Essay Questions

49. (p. 36-37) Identify and briefly describe the 4 major parts of corporate entrepreneurship.

1. New business venturing: These entrepreneurial activities consist of creating something new of value either by redefining the company's current products or services, developing new markets, or forming more formally autonomous or semiautonomous units or firms.
 2. Organizational innovativeness refers to product and service innovation. It includes new product development, product improvements, and new production methods and procedures.
 3. Self-renewal is the transformation of an organization through the renewal of the key ideas on which it is built. Includes a redefinition of the business concept, reorganization, and the introduction of system wide changes to increase innovation.
 4. Proactiveness includes initiative and risk taking, as well as competitive aggressiveness and boldness, which are particularly reflected in the orientations and activities of top management. A proactive organization tends to take risks by conducting experiments; it also takes initiative and is bold and aggressive in pursuing opportunities. Organizations with this proactive spirit attempt to lead rather than follow competitors in such key business areas as the introduction of new products or services, operating technologies, and administrative techniques.

50. (p. 37-41) Discuss three major ways in which managerial and entrepreneurial decision making differs.

Eight areas of difference students can choose from:

1. strategic orientation
2. commitment to opportunity
3. commitment of resources
4. control of resources
5. management structure
6. reward philosophy
7. growth orientation
8. entrepreneurial culture

Basic differences in each dimension:

TABLE 2.1 Distinguishing Entrepreneurially from Traditionally Managed Firms

Entrepreneurial Focus	Conceptual Dimension	Administrative Focus
Driven by perception of opportunity	Strategic orientation	Driven by controlled resources
Revolutionary with short duration	Commitment to opportunity	Evolutionary with long duration
Many stages with minimal exposure	Commitment of resources	A single stage with complete commitment out of decision
Episodic use or rent of required resources	Control of resources	Ownership or employment of required resources
Flat with multiple informal networks	Management structure	Hierarchy
Based on value creation	Reward philosophy	Based on responsibility and seniority
Rapid growth is top priority; risk accepted to achieve growth	Growth orientation	Safe, slow, and steady
Promoting broad search for opportunities	Entrepreneurial culture	Opportunity search restricted by controlled resources; failure punished

Chapter 02 - Entrepreneurial Intentions and Corporate Entrepreneurship

53. (p. 50) Explain the dual process model of coping with negative emotions.

Student should define process as shifting between a loss orientation and a restoration orientation. The student should also explain the two types of loss:

loss orientation An approach to negative emotions that involves working through, and processing, some aspect of the loss experience and, as a result of this process, breaking emotional bonds to the object lost.

restoration orientation An approach to negative emotions based on both avoidance and a proactiveness toward secondary sources of stress arising from a major loss.

The entrepreneur can benefit from both orientations while minimizing the costs of maintaining either for too long.

Difficulty: Medium

54. (p. 50) Explain the benefits, or practical implications, of using the dual process model of coping with negative emotions.

1. Helps to reduce feelings of shame and embarrassment.
2. Realizing that psychological and physiological outcomes caused by the feelings of loss are "symptoms" can reduce secondary sources of stress and may also assist with the choice of treatment.
3. Understanding that there is a process can provide entrepreneurs some comfort that their current feelings of loss, sadness, and helplessness will eventually diminish.
4. The recovery and learning process can be enhanced by some degree of oscillation between a loss orientation and a restoration orientation.
5. Recovery from loss offers an opportunity to increase one's knowledge of entrepreneurship. This provides benefits to the individual and society.
