

Chapter 02

Decisions + Processes: Value Driven Business

True / False Questions

1. Analytics is the science of fact-based decision making.
True False
2. At the operational level employees are continuously evaluating company operations to hone the firm's abilities to identify, adapt to, and leverage change.
True False
3. At the operational level employees are develop, control, and maintain core business activities required to run the day-to-day operations.
True False
4. Operational decisions are considered structured decisions.
True False
5. Asking how many employees are out sick is a type of operational question.
True False
6. Strategic decisions are highly structured decisions.
True False
7. One of the most important and challenging questions confronting managers today is how to lay the foundation for tomorrow's success while competing to win in today's business environment.
True False
8. The structure of a typical organization is similar to a pyramid, with different levels that require one consistent type of information to assist with all managerial decision making.
True False
9. Operational decisions or semistructured decisions arise in situations where established processes offer potential solutions.
True False

10. Unstructured decisions occur in situations in which no procedures or rules exist to guide decision makers towards the correct choice.
- True False
11. At the strategic decision-making level employees develop, control, and maintain core business activities.
- True False
12. The construction of a new city subway station and the processing of monthly payroll are both considered types of projects as defined in your text.
- True False
13. Key performance indicators can focus on external and internal measurements.
- True False
14. The proportion of the market that a firm captures is called market share.
- True False
15. Benchmarks are baseline values the system seeks to attain.
- True False
16. Effectiveness MIS metrics include throughput, transaction speed, and system availability.
- True False
17. Measuring the amount of website traffic is the best way to determine an organization's success.
- True False
18. A project is a temporary activity a company undertakes to create a unique product, service, or result.
- True False
19. Metrics are temporary activities a company undertakes to create a unique product, service, or result.
- True False
20. Metrics are measurements that evaluate results to determine whether a project is meeting its goals.
- True False
21. Efficiency MIS metrics include throughput, speed, and availability.
- True False

22. Effectiveness MIS metrics measure the impact MIS has on business processes and activities, including customer satisfaction and customer conversion rates.

True False

23. Efficiency MIS metrics measure the impact MIS has on business processes and activities, including customer satisfaction and customer conversion rates.

True False

24. Best practices are the most successful solutions or problem-solving methods that have been developed by a specific organization or industry.

True False

25. Return on investment indicates the earning power of a project.

True False

26. MIS support systems rely on models for computational and analytical routines that mathematically express relationships among variables.

True False

27. Streamlining information encompasses all of the information contained within a single business process or unit of work, and its primary purpose is to support the performing of daily operational or structured decisions.

True False

28. Sensitivity analysis, what-if analysis, optimization analysis, and market basket analysis are the common DSS analysis techniques.

True False

29. Digital dashboards offer consolidation, drill-down, and slice-and-dice capabilities.

True False

30. Managers use transactional information when making structured decisions at the operational level.

True False

31. The manipulation of information to create business intelligence in support of strategic decision making is referred to as OLTP or online transaction processing.

True False

32. A model is a simplified representation or abstraction of reality.

True False

33. Source documents are simplified representation or abstraction of reality.

True False

34. Source documents are the original transaction records.
- True False
35. Granularity refers to the level of detail in the model or the decision-making process.
- True False
36. Visualization produces graphical displays of patterns and complex relationships in large amounts of data.
- True False
37. A digital dashboard produces graphical displays of patterns and complex relationships in large amounts of data.
- True False
38. Intelligent systems are various commercial applications of artificial intelligence.
- True False
39. A neural network is a category of efficiency metrics where it attempts to measure the way the human brain works.
- True False
40. Investment companies use genetic effectiveness metrics to help in trading decisions.
- True False
41. A shopping bot is one of the simplest examples of an intelligent agent.
- True False
42. At Microsoft's headquarters, to eliminate congestion and save on other business expenses the company offered employees the option to work virtually from home.
- True False
43. Fuzzy logic is a mathematical method of handling imprecise or subjective information.
- True False
44. Fuzzy logic is the process within a genetic algorithm of randomly trying combinations and evaluating the success (or failure) of the outcome.
- True False
45. Mutation is the process within a genetic algorithm of randomly trying combinations and evaluating the success (or failure) of the outcome.
- True False

46. Mutation is a mathematical method of handling imprecise or subjective information.
- True False
47. Virtual reality is a computer-simulated environment that can be a simulation of the real world or an imaginary world.
- True False
48. Augmented reality is the viewing of the physical world with computer-generated layers of information added to it.
- True False
49. Augmented reality is a computer-simulated environment that can be a simulation of the real world or an imaginary world.
- True False
50. Virtual reality is the viewing of the physical world with computer-generated layers of information added to it.
- True False
51. Business-facing processes or back-office processes are invisible to the external customer but essential to the effective management and operation of the business.
- True False
52. When evaluating the 5-steps in the order-to-delivery business process, step one includes creating a campaign and checking inventory, which are both part of the sales function.
- True False
53. Strategic planning is a customer-facing business process.
- True False
54. Product delivery is a customer-facing business process.
- True False
55. Improving the efficiency and effectiveness of its business processes will improve a firm's value chain.
- True False
56. Core processes are business processes, such as manufacturing goods, selling products, and providing services that make up the primary activities in a value chain.
- True False
57. Core processes are patents that protect a specific set of procedures for conducting a particular business activity.
- True False

58. A business process patent is a patent that protects a specific set of procedures for conducting a particular business activity.
- True False
59. A business management system is a graphic description of a process, showing the sequence of process tasks, which is developed for a specific purpose and from a selected viewpoint.
- True False
60. To-Be process models show the results of applying change improvement opportunities to the current (As-Is) process model.
- True False
61. The primary goal of an As-Is process model is to simplify, eliminate, and improve the To-Be processes.
- True False
62. Business processes should never drive MIS choices and should be based on business strategies and goals.
- True False
63. A swim lane layout arranges the steps of a business process into a set of rows depicting the various elements.
- True False
64. A swim lane layout arranges the steps of a business process into a circle with pictures showing the process flows.
- True False
65. Redundancy occurs when a task or activity is never repeated.
- True False
66. Business process reengineering is the analysis and redesign of workflow within and between enterprises.
- True False
67. Business process management systems evaluate and improve processes that include both person-to-person workflow and system-to-system communications.
- True False
68. BPM systems include advanced features such as enhanced process modeling, simulation, execution, and monitoring, providing a high level of flexibility while reducing costs.
- True False

Multiple Choice Questions

69. Which of the following is not a type of organizational information system?

- A. Executive information system
- B. Decisions support system
- C. Analysis processing system
- D. Transactional processing system

70. Which of the below is an important challenge facing managers today?

- A. Making business decision
- B. Solving business problems
- C. Competing to win in today's market
- D. All of the above

71. What must managers be able to do to compete in today's global marketplace?

- A. Make decisions to gain competitive advantages
- B. Make decision that can help forecast future business needs
- C. Make decision that can help forecast future business requirements
- D. All of the above

72. Which of the below is not considered a challenge facing most managers today?

- A. Managerial decisions must be made quickly
- B. Strategic decisions need to be made by applying analysis techniques
- C. Artificial intelligence is required by all managers to be successful
- D. Managerial decisions require large amounts of information to analyze

73. Which of the following is not included in the decision-making process?

- A. Data Collection
- B. Solution Benchmarking
- C. Solution Generation
- D. Solution Test

74. When evaluating the six-step decision making process, what occurs during the solution implementation step?

- A. The process will begin again if the decisions made were incorrect
- B. Definition of the problem as clearly and precisely as possible
- C. Details of every solution possible including ideas that seem far fetched
- D. The solution that best solves the problem is selected

75. When evaluating the six-step decision making process, what occurs during the problem identification step?
- A. The process will begin again if the decisions made were incorrect
 - B. Definition of the problem as clearly and precisely as possible
 - C. Details of every solution possible including ideas that seem far fetched
 - D. The solution that best solves the problem is selected
76. When evaluating the six-step decision making process, what occurs during the solution selection step?
- A. The process will begin again if the decisions made were incorrect
 - B. Definition of the problem as clearly and precisely as possible
 - C. Details of every solution possible including ideas that seem far fetched
 - D. The solution that best solves the problem is selected
77. When evaluating the six-step decision making process, what occurs during the solution test step?
- A. The process will begin again if the decisions made were incorrect
 - B. Definition of the problem as clearly and precisely as possible
 - C. Details of every solution possible including ideas that seem far fetched
 - D. None of the above
78. Which of the below represents the structure of a typical organization?
- A. Flat line
 - B. Pyramid
 - C. Circle
 - D. Cube
79. Which of the below represents the three different levels of a company pyramid from the top to the bottom?
- A. Managerial - Strategic - Operational
 - B. Strategic - Managerial - Operational
 - C. Operational - Managerial - Strategic
 - D. Strategic - Operational - Managerial
80. Which of the below would you include as decisions and responsibilities typically found at the managerial level of a company?
- A. Monthly Plans
 - B. Monthly Budgets
 - C. Weekly Schedule
 - D. All of the above

81. Which of the below would you include as decisions and responsibilities typically found at the operational level of a company?
- A. Develop core business activities required to run the day-to-day operations
 - B. Control core business activities required to run the day-to-day operations
 - C. Maintain core business activities required to run the day-to-day operations
 - D. All of the above
82. Data collection, solution generation, and solution implementation are all concepts associated which of the following processes?
- A. The six-step problem solving process
 - B. The six-step decision making process
 - C. The four-step problem solving process
 - D. The four-step decision making process
83. Review the below key terms. Which one defines an operational decision that involves situations where established processes offer potential solutions?
- A. Optimization analysis decision
 - B. Artificial intelligence decision
 - C. Structured decision
 - D. Unstructured decision
84. Review the below statements. Which one does not represent an example of a structured decision?
- A. Reordering inventory
 - B. Deciding to enter a new market
 - C. Creating the employee weekly staffing schedule
 - D. Creating the employee weekly production schedule
85. Which of the below is not considered a part of decision making at the managerial level?
- A. Developing overall business goals and objectives
 - B. Creating a short-term budget
 - C. Allocating resources to a department
 - D. Monitoring performance of a project team
86. Which of the below key terms represents the types of decisions made at the operational, managerial, and strategic levels of a company?
- A. Structured decisions
 - B. Unstructured decisions
 - C. Semistructured decisions
 - D. All of the above

87. At which level do managers develop the overall business strategies and monitor the performance of the organization and the competitive business environment?
- A. Operational
 - B. Strategic
 - C. Managerial
 - D. Communications
88. Jenny Welch works at a retail store selling sports equipment. Her daily tasks include opening the store, creating the work schedules, processing payroll, overseeing sales and inventory, and training employees. At what level of the organizational pyramid would you categorize Jenny?
- A. Managerial
 - B. Operational
 - C. Strategic
 - D. Owner
89. Andy Benton works at the local Starbucks coffee shop and his responsibilities include taking orders, fulfilling orders, and ringing in sales. At what level of the organizational pyramid would you categorize Andy?
- A. Strategic
 - B. Owner
 - C. Operational
 - D. Managerial
90. Bill Schultz works at a high power investment firm in Los Angeles. Bill is responsible for promoting the firm's vision and creating the company-wide goals and strategies. He also monitors the overall strategic performance of the company and its direction for future business strategies. At what level of the organizational pyramid would you categorize Bill?
- A. Strategic
 - B. Owner
 - C. Operational
 - D. Managerial
91. Chuck Biggs has been hired to oversee all of the plans that the city of Denver has created to expand its train transportation system by adding six more lines to the metro area. Chuck will be responsible for planning the project, managing the processes, and finalizing each new line as it is completed. How would you categorize the majority of the decisions Chuck will have to make to complete his job?
- A. Unstructured decisions
 - B. Semistructured decisions
 - C. Structured decisions
 - D. Strategic decisions

92. What is the science of fact-based decision making?

- A. Analytics
- B. Structured decisions
- C. Unstructured decisions
- D. Semistructured decisions

93. What occurs in situations in which a few established processes help to evaluate potential solutions, but not enough to lead to a definite recommended decision.

- A. Analytics
- B. Structured decisions
- C. Unstructured decisions
- D. Semistructured decisions

94. What occurs in situations in which no procedures or rules exist to guide decision makers toward the correct choice?

- A. Analytics
- B. Structured decisions
- C. Unstructured decisions
- D. Semistructured decisions

95. What arises in situations where established processes offer potential solutions?

- A. Analytics
- B. Structured decisions
- C. Unstructured decisions
- D. Semistructured decisions

96. The structure of an organization is similar to a pyramid. The different levels require different types of information to assist with which of the following?

- A. Decision making
- B. Problem solving
- C. Opportunity capturing
- D. All of the above

97. At which level will a manager use analytics to make decisions?

- A. Operational level
- B. Managerial level
- C. Strategic level
- D. All of the above

98. At which level of an organization do employees develop, control, and maintain core business activities required to run the day-to-day operations?
- A. Operational level
 - B. Managerial level
 - C. Strategic level
 - D. All of the above
99. At which level of an organization are employees continuously evaluating company operations to hone the firm's abilities to identify, adapt to, and leverage change.
- A. Operational level
 - B. Managerial level
 - C. Strategic level
 - D. All of the above
100. At which level of an organization do managers develop overall business strategies, goals, and objectives as part of the company's strategic plan?
- A. Operational level
 - B. Managerial level
 - C. Strategic level
 - D. All of the above
101. CSF's and KPI's are two core metrics used to evaluate results and measure the progress of a project for a business. Which of the below represents the acronyms for CSF and KPI?
- A. Continual success factors and key performance indicators
 - B. Critical success factors and key project ideas
 - C. Customer success findings and key project ideas
 - D. Critical success factors and key performance indicators
102. What are measurements that evaluate results to determine whether a project is meeting its goals?
- A. Models
 - B. Metrics
 - C. Benchmarks
 - D. Genetic algorithms
103. What are the crucial steps companies perform to achieve their goals and objectives and implement their strategies?
- A. Critical success factors
 - B. Crucial success factors
 - C. Key performance indicators
 - D. Key performance factors

104. Which of the below is an example of a critical success factor?

- A. Increase customer satisfaction
- B. Number of new customers
- C. Number of new products
- D. Percentage of employee turnover

105. Which of the below statements is accurate?

- A. Key performance indicators can have no more than four critical success factors
- B. Critical success factors can have no more than four key performance indicators
- C. Key performance indicators can have several critical success factors
- D. Critical success factors can have several key performance indicators

106. Key performance indicators are the metrics a company uses to evaluate progress toward critical success factors. Which of the below represents a key performance indicator?

- A. Create high-quality products
- B. Reduce product costs
- C. Percentage of help desk calls answered in the first minute
- D. Hire the best business professionals

107. CSF's and KPI's are the two core metrics used within a business to track progress or success. What is the relationship between CSFs and KPIs?

- A. CSF's are business strategy elements where KPI's measure the progress of the CSF's
- B. CSF's build the business environment where KPI's explain how to build the CSF's
- C. KPI's are used first where CSF's are applied after
- D. KPI's promote employees on their performance where CSF's demote employees based on their performance level

108. Market share measures a firm's external performance relative to that of its competitors. Which of the following represents how a firm measures market share?

- A. Multiplying the firm's sales by the industries total sales
- B. Dividing the firm's sales by the total market sales for the entire industry
- C. Subtracting your competitors sales from your total sales
- D. Subtracting the industries total sales from the firm's total sales

109. Anne-Marie Cole runs the sales division for a local auto insurance firm. One of her key duties is to calculate her company's market share. When evaluating the prior year numbers, she found that her firm achieved total sales of \$3 million and the entire industry had \$30 million in sales. What is Anne-Marie's current market share?
- A. 1%
 - B. 10%
 - C. 18%
 - D. 20%
110. Anne-Marie Cole runs the sales division for a local auto insurance firm. One of her key duties is to ensure the company has 10 percent market share by the end of the year. When evaluating the current sales numbers she determines that her sales division has total sales of \$3 million and the entire industry has total sales of \$50 million. What additional sales must Anne-Marie's division meet to ensure they have 10 percent of the market by the end of the year?
- A. \$1 million
 - B. \$2 million
 - C. \$5 million
 - D. \$10 million
111. What type of measurement is using market share as a KPI?
- A. Fuzzy logic measurement
 - B. External measurement
 - C. Neural network measurement
 - D. Internal measurement
112. Which of the below represents an internal KPI that indicates the earning power of a project?
- A. Market share
 - B. Return on intelligent
 - C. Sensitivity analysis
 - D. Return on investment
113. Todd Haitz is the marketing manager for the National Basketball Association. Todd analyzes and tracks his marketing campaigns to determine the best success rate per project for increasing ticket sales. Todd uses an internal KPI to track his marketing campaign success. Which of the below would be an internal KPI Todd would use to track his marketing campaigns?
- A. Marketing campaign ROI
 - B. Marketing campaign percentage of fans purchasing Sports Illustrated magazine
 - C. Marketing campaign advertiser revenue sales
 - D. Marketing campaign market share

114. What could a manager use to measure the success of an MIS project?

- A. Effectiveness MIS metrics, efficiency MIS metrics
- B. Effectiveness MIS metrics, expert MIS metrics
- C. Expert MIS metrics, executive MIS metrics
- D. All of the above

115. What type of metrics measure throughput, transaction speed, and system availability?

- A. Efficiency MIS metrics
- B. Effectiveness MIS metrics
- C. ROI
- D. Benchmarks

116. What types of metrics measure customer satisfaction?

- A. Efficiency MIS metrics
- B. Effectiveness MIS metrics
- C. Both efficiency and effectiveness MIS metrics
- D. Both ROI and market share

117. According to Peter Drucker, what are managers who do things right addressing?

- A. Efficiency
- B. Effectiveness
- C. Both efficiency and effectiveness
- D. Customer satisfaction only

118. According to Peter Drucker, what are managers who do the right things addressing?

- A. Efficiency
- B. Effectiveness
- C. Both efficiency and effectiveness
- D. Customer satisfaction only

119. Which of the following is a type of effectiveness MIS metric?

- A. Transaction speed
- B. System availability
- C. Usability
- D. Throughput

120. Which of the following is a type of efficiency MIS metric?

- A. Customer satisfaction
- B. Conversion rates
- C. Financial transactions
- D. Web traffic

121. Which term is used to describe the ease with which people perform transactions and/or find information?

- A. Usability
- B. Customer satisfaction
- C. Financial
- D. Conversion rates

122. What is measured by such benchmarks as satisfaction surveys, percentage of existing customers retained, and increases in revenue dollars per customer?

- A. Usability
- B. Customer satisfaction
- C. Financial
- D. Conversion rates

123. What would a company like eBay or Amazon be constantly benchmarking?

- A. MIS efficiency
- B. MIS effectiveness
- C. MIS efficiency and MIS effectiveness
- D. Usability metrics only

124. When considering the graph depicting the interrelationships between efficiency and effectiveness, where does an organization ideally want to operate?

- A. Upper right-hand corner
- B. Lower right-hand corner
- C. Upper left-hand corner
- D. Lower left-hand corner

125. Which of the following would efficiency MIS metrics measure?

- A. Response time
- B. System availability
- C. Transaction speed
- D. All of the above

126. Which of the following are the four common types of effectiveness MIS metrics?

- A. Unstructured decisions, customer satisfaction, conversion rates, financial
- B. Usability, customer service, conversion rates, fiscal year revenue
- C. Usability, customer satisfaction, conversion rates, financial
- D. Usability, customer satisfaction, conversion rates, affordability

127. Drew Savage is an MIS manager for an international consulting firm. Drew travels to different European countries where he implements news response tracking systems. Some of the metrics he uses to track the performance of his system include tracking the response time it takes to respond to Twitter posts mentioning the news station, as well as the speed and accuracy of content posted on numerous websites and social media sites. What type of metrics is Drew using to measure his system?

- A. Customer satisfaction metrics
- B. Efficiency metrics
- C. Effectiveness metrics
- D. Benchmarking metrics

128. Efficiency MIS metrics focus on the extent to which a firm is using its resources in an optimal way, while effectiveness MIS metrics focus on _____.

- A. Understanding how successful a firm is at achieving its goals and objectives
- B. Analyzing if a firm is doing the right things
- C. Setting the right goals and ensuring they are accomplished
- D. All of the above

129. Which of the below describes the efficiency MIS metric of throughput?

- A. The number of hours a system is available for users
- B. The time it takes to respond to user interactions such as a mouse click
- C. The amount of information that can travel through a system at any point in time
- D. The ease with which people perform transactions and/or find information

130. Which of the following tracks the number of customers an organization touches for the first time and persuades to purchase its products or services?

- A. Customer satisfaction
- B. Usability
- C. Conversion rates
- D. Financial

131. What does usability effectiveness MIS metrics measure?

- A. The ease with which people perform transactions and find information
- B. The number of customers an organization "touches" for the first time and persuades to purchase its products or services
- C. The amount of time a system takes to perform a transaction
- D. The number of hours a system is available for users

132. A common mistake that many managers tend to make is focusing on only one type of metrics because they are easier to measure. Which type of metrics do they focus on?

- A. Effectiveness MIS metrics
- B. Efficiency MIS metrics
- C. Endurance MIS metrics
- D. Product sales metrics

133. When analyzing the interrelationships between efficiency and effectiveness, where would a company ideally want to operate?

- A. With high efficiency
- B. The upper right-hand corner of the interrelationship graph
- C. With high effectiveness
- D. All of the above

134. What is the process of continuously measuring system results, comparing those results to optimal system performance, and identifying steps and procedures to improve system performance?

- A. Benchmarking
- B. Bottlenecking
- C. Consolidation
- D. Cycle time

135. Which of the below is not included as part of a benchmark?

- A. Benchmarks help assess how an MIS project performs over time
- B. When measured against MIS projects, benchmarks can provide feedback so managers can control the system
- C. Benchmarks help to establish baseline values the system seeks to attain
- D. Benchmarks perform all of the above

136. As a manager for your company some of your responsibilities include measuring metrics and overseeing company strategies. You observe some critical success factors and see large increases in productivity. What would you suspect would be the primary reason for the large increases in productivity?

- A. Decreases in effectiveness
- B. Increases in effectiveness
- C. Increases in executive roles
- D. Decreases in efficiency

137. What are the most successful solutions or problem-solving methods that have been developed by a specific organization or industry?

- A. ROI
- B. Metrics
- C. Best practices
- D. KPI

138. What indicates the earning power of a project?

- A. ROI
- B. Metrics
- C. Best practices
- D. KPI

139. What are measurements that evaluate results to determine whether a project is meeting its goals?

- A. ROI
- B. Metrics
- C. Best practices
- D. KPI

140. What are the crucial steps companies perform to achieve their goals and objectives and implement their strategies?

- A. ROI
- B. CSF
- C. KPI
- D. None of the above

141. What are the quantifiable metrics a company uses to evaluate progress toward critical success factors?

- A. ROI
- B. CSF
- C. KPI
- D. None of the above

142. Which of the following represents the top-down (executives to analysts) organizational levels of information technology systems?

- A. TPS, DSS, EIS
- B. DSS, TPS, EIS
- C. EIS, DSS, TPS
- D. None of the above, it varies from organization to organization

143. Which of the following is an incorrect enterprise view of information technology?

- A. Processes are analytical for executives and transactional for analysts
- B. Granularity is coarse for executives and fine for analysts
- C. Processing is OLTP for executives and OLAP for analysts
- D. None of the above

144. What can a model accomplish?

- A. Calculate risks
- B. Understand uncertainty
- C. Manipulate time
- D. All of the above

145. What is consolidation?

- A. Involves the aggregation of information and features simple roll-ups to complex groupings of interrelated information
- B. The ability to look at information from different perspectives
- C. Enables users to get details, and details of details, of information
- D. Finds the inputs necessary to achieve a goal such as a desired level of output

146. What is drill-down capability?

- A. Involves the aggregation of information and features simple roll-ups to complex groupings of interrelated information
- B. The ability to look at information from different perspectives
- C. Enables users to get details, and details of details, of information
- D. Finds the inputs necessary to achieve a goal such as a desired level of output

147.What is slice-and-dice capability?

- A. Involves the aggregation of information and features simple roll-ups to complex groupings of interrelated information
- B. The ability to look at information from different perspectives
- C. Enables users to get details, and details of details, of information
- D. Finds the inputs necessary to achieve a goal such as a desired level of output

148.What compiles information from multiple sources and tailors it to meet user needs?

- A. Drill-down
- B. Sensitivity analysis
- C. What-if analysis
- D. Digital dashboard

149.What captures transaction and event information using technology to (1) process the information according to defined business rules, (2) store the information, and (3) update existing information to reflect the new information?

- A. OLTP
- B. OLAP
- C. TPS
- D. DSS

150.What is the basic business system that serves the operational level and assists in making structured decisions?

- A. OLTP
- B. OLAP
- C. TPS
- D. DSS

151.What encompasses all organizational information and its primary purpose is to support the performance of managerial analysis or semistructured decisions.

- A. OLTP
- B. OLAP
- C. Analytical information
- D. Transactional information

152. What encompasses all the information contained within a single business process or unit of work and its primary purpose is to support the performance of daily operational or structured decisions.

- A. OLTP
- B. OLAP
- C. Analytical information
- D. Transactional information

153. What is the manipulation of information to create business intelligence in support of strategic decision making?

- A. OLTP
- B. OLAP
- C. TPS
- D. DSS

154. What models information and provides assistance in evaluating and choosing among different courses of action?

- A. OLTP
- B. OLAP
- C. TPS
- D. DSS

155. What refers to the level of detail in the model or the decision-making process?

- A. Granularity
- B. Visualization
- C. Digital Dashboard
- D. All of the above

156. What produces graphical displays of patterns and complex relationships in large amounts of data?

- A. Granularity
- B. Visualization
- C. Digital Dashboard
- D. All of the above

157. What tracks KPIs and CSFs by compiling information from multiple sources and tailoring it to meet user needs?

- A. Granularity
- B. Visualization
- C. Digital Dashboard
- D. All of the above

158. Which of the below is considered an input in the systems thinking example of a TPS?

- A. CRUD
- B. Calculate
- C. Report
- D. Source Document

159. Which of the below is considered part of the process in the systems thinking example of a TPS?

- A. Source Document
- B. Calculate
- C. Report
- D. All of the above

160. Which of the below is considered the output in the systems thinking example of a TPS?

- A. CRUD
- B. Calculate
- C. Report
- D. Source Document

161. Which of the below is considered the input in the systems thinking example of a DSS?

- A. TPS
- B. What-If
- C. Optimization
- D. Forecasts

162. Which of the below is considered the process in the systems thinking example of a DSS?

- A. TPS
- B. Optimization
- C. Forecasts
- D. Simulation

163. Which of the below is considered the output in the systems thinking example of a DSS?

- A. TPS
- B. Optimization
- C. Goal Seeking
- D. Forecasts

164. Which of the below is correct in terms of granularity?

- A. Refers to the level of detail in the model
- B. The greater the granularity the deeper the level of detail of the data
- C. The greater the granularity the deeper the level of fineness of the data
- D. All of the above

165. Which of the following is a potential feature of a digital dashboard?

- A. A hot list of KPIs refreshed every 15 minutes
- B. A running line graph of planned versus actual production for the past 24 hours
- C. A graph of stock market prices
- D. All of the above

166. What is a simplified representation or abstraction of reality?

- A. Model
- B. Metric
- C. Redundancy
- D. Sensitivity Analysis

167. What can a manager use a model to do?

- A. Calculate risk
- B. Change variables
- C. Understand uncertainty
- D. All of the above

168. What would managers use to make structured decisions at the operational level?

- A. Transactional information
- B. Analytical information
- C. An EIS system
- D. Intelligent system

169. Which of the below would create transactional information?

- A. Projecting future sales growth
- B. Making an airline reservation
- C. A semistructured decision to hire more employees
- D. Generating payroll reports

170. What are the three primary types of management information systems available to support decision making across the company levels?

- A. Transaction Processing Systems, Decision Support Systems, Executive Information Systems
- B. Analytical Information, Decision Support Systems, Executive Information Systems
- C. Transaction Processing Systems, Drill-Down Systems, Expert Systems
- D. What-If Analysis, Sensitivity Analysis, Goal-Seeking Analysis

171. A transaction processing system (TPS) is the basic business system that assists operational level analysts when making structured decisions. Which of the below is not an example of a TPS?

- A. Target's internal company payroll system
- B. Comfort Dental patient diagnosis system
- C. First Bank's overall accounting system
- D. Stewart Sport's order entry system

172. What is the flow that a systems thinking approach using a TPS would follow?

- A. Streamlining (Input) - CRUD, Calculate (Process) - Reports (Output)
- B. Source Documents (Input) - Optimization Analysis (Process) - (Feedback) - (Output)
- C. Source Documents (Input) - CRUD, Calculate (Process) - Reports (Output) - (Feedback)
- D. Selling Documents (Input) - Cycle Time (Process) - Reports (Output) - (Feedback)

173. Online transaction processing (OLTP) is the capturing of transaction and event information using technology to _____.

- A. Update existing information to reflect the new information
- B. Store the information
- C. Process the information according to defined business rules
- D. All of the above

174. Which of the below does not represent an example of analytical information?

- A. Trends and product statistics
- B. Unstructured long-term decisions
- C. Five year sales report
- D. Future growth projections

175. Decision support systems or DSS's model information using OLAP, which provides assistance in evaluating and choosing among different courses of action. Which of the below does not represent an example of a DSS in business?

- A. An insurance company using a system to gauge risk of providing insurance to drivers who have imperfect driving records.
- B. A medical doctor may enter symptoms into a system to aid them in diagnosing and treating patients.
- C. A manufacturing digital dashboard showing visualizations of inventory and production.
- D. A dentist entering symptoms into a system to help diagnose and treat patients.

176. What is the MIS system that manipulates information to create business intelligence in support of strategic decision making?

- A. Online transaction processing (OLTP)
- B. Online analytical processing (OLAP)
- C. Digital dashboard
- D. Visualization

177. When viewing systems thinking, source documents are the original transaction records. What would the source documents for a medical doctor's payroll system include?

- A. Employee time sheets
- B. Employee benefit reports
- C. Employee wage rates
- D. All of the above

178. Which of the below represent the four main DSS analysis techniques outlined in the chapter?

- A. What-If Analysis, Sensitivity Analysis, Goal-Seeking Analysis, Optimization Analysis
- B. Workflow Analysis, Sensitivity Analysis, Growth Analysis, Organizational Analysis
- C. What-If Analysis, Structured Analysis, Goal-Seeking Analysis, Optimization Analysis
- D. What-If Analysis, Sensitivity Analysis, Growth Analysis, Organizational Analysis

179. Tom Repicci is a manager for a McDonald's restaurant. Many of his key responsibilities include analyzing data and making key decisions for the success of his store. Tom's store has been experiencing decreased sales for breakfast services over the past 3 months. Tom is unsure why breakfast revenues are down while lunch and dinner revenues remain unchanged. Tom believes that he can drive revenue up by implementing a few different breakfast promotions such as free coffee or hash browns with the purchase of a meal. Tom performs an extensive analysis of how continuous changes in breakfast promotions could impact his daily revenue. What type of DSS analysis is Tom performing?

- A. Optimization analysis
- B. Sensitivity analysis
- C. Transaction analysis
- D. Goal-seeking analysis

180. What is the DSS analysis that checks the impact of a change in a variable or assumption on the model?

- A. Optimization analysis
- B. Goal-seeking analysis
- C. Sensitivity analysis
- D. What-if analysis

181. Online transaction processing (OLTP) and online analytical processing (OLAP) are similar MIS strategies used to help with business decision making. What is the primary difference between OLTP and OLAP?

- A. OLTP is used at the operational level; OLAP is used at the managerial level
- B. OLTP is used to capture transactional and event data; OLAP is used to manipulate information
- C. OLTP is used to support structured decisions; OLAP is used to support semistructured decisions
- D. All of the above

182. An optimization analysis finds the optimum value for a target variable by repeatedly changing other variables, subject to specified constraints. What can a manager determine by changing revenue and cost variables in an optimization analysis?

- A. Calculate the highest potential profits
- B. Calculate employee benefit payments
- C. Use this as an extension for a digital dashboard
- D. Create production schedules

183. What is the analysis that works in reverse to what-if and sensitivity analysis by finding the inputs necessary to achieve a goal such as a desired level of output?

- A. Solutions based analysis
- B. Optimization system
- C. Goal-seeking analysis
- D. Revenue analysis

184. Decision making at the executive or strategic level requires business intelligence and knowledge to support the uncertainty and complexity of the business. What is a specialized DSS that supports senior-level executives and unstructured decisions requiring judgment, evaluation, and insight?

- A. OLTP
- B. Executive Information System (EIS)
- C. Transaction Support System (TSS)
- D. Decision Support System (DSS)

185.Executives of a company deal less with details of the operational activities and deal more with the higher meaningful aggregations of information or "coarser" information. What refers to the level of detail in the model?

- A. Drill-down
- B. Visualization
- C. Granularity
- D. Consolidation

186.How does a DSS typically differ from an EIS?

- A. EIS requires data from external sources to support unstructured decisions where a DSS typically use internal sources to support semistructured decisions
- B. DSS typically use external sources and EIS use internal sources to support decisions
- C. A DSS never use external sources
- D. EIS always use internal sources to support structured decisions

187.What is a graphical display of patterns and complex relationships in large amounts of data?

- A. Visualization
- B. Model
- C. Table
- D. Digital spreadsheet

188.What is a common tool that is used to support visualizations and tracks KPIs and CSFs by compiling information from multiple sources?

- A. Models
- B. Digital dashboards
- C. Neural networks
- D. Verified graphs

189.Which of the below is offered by a digital dashboard?

- A. Consolidation
- B. Drill-down
- C. Slice-and-Dice
- D. All of the above

190.Which of the below would not be found in a digital dashboard for a manufacturing team?

- A. A graph of stock market prices
- B. A running line graph of planned versus actual production for the past 24 hours
- C. An excel spreadsheet with cost analysis data
- D. A hot list of key performance indicators, refreshed every 15 minutes

191. As the product manager for the eatery division at Whole Foods, Jerry is responsible for analyzing sales data to help him manage his team. Today Jerry is analyzing his data using many different perspectives to identify different ways to improve his division. Which of the following common digital dashboard capabilities is Jerry using to analyze his department's success?

- A. Slice-and-Dice
- B. Competitive tables
- C. Drill-down
- D. Consolidation

192. As the product manager for the eatery division at Whole Foods, Jerry is responsible for analyzing sales data to help him manage his team. Today Jerry is analyzing his data using aggregation techniques allowing him to see simple roll-ups to complex groupings of interrelated information. Which of the following common digital dashboard capabilities is Jerry using to analyze his departments success?

- A. Slice-and-Dice
- B. Competitive tables
- C. Drill-down
- D. Consolidation

193. As the product manager for the eatery division at Whole Foods, Jerry is responsible for analyzing sales data to help him manage his team. Today Jerry is analyzing his data by looking at details, and details of details of information. Which of the following common digital dashboard capabilities is Jerry using to analyze his departments success?

- A. Slice-and-Dice
- B. Competitive tables
- C. Drill-down
- D. Consolidation

194. Van Lines Inc. is a large corporation operating in all 50 states. Jim Poulos is the regional manager overseeing the western division, which includes Utah, Colorado, Idaho, Montana, Wyoming, and Nevada. Jim receives data from his managers in each state which he loads into his digital dashboard for analysis of his entire western division. What digital dashboard capability is Jim primarily using?

- A. Drill-down
- B. Slice-and-dice
- C. Intelligent system
- D. Consolidation

195. What is a category of AI that attempts to emulate the way the human brain works?

- A. Intelligent system
- B. Artificial intelligence
- C. Expert systems
- D. Neural network

196. Which of the following is the most commonly used form of AI in the business arena?
- A. Intelligent system
 - B. Artificial intelligence
 - C. Expert system
 - D. Neural network
197. What is a special-purpose knowledge-based information system that accomplishes specific tasks on behalf of its users?
- A. Intelligent system
 - B. Artificial intelligence
 - C. Neural network
 - D. Intelligent agent
198. What do cargo transport systems, book distribution centers, the video game market, a flu epidemic, and an ant colony have in common?
- A. They are all expert systems and thus share some characteristics
 - B. They are all genetic algorithm systems and thus share some characteristics
 - C. They are all neural network systems and thus share some characteristics
 - D. They are all complex adaptive systems and thus share some characteristics
199. Which industry has been relying on neural network technology for over two decades?
- A. Food service
 - B. Hotels
 - C. Finance
 - D. Healthcare
200. Which type of AI system assigns values of 0 and 1 to vague or ambiguous information?
- A. Genetic algorithms
 - B. Artificial intelligence
 - C. Fuzzy logic
 - D. Intelligent agents
201. Artificial Intelligence stimulates human thinking and behavior, such as the ability to reason and learn. What is the ultimate goal of AI?
- A. To build an intelligent system
 - B. To build an intelligent agent
 - C. To build a system that can mimic human intelligence
 - D. To build a system that can mimic an expert agent

202. Which of the following is an example of an intelligent system?

- A. The Firefighter Robot that can extinguish flames at chemical plants
- B. Shell Oil's Smart Pump robot that pumps gas for the customer
- C. A robot that cleans and sweeps at a local airport
- D. All of the above

203. Which of the below does not represent a category of AI?

- A. Genetic algorithms
- B. Neural networks
- C. Expert systems
- D. Consolidation

204. What is a system that uses computerized advisory programs to imitate the reasoning processes of experts in solving difficult problems?

- A. Expert system
- B. Virtual reality
- C. Neural network
- D. Genetic algorithm

205. Which of the below categories of AI is used extensively in the finance industry to analyze situations where the logic or rules are unknown?

- A. Expert system
- B. Virtual reality
- C. Neural network
- D. Genetic algorithm

206. Which of the following is not a feature of a neural network?

- A. Neural networks can cope with huge volumes of information with many variables
- B. Neural networks can function without complete or well-structured information
- C. Neural networks can analyze linear relationships only
- D. Neural networks can learn and adjust to new circumstance on their own

207. What is the mathematical method of handling imprecise or subjective information?

- A. Fuzzy logic
- B. Virtual reality
- C. Expert system
- D. Genetic algorithm

208. Sears department stores used to plant employees in competitor stores to perform research and analysis. Recently the company implemented a system that can search competitor websites and provide comparisons of price, promotions, and availability and the system is saving time, money, and resources. What type of system did Sears implement?
- A. Shopping algorithm
 - B. Shopping network
 - C. Shopping logic
 - D. Shopping bot
209. What is the process of learning from ecosystems and adapting their characteristics to human and organization situations?
- A. Data collection
 - B. Artificial intelligence
 - C. Biomimicry
 - D. Intelligent system
210. Which of the following is a special-purpose knowledge based information system that accomplishes specific tasks on behalf of its users?
- A. Intelligent agent
 - B. Executive agent
 - C. Expert agent
 - D. Modeling system
211. Which of the below offers a disadvantage for working virtually?
- A. Increases in worker productivity
 - B. Increases in feelings of seclusion
 - C. Decreases in expenses for the company
 - D. Alleviation of congested roadways
212. What is an optimizing system that can find and evaluate solutions with many more possibilities, faster and more thoroughly than a human?
- A. Genetic algorithm
 - B. Expert system
 - C. Intelligent agent
 - D. Virtual reality

213. Bob Silver loves playing a game called World of Warcraft where he has the capability to create his own character and even his own life-like environment. Which AI system would you categorize World of Warcraft?

- A. Multi-agent system
- B. Expert system
- C. Virtual reality
- D. Fuzzy logic system

214. Which of the following offers an example of an intelligent agent that uses a multi-agent system?

- A. A cargo transport system
- B. Book distribution center
- C. A flu epidemic
- D. All of the above

215. What types of business decisions would an EIS use AI for?

- A. Semistructured decisions
- B. Multistructured decisions
- C. Structured decisions
- D. Unstructured decisions

216. Which of the below business ideas is not using AI?

- A. Best Buy implements a software system that will determine how many customers are needed to increase gross profits to \$5 million
- B. McDonald's unveiling a robot that cleans and tidies the restaurant, while also asking guests if it can take their trays to the trash
- C. Starbucks creates a system that works like a hand and lifts and moves the mixing pots for the coffees to and from the coffee machines to the counters
- D. Golf courses create an automated golf cart that can offer swing suggestions, club suggestions, and even navigate the course for the driver

217. What is the viewing of the physical world with computer-generated layers of information added to it?

- A. Virtual reality
- B. Augmented reality
- C. Virtual workforce
- D. All of the above

218. What is a computer-simulated environment that can be a simulation of the real world or an imaginary world?
- A. Virtual reality
 - B. Augmented reality
 - C. Virtual workforce
 - D. All of the above
219. What is the process within a genetic algorithm of randomly trying combinations and evaluating the success (or failure) of the outcome.
- A. Augmented reality
 - B. Mutation
 - C. Fuzzy logic
 - D. Shopping bot
220. What is software that will search several retailer websites and provide a comparison of each retailer's offerings including prices and availability?
- A. Augmented reality
 - B. Mutation
 - C. Fuzzy logic
 - D. Shopping bot
221. Which of the below business processes would you find in the marketing and sales division?
- A. Ordering inventory
 - B. Enrolling employees in health care benefits
 - C. Promoting of discounts
 - D. Creating financial statements
222. Which of the following departments is primarily responsible for promoting discounts, attracting customers, and communicating marketing campaigns?
- A. Accounting and Finance
 - B. Marketing and Sales
 - C. Operations Management
 - D. Human Resources
223. Which of the following represents a business process you would find in the operations management department?
- A. Ordering inventory
 - B. Processing sales
 - C. Promoting discounts
 - D. Paying of accounts payable

224. Most business processes are cross-functional or cross-departmental processes that span the entire organization. Which of the below does not represent a cross-functional business process?

- A. Order-to-delivery process
- B. Loan processing
- C. Taking a product from concept to market
- D. Processing payroll

225. The accounting and finance department performs processes such as creating financial statements, paying accounts payables, and collecting accounts receivables. What form of processes do these represent?

- A. Customer-facing processes
- B. Business-facing processes
- C. Industry-specific customer facing processes
- D. All of the above

226. What form of processes include loan processing for a bank, claims processing for an insurance company, reservation processing for a hotel, and baggage handling for an airline?

- A. Customer-facing processes
- B. Business-facing processes
- C. Industry-specific customer-facing processes
- D. All of the above

227. What type of process includes order processing, customer service processing, sales processing, customer billing processing, and order shipping processing?

- A. Customer-facing processes
- B. Business-facing processes
- C. Industry-specific customer facing processes
- D. All of the above

228. Which of the below represents business processes you would find in the human resources department?

- A. Hiring employees
- B. Enrolling employees in benefit plans
- C. Tracking vacation and sick time
- D. All of the above

229.What is the difference between customer-facing processes and business-facing processes?

- A. Business-facing processes are front-office processes, customer-facing processes are back-office processes
- B. Customer-facing processes are front-office processes, business-facing processes are back-office processes
- C. Customer-facing processes are back-office processes, and industry-specific customer-facing processes are back-office processes
- D. Customer-facing processes are back-office processes, and industry-specific customer-facing processes are front-office processes

230.Which of the below is a customer-facing process?

- A. Communicating with customers
- B. Strategic goal setting
- C. Providing performance feedback and rewards
- D. Purchasing raw materials

231.Which of the following represents a business-facing process?

- A. Loan processing
- B. Order processing
- C. Strategic planning
- D. Customer billing

232.When considering the 5-steps of the order-to-delivery business process, creating campaigns and checking inventory are included in which of the following?

- A. Step 4 - Sales
- B. Step 1 - Marketing
- C. Step 3 - Operations management
- D. Step 2 - Customer service

233.Which of the following processes focuses on the entire customer order process and operates across functional departments?

- A. Order to delivery process
- B. Customer billing process
- C. Customer loan process
- D. All of the above

234.Which of the below processes would be found in the operations management department?

- A. Creating production schedules
- B. Communicating marketing campaigns
- C. Hiring employees
- D. Processing sales

235. Which of the following should a business follow for success?

- A. Technology choices should drive business processes
- B. Business processes should drive technology choices
- C. Technology choices should drive business strategies and goals
- D. All of the above depending on the industry

236. Business process modeling or mapping, is the activity of creating a detailed flowchart or process map of a work process that shows its inputs, tasks, and activities in a _____ sequence.

- A. Unstructured
- B. Semi structured
- C. Structured
- D. Unilateral

237. Jessica Ulta works as an employee for City Service Credit Union and is responsible for consulting on loans, talking clients through the loan process, and providing loans to members. What type of processes does Jessica primarily work with?

- A. Business-facing processes
- B. Industry-specific customer facing processes
- C. Customer-facing process
- D. Industry-specific business-facing processes

238. Sarah Schin was recently hired by Bank West as the Global Director of Human Resources. Her job duties include determining employment policies as well as overseeing all hiring, firing, and training of employees. What type of processes does Sarah's new job demonstrate?

- A. Business-facing processes
- B. Industry-specific customer facing processes
- C. Customer-facing process
- D. Industry-specific business-facing processes

239. What is a model that represents the current state of the operation without any specific improvements or changes to existing processes?

- A. As-Is process models
- B. To-Be process models
- C. Competitive business process models
- D. Workflow model

240. What is the business process model that ensures the process is fully and clearly understood before the details of a process solution are decided upon?

- A. As-Is process model
- B. Business process reengineering model
- C. Customer facing process
- D. To-Be process model

241. What is the difference between the As-Is process model and the To-Be process model?

- A. The As-Is process model begins with what the process problem is, and the To-Be process model displays how the problem will be solved
- B. The process models are not related
- C. Both process models determine when to solve the problem
- D. The As-Is process model begins with where to implement the solution, and the To-Be process model displays why the problem needs to be fixed

242. What is the primary goal of the As-Is process model?

- A. To outline the process elements for the To-Be process
- B. To create process choices for the As-Is process
- C. To simplify, eliminate, and improve the To-Be process
- D. To analyze the To-Be process elements

243. The local florist in town is Cheryl Steffan who has been in business for over 20 years. Recently, Cheryl has noticed several complaints about delivery errors. Cheryl decides to investigate the errors in her business delivery process and finds that most of the inaccuracies occur during order taking. Cheryl decides to implement an electronic ordering system to help improve order efficiency and effectiveness. What method did Cheryl follow to solve her delivery issues?

- A. Modeled the As-Is process, fixed the errors, and then created the To-Be process
- B. Modeled the To-Be process, fixed the errors, and then created the As-Is process
- C. Moved directly to implementing the To-Be process without analyzing the As-Is process
- D. Moved directly to implementing the As-Is process without analyzing the To-Be process

244. What is the primary goal of using As-Is and To-Be process models?

- A. To determine employee specific errors
- B. To determine measurement metrics
- C. To determine the best way to solve a problem
- D. To determine what the problem is and then how to solve the problem

245. Review the below list of key terms and determine which one typically occurs during operational business process improvement.

- A. Automation
- B. Streamlining
- C. Reengineering
- D. Improvement

246. Review the below list of key terms and determine which one typically occurs during managerial business process improvement.

- A. Automation
- B. Streamlining
- C. Reengineering
- D. Improvement

247. Review the below list of key terms and determine which one typically occurs during strategic business process improvement.

- A. Automation
- B. Streamlining
- C. Reengineering
- D. Improvement

248. Which of the below examples indicates when the time is right to initiate a business process change?

- A. The market being served makes a distinctive shift
- B. The company is below industry benchmarks on its core processes
- C. The company strategically passes or leapfrogs the competition on key decisions to regain competitive advantage
- D. All of the above

249. What does BPR assume about the current process in the extreme?

- A. Current process is irrelevant
- B. Current process is broken
- C. Current process must be overhauled from scratch
- D. All of the above

250. Which of the below processes attempt to understand and measure the current process and make improvements?

- A. Business process mapping
- B. Business process reengineering
- C. Business process improvement
- D. Business process model

251. Transaction processing systems are primarily used to automate business processes. Automation increases efficiency and effectiveness, while reducing head count which in turn reduces the overall operational _____.

- A. Costs
- B. Systems
- C. Revenues
- D. Intelligence

252. Several factors can accelerate the need for a company to make business improvement processes. What is the most prevalent factor?

- A. Market shifts
- B. Technology
- C. Discoveries
- D. Bottlenecking

253. What improves managerial level business processes?

- A. Performance measures
- B. Bottlenecks
- C. Redundancy
- D. Streamlining

254. What is the point when resources reach full capacity and cannot handle any additional demands?

- A. Optimization analysis
- B. Bottlenecks
- C. Redundancy
- D. Swim lane

255. Automating a business process that contains _____ or _____ will magnify or amplify these problems if they are not corrected first.

- A. Bottlenecks; regulations
- B. Redundancies; regulations
- C. Bottlenecks; redundancies
- D. Redundancies; swim lanes

256. Fedex is a great example of a company that created a competitive advantage through combining MIS and _____.

- A. Traditional distribution and logistics processes
- B. Logistic processes and an As-Is process model
- C. Artificial intelligence and As-Is process model
- D. Swim lanes and logistic processes

257. What is the analysis and redesign of workflow within and between enterprises?

- A. Critical success factors (CSFs)
- B. Benchmarking metrics
- C. Business process reengineering (BPR)
- D. Decision support interfaces (DSI)

258. Changing business processes with MIS outlines how to improve the three levels of business processes which include operational, managerial, and strategic. From operational to strategic, what are the three major improvement strategies that the author describes?

- A. Automation - streamlining - reengineering
- B. Artificial intelligence - streamlining - reengineering
- C. Automation - workflow - reinvention
- D. Automation - consolidating - restructuring

259. Which of the below represents the four main steps in the business process reengineering?

- A. Set project problem, study competition, create new products, and implement solution
- B. Set project scope, study competition, create new products, and implement solution
- C. Set project scope, study competition, create new processes, and implement solution
- D. Study competition, set project scope, create new processes, and implement solutions

260. Which of the following explains why a company would implement a BPR strategy?

- A. To encourage competition
- B. To decrease customers
- C. To create value for the customer
- D. All of the above

261. What includes the tasks, activities, and responsibilities required to execute each step in a business process?

- A. Workflow
- B. Swim lane
- C. Automation
- D. Streamlining

262. What is the process of computerizing manual tasks, making them more efficient and effective and dramatically lowering operational costs?

- A. Workflow
- B. Swim lane
- C. Automation
- D. Streamlining

263.What improves business process efficiencies by simplifying or eliminating unnecessary steps?

- A. Workflow
- B. Swim lane
- C. Automation
- D. Streamlining

264.What occurs when resources reach full capacity and cannot handle any additional demands limiting throughput and impeding operations?

- A. Bottlenecks
- B. Redundancy
- C. Automation
- D. Streamlining

265.What occurs when a task or activity is unnecessarily repeated?

- A. Bottlenecks
- B. Redundancy
- C. Automation
- D. Streamlining

266.What is the system that focuses on evaluating and improving the processes that include both person-to-person workflow and system-to-system communications?

- A. Business process management (BPM) systems
- B. Semistructured systems
- C. Virtual reality
- D. All of the above

Fill in the Blank Questions

267._____ decisions are considered operational, and involve situations where established processes offer potential solutions.

268.The typical structure of a business organization is similar to a pyramid and consists, from top to bottom, of strategic, managerial, and _____ levels.

269.At the _____ level, of a business structure, employees are continuously evaluating company operations to hone the firm's abilities to identify, adapt to, and leverage change.

270. The _____ level, of a business structure, is where employees develop, control, and maintain core business activities required to run the day-to-day activities.

271. The President and Vice-President of a company are typically found in the _____ level of the business structure.

272. Situations in which a few established processes help to evaluate potential solutions, but not enough to lead to a definite recommended decision are considered _____ decisions.

273. _____ is the science of fact-based decision making.

274. The structure of a typical organization is similar to a _____.

275. A _____ is a temporary activity a company undertakes to create a unique product, service, or result.

276. The crucial steps companies perform to achieve their goals and objectives and implement their strategies are called _____ success factor.

277. _____ MIS metrics measure the impact MIS has on business processes and activities including customer satisfaction and customer conversion rates.

278. _____ MIS metrics measure the performance of the IT system itself including throughput, speed, availability, etc.

279. _____ focuses on how well an organization is achieving its goals and objectives.

280. _____ focuses on the extent to which an organization is using its resources in an optimal way.

281. _____ are baseline values the system seeks to attain.

282. _____ is a process of continuously measuring system results, comparing those results to optimal system performance, and identifying steps and procedures to improve system performance.

283. _____ is the amount of information that can travel through a system at any point in time.

284. System _____ is the number of hours a system is available for use by customers and employees.

285. _____ practices are the most successful solutions or problem-solving methods that have been developed by a specific organization or industry.

286. _____ seeking analysis finds the inputs necessary to achieve a goal such as a desired level of output.

287. The basic business system that serves the operational level (analysts) and assists in making structure decisions is called _____ processing system.

288. Using systems thinking, we can see that the inputs for a transaction processing system are _____ documents, the original transaction record.

289. _____ support systems model information using OLAP which provides assistance in evaluating and choosing among different courses of action.

290. A _____ is a simplified representation or abstraction of reality.

291. _____ information systems is a specialized DSS that supports senior-level executives and unstructured, long-term, nonroutine decisions requiring judgment, evolution and insight.

292. _____ refers to the level of detail in the model or the decision-making process.

293. _____ produces graphical displays of patterns and complex relationships in large amounts of data.

294. A digital _____ tracks KPIs and CSFs by compiling information from multiple sources and tailoring it to meet user needs.

295. A model is a simplified representation or abstraction of _____.

296. A decision support system models _____ to support managers and business professionals during the decision-making process.

297. _____ analysis occurs when users change the value of one variable repeatedly and observe the resulting changes in other variables.

298. What-if analysis checks the impact of a _____ in an assumption on the proposed solution.

299. _____ logic is a mathematical method of handling imprecise or subjective information.

300. _____ systems are various commercial applications of artificial intelligence.

301. Artificial intelligence simulates _____ intelligence such as the ability to reason and learn.

302. _____ systems are computerized advisory programs that imitate the reasoning processes of experts in solving difficult problems.

303. A(n) _____ agent is a special-purpose knowledge-based information system that accomplishes specific tasks on behalf of its users.

304. Executive information systems are starting to take advantage of _____ intelligence to support strategic decision making, by stimulating human thinking and behavior.

305. A shopping _____ is software that will search several retailer websites and provide a comparison of each retailer's offerings including price and availability.

306. Citibank uses _____ networks to find opportunities in financial markets by carefully examining historical stock market data.

307. At Microsoft's headquarters in Washington they have implemented a _____ workforce to help alleviate congestion, save on real estate, and potentially increase worker production.

308. The _____ facing processes are also called front-office processes that result in a product or service received by an external customer.

309. _____ processes are business processes, such as manufacturing goods, selling products, and providing service that make up the primary activities in a value chain.

310. A business process _____ is a patent that protects a specific set of procedures for conducting a particular business activity.

311. A _____ lane layout arranges the steps of a business process into a set of rows depicting the various elements.

312. Business process modeling or _____ is the activity of creating a detailed flowchart or process of a work process that shows its inputs, tasks, and activities in a structured sequence.

313. As-Is _____ model represents the current state of the operation that has been mapped, without any specific improvements or changes to existing processes.

314. To-Be process _____ represent the current state of the operation that has been mapped, without any specific improvements or changes to existing processes.

315. A _____ occurs when resources reach full capacity and cannot handle any additional demands.

316. The primary types of business process change from the operational level to the strategic level are _____, streamlining, and reengineering.

317. Business process reengineering is the analysis and _____ of workflow within and between enterprises.

318. _____ includes the tasks, activities, and responsibilities required to execute each step in a business process.

319. _____ is the process of computerizing manual tasks, making them more efficient and effective and dramatically lowering operational costs.

320. _____ improves business process efficiencies by simplifying or eliminating unnecessary steps in a process.

321. A business _____ management system focuses on evaluating and improving processes that include both person-to-person workflow and system-to-system communications.

Essay Questions

322. Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

323. Define critical success factors (CSFs) and key performance indicators (KPIs), and explain how managers use them to measure the success of MIS projects.

324. Classify the different operational support systems, managerial support systems, and strategic support systems, and explain how managers can use these systems to make decisions and gain competitive advantages.

325. Describe artificial intelligence, and identify its five main types.

326. Explain the value of business processes for a company, and differentiate between customer-facing and business-facing process.

327. Demonstrate the value of business process modeling, and compare As-Is and To-Be models.

328. Differentiate among business process improvements, streamlining, and reengineering.

329. Describe business process management and its value to an organization.

Chapter 02 Decisions + Processes: Value Driven Business **Answer Key**

True / False Questions

1. Analytics is the science of fact-based decision making.
(p. 28)

TRUE

Analytics is the science of fact-based decision making.

AACSB: Reflective Thinking
AACSB: Technology

Learning Outcome: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Topic: Making Business Decisions

101. CSF's and KPI's are two core metrics used to evaluate results and measure the progress of a project for a business. Which of the below represents the acronyms for CSF and KPI?
(p. 32)

- A. Continual success factors and key performance indicators
- B. Critical success factors and key project ideas
- C. Customer success findings and key project ideas
- D. Critical success factors and key performance indicators**

CSF's and KPI's are terms used when evaluating metrics or measuring a company's success. These both stand for Critical success factors (CSF's) and key performance indicators (KPI's).

108. Market share measures a firm's external performance relative to that of its competitors. Which
(p. 32) of the following represents how a firm measures market share?

- A. Multiplying the firm's sales by the industries total sales
- B.** Dividing the firm's sales by the total market sales for the entire industry
- C. Subtracting your competitors sales from your total sales
- D. Subtracting the industries total sales from the firm's total sales

To calculate market share you divide the firm's sales by the total market sales for the entire industry.

AACSB: Reflective Thinking
AACSB: Technology
Accessibility: Keyboard Navigation
Blooms: Understand
Difficulty: 2 Medium
Learning Outcome: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.
Topic: Metrics: Measuring Success

109. Anne-Marie Cole runs the sales division for a local auto insurance firm. One of her key duties is to calculate her company's market share. When evaluating the prior year numbers, she found that her firm achieved total sales of \$3 million and the entire industry had \$30 million in sales. What is Anne-Marie's current market share?

A. 1%
B. 10%
C. 18%
D. 20%

Market share is the proportion of the market that a firm captures. It is calculated by dividing the firm's sales by the total market sales for the entire industry. 3 million divided by 30 million is 10 percent.

AACSB: Reflective Thinking
AACSB: Technology
Accessibility: Keyboard Navigation
Blooms: Understand
Difficulty: 2 Medium

Learning Outcome: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.
Topic: Metrics: Measuring Success

110. Anne-Marie Cole runs the sales division for a local auto insurance firm. One of her key duties is to ensure the company has 10 percent market share by the end of the year. When evaluating the current sales numbers she determines that her sales division has total sales of \$3 million and the entire industry has total sales of \$50 million. What additional sales must Anne-Marie's division meet to ensure they have 10 percent of the market by the end of the year?

A. \$1 million
B. \$2 million
C. \$5 million
D. \$10 million

Market share is the proportion of the market that a firm captures. It is calculated by dividing the firm's sales by the total market sales for the entire industry. 10 percent of \$50 million is \$5 million. Since Anne-Marie already has \$3 million she needs an additional \$2 million in sales.

Learning Outcome: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.
Topic: Support: Enhancing Decision Making with MIS

145. What is consolidation?
(p. 40)

- A.** Involves the aggregation of information and features simple roll-ups to complex groupings of interrelated information
- B. The ability to look at information from different perspectives
- C. Enables users to get details, and details of details, of information
- D. Finds the inputs necessary to achieve a goal such as a desired level of output

This is the definition of consolidation.

Topic: Support: Enhancing Decision Making with MIS

179. Tom Repicci is a manager for a McDonald's restaurant. Many of his key responsibilities include analyzing data and making key decisions for the success of his store. Tom's store has been experiencing decreased sales for breakfast services over the past 3 months. Tom is unsure why breakfast revenues are down while lunch and dinner revenues remain unchanged. Tom believes that he can drive revenue up by implementing a few different breakfast promotions such as free coffee or hash browns with the purchase of a meal. Tom performs an extensive analysis of how continuous changes in breakfast promotions could impact his daily revenue. What type of DSS analysis is Tom performing?

- A. Optimization analysis
- B. Sensitivity analysis**
- C. Transaction analysis
- D. Goal-seeking analysis

Sensitivity analysis is a special case of what-if analysis, is the study of the impact on other variables when one variable is changed repeatedly. For example, changing revenue in small increments to determine its effects on other variables would help a manager understand the impact of various revenue levels on other decision factors.

181. Online transaction processing (OLTP) and online analytical processing (OLAP) are similar MIS strategies used to help with business decision making. What is the primary difference between OLTP and OLAP?
(p. 36)

- A. OLTP is used at the operational level; OLAP is used at the managerial level
- B. OLTP is used to capture transactional and event data; OLAP is used to manipulate information
- C. OLTP is used to support structured decisions; OLAP is used to support semistructured decisions
- D. All of the above**

Online transaction processing (OLTP) is the capturing of transaction and event information using technology to (1) process the information according to defined business rules, (2) store the information, and (3) update existing information to reflect the new information. It is used at the operational level and to support structured decisions. Online analytical processing (OLAP) is the manipulation of information to create business intelligence in support of strategic decision making. It is used at the managerial level and to support semistructured decisions.

Learning Outcome: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.
Topic: Support: Enhancing Decision Making with MIS

186. How does a DSS typically differ from an EIS?
(p. 38)

- A. EIS requires data from external sources to support unstructured decisions where a DSS typically use internal sources to support semistructured decisions**
- B. DSS typically use external sources and EIS use internal sources to support decisions
- C. A DSS never use external sources
- D. EIS always use internal sources to support structured decisions

A DSS (decision support system) differs from an EIS (executive information system) primarily because EIS require data from external sources to support unstructured decisions where a DSS typically uses internal sources to support semistructured decisions.

Learning Outcome: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing process.
Topic: Evaluating Business Processes

230. Which of the below is a customer-facing process?
(p. 44)

- A. Communicating with customers
- B. Strategic goal setting
- C. Providing performance feedback and rewards
- D. Purchasing raw materials

Business-facing processes, also called back-office processes, are invisible to the external customer but essential to the effective management of the business; they include goal setting, day-to-day planning, giving performance feedback and rewards, and allocating resources.

Learning Outcome: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing process.
Topic: Evaluating Business Processes

231. Which of the following represents a business-facing process?
(p. 44)

- A. Loan processing
- B. Order processing
- C. Strategic planning
- D. Customer billing

Customer-facing processes result in a product or service received by an organization's external customer and includes fulfilling orders, communicating with customers, sending out bills, and marketing information.

Learning Outcome: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing process.
Topic: Evaluating Business Processes

232. When considering the 5-steps of the order-to-delivery business process, creating campaigns and checking inventory are included in which of the following?
(p. 45)

- A. Step 4 - Sales
- B. Step 1 - Marketing**
- C. Step 3 - Operations management
- D. Step 2 - Customer service

When considering the 5-steps of the order-to-delivery business process, Step 1 is marketing where the business creates campaigns and checks inventory.

Difficulty: 2 Medium

Learning Outcome: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing process.
Topic: Evaluating Business Processes

233. Which of the following processes focuses on the entire customer order process and operates across functional departments?
(p. 44)

- A. Order to delivery process**
- B. Customer billing process
- C. Customer loan process
- D. All of the above

Most business processes are cross-functional or cross-departmental processes and span the entire organization. The process of "order to delivery" focuses on the entire customer order process across functional departments.

Blooms: Remember
Difficulty: 1 Easy

Learning Outcome: 02-06 Demonstrate the value of business process modeling; and compare As-Is and To-Be models.
Topic: Models: Measuring Performance

241. What is the difference between the As-Is process model and the To-Be process model?
(p. 46)

- A.** The As-Is process model begins with what the process problem is, and the To-Be process model displays how the problem will be solved
- B. The process models are not related
- C. Both process models determine when to solve the problem
- D. The As-Is process model begins with where to implement the solution, and the To-Be process model displays why the problem needs to be fixed

The business process modeling usually begins with a functional process representation. The differences between the two models is that the As-Is process model begins with what the process problem is and the To-Be process model displays how the problem will be solved.

243. The local florist in town is Cheryl Steffan who has been in business for over 20 years.
(p. 46) Recently, Cheryl has noticed several complaints about delivery errors. Cheryl decides to investigate the errors in her business delivery process and finds that most of the inaccuracies occur during order taking. Cheryl decides to implement an electronic ordering system to help improve order efficiency and effectiveness. What method did Cheryl follow to solve her delivery issues?

- A. Modeled the As-Is process, fixed the errors, and then created the To-Be process
- B. Modeled the To-Be process, fixed the errors, and then created the As-Is process
- C. Moved directly to implementing the To-Be process without analyzing the As-Is process
- D. Moved directly to implementing the As-Is process without analyzing the To-Be process

The As-Is process model has the primary goals to simplify, eliminate, and improve the processes by defining the most efficient and effective process.

Essay Questions

322. Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.
(p. 28)

Decision-making skills are essential for all business professionals, at every company level, who make decisions that run the business. At the operational level, employees develop, control, and maintain core business activities required to run the day-to-day operations. Operational decisions are considered structured decisions, which arise in situations where established processes offer potential solutions. Structured decisions are made frequently and are almost repetitive in nature; they affect short-term business strategies. At the managerial level, employees are continuously evaluating company operations to hone the firm's abilities to identify, adapt to, and leverage change. Managerial decisions cover short- and medium-range plans, schedules, and budgets along with policies, procedures, and business objectives for the firm. These types of decisions are considered semistructured decisions; they occur in situations in which a few established processes help to evaluate potential solutions, but not enough to lead to a definite recommended decision. At the strategic level, managers develop overall business strategies, goals, and objectives as part of the company's strategic plan. They also monitor the strategic performance of the organization and its overall direction in the political, economic, and competitive business environment. Strategic decisions are highly unstructured decisions, occurring in situations in which no procedures or rules exist to guide decision makers toward the correct choice. They are infrequent, extremely important, and typically related to long-term business strategy.

AACSB: Technology

Blooms: Analyze

Difficulty: 3 Hard

Learning Outcome: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.
Topic: Making Business Decisions

323. Define critical success factors (CSFs) and key performance indicators (KPIs), and explain how managers use them to measure the success of MIS projects.
(p. 32)

Metrics are measurements that evaluate results to determine whether a project is meeting its goals. Two core metrics are critical success factors and key performance indicators. CSFs are the crucial steps companies perform to achieve their goals and objectives and implement their strategies and include creating high-quality products, retaining competitive advantages, and reducing product costs. KPIs are the quantifiable metrics a company uses to evaluate progress toward critical success factors. KPIs are far more specific than CSFs; examples include turnover rates of employees, percentage of help-desk calls answered in the first minute, and number of products returned. It is important to understand the relationship between critical success factors and key performance indicators. CSFs are elements crucial for a business strategy's success. KPIs measure the progress of CSFs with quantifiable measurements, and one CSF can have several KPIs. Of course, both categories will vary by company and industry. Imagine improved graduation rates as a CSF for a college.

AACSB: Reflective Thinking

AACSB: Technology

Blooms: Analyze

Difficulty: 3 Hard

Learning Outcome: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

324. Classify the different operational support systems, managerial support systems, and strategic support systems, and explain how managers can use these systems to make decisions and gain competitive advantages.
(p. 36)

Being able to sort, calculate, analyze, and slice-and-dice information is critical to an organization's success. Without knowing what is occurring throughout the organization there is no way that managers and executives can make solid decisions to support the business. The different operational, managerial, and strategic support systems include: Operational: A transaction processing system (TPS) is the basic business system that serves the operational level (analysts) in an organization. The most common example of a TPS is an operational accounting system such as a payroll system or an order-entry system. Managerial: A decision support system (DSS) models information to support managers and business professionals during the decision-making process. Strategic: An executive information system (EIS) is a specialized DSS that supports senior level executives within the organization.

325. Describe artificial intelligence, and identify its five main types.
(p. 41)

Artificial intelligence (AI) simulates human thinking and behavior, such as the ability to reason and learn. The five most common categories of AI are: 1. Expert systems—computerized advisory programs that imitate the reasoning processes of experts in solving difficult problems. 2. Neural networks—attempts to emulate the way the human brain works. 3. Genetic algorithm—a system that mimics the evolutionary, survival-of-the-fittest process to generate increasingly better solutions to a problem. 4. Intelligent agents—a special-purpose knowledge-based information system that accomplishes specific tasks on behalf of its users. 5. Virtual reality—a computer-simulated environment that can be a simulation of the real world or an imaginary world.

Topic: The Future: Artificial Intelligence

326. Explain the value of business processes for a company, and differentiate between customer-facing and business-facing process.
(p. 44)

A business process is a standardized set of activities that accomplish a specific task, such as processing a customer's order. Business processes transform a set of inputs into a set of outputs (goods or services) for another person or process by using people and tools. Without processes, organizations would not be able to complete activities. Customer-facing processes result in a product or service that is received by an organization's external customer. Business-facing processes are invisible to the external customer but essential to the effective management of the business.

AACSB: Reflective Thinking
AACSB: Technology
Blooms: Analyze
Difficulty: 3 Hard

Learning Outcome: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing process.
Topic: Evaluating Business Processes

327. Demonstrate the value of business process modeling, and compare As-Is and To-Be models.
(p. 47)

Business process modeling (or mapping) is the activity of creating a detailed flowchart or process map of a work process showing its inputs, tasks, and activities, in a structured sequence. A business process model is a graphic description of a process, showing the sequence of process tasks, which is developed for a specific purpose and from a selected viewpoint. Business process modeling usually begins with a functional process representation of what the process problem is, or an As-Is process model. As-Is process models represent the current state of the operation that has been mapped, without any specific improvements or changes to existing processes. The next step is to build a To-Be process model that displays how the process problem will be solved or implemented. To-Be process models show the results of applying change improvement opportunities to the current (As-Is) process model. This approach ensures that the process is fully and clearly understood before the details of a process solution are decided upon.

AACSB: Reflective Thinking
AACSB: Technology
Blooms: Analyze
Difficulty: 3 Hard

Learning Outcome: 02-06 Demonstrate the value of business process modeling; and compare As-Is and To-Be models.
Topic: Models: Measuring Performance

328. Differentiate among business process improvements, streamlining, and reengineering.
(p. 49)

Business process improvement attempts to understand and measure the current process and make performance improvements accordingly. Streamlining improves business process efficiencies by simplifying or eliminating unnecessary steps. Bottlenecks occur when resources reach full capacity and cannot handle any additional demands; they limit throughput and impede operations. Streamlining removes bottlenecks, an important step if the efficiency and capacity of a business process are being increased. Business process reengineering (BPR) is the analysis and redesign of workflow within and between enterprises and occurs at the systems level or companywide level and the end-to-end view of a process.
