

1) Systems of classification of abnormal behaviour date to _____.

- A) ancient times
- B) the early 1900s
- C) the Renaissance
- D) the mid-1800s

Answer: a

Diff: 2

Type: MC

Page Ref: 41

Skill: Factual

2) Each of the following is a reason why it is important to classify abnormal behaviour EXCEPT _____.

- A) it allows researchers to test the effectiveness of new medical treatments such as drugs
- B) it allows mental health professionals to label people who engage in unpopular or different behaviours than the majority of a population
- C) it helps clinicians predict future behaviour
- D) it helps researchers identify populations with similar patterns of abnormal behaviour

Answer: b

Diff: 2

Type: MC

Page Ref: 41

Skill: Factual

3) The most widely used means of assessment is the _____.

- A) projective test
- B) intelligence test
- C) interview
- D) actuarial test

Answer: c

Diff: 1

Type: MC

Page Ref: 41

Skill: Factual

4) The intake interview provides an opportunity for the clinician to _____.

- A) learn more about the client's presenting problem and history
- B) gain an in-depth understanding of the dynamics in a client's life
- C) attempt a specific therapeutic intervention to resolve the client's problem
- D) gather the client's demographic information

Answer: a

Diff: 1

Type: MC

Page Ref: 42

Skill: Factual

5) Which of the following is NOT one of the three general types of clinical interviews?

- A) an unstructured interview
- B) an understructured interview
- C) a semi-structured interview
- D) a structured interview

Answer: b

Diff: 1 Type: MC Page Ref: 42 Skill: Factual

- 6) When interviewing, Richard likes to use his own style of questioning rather than following a standard format. He is using the _____ type of interview.
- A) unstructured
 - B) superstructured
 - C) semi-structured
 - D) structured

Answer: a

Diff: 2 Type: MC Page Ref: 42 Skill: Applied

- 7) In a(n) _____ interview, the clinician follows a general outline of questions designed to gather essential information, but is free to ask the questions in any particular order and to branch off into other directions in order to follow up clinically important information.
- A) unstructured
 - B) superstructured
 - C) semi-structured
 - D) structured

Answer: c

Diff: 1 Type: MC Page Ref: 42 Skill: Conceptual

- 8) When Dr. Bond interviews some of her clients, she uses a standardized format that includes a preset series of questions in a particular order. She is using a _____ format.
- A) unstructured
 - B) quasi-structured
 - C) semi-structured
 - D) structured

Answer: d

Diff: 2 Type: MC Page Ref: 42 Skill: Applied

- 9) Spontaneity is a major advantage of the _____ interview.
- A) unstructured
 - B) superstructured
 - C) semi-structured
 - D) structured

Answer: a

Diff: 1 Type: MC Page Ref: 42 Skill: Factual

- 10) Lack of standardization tends to reduce the _____ of the unstructured interview as a diagnostic tool.
- A) reliability
 - B) validity
 - C) coherency
 - D) appropriateness

Answer: a

Diff: 2 Type: MC Page Ref: 42 Skill: Factual

- 11) Standardized interviews are also known as _____ interviews.
- A) unstructured
 - B) superstructured
 - C) semi-structured
 - D) structured

Answer: d

Diff: 1 Type: MC Page Ref: 42 Skill: Conceptual

- 12) _____ interview techniques increase the reliability of diagnostic clinical judgments.
- A) Standardized
 - B) Structured
 - C) Unstructured
 - D) Spontaneous

Answer: a

Diff: 2 Type: MC Page Ref: 42 Skill: Factual

- 13) The SCID represents a(n) _____.
- A) actuarial assessment tool
 - B) projective test
 - C) standardized interview technique
 - D) mental status examination

Answer: c

Diff: 2 Type: MC Page Ref: 42 Skill: Factual

- 14) The SCID includes _____.
- A) a series of declarative statements
 - B) open-ended questions
 - C) closed-ended questions
 - D) both open- and closed-ended questions

Answer: d

Diff: 2 Type: MC Page Ref: 42 Skill: Factual

- 15) Which of the following is NOT a general category of a mental status examination?
- A) psychosocial history
 - B) appearance
 - C) level of awareness
 - D) mood

Answer: a

Diff: 2 Type: MC Page Ref: 43 Skill: Factual

- 16) Psychological tests are structured methods of assessment that are used to evaluate _____.
- A) affect
 - B) motivation
 - C) goals
 - D) traits

Answer: d

Diff: 2 Type: MC Page Ref: 43 Skill: Conceptual

- 17) Intelligence tests are used in assessment of abnormal behaviour for each of the following reasons EXCEPT _____.
- A) they can identify genetic differences in intelligence among clients from differing racial and ethnic backgrounds
 - B) they can help diagnose mental retardation
 - C) they can be used to assess intellectual impairment due to organic mental disorders
 - D) they provide a profile of a client's intellectual strengths and weaknesses in order to develop a treatment plan suited to the client's competencies

Answer: a

Diff: 3 Type: MC Page Ref: 43 Skill: Factual

- 18) The capacity to understand the world and the resourcefulness to cope with its challenges is one definition of _____.
- A) psychological affect
 - B) emotional maturity
 - C) intelligence
 - D) creativity

Answer: c

Diff: 1 Type: MC Page Ref: 43 Skill: Conceptual

- 19) The Binet-Simon scale yields a score called a(n) _____.
- A) intelligence quotient
 - B) basal age

- C) mental age
- D) aptitude level

Answer: c

Diff: 2 Type: MC Page Ref: 43 Skill: Factual

- 20) The formula for an IQ is _____.
- A) $IQ = CA/MA \times 100$
 - B) $IQ = MA/CA \times 100$
 - C) $IQ = [MA \times CA] / 100$
 - D) $IQ = [MA \times 100] / CA$

Answer: b

Diff: 1 Type: MC Page Ref: 43 Skill: Factual

- 21) The Stanford-Binet scale yields a(n) _____.
- A) intelligence quotient
 - B) basal age
 - C) mental age
 - D) aptitude level

Answer: a

Diff: 1 Type: MC Page Ref: 43 Skill: Factual

- 22) An IQ score is based on _____.
- A) a summative score of correct answers on the test
 - B) the relationship between a person's basal age and mental age
 - C) the relationship between a person's basal age and chronological age
 - D) the relationship between a person's mental age and chronological age

Answer: d

Diff: 2 Type: MC Page Ref: 43 Skill: Conceptual

- 23) The Stanford-Binet is an example of a(n) _____.
- A) mental status examination
 - B) projective test
 - C) intelligence test
 - D) personality test

Answer: c

Diff: 1 Type: MC Page Ref: 43 Skill: Factual

- 24) Two children take the Stanford-Binet test. They both obtain the same mental-age scores. However, the first child is much younger than the second child who took the test. How will this affect the score that each child receives?
- A) The younger child will obtain a lower IQ score.

- B) The younger child will obtain a higher IQ score.
- C) Both children will obtain the same IQ score.
- D) Neither child can receive an IQ score from the Stanford-Binet test.

Answer: b

Diff: 2

Type: MC

Page Ref: 43

Skill: Applied

25) The mean score of an IQ test is _____.

- A) 50
- B) 100
- C) 150
- D) 200

Answer: b

Diff: 1

Type: MC

Page Ref: 43

Skill: Factual

26) The amount by which a person's performance on an IQ test differs from the norms for others in his or her age group is called _____ IQ.

- A) difference
- B) variance
- C) deviation
- D) performance

Answer: c

Diff: 2

27) Each of the following is an advantage to computerized clinical interviews, as compared with human interviews, EXCEPT _____.

- A) computers can be programmed to analyze nonverbal behaviours more accurately than humans are able to do
- B) computers can be programmed to ask a specific set of questions in predetermined order
- C) some clients are less embarrassed relating sensitive personal issues to a computer
- D) computerized interviews can free clinicians to spend more time offering direct clinical services

Answer: a

Diff: 3

Type: MC

Page Ref: 44

Skill: Factual

28) Brief diagnostic interviews using the telephone have been found to achieve _____ results to a human interview.

- A) relatively the same
- B) less positive
- C) increased positive
- D) profoundly less positive

Answer: a

Diff: 2 *Type: MC* *Page Ref: 44* *Skill: Conceptual*

- 29) In remote and northern regions of Canada, _____ between therapists and clients has been found useful.
- A) correspondence
 - B) email
 - C) video-conferencing
 - D) texting

Answer: c

Diff: 1 *Type: MC* *Page Ref: 44* *Skill: Factual*

- 30) According to your text, CASPAR is a(n) _____.
- A) projective test
 - B) actuarial assessment test
 - C) standardized clinical interview technique
 - D) computerized clinical interview technique

Answer: d

Diff: 2 *Type: MC* *Page Ref: 44* *Skill: Factual*

- 31) Which of the following is NOT true of computerized interview programs?
- A) They achieve similar results to human interviewers using a more intensive interview protocol.
 - B) Clients report more problems to the computer than they do to human interviewers.
 - C) The majority of these programs have been designed to substitute for a live therapist.
 - D) Clients appear to be more willing to share problems with a computer than they are embarrassed about or unwilling to report to a human.

Answer: c

Diff: 3 *Type: MC* *Page Ref: 44* *Skill: Factual*

- 32) A review of research suggests that the best computer programs are _____.
- A) not as good as humans at either obtaining information from a client or reaching an accurate diagnosis
 - B) as good as humans at obtaining information from a client, but not as good at reaching an accurate diagnosis
 - C) as good as humans at reaching an accurate diagnosis, but not as good at obtaining information from a client
 - D) as good as humans at obtaining information from a client and at reaching an accurate diagnosis

Answer: d

Diff: 2 Type: MC Page Ref: 44 Skill: Factual

- 33) A review of research on computer interviews indicates that they are _____ expensive and _____ time-efficient than human interviews.
- A) less; less
 - B) more; less
 - C) less; more
 - D) more; more

Answer: c

Diff: 2 Type: MC Page Ref: 44 Skill: Factual

- 34) The IQ test designed to measure both verbal and performance areas of intelligence is the _____ scale.
- A) Binet-Simon
 - B) Stanford-Binet
 - C) Wechsler
 - D) Terman

Answer: c

Diff: 1 Type: MC Page Ref: 45 Skill: Factual

- 35) Cindy's assessment revealed significant verbal strengths. The test used was the _____.
- A) Wechsler
 - B) BDI
 - C) MMPI
 - D) TAT

Answer: a

Diff: 3 Type: MC Page Ref: 45 Skill: Applied

- 36) About _____ % of the IQ scores of any population on the Wechsler scales lie within the range of 90–110.
- A) 30
 - B) 50
 - C) 70
 - D) 90

Answer: b

Diff: 2 Type: MC Page Ref: 45 Skill: Factual

- 37) About _____ % of the IQ scores of any population on the Wechsler scales are above 130 or below 70.
- A) 1

- B) 5
- C) 10
- D) 15

Answer: b

Diff: 2

Type: MC

Page Ref: 45

Skill: Factual

38) Robin was labelled as “intellectually deficient” after being administered the Wechsler intelligence test. His IQ would have been scored as below _____.

- A) 10
- B) 30
- C) 50
- D) 70

Answer: d

Diff: 2

Type: MC

- 47) The MMPI is an example of a(n) _____.

- A) projective test
- B) structured interview technique
- C) IQ test
- D) objective test

Answer: d

Diff: 1 Type: MC Page Ref: 47 Skill: Factual

- 48) The MMPI is a(n) _____ test.
- A) intelligence
 - B) projective
 - C) personality
 - D) visual-motor

Answer: c

Diff: 1 Type: MC Page Ref: 47 Skill: Factual

- 49) The MMPI was constructed primarily on the basis of _____.
- A) clinical data
 - B) naturalistic observation
 - C) a rational approach
 - D) structured interviews

Answer: a

Diff: 2 Type: MC Page Ref: 47 Skill: Factual

- 50) Scales that measure the degree to which someone attempts to “fake good” or “fake bad” on the MMPI are called _____.
- A) diagnostic scales
 - B) content scales
 - C) validity scales
 - D) clinical scales

Answer: c

Diff: 2 Type: MC Page Ref: 49 Skill: Conceptual

- 51) Blind interpretation is when the administrator of an assessment doesn't know the _____.
- A) diagnosis of the client
 - B) type of test being administered
 - C) client's age, sex, and level of education
 - D) reasons why the client is being assessed

Answer: c

Diff: 2 Type: MC Page Ref: 48 Skill: Conceptual

- 52) Each of the following is an advantage to self-report inventories EXCEPT _____.
- A) they are easy and economical to administer
 - B) they can be scored with high inter-rater reliability
 - C) they are nearly immune to response bias problems
 - D) they have a quantified basis for interpreting test responses

Answer: c

Diff: 3 Type: MC Page Ref: 49 Skill: Factual

- 53) Each of the following is a limitation to self-report inventories EXCEPT _____.
- A) they possess low inter-rater reliability
 - B) they rely on clients as the source of their data
 - C) they tell us little about possible unconscious processes
 - D) they may be limited to relatively high-functioning persons who can read well and respond to verbal material

Answer: a

Diff: 2 Type: MC Page Ref: 49 Skill: Factual

- 54) A client at a mental health clinic is given a test in which she is asked to describe a series of ambiguous-looking ink blots. The test she is taking is a(n) _____ test.
- A) intelligence
 - B) objective
 - C) projective
 - D) neuropsychological

Answer: c

Diff: 1 Type: MC Page Ref: 49 Skill: Applied

- 55) Projective tests are based upon _____ theories.
- A) psychodynamic
 - B) humanistic
 - C) cognitive
 - D) social learning

Answer: a

Diff: 2 Type: MC Page Ref: 50 Skill: Conceptual

- 56) The TAT is an example of a(n) _____ test.
- A) forced-choice
 - B) objective
 - C) projective
 - D) intelligence

Answer: c

Diff: 1 Type: MC Page Ref: 50 Skill: Factual

57) The Rorschach test is an example of a(n) _____ test.

- A) forced-choice
- B) objective
- C) projective
- D) intelligence

Answer: c

Diff: 1 Type: MC Page Ref: 50 Skill: Factual

58) Which of the following is a projective test?

- A) the MMPI
- B) the WAIS
- C) the MCMI
- D) the TAT

Answer: d

Diff: 2 Type: MC Page Ref: 50 Skill: Factual

59) The Rorschach test consists of _____ inkblots.

- A) 5
- B) 10
- C) 15
- D) 20

Answer: b

Diff: 2 Type: MC Page Ref: 50 Skill: Factual

60) Amy takes a Rorschach test. Her responses tend to be based solely on minor details of the inkblots. She is likely to be diagnosed with _____ tendencies.

- A) depressed
- B) passive-aggressive
- C) hysteric
- D) obsessive-compulsive

Answer: d

Diff: 3 Type: MC Page Ref: 50 Skill: Applied

61) Each of the following is a criticism of the Rorschach EXCEPT _____.

- A) there is a lack of empirical research to support the interpretation of particular responses
- B) it is not useful as a means of gathering information about the ways in which clients construct meaning from unstructured or ambiguous situations
- C) the interpretation of clients' responses is not objective
- D) it lacks a well-accepted standardized scoring procedure

Answer: b

Diff: 2 Type: MC Page Ref: 50 Skill: Factual

62) The Thematic Aptitude Test was developed by _____.

- A) Murray
- B) Termin
- C) Wechsler
- D) Bandura

Answer: a

Diff: 2 Type: MC Page Ref: 50 Skill: Factual

63) The TAT is composed of a series of cards _____.

- A) containing nonsense syllables
- B) containing ambiguous inkblots
- C) with open-ended statements like “My favourite food is ...”
- D) depicting ambiguous scenes

Answer: d

Diff: 1 Type: MC Page Ref: 51 Skill: Factual

64) Each of the following is a criticism of the TAT EXCEPT _____.

- A) it may exert too strong a “stimulus pull” for clients' answers to be truly based on internalized perceptions or projections
- B) its appeal among clinicians is particularly low
- C) it lacks a widely accepted standardized scoring procedure
- D) the interpretation of clients' responses is not objective

Answer: b

Diff: 2 Type: MC Page Ref: 51 Skill: Factual

65) Various methods of _____ assessment help researchers and clinicians evaluate whether or not behavioural problems reflect underlying organic conditions or brain damage.

- A) neuropsychological
- B) neurophysiological
- C) actuarial
- D) clinical

Answer: a

Diff: 2 Type: MC Page Ref: 51 Skill: Factual

66) The Luria Nebraska Test Battery reveals _____.

- A) patterns of responses suggesting unconscious conflicts or repressed memories
- B) patterns of skills deficits that are suggestive of particular sites of brain damage

- C) a profile of someone's personal and professional areas of interests
- D) visual and auditory perceptual skills

Answer: b

Diff: 2 Type: MC Page Ref: 51 Skill: Factual

67) Each of the following is true of the Luria Nebraska Test Battery EXCEPT _____.

- A) it tests a wide range of skills
- B) it is more efficiently administered than many other similar tests, such as the Halstead-Reitan Battery
- C) it has been proven to have extremely high reliability
- D) it reveals patterns of skills deficits suggestive of sites of organic brain damage

Answer: c

Diff: 2 Type: MC Page Ref: 51 Skill: Factual

68) The _____ approach holds that psychological tests reveal signs of reasonably stable traits or dispositions that largely determine the individual's behaviour.

- A) cognitive
- B) psychometric
- C) behavioural
- D) neuropsychological

Answer: b

Diff: 2 Type: MC Page Ref: 52 Skill: Conceptual

69) Trait-based tests such as the MMPI and the Rorschach are based upon the _____ approach.

- A) cognitive
- B) psychometric
- C) behavioural
- D) neuropsychological

Answer: b

Diff: 2 Type: MC Page Ref: 52 Skill: Applied

70) The _____ model treats test results as samples of behaviour that occur in specific situations rather than signs of underlying personality types or traits.

- A) Gestalt
- B) psychometric
- C) behavioural
- D) actuarial

Answer: c

Diff: 2 Type: MC Page Ref: 52 Skill: Conceptual

- 71) The behavioural interview, more so than the general clinical interview, focuses on the _____ that relate to the problem.
- A) genetic predispositions
 - B) person variables
 - C) situational factors
 - D) childhood factors

Answer: c

Diff: 1 Type: MC Page Ref: 52 Skill: Factual

- 72) The hallmark technique of behavioural assessment is _____.
- A) direct observation
 - B) analogue measurement
 - C) self-monitoring
 - D) the structured interview

Answer: a

Diff: 2 Type: MC Page Ref: 52 Skill: Conceptual

- 73) Each of the following is an advantage to direct observation as an assessment technique EXCEPT _____.
- A) there is usually a consensus in defining problems in behavioural terms
 - B) observations can be videotaped for more extensive analysis of behaviour patterns
 - C) it does not rely on clients' self-reports
 - D) it can suggest appropriate strategies for intervention

Answer: a

Diff: 3 Type: MC Page Ref: 52 Skill: Factual

- 74) Each of the following is a disadvantage to direct observation as an assessment technique EXCEPT _____.
- A) observer drift
 - B) reactivity
 - C) observer response bias
 - D) reliance on clients' self-reports

Answer: d

Diff: 3 Type: MC Page Ref: 52 Skill: Factual

- 75) Each of the following is a disadvantage to direct observation as an assessment technique EXCEPT _____.
- A) reactivity
 - B) lack of consensus in defining problems in behavioural terms
 - C) it does not, in itself, suggest strategies for intervention
 - D) observer drift

Answer: c

Diff: 2 Type: MC Page Ref: 52 Skill: Factual

- 76) Jeremiah is asked when he feels anxious, where he when he feels anxious, how often he feels anxious, and under what circumstances he feels anxious in his assessment. This would most likely be done in a _____ assessment.
- A) behavioural
 - B) cognitive
 - C) neuropsychological
 - D) personality

Answer: a

Diff: 3 Type: MC Page Ref: 52 Skill: Applied

- 77) A psychologist visits Natalie's home to observe the interaction between Natalie and her parents. The psychologist is completing a(n) _____ assessment.
- A) cognitive
 - B) behavioural
 - C) eclectic
 - D) mental status

Answer: b

Diff: 3 Type: MC Page Ref: 52 Skill: Applied

- 78) Each of the following is a problem with self-monitoring EXCEPT _____.
- A) reactivity
 - B) some clients are unreliable and do not keep accurate records of targeted behaviour
 - C) some clients underreport undesirable behaviours
 - D) it does not teach clients to assume primary responsibility for their own behaviour

Answer: d

Diff: 2 Type: MC Page Ref: 53 Skill: Factual

- 79) In self-monitoring, a period of time preceding the implementation of a treatment is called _____.
- A) a starting point
 - B) a baseline
 - C) an observational bias
 - D) a set point

Answer: b

Diff: 2 Type: MC Page Ref: 53 Skill: Conceptual

- 80) Behaviours such as food intake, hair pulling, and cigarette smoking are well suited for _____.
- A) self-monitoring
 - B) direct observation
 - C) behavioural interviews
 - D) home observation

Answer: a

Diff: 3

- 84) The behavioural Approach Task is a popular _____ measure.
- A) experimental
 - B) in vivo
 - C) analogue
 - D) psychometric

Answer: c

Diff: 3 Type: MC Page Ref: 54 Skill: Conceptual

- 85) The behavioural Approach Task is used to help clients deal with _____.
- A) generalized anxiety
 - B) phobias
 - C) conversion disorders
 - D) cognitive dissonance

Answer: b

Diff: 3 Type: MC Page Ref: 54 Skill: Factual

- 86) In discussing his child's problem behaviours with a therapist, Fred is asked to review a checklist of more than 100 specific problem behaviours and place a check mark next to each behaviour that applies to his child. This checklist is known as a _____.
- A) behavioural rating scale
 - B) behavioural approach task
 - C) social desirability scale
 - D) social reactivity scale

Answer: a

Diff: 2 Type: MC Page Ref: 54 Skill: Applied

- 87) Hillary visits a therapist to deal with her anxiety and depression. The therapist explores her thoughts, beliefs, and attitudes and attempts to replace her self-defeating thoughts with rational, self-enhancing thought patterns. Her therapist is using a _____ assessment approach.
- A) psychometric
 - B) behavioural
 - C) cognitive
 - D) Gestalt

Answer: c

Diff: 3 Type: MC Page Ref: 54 Skill: Applied

- 88) André is asked to keep a diary to record his thoughts and then bring it to his therapy session. This is a technique used in the _____ assessment approach.
- A) psychometric
 - B) behavioural
 - C) humanistic
 - D) cognitive

Answer: d

Diff: 3 Type: MC Page Ref: 54 Skill: Applied

- 89) Candace is asked to role-play how she would approach her parents to tell them she failed a course. This is an example of _____.

- A) behavioural rating
- B) an in vitro exercise
- C) cognitive restructuring
- D) an analogue or contrived measure

Answer: d

Diff: 3 Type: MC Page Ref: 54 Skill: Applied

- 90) Helen is asked to carry a diary to record when she has negative thoughts about herself. Her therapist is using a(n) _____ approach.
- A) cognitive
 - B) behavioural
 - C) analogue or contrived measure
 - D) in vitro

Answer: a

Diff: 3 Type: MC Page Ref: 54 Skill: Applied

- 91) Andrew is asked to rate the frequency of times he says “I hate myself.” His therapist is using a(n) _____.
- A) automatic thoughts questionnaire
 - B) thought record
 - C) thought diary
 - D) analogue or contrived questionnaire

Answer: d

Diff: 3 Type: MC Page Ref: 55 Skill: Applied

- 92) Hillary visits a therapist to help deal with her anxiety and depression. The therapist administers a rating scale in which she rates the weekly frequency and degree of conviction of 30 negative thoughts. The scale Hillary was given was probably the _____.
- A) Dysfunctional Attitudes Scale
 - B) Daily Record of Dysfunctional Thoughts
 - C) Automatic Thoughts Questionnaire
 - D) Cognitive Checklist

Answer: c

Diff: 3 Type: MC Page Ref: 55 Skill: Applied

- 93) Anxious people tend to sweat, and that sweating can be measured by _____.
- A) electroencephalograph
 - B) electromyograph
 - C) electrocardiograph
 - D) electrodermal response

Answer: d

- 108) In the DSM system, abnormal behaviours are classified as _____.
- A) abnormalities
 - B) behaviour abnormalities
 - C) mental disorders
 - D) mental diseases

Answer: c

Diff: 2 Type: MC Page Ref: 59 Skill: Factual

- 109) The current classification system used by most mental health professionals to assess abnormal behaviour is the _____.
- A) DSM-I
 - B) DSM-II
 - C) DSM-III
 - D) DSM-IV

Answer: d

Diff: 1 Type: MC Page Ref: 59 Skill: Factual

- 110) The _____ has been adopted as the Canadian standard for coding, reporting, and tracking health information.
- A) DSM
 - B) DSM-IV
 - C) DSM-IV-TR
 - D) ICD-10

Answer: d

Diff: 2 Type: MC Page Ref: 59 Skill: Factual

- 111) The DSM system is often criticized for relying too much on the _____ model of abnormal behaviour.
- A) psychodynamic
 - B) medical
 - C) sociocultural
 - D) social learning

Answer: b

Diff: 2 Type: MC Page Ref: 59 Skill: Factual

112) Each of the following is considered an abnormal behaviour pattern by the DSM system EXCEPT _____.

- A) experiencing emotional distress
- B) engaging in behaviour that is statistically deviant
- C) experiencing impaired functioning
- D) engaging in behaviour that risks personal suffering, pain, or death

Answer: b

Diff: 3 Type: MC Page Ref: 59 Skill: Conceptual

113) Which of the following is NOT true of the DSM system?

- A) It treats abnormal behaviours as symptoms of underlying disorders.
- B) It assumes that abnormal behaviours result from biological causes.
- C) It does not subscribe to any single theory of abnormality.
- D) It can be used by practitioners of diverse theoretical persuasions.

Answer: b

Diff: 2 Type: MC Page Ref: 59 Skill: Factual

114) The DSM system is used to classify _____.

- A) groups
- B) theoretical perspectives
- C) social norms
- D) disorders

Answer: d

Diff: 1 Type: MC Page Ref: 59 Skill: Conceptual

115) In the DSM system, disorders are classified on the basis of _____.

- A) clinical features and behaviour patterns
- B) their frequency within clinical populations
- C) underlying theoretical mechanisms
- D) their response rates to various treatment methods

Answer: a

Diff: 2 Type: MC Page Ref: 60 Skill: Factual

116) Wakefield recently proposed that the term *disorder* be conceptualized as _____.

- A) statistically deviant behaviour
- B) harmful dysfunction
- C) physiologically-based problems
- D) a label society imposes on people who are different

Answer: b

Diff: 1 Type: MC Page Ref: 60 Skill: Conceptual

117) Which of the following is NOT a feature of the DSM system?

- A) It is explanatory.
- B) Specific diagnostic criteria are used.
- C) Abnormal behaviours that share common clinical features are grouped together.
- D) A multiaxial system is used.

184) Thorazine, Mellaril, Prolixin, and Stelazine are all types of _____.

- A) benzodiazepines
- B) phenothiazines
- C) tricyclics
- D) MAO inhibitors

Answer: b

Diff: 3

Type: MC

Page Ref: 69

Skill: Conceptual

185) Phenothiazines are a class of _____.

- A) antipsychotic drugs
- B) antineurotic drugs
- C) antidepressants
- D) analgesics

Answer: a

Diff: 2 Type: MC Page Ref: 69 Skill: Conceptual

186) Phenothiazines control psychotic features by blocking the action of _____.

- A) serotonin
- B) cholinesterase
- C) norepinephrine
- D) dopamine

Answer: d

Diff: 2 Type: MC Page Ref: 69 Skill: Factual

187) An effective antipsychotic drug that is NOT a member of the phenothiazine class of drugs is _____.

- A) clozapine
- B) Nardil
- C) Elavil
- D) Prolixin

Answer: a

Diff: 3 Type: MC Page Ref: 69 Skill: Factual

188) The introduction of _____ in the mid-1950s was one of the major factors that led to a massive exodus of chronic mental patients from state institutions.

- A) antineurotics
- B) antidepressants
- C) minor tranquilizers
- D) major tranquilizers

Answer: d

Diff: 2 Type: MC Page Ref: 69 Skill: Factual

189) Jason has been taking prescription drugs for years for the treatment of schizophrenia. Recently, he has been plagued by uncontrollable eye blinking, lip smacking, facial grimaces, and other involuntary muscle movements. His symptoms suggest that he has developed _____.

- A) cerebral palsy
- B) Tourette syndrome
- C) Huntington's disease
- D) tardive dyskinesia

Answer: d

Diff: 2 Type: MC Page Ref: 69 Skill: Applied

- 190) Tardive dyskinesia is most closely associated with the long-term use of _____ drugs.
- A) anti-anxiety
 - B) antidepressant
 - C) antipsychotic
 - D) anti-inflammatory

Answer: c

Diff: 2 Type: MC Page Ref: 69 Skill: Factual

- 191) Each of the following is a class of antidepressant EXCEPT _____.
- A) neuroleptics
 - B) tricyclics
 - C) serotonin reuptake inhibitors
 - D) MAO inhibitors

Answer: a

Diff: 3 Type: MC Page Ref: 69 Skill: Factual

- 192) Tricyclics and MAO inhibitors are types of _____.
- A) antineurotics
 - B) antidepressants
 - C) minor tranquilizers
 - D) major tranquilizers

Answer: b

Diff: 2 Type: MC Page Ref: 69 Skill: Factual

- 193) Tofranil and Elavil are types of _____.
- A) tricyclics
 - B) MOA inhibitors
 - C) phenothiazines
 - D) benzodiazepines

Answer: a

Diff: 3 Type: MC Page Ref: 69 Skill: Factual

- 194) Nardil and Parnate are types of _____.
- A) tricyclics
 - B) MAO inhibitors
 - C) phenothiazines
 - D) benzodiazepines

Answer: b

Diff: 3 Type: MC Page Ref: 69 Skill: Factual

195) Which of the following antidepressant drugs is neither a MAO inhibitor nor a tricyclic?

- A) Prozac
- B) Elavil
- C) Tofranil
- D) Sinequan

Answer: a

Diff: 3

Type: MC

Page Ref: 69

Skill: Factual

196) Prozac and Zoloft are types of _____.

- A) neuroleptics
- B) tricyclics
- C) serotonin reuptake inhibitors
- D) MAO inhibitors

Answer: c

198) Slightly more than _____ % of the people with clinically significant depression who are treated with tricyclics will respond favourably.

- A) 30
- B) 50
- C) 70
- D) 90

Answer: b

Diff: 3

Type: MC

Page Ref: 69

Skill: Factual

199) Research on the effectiveness of antidepressant drugs indicates that _____.

- A) tricyclics are more effective than MAO inhibitors or selective serotonin reuptake inhibitors
- B) MAO inhibitors are more effective than tricyclics or selective serotonin reuptake inhibitors
- C) selective serotonin reuptake inhibitors are more effective than tricyclics or MAO inhibitors

D) all three classes of antidepressants are similar in effectiveness

Answer: d

Diff: 2 Type: MC Page Ref: 70 Skill: Factual

200) Among antidepressant medications, _____.

- A) tricyclics have the fewest side effects
- B) MAO inhibitors have the fewest side effects
- C) selective serotonin reuptake inhibitors have the fewest side effects
- D) all have similar side effects

Answer: c

Diff: 2 Type: MC Page Ref: 70 Skill: Factual

201) Anxiety and eating disorders are most likely to be treated with _____ drugs.

- A) anti-anxiety
- B) anti-inflammatory
- C) antipsychotic
- D) antidepressant

Answer: d

Diff: 2 Type: MC Page Ref: 70 Skill: Factual

202) Lithium carbonate has shown remarkable success in treating _____.

- A) obsessive-compulsive disorder
- B) bipolar disorder
- C) acute psychotic episodes among schizophrenics
- D) major depression

Answer: b

Diff: 2 Type: MC Page Ref: 70 Skill: Factual

203) Joe has been diagnosed with bipolar disorder and takes lithium carbonate. His physician would likely recommend that he _____.

- A) needs to take it only for a few weeks
- B) needs to take it only for a few months
- C) he can be slowly weaned from it after several years of taking it
- D) must continue to take the drug indefinitely

Answer: d

Diff: 2 Type: MC Page Ref: 70 Skill: Factual

204) Electroconvulsive therapy is used today to treat _____.

- A) depression
- B) autism
- C) schizophrenia

D) convulsions

Answer: a

226) Each of the following is true of current psychodynamic therapies when compared with traditional psychoanalysis EXCEPT _____.

- A) they tend to be briefer
- B) they focus more on unconscious conflicts
- C) they follow a somewhat different format
- D) they focus more on issues concerning present relationships

Answer: b

Diff: 1 Type: MC Page Ref: 74 Skill: Factual

- 227) The systematic application of techniques drawn from the principles of learning to help people make adaptive changes in their lives is called _____.
- A) psychoanalysis
 - B) rational-emotive therapy
 - C) cognitive therapy
 - D) behaviour therapy

Answer: d

Diff: 1 Type: MC Page Ref: 75 Skill: Conceptual

- 228) Each of the following therapeutic approaches has a "here and now" focus EXCEPT _____.
- A) psychoanalysis
 - B) humanistic-existential therapy
 - C) cognitive therapy
 - D) behaviour therapy

Answer: a

Diff: 2 Type: MC Page Ref: 75-82 Skill: Conceptual

- 229) _____ therapists believe that the efficacy of therapy results from learning-based techniques rather than from the nature of the therapeutic relationship.
- A) Cognitive
 - B) Humanistic
 - C) Behaviour
 - D) Existential

Answer: c

Diff: 1 Type: MC Page Ref: 75 Skill: Factual

- 230) Which of the following is NOT one of the techniques developed by behaviour therapists for reducing fears and phobias?
- A) generalization
 - B) systematic desensitization
 - C) modelling
 - D) gradual exposure

Answer: a

Diff: 1 Type: MC Page Ref: 75 Skill: Factual

- 231) Ted goes to a therapist to help overcome his fear of snakes. The therapist helps Ted to become deeply relaxed through the use of progressive relaxation. Ted is then asked to imagine increasingly anxiety-arousing scenes involving snakes while

maintaining a relaxed state. If Ted becomes fearful, the therapist switches Ted back to relaxation until Ted can tolerate the scene and remain fully relaxed. This process is continued until Ted can stay relaxed through even the most distressing scene in the hierarchy. This process is called _____.

- A) flooding
- B) systematic desensitization
- C) gradual exposure
- D) modelling

Answer: b

Diff: 3

Type: MC

Page Ref: 75

Skill: Applied

232) Matt goes to a therapist to help overcome his fear of snakes. The therapist helps Matt become deeply relaxed through the use of progressive relaxation. Matt is then exposed to actual fear-evoking stimuli involving snakes while trying to maintain his relaxed state. The therapist begins with the least distressing stimuli in a hierarchy and progresses to more distressing stimuli until Matt can maintain his relaxed state when exposed to even the most distressing stimuli in the hierarchy, which involves draping a large snake over his shoulders. This process is called _____.

- A) cue-controlled conditioning
- B) systematic desensitization
- C) gradual exposure
- D) flooding

Answer: c

Diff: 3

Type: MC

Diff: 1 Type: MC Page Ref: 76 Skill: Conceptual

- 250) Mary Ann is a therapist who helps people who have abused their children. She is able to accept her clients without judgement even though she objects to their behaviours. Carl Rogers called this acceptance _____.
- A) unconditional positive regard
 - B) genuineness
 - C) empathy
 - D) congruence

Answer: a

Diff: 3 Type: MC Page Ref: 76 Skill: Applied

- 251) The fit between one's thoughts and one's feelings referring to the degree to which one's thoughts and feelings are integrated and consistent is what Roger's called _____.
- A) unconditional positive regard
 - B) genuineness
 - C) empathy
 - D) congruence

Answer: d

Diff: 2 Type: MC Page Ref: 76 Skill: Conceptual

- 252) An essential tenet of _____ is not to eliminate intense or uncomfortable feelings, but to view them as a signal to action.
- A) emotion-focused therapy
 - B) cognitive-behavioural therapy
 - C) psychodynamic therapy

D) client-centred therapy

Answer: a

Diff: 2 Type: MC Page Ref: 78 Skill: Conceptual

253) An emotion-focused therapist acts as a(n) _____.

- A) encourager
- B) coach
- C) interpreter
- D) teacher

Answer: b

Diff: Conceptual Type: MC Page Ref: 78 Skill: Factual

254) Reliving past hurts that become our maladaptive responses to current situations would be a tenet of what type of therapy?

- A) cognitive
- B) psychoanalytical
- C) rational-emotive
- D) emotion-focused

Answer: d

Diff: 2 Type: MC Page Ref: 78 Skill: Conceptual

255) Jolene's therapist points out that she distorts the meaning of negative events in her life and suggests that she views them through "dark-coloured glasses" of irrational beliefs. Her therapist is likely using what theoretical approach?

- A) emotion-focused
- B) psychoanalysis
- C) rational-emotive
- D) behavioural

Answer: c

Diff: 3 Type: MC Page Ref: 79 Skill: Applied

256) Shakespeare's quote "There is nothing either good or bad, but thinking makes it so," most closely reflects the views of _____ therapists.

- A) psychoanalytic
- B) cognitive
- C) humanistic
- D) existential

Answer: b

Diff: 2 Type: MC Page Ref: 79 Skill: Applied

257) Cognitive therapists focus on helping clients _____.

- A) achieve their actualizing potential
- B) uncover early childhood conflicts and repressed memories
- C) identify and correct maladaptive beliefs and self-defeating attitudes
- D) change environmental antecedents that lead to problem behaviours

Answer: c

Diff: 1 Type: MC Page Ref: 79 Skill: Factual

258) The founder of rational-emotive therapy is _____.

- A) Albert Ellis
- B) Albert Bandura
- C) Aaron Beck
- D) Rollo May

Answer: a

Diff: 1 Type: MC Page Ref: 79 Skill: Factual

259) Melissa seeks out a therapist to help her overcome her severe depression. Her therapist tells her that her depression stems from her irrational beliefs about herself and what she must accomplish in life to be loved and accepted by others. Her therapist actively disputes these beliefs and helps her develop more adaptive beliefs. Melissa's therapist is most like _____.

- A) Albert Ellis
- B) Sigmund Freud
- C) Aaron Beck
- D) Carl Rogers

Answer: a

Diff: 2 Type: MC Page Ref: 79 Skill: Applied

260) Nicole seeks out a therapist to help her overcome her severe depression. Her therapist tells her that her depression stems from her irrational beliefs about herself and what she must accomplish in life to be loved and accepted by others. Her therapist actively disputes these beliefs and helps her develop more adaptive beliefs. Nicole's therapist is using _____.

- A) cognitive therapy
- B) psychoanalysis
- C) existential therapy
- D) humanistic therapy

Answer: a

Diff: 3 Type: MC Page Ref: 79 Skill: Applied

261) The concept of irrational beliefs would be most important to _____.

- A) Margaret Mahler
- B) Sigmund Freud

- C) Carl Rogers
- D) Albert Ellis

Skill: Conceptual

271) Kathryn seeks out a therapist to help her overcome her severe depression. The therapist spends much of the time in the early sessions using the techniques of mirroring and reflection, suggesting that part of her problem relates to early childhood conflicts with her parents, which have prevented her from achieving self-actualization. Then the therapist suggests focusing on her current problems, emphasizing the role of learned maladaptive behaviours and negative self-talk in maintaining her depression. The therapist uses a combination of cognitive restructuring and operant conditioning techniques to help Kathryn overcome her depression. Kathryn's therapist is best described as _____.

- A) psychodynamic
- B) behavioural-cognitive
- C) humanistic-existential
- D) eclectic

Answer: d

272) Tammy has a fear of elevators, and her therapist gradually exposes her to them and conducts cognitive restructuring along the process. This approach is an example of _____ therapy.

- A) cognitive-behavioural
- B) emotion-focused
- C) behavioural
- D) cognitive

Answer: a

Diff: 3 Type: MC Page Ref: 80 Skill: Applied

- 273) Today, the largest single group of psychologists and psychotherapists identify themselves as _____ in orientation.
- A) psychodynamic
 - B) humanistic-existentialist
 - C) eclectic
 - D) cognitive-behavioural

Answer: c

Diff: 2 Type: MC Page Ref: 81 Skill: Factual

- 274) About _____ of therapists surveyed label themselves as eclectic in their orientation.
- A) one fifth to one quarter
 - B) one quarter to one third
 - C) one third to one half
 - D) one half to two thirds

Answer: c

Diff: 3 Type: MC Page Ref: 81 Skill: Factual

- 275) Which of the following is NOT true of group therapy?
- A) It allows greater access to limited resources.
 - B) It is usually preferred by clients over individual therapy.
 - C) It costs less than individual therapy.
 - D) It provides opportunities for dealing more effectively with people.

Answer: b

Diff: 2 Type: MC Page Ref: 81 Skill: Factual

- 276) Which of the following is true of group therapy?
- A) It allows clients to see that their problems are not unique.
 - B) It is more effective than individual therapy.
 - C) It is costlier than individual therapy.
 - D) It is usually preferred by clients over individual therapy.

Answer: a

Diff: 2 Type: MC Page Ref: 81 Skill: Factual

- 277) Each of the following is a reason clients prefer individual therapy to group therapy EXCEPT _____.
- A) some clients may not wish to disclose their problems to others in a group
 - B) some clients prefer the individual attention of the therapist
 - C) individual therapy has been shown to be more effective than group therapy

- D) social inhibitions may prevent many clients from feeling comfortable in a group setting

Answer: c

Diff: 2 Type: MC Page Ref: 82 Skill: Factual

278) Which of the following is NOT true of family therapy?

- A) Conflicts requiring family therapy often emerge at transitional points in the life cycle when family patterns are altered by changes in one or more family members.
- B) Faulty family communications often play a role in creating problems in the family.
- C) It is common for family members to scapegoat one member of the family as the "identified client" or source of the problem.
- D) Family therapists work with family members to resolve conflicts, lessen autonomy, and encourage mutual dependence to bring the family closer together.

Answer: d

Diff: 3 Type: MC Page Ref: 82 Skill: Factual

279) Shannon's family is involved in family therapy. Their therapist suggests that the family's problems arise from faulty patterns of communication and interaction, which need to be adjusted to enhance the family as a unit as well as the growth of individual family members. The therapist is using _____.

- A) conjoint family therapy
- B) structural family therapy
- C) functional family therapy
- D) ecological family therapy

Answer: a

Diff: 3 Type: MC Page Ref: 82 Skill: Applied

280) Conjoint family therapy was developed by _____.

- A) Minuchin
- B) Satir
- C) Westheimer
- D) Dawson

285) The effectiveness of psychotherapy _____.

- A) receives strong support from the research literature
- B) receives only weak and sporadic support from the research literature
- C) has not been demonstrated by the research literature
- D) has not been thoroughly examined by researchers

Answer: a

Diff: 2 Type: MC Page Ref: 83 Skill: Factual

- 286) A statistical technique for averaging the results of large numbers of studies in order to determine levels of overall effectiveness is called _____.
- A) factor analysis
 - B) analysis of variance
 - C) meta-analysis
 - D) stepwise regression analysis

Answer: c

Diff: 2 Type: MC Page Ref: 83 Skill: Conceptual

- 287) Smith, Glass, and Miller (1980) found that the average psychotherapy client was better off than _____ % of clients who remained untreated.
- A) 20
 - B) 40
 - C) 60
 - D) 80

Answer: d

Diff: 3 Type: MC Page Ref: 83 Skill: Factual

- 288) The most frequently cited meta-analysis of psychotherapy research was conducted by _____.
- A) Smith and Glass
 - B) Eysenck
 - C) Bowers and Clum
 - D) Crits-Christoph

Answer: a

Diff: 1 Type: MC Page Ref: 83 Skill: Factual

- 289) Meta-analyses suggest that _____.
- A) behavioural therapy is more effective than psychodynamic therapy
 - B) behavioural therapy is not as effective as psychodynamic therapy
 - C) cognitive therapy is more effective than psychodynamic therapy
 - D) the effectiveness of any psychotherapy has more to do with the features it shares with other therapies than with those that set them apart

Answer: d

Diff: 2 Type: MC Page Ref: 83 Skill: Factual

- 290) Researchers have found that about _____% of clients in once weekly psychotherapy experience a remission of their presenting complaints sufficient to restore them to normal functioning by about one year of therapy.

- A) 35
- B) 55
- C) 75
- D) 95

Answer: c

Diff: 3 Type: MC Page Ref: 83 Skill: Factual

- 291) The elements that psychotherapies share are called _____.
- A) placebo factors
 - B) specific factors
 - C) treatment factors
 - D) nonspecific factors

Answer: d

Diff: 2 Type: MC Page Ref: 83 Skill: Conceptual

- 292) Nonspecific factors in psychotherapy stem largely from _____.
- A) the therapist–client relationship
 - B) genetically inherited traits
 - C) environmental cues
 - D) response biases
