## Essentials of Negotiation Canadian 3rd Edition Lewicki Test Bank

Full Download: http://testbanklive.com/download/essentials-of-negotiation-canadian-3rd-edition-lewicki-test-bank/ TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.

1) Distributive bargaining is basically a competition over who is going to get the most of a limited resource.
Answer: • True False
<ul><li>2) Whether or not one or both parties in a distributive bargaining situation achieve their objectives will depend upon the strategy and tactics they employ.</li><li>Answer: True False</li></ul>
3) Many people use distributive bargaining strategies and tactics almost exclusively, negotiators <i>don't</i> need to understand how to counter their effects.
Answer: True • False
4) The <i>resistance point</i> is the point beyond which a person will not go and would rather break off negotiations.
Answer: • True False
5) The spread between the resistance points is called <i>the bargaining agreement</i> .
Answer: True • False
6) A <i>positive</i> bargaining zone occurs when the buyer's resistance point is above that of the seller.  Answer: • True False
7) Alternatives are important because they give the negotiator the power to walk away from any negotiation when the emerging deal is not very good.  Answer: • True False
8) The objective of both parties in negotiation is to obtain as little of the bargaining zone as possible for themselves.
Answer: True • False
9) Distributive bargaining strategies are the only strategies that are effective in interdependent situations.
Answer: True • False
10) The resistance point is the point at which a negotiator would like to conclude negotiations.  Answer: True False
Allswei. True Praise
11) Each party's resistance point is openly stated at the conclusion of negotiations.  Answer: True False
12) Anything outside the bargaining zone will be summarily rejected by one of the negotiators.  Answer: • True False
13) A negative bargaining range occurs when the buyer's resistance point is above the seller's.
Answer: True • False

14) Negotiations that begin with a negative bargaining rar	nge are likely to stalemate.
Answer: • True False	
MULTIPLE CHOICE. Choose the one alternative that best complete	s the statement or answers the question.
15) Distributive bargaining strategies:	
A) are the most efficient negotiating strategies to use	e.
B) can cause negotiators to ignore what the parties h	nave in common.
C) are used in all interdependent relationships.	
D) are useful in maintaining long term relationships	
Answer: B	
16) The target point is the	
A) point at which a negotiator would like to conclude	le negotiations.
B) initial price set by the seller.	
C) first offer a negotiator quotes to his opponent.	
D) negotiator's bottom line.	
Answer: A	
17) Starting points (or initial offers)	
A) are not known to the other party.	
B) are usually contained in the opening statements e	each negotiator makes.
C) are usually learned or inferred as negotiations get	t under way.
D) are given up as concessions are made.	
Answer: B	
18) The objective of both parties in distributive bargaining	g is to obtain as much of what as possible?
A) Target point	B) Bargaining mix
C) Bargaining range	D) Resistance point
Answer: C	
TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement	nt is false.
19) Central to planning the strategy and tactics for distribu	utive bargaining is effectively locating the
other party's resistance point.	
Answer: • True False	
20) The more attractive the other party's alternatives, the r	more likely he or she will be to maintain a low
resistance point.	
Answer: True • False	
21) A resistance point will also be influenced by the cost a	an individual attaches to delay or difficulty in
negotiation or in having the negotiations aborted.	
Answer: 🖸 True 💮 False	

	The lower resistance			stimate of your c	cost of de	lay or impasso	e, the stronge	er the other party's

bargaining are reached when the deadline is:  A) flexible.  B) past.  C) near.  D) undefined.  Answer: C	MULTII	PLE CHOICE. Choose t	he one alternative that best	completes the statement or a	nswers the question.	
Answer: C	41	•			ements in distributive	
42) Disruptive action tactics can cause all of the following, <i>except</i> :			B) past.	C) near.	D) undefined.	
A) anger B) embarrassment C) mutual satisfaction D) increased costs Answer: C	42	A) anger C) mutual satisfac		B) embarrassmer		

43) The opening stance is:
A) the first price that a buyer quotes to a seller.
B) the attitude to adopt during the negotiation.
C) another name for the first round of concessions.
D) a package of concessions.
Answer: B
44) The bargaining range is defined by:
A) the bargaining mix and the opening stance.
B) the opening offer and the counteroffer.
C) the initial round of concessions.
D) the opening stance and the initial concession.
Answer: B
TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.
45) To communicate the most effective message, a negotiator should try to send a consistent message through both the opening offer and stance.
Answer: True False
46) An offer that may have been rejected had it emerged as a result of concession making may be accepted when it is presented as a <i>fait accompli</i> .  Answer: True • False
<ul><li>47) When acting as if the decision to close the deal has already been made, the negotiator is using the "assume-the-close" tactic of closing the agreement.</li><li>Answer: ○ True False</li></ul>
48) Splitting the difference is perhaps the least popular closing tactic.  Answer: True False
49) To encourage further concessions from the other side, negotiators sometimes link their concessions

to a prior concession made by the other.

Answer: True False

50) Studies indicate that negotiators who make low or modest opening offers get higher settlements than do those who make extreme opening offers.

Answer: True Selse

51) Parties feel better about a settlement when negotiations involve a progression of concessions.

Answer: True False

52) If a major concession has been made on a significant point, it is expected that the return offer will be on the same item or one of similar weight and comparable magnitude.

Answer: True False

	53) A small concession Answer: • True	on late in negotiations ma False	y indicate that there is little room left to move.
	54) It is important to s almost over.	signal to the other party w	vith either behaviour or words that the concessions are

80) Negotiators using tactic ask fe	or a proportionally small concession on an item that hasn't
been discussed previously to close the d	eal.
A) Good Cop/Bad Cop	B) Lowball/Highball
C) The Nibble	D) Bogey
Answer: C	

#### ESSAY. Write your answer in the space provided or on a separate sheet of paper.

81) Define distributive bargaining.

Answer: A competition over who is going to get the most of a limited resource (can be money, time, people, etc.)

82) List two situations when distributive bargaining strategies are useful.

Answer: When a negotiator wants to maximize the value obtained in a single deal and when the relationship with the other party is not important.

83) A negative bargaining range occurs when:

Answer: The seller's resistance point is above the buyer's.

84) How can a negotiation that begins with a negative bargaining range be resolved?

Answer: If one or both parties are persuaded to change their resistance points, or if someone else forces a solution upon them that one or both parties dislike.

85) Define BATNA.

Answer: Best Alternative To a Negotiated Agreement.

- 86) What can happen when one or both parties do not think they got the best agreement possible?

  Answer: One party or the other may try to get out of the agreement later or try to recoup losses or get even.
- 87) "The higher the other party's estimate of your cost of delay or impasse, the stronger the other party's resistance point will be." Explain.
  - Answer: If the other party sees that you need a settlement quickly and cannot defer it, he or she can seize this advantage and press for a better outcome. Expectations will rise and the other party will set a more demanding resistance point. The more you can convince the other that your costs of delay or aborting negotiations are low (that you are in no hurry and can wait forever), the more modest the other's resistance point will be.
- 88) In a short essay, defend or refute the following statement: "The less the other party values an issue, the higher his or her resistance point will be."
  - Answer: The less the other party values an issue, the *lower* his or her resistance point will be. The resistance point may soften as the person reduces how valuable he or she considers that issue. If you can convince the other party that a current negotiating position will not have the desired outcome or that the present position is not as attractive as the other believes, then he or she will adjust the resistance point.

89) What are the four important tactical tasks for a negotiator in a distributive bargaining situation?

Answer: (1) Assess the other party's outcome values and the costs of terminating negotiations; (2) manage the other party's impression of one's own outcome values; (3) modify the other party's perception of his or her own outcome values; (4) manipulate the actual costs of delaying or aborting negotiations.

90) What is the simplest way to screen a position?

Answer: Say and do as little as possible.

91) Define calculated incompetence.

Answer: The negotiating agent is not given all of the necessary information, making it impossible for information to be leaked.

92) Define selective presentation.

Answer: Negotiators reveal only the facts necessary to support their case.

93) Describe the use of emotional reaction.

Answer: Another form of direct action negotiators can take to provide information about what is important to them. Powerful displays allow negotiators to claim more value.

94) What are the three ways to manipulate the costs of delay in negotiation?

Answer: (1) Plan disruptive action; (2) ally with outsiders; (3) manipulate the scheduling of negotiations.

95) Why is it advantageous to make an extreme opening offer?

Answer: Gives more room for movement in negotiation and therefore more time to learn the other party's priorities. May create the impression that there is a long way to go before a reasonable settlement will be achieved and more concessions than originally intended may have to be made to bridge the difference between the two opening positions.

96) What are the disadvantages of making a more extreme opening offer?

Answer: It may be summarily rejected by the other party, and it communicates an attitude of toughness that may be harmful to long term relationships.

97) What characteristics of the original offer, opening stance and opening concession signal a position of firmness? Of flexibility?

Answer: Firmness: an extreme original offer, a determined opening stance, and a very small opening concession. Flexibility: a more moderate opening offer, a reasonable co-operative opening stance, and a more generous initial concession.

98) What are the advantages of adopting a flexible position?

Answer: Can learn about the other party's outcome values and perceived possibilities. Establishes a co-operative rather than combative relationship, hoping to get a better agreement. Keep negotiations going.

99) Discuss the importance of reciprocating (or not reciprocating) concessions.

Answer: Concession making indicates an acknowledgment of the other party and a movement toward the other's position. It implies recognition of that position and its legitimacy. If the other party does not reciprocate, the concession maker may appear to be weaker by having given up something and received nothing in return. If the giver has made a major concession on a significant point, it is expected that the return offer will be on the same item or one of similar weight and somewhat comparable magnitude. To make an additional concession when none has been received (or when what was given was inadequate) can imply weakness and can squander valuable maneuvering room.

100) What is the disadvantage of letting the absence of further concessions convey the message of the final offer?

Answer: The other party may not recognize at first that the last offer was the final one and might volunteer a further concession to get the other to respond. Finding that no further concession results, the other party may feel betrayed and perceive that the pattern of concession-counter concession was violated.

101) What are the risks involved when using hardball tactics?

Answer: Harm to reputation, losing the deal, negative publicity, and dealing with the other party's revenge.

102) What are the strategies for responding to hardball tactics?

Answer: Ignore them, discuss them, respond in kind, and co-opt the other party. Also discussed in the text but not listed specifically: preparation, familiarity with hardball tactics, identification and discussing the tactics, halting the negotiation process, team negotiations.

- 82) When a negotiator wants to maximize the value obtained in a single deal and when the relationship with the other party is not important.
- 83) The seller's resistance point is above the buyer's.
- 84) If one or both parties are persuaded to change their resistance points, or if someone else forces a solution upon them that one or both parties dislike.
- 85) Best Alternative To a Negotiated Agreement.
- 86) One party or the other may try to get out of the agreement later or try to recoup losses or get even.
- 87) If the other party sees that you need a settlement quickly and cannot defer it, he or she can seize this advantage and press for a better outcome. Expectations will rise and the other party will set a more demanding resistance point. The more you can convince the other that your costs of delay or aborting negotiations are low (that you are in no hurry and can wait forever), the more modest the other's resistance point will be.
- 88) The less the other party values an issue, the *lower* his or her resistance point will be. The resistance point may soften as the person reduces how valuable he or she considers that issue. If you can convince the other party that a current negotiating position will not have the desired outcome or that the present position is not as attractive as the other believes, then he or she will adjust the resistance point.

### Essentials of Negotiation Canadian 3rd Edition Lewicki Test Bank

Answer Key

Testname: UNTITLED2

- 89) (1) Assess the other party's outcome values and the costs of terminating negotiations; (2) manage the other party's impression of one's own outcome values; (3) modify the other party's perception of his or her own outcome values; (4) manipulate the actual costs of delaying or aborting negotiations.
- 90) Say and do as little as possible.
- 91) The negotiating agent is not given all of the necessary information, making it impossible for information to be leaked.
- 92) Negotiators reveal only the facts necessary to support their case.
- 93) Another form of direct action negotiators can take to provide information about what is important to them. Powerful displays allow negotiators to claim more value.
- 94) (1) Plan disruptive action; (2) ally with outsiders; (3) manipulate the scheduling of negotiations.
- 95) Gives more room for movement in negotiation and therefore more time to learn the other party's priorities. May create the impression that there is a long way to go before a reasonable settlement will be achieved and more concessions than originally intended may have to be made to bridge the difference between the two opening positions.
- 96) It may be summarily rejected by the other party, and it communicates an attitude of toughness that may be harmful to long term relationships.
- 97) Firmness: an extreme original offer, a determined opening stance, and a very small opening concession. Flexibility: a more moderate opening offer, a reasonable co-operative opening stance, and a more generous initial concession.
- 98) Can learn about the other party's outcome values and perceived possibilities. Establishes a co-operative rather than combative relationship, hoping to get a better agreement. Keep negotiations going.
- 99) Concession making indicates an acknowledgment of the other party and a movement toward the other's position. It implies recognition of that position and its legitimacy. If the other party does not reciprocate, the concession maker may appear to be weaker by having given up something and received nothing in return. If the giver has made a major concession on a significant point, it is expected that the return offer will be on the same item or one of similar weight and somewhat comparable magnitude. To make an additional concession when none has been received (or when what was given was inadequate) can imply weakness and can squander valuable maneuvering room.
- 100) The other party may not recognize at first that the last offer was the final one and might volunteer a further concession to get the other to respond. Finding that no further concession results, the other party may feel betrayed and perceive that the pattern of concession-counter concession was violated.
- 101) Harm to reputation, losing the deal, negative publicity, and dealing with the other party's revenge.
- 102) Ignore them, discuss them, respond in kind, and co-opt the other party. Also discussed in the text but not listed specifically: preparation, familiarity with hardball tactics, identification and discussing the tactics, halting the negotiation process, team negotiations.
