
  - D) union members who are working.

Answer: A

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 26) The U.S. Department of Labor classifies all individuals in the United States as
- A) labor force participants.
  - B) either employed, unemployed, or not in the labor force.
  - C) either overemployed or underemployed.
  - D) potential employees.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 27) A person who previously had a full-time job has been paroled from prison and has applied for a job is considered
- A) a reentrant.
  - B) a job loser.
  - C) a new entrant.
  - D) not in the labor force.

Answer: A

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 28) Increases in the duration of unemployment may
- A) reflect a general downturn in economic activity that depresses job openings.
  - B) increase the number of discouraged workers.
  - C) increase the unemployment rate.
  - D) all of the above.

Answer: D

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 29) Which category of unemployed individuals makes up the greatest share of those who are unemployed?

- A) new entrants
- B) reentrants
- C) job losers
- D) job leavers

Answer: C

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 30) Which of the following is a stock variable? The number of

- A) unemployed people.
- B) reentrants.
- C) job losers.
- D) job leavers.

Answer: A

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

31) The number of people that are fired in a month is

- A) a stock.
- B) a flow.
- C) both a stock and a flow.
- D) neither a stock nor a flow.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

32) When there is an increase in the duration of unemployment, the U.S. Congress typically responds by

- A) lowering income taxes.
- B) extending unemployment benefits.
- C) encouraging unemployed U.S. workers to seek employment overseas.
- D) redefining "unemployed" so the unemployment rate does not look so bad.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

33) The labor-force participation rate shows the percentage of

- A) people not working, but who want to work.
- B) people who are not actively participating in meaningful economic activity.
- C) new entrants into the labor force.
- D) non-institutionalized working-age people who are actually working or seeking employment.

Answer: D

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

34) The largest major change in the U.S. labor force participation rate during the last few decades has been

- A) the number of prisoners dropping out of the labor force.
- B) the increase in the number of working women.
- C) the decrease in the number of working women.
- D) the increase in the number of illegal immigrants in the United States.

Answer: B

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

35) In the United States, the labor-force participation rate since 1960 has been

- A) increasing for females.
- B) declining for females.
- C) declining for both males and females.
- D) unchanged for both males and females.

Answer: A

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

36) If a person is laid off from a job, he is considered by the Bureau of Labor Statistics to be a

- A) job loser.
- B) reentrant.
- C) job leaver.
- D) new entrant.

Answer: A

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 37) If I voluntarily end my employment, the Bureau of Labor Statistics would consider me to be
- A) a job loser.
  - B) a job leaver.
  - C) a discouraged worker.
  - D) a reentrant.

Answer: B

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

- 38) Which of the following would NOT be considered unemployed?

- A) a new entrant to the labor force
- B) a job leaver who is looking for a better job
- C) an individual fired by her employer
- D) a newly retired worker

Answer: D

Diff: 1

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

128) With regard to employment status, the adult population is divided into what three groups? How is it determined whether someone is in the labor force or not?

Answer: The adult population is in one of three groups—the employed, the unemployed, and those not in the labor force. To be in the labor force, one must be 16 years old or older, and either be working or actively looking for work.

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

129) What are the four criteria used by the Bureau of Labor Statistics to determine whether an individual is unemployed or not?

Answer: First are job losers, who became unemployed voluntarily through termination or layoff. Second are reentrants, which are people who worked at a full-time job before but have been out of the labor force for a while. Third are job leavers who voluntarily leave their jobs, and the last are new entrants, who are people who never worked a full-time job for two weeks or longer.

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

130) Who are discouraged workers, and how do they affect labor force participation and unemployment rates?

Answer: Discouraged workers are people who have dropped out of the labor force because they don't believe they can find a job that they would want. To be considered in the labor force, one must be actively looking for work, so a discouraged worker is not considered in the labor force and is not considered unemployed. Hence, the existence of discouraged workers implies that the published unemployment rates understate the true level of unemployment.

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

131) Distinguish between a stock and a flow. How do these concepts relate to unemployment?

Answer: A stock is a quantity of something measured at a given point in time, while a flow is a quantity measured per unit of time. Unemployment is a stock concept—there are so many people out of work at a given point in time. Over time, it increases or decreases depending on what happens to flows such as job finders and job losers.

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

132) If the duration of unemployment increases, what happens to the unemployment rate, other things being equal? Why?

Answer: An increase in the duration of unemployment increases the unemployment rate. If workers stay unemployed longer, other things constant, there will be more workers unemployed at any given point in time.

Diff: 2

Topic: 7.1 Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

133) What is unemployment and what is the unemployment rate? What are the costs of unemployment?

Answer: Unemployment refers to someone who is without a job but who is actively looking for work. The unemployment rate is the proportion of the labor force, which is the people 16 and older who either are working or are looking for work, that is unemployed. The cost of unemployment is the reduced output that could have been made with full employment, as well as the psychological costs to the unemployed.

AACSB: Analytical thinking

72) Which one of these factors plays a role in determining the extent and duration of frictional unemployment?

- A) the ease with which job seekers can obtain information about job openings
- B) the degree to which the overall level of business activity fluctuates up and down
- C) the extent to which government legislation requires firms to provide health insurance for employees
- D) the education and skill levels of labor force participants

Answer: A

Diff: 2

Topic: 7.2 The Major Types of Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

73) Describe the major types of unemployment.

Answer: Frictional unemployment is the continuous flow of people from job to job. Seasonal unemployment refers to changes in employment related to seasonal-type of work, such as work at summer resorts or winter ski lodges. Structural unemployment refers to unemployment of workers over lengthy intervals resulting from skill mismatches of prospective employees' abilities and skills with requirements of employers, and from fewer jobs being offered by employers constrained by government regulations and labor market policies. Cyclical unemployment has to do with those unemployed due to a downturn in business activity.

Topic: 7.2 The Major Types of Unemployment

Learning Outcome: Macro-14: Identify different types and measures of unemployment and discuss its causes

AACSB: Analytical thinking

74) What is meant by full employment? Why isn't the full employment rate zero? What causes frictional unemployment?

Answer: Full employment is the level of unemployment that corresponds to normal friction in the labor market. Since a dynamic economy will always experience changes in demand for goods and services, there will always be some frictional unemployment. Frictional unemployment refers to the unemployment resulting from the time people spend between jobs, looking for other work.

Topic: 7.3 Inflation and Deflation

Learning Outcome: Macro-13: Discuss the key measures, theories, and effects of inflation and deflation

AACSB: Analytical thinking

97) In what ways is the consumer price index flawed?

Answer: There are at least three problems with the CPI. First, it is a fixed-quantity index, which means that it doesn't take into consideration the way people change their purchases of goods and services when there are relative price changes. Second, it fails to account for quality changes in goods. Third, it ignores the introduction of new goods.

Topic: 7.3 Inflation and Deflation

Learning Outcome: Macro-13: Discuss the key measures, theories, and effects of inflation and deflation

AACSB: Analytical thinking

98) What is a price index? How do the CPI, the PPI, the PCE Index and the GDP deflator differ?

Answer: A price index is the cost of today's market basket of goods and services expressed as a percentage of the cost of the same market basket during a base year. The CPI, PPI, and GDP deflator differ in the goods and services they cover. The CPI measures price changes for goods and services purchased by consumers. The PPI measures price changes for goods and services charged by firms. The PCE Index measures a weighted average of prices of consumer goods and services based on continuously updated survey's of consumers' purchases. The GDP deflator measures changes in prices of everything produced in the economy.

A) losses for creditors and gains for debtors.

B) losses for both creditors and debtors.

C) gains for both creditors and debtors.

D) gains for creditors and losses for debtors.

Answer: A

Diff: 1

Topic: 7.4 Anticipated versus Unanticipated Inflation

Learning Outcome: Macro-13: Discuss the key measures, theories, and effects of inflation and deflation

AACSB: Analytical thinking

3) Most of the problems caused by inflation are caused by the fact that

A) there are no ways available for people to protect themselves against inflation.

B) anticipated inflation induces people to protect themselves against inflation.

C) inflation causes the purchasing power of the dollar to increase.

D) the inflation is often unanticipated and therefore comes as a surprise to individuals in the economy.

Answer: D

Diff: 2

Topic: 7.4 Anticipated versus Unanticipated Inflation

Learning Outcome: Macro-13: Discuss the key measures, theories, and effects of inflation and deflation

AACSB: Analytical thinking

- 4) Fully anticipated inflation occurs when
- A) the actual inflation rate equals the anticipated inflation rate.
  - B) the actual inflation rate is less than the anticipated inflation rate.
  - C) the inflation rate is zero.
  - D) the anticipated inflation rate and the unanticipated inflation rate are equal.

Answer: A

Diff: 2

Topic: 7.4 Anticipated versus Unanticipated Inflation

Learning Outcome: Macro-13: Discuss the key measures, theories, and effects of inflation and deflation

AACSB: Analytical thinking

- 5) The real rate of interest is the
- A) nominal rate of interest minus the anticipated rate of inflation.
  - B) current rate actually paid by the borrower.
  - C) difference between the bank's lending and savings rates.
  - D) current rate which the government pays on its debt.

Answer: A

Answer: C

Diff: 2

Topic: 7.4 Anticipated versus Unanticipated Inflation

Learning Outcome: Macro-13: Discuss the key measures, theories, and effects of inflation and deflation

AACSB: Analytical thinking

- 52) How is inflation related to interest rates?

Answer: People base their decisions on borrowing, lending, and investing on the basis of the real interest rate. If there is anticipated inflation, the nominal rate of interest will equal the real rate of interest plus the anticipated inflation rate. So, interest rates vary directly with anticipated inflation. Unanticipated inflation leads to a real interest rate different from what people thought, and the decisions people made turn out to be mistaken.

Diff: 2

Topic: 7.4 Anticipated versus Unanticipated Inflation

Learning Outcome: Macro-13: Discuss the key measures, theories, and effects of inflation and deflation

AACSB: Analytical thinking

53) What are the costs to society of inflation? Who is harmed by inflation and who benefits?

Answer: The resources used by people to protect themselves against inflation is the major cost of inflation to society as a whole. There is resource misallocation due to people making decisions based on faulty information about the true rate of inflation. In general, creditors are harmed by unanticipated inflation and debtors benefit.

Diff: 2

53) A war in the Middle East that disrupts U.S. economic activity is known as

- A) an external shock.
- B) an expansion.
- C) a demand shock.
- D) an internal shock.

Answer: A

Diff: 2

Topic: 7.5 Changing Inflation and Unemployment: Business Fluctuations

Learning Outcome: Macro-3: Identify and interpret key macroeconomic measures

AACSB: Analytical thinking

54) What is the business cycle? How "cyclical" is it? What causes the business cycle?

Answer: The business cycle refers to the ups and downs in overall business activity over time. It is cyclical in the sense that expansions eventually give way to contractions, which are followed again by an expansion. But, the pattern of the expansions and contractions are neither symmetrical nor repeating. External shocks are important in explaining the business cycle, although they are insufficient alone to explain the cycle.
