AACSB: Analytical Thinking

26) When including an asset such as a car on your balance sheet

- A) list its current value as indicated in a blue book or site like www.edmunds.com.
- B) list the original purchase price of the vehicle.
- C) list the amount it would cost to purchase a new model of this vehicle.
- D) none of the above.

Answer: A

Diff: 1

Topic: Blue Book

AACSB: Analytical Thinking

27) A physical asset such as a high-definition, flat-screen TV or a Harley Davidson motorcycle is called a(n)

- A) financial asset.
- B) liability.
- C) tangible asset.
- D) investment.

Answer: C

Diff: 2

Topic: Assets

AACSB: Analytical Thinking

28) Describe the three sections included in a personal balance sheet.

Answer: A personal balance sheet consists of three parts: assets, liabilities, and net worth. Assets include the value of monetary assets, investments, retirement plans, housing, automobiles, personal property, and other assets. Liabilities consist of current bills, credit card debt, home mortgages, and other long term debts such as automobile loans. Your net worth, determined by subtracting liabilities from assets, is the part of your assets that are free and clear of debt.

Diff: 3

Topic: Balance Sheet

AACSB: Analytical Thinking

29) Why is the balance sheet a useful tool?

Answer: The balance sheet is a useful tool to examine your current financial position. A financial snapshot, the balance sheet tells you how much wealth you have accumulated as of a certain date. The balance sheet also supplies the numbers for financial ratios that will help you measure your financial health against common standards.

AACSB: Analytical Thinking

19) From her annual salary of \$72,000, Kierstan has \$5,700 automatically deducted for insurance on an annual basis. Additionally, \$9,000 is deducted each year in taxes. When preparing her personal income statement, what figure should Kierstan enter for her income?

- A) \$66,300
- B) \$57,300
- C) \$63,000
- D) \$72,000

Answer: D

Diff: 3

Topic: Net Worth

AACSB: Analytical Thinking

20) From her annual salary of \$60,000, Claudia has \$4,500 automatically deducted for insurance on an annual basis. Additionally, \$7,500 is deducted each year in taxes. When preparing her personal income statement, what figure should Claudia enter for her income?

- A) \$55,500
- B) \$48,000
- C) \$52,500
- D) \$60,000

Answer: D

Diff: 3

Topic: Net Worth

AACSB: Analytical Thinking

21) Suppose that David's only assets are an automobile worth \$10,000 and a checking account with a \$5,000 balance. His only liabilities are a student loan balance of \$12,000 and a balance of \$9,000 on his car loan. What is his net worth?

A) \$21,000

B) \$15,000

C) \$6,000

D) Doug is currently insolvent with \$6,000 negative net worth.

E) None of the above statements are correct.

Answer: D

Diff: 2

Topic: Net Worth

AACSB: Analytical Thinking

22) Describe an income statement and its functions.

Answer: Answer: An income statement consists of three parts: income, expenses, and surplus funds. Income includes revenue from all sources and all parties contributing to the household. Typical expense items are housing, food, clothing and personal care, charitable contributions, recreation, medical expenses, insurance, and transportation. Surplus funds tell if you have any money left over at the end of the month or if you spent more than you earned. An income statement shows an itemized list of expenditures and allows you to isolate areas where you are over-spending. The statement is a good planning tool for budgets and income tax preparation.

Diff: 2

Topic: Income Statement

AACSB: Analytical Thinking

23) Does your use of debt affect your net worth?

Answer: Yes, although this depends on how you use credit. If you use credit to buy tangible assets like home furnishings, cars, and real estate, then you will have equity in these assets as you pay down your debt. If you use debt for daily living expenses, travel, and entertainment, then you have nothing of value to offset your debt or liabilities.

Diff: 3

Topic: Net Worth

AACSB: Analytical Thinking

24) How can an income statement help you stay solvent?

Answer: An income statement can help you stay solvent by indicating whether or not you're earning more than you spend. If you're spending too much, your income statement will show you exactly where your money is going, which will allow you to quickly spot any problem areas. If you do not spend frivolously, your income statement will indicate how much of your income is available for saving and for meeting financial goals.

33) How do you calculate the current ratio, debt ratio, and savings ratio?

Answer: Current ratio is calculated by dividing total current assets by total current liabilities. A ratio of 1.0 will get you by, but a ratio of 2.0 or more is preferred. The debt ratio is determined by dividing total debt or liabilities by total assets. The savings ratio is found by dividing the income available for savings and investments by income available for living expenses.

AACSB: Analytical Thinking

34) Explain the relationship between the debt ratio and insolvency?

Answer: The debt ratio shows the relationship between your assets, or how much you own, and your liabilities, or how much you owe. Your assets minus your liabilities equals your net worth. If your debt ratio is a fraction below 1.0, then your assets are larger than your debt, leaving you solvent with positive net worth. If your debt ratio is larger than 1.0, then your debt is greater than your assets, leaving you insolvent with negative net worth.

Diff: 3

Topic: Ratios

AACSB: Analytical Thinking

35) A financial ratio by itself is of little value. To what can you compare your financial ratios to make them valuable financial planning tools?

Answer: Financial ratios can be compared to historical ratios, projected or budgeted ratios, expert advice, or industry averages. If I knew my savings ratio for 2013 was 6 percent and my savings ratio for 2015 is 8 percent, then I know I have made an improvement in freeing up cash for savings and investment. If I budgeted my savings ratio for 2015 to be 10 percent and it is currently running at 8 percent, then I know I am not on track to meet my budgeted goals for the year. I can then analyze my income and expenditures to see why I am not on track to meet my goals, or possibly my goals were not realistic based on current conditions. If my savings ratio is currently 8 percent and the experts say that the ideal or average savings ratio should be 15 percent, then I can measure how well I'm doing compared to these benchmarks and adjust accordingly.

6) According to the Keown book, what are the three primary reasons for maintaining financial records?

Answer: First, without adequate records, it is extremely difficult to prepare taxes. Second, a strong record-keeping system allows you to track expenses in order to know exactly how much you're spending and where you're spending it. Without that knowledge, you will not have control over your finances. Third, organized record-keeping makes it easier for someone else to step in during an emergency and understand your financial situation.

12) Explain the steps in developing a cash budget.

Answer: First, determine your anticipated income by referring to last year's adjusted income. Next, estimate your level of taxes to determine after-tax income available for living expenses. Add fixed and variable expense estimates together to determine your level of spending. Last, subtract living expenditures from expected take-home pay to calculate income available for savings and investment.

13) Describe how to implement the "envelope" budgeting system.

Answer: For those new to budgeting or those with small amounts of self-discipline, the envelope system is useful. Use a separate envelope for each major monthly expense, including one for miscellaneous, and label each with the expense name. From the appropriate paycheck or source of income, allocate the proper amount of money for each envelope. Use the money in each envelope only for its intended use, and you should have enough to go around. As soon as possible, add an envelope for savings and emergencies.

14) What are some benefits of using a mobile app coupled with a Web-based personal financial planning website? Which two websites/apps are highly recommended by the author?

Answer: Many personal financial planning apps and websites allow you to keep an eye on your financial moves. Several allow you to simultaneously track all bank accounts, credit cards, retirement accounts, investments, and loans. Mint.com, a free app and website, is one such tool. It also allows you to create a budget based on your actual spending and helps you plan for your financial goals. Another example is Levelmoney.com. Free, simple, and effective, Level Money works like a gas gauge, monitoring your spending and keeping you from getting into financial trouble. Both Mint.com and Levelmoney.com are highly recommended by the author.

6) What are the four choices in managing your financial affairs?

Answer: The most simple approach is to manage your finances yourself. A second choice is to jointly plan your finances with a professional planner. A third choice is to let a professional planner compile the entire plan together for you. If you develop your own plan, you might want a professional planner to validate what you have done.

7) Prepare a list of questions to ask a prospective financial planner you are considering.

Answer:

1. How long have you been a financial planner?
2. What are your credentials and professional designations?
3. Do you actively participate in continuing education to keep up with the times?
4. How do you keep up with the latest financial changes?
5. Will you provide us with references?
6. Will you let me see a copy of a financial plan you created for someone else in similar circumstances?
7. Who will work with you on my plan? Will the work be done by a junior staffer or a computer program?
9. Are you paid through fees, commissions, or a combination? What are your fees and commissions, how often are you paid, and how will your fees and commissions be calculated?
10. Will you provide a written estimate of the services I expect and the cost of those services?

8) List the benefits a professional financial planner can offer.

Answer: A financial planner has the knowledge and skills to teach you the financial axioms.

From an objective point of view, the pro will be able to help you prepare balance sheets, income statements, budgets, and financial ratios, as well as savings, investment, and retirement plans that are realistic. A financial planner can save you time and costly mistakes. He or she may suggest a computer software program to meet your individual needs, as well as give tax advice.

Diff: 2

Topic: Professional Financial Planners

AACSB: Reflective Thinking

9) The experts say that, stereotypically, a fee-only financial planner is a better option than one who earns commissions on what he or she sells you. Why is this sometimes true?

Answer: Because of the agency relationship and self-interested behavior, a commission-earning financial planner may be more interested in the commissions he or she will earn versus what is best for your personal needs. There is the potential for the planner to recommend financial products that pay higher commissions, when these products may not be best suited to your individual needs, or when there may be less expensive options available. A fee-only planner has no such incentive, since the fees are not contingent on your financial decisions. The fee-only planner knows that he or she must do a good job or you will not continue to utilize their services or refer new business to them.
